

COURSE NOTES
FOR
HIGH PERFORMANCE
IMAGE GENERATION SYSTEMS

Presented at
ACM SIGGRAPH '85
12th Annual Conference on
Computer Graphics & Interactive Techniques
Technical Courses
San Francisco, CA
July 1985

Course Chair Roy Latham
Link Flight Simulation Division,
The Singer Company
1077 East Arques Avenue
Sunnyvale, CA 94088-3484
(415) 720-5633

CONTENTS

1. What is "High Performance" in Computer Graphics Systems
Roy Latham (8 p.)
2. Overview of Computer Image Generation in Visual Simulation
Peter K. Doenges (vi + 78p.)
3. Data Bases and Scene Management for Real Time Computer Gen-
erated Imagery
Glenn Davis (13 p.)
4. The Design of Flight Simulation Visual System Data Bases
Roy W. Latham (14 p.)
5. (Reprinted from 4th Interservice/Industry Training Equipment
Conference) Enhancing the computer Generated Illusion
Neal L. Mayer and Michael A. Cosman (22 p.)
6. (Reprinted from 6th Intersevice/Industry Training Equipment
Conference) Selective Scene Management in Flight Simulator
Visual Systems
Jack W. Newhard and Michael R. Nicol (21 p.)
7. (Reprinted from the 5th Interservice/Industry Training
Equipment Conference) Image Generator Architectures and
Features
Roy W. Latham (8 p.)
8. Texture Generation in Real Time Computer-Generated Imagery
Johnson K. Yan (23 p.)
9. Displays for Simulators
David L. Peters (67 p.)
