

# Contents

<b>1. Introduction</b> .....	<b>1</b>
<b>1.1. General References</b> .....	<b>2</b>
<b>2. Preliminaries</b> .....	<b>3</b>
<b>3. Hermite and Cubic Spline Interpolation</b> .....	<b>6</b>
<b>3.1. Practical Considerations - Computing Natural Cubic Splines</b> .....	<b>8</b>
<b>3.2. Other End Conditions For Cubic Interpolating Splines</b> .....	<b>9</b>
<b>3.3. Knot Spacing</b> .....	<b>11</b>
<b>3.4. Closed Curves</b> .....	<b>11</b>
<b>4. A Simple Approximation Technique — Uniform Cubic B-splines</b> .....	<b>13</b>
<b>4.1. The Convex Hull Property</b> .....	<b>22</b>
<b>4.2. Translation Invariance</b> .....	<b>24</b>
<b>4.3. Rotation and Scaling Invariance</b> .....	<b>24</b>
<b>4.4. The Perspective Transformation</b> .....	<b>24</b>
<b>4.5. End Conditions for Curves</b> .....	<b>25</b>
<b>4.5.1. Curvature</b> .....	<b>25</b>
<b>4.5.2. No End Conditions</b> .....	<b>26</b>
<b>4.5.3. Double Vertices</b> .....	<b>27</b>
<b>4.5.4. Triple Vertices</b> .....	<b>28</b>
<b>4.5.5. Multiple Interior Vertices</b> .....	<b>29</b>
<b>4.5.6. Collinear Vertices</b> .....	<b>30</b>
<b>4.5.7. Phantom Vertices: Position Specification</b> .....	<b>30</b>
<b>4.5.8. Phantom Vertices: End Vertex Interpolation</b> .....	<b>31</b>
<b>4.5.9. Phantom Vertices: Fixing Derivative Vectors</b> .....	<b>32</b>
<b>4.5.10. End Conditions: Closed Curves</b> .....	<b>32</b>
<b>4.6. Uniform Bicubic B-Spline Surfaces</b> .....	<b>32</b>
<b>4.7. Boundary Conditions for Surfaces</b> .....	<b>34</b>
<b>4.7.1. Multiple Vertices</b> .....	<b>35</b>
<b>4.7.2. Periodic Surfaces</b> .....	<b>39</b>
<b>5. Interlude</b> .....	<b>42</b>
<b>6. Splines in a More General Setting</b> .....	<b>43</b>
<b>6.1. Preliminaries</b> .....	<b>43</b>
<b>6.2. Polynomials</b> .....	<b>45</b>
<b>6.3. Vector Spaces</b> .....	<b>46</b>
<b>6.4. Polynomials as a Vector Space</b> .....	<b>47</b>
<b>6.5. Bases and Dimension</b> .....	<b>49</b>
<b>6.6. Change of Basis</b> .....	<b>50</b>
<b>6.7. An Alternative Polynomial Basis</b> .....	<b>53</b>
<b>6.8. Subspaces</b> .....	<b>56</b>
<b>6.9. Knots and Parameter Ranges: Splines as a Vector Space</b> .....	<b>57</b>

6.10. Spline Continuity and Multiple Knots .....	60
7. The One-Sided Basis .....	70
7.1. The One-sided Cubic .....	70
7.2. The General Case .....	73
7.3. One-sided Power Functions .....	77
7.4. The One-sided Basis .....	78
7.5. Linear Combinations and Cancellation .....	82
7.6. Cancellation as a Divided Difference .....	84
7.7. Cancelling the Quadratic Term — The Second Difference .....	86
7.8. Cancelling the Linear Term — The Third Difference .....	89
7.9. The Uniform Cubic B-spline — A Fourth Difference .....	91
8. Divided Differences .....	95
8.1. Differentiation and One-sided Power Functions .....	95
8.2. Divided Differences in a General Setting .....	99
8.3. Algebraic and Analytic Properties .....	102
9. General B-splines .....	104
9.1. A Simple Example — Step Function B-splines .....	105
9.2. Linear B-splines .....	111
9.3. General B-spline Bases .....	115
9.4. Examples — Quadratic B-splines .....	116
9.5. The Visual Effect of Knot Multiplicities — Cubic B-splines .....	119
9.6. Altering Knot Spacing — More Cubic B-splines .....	127
10. B-Spline Properties .....	129
10.1. Differencing Products — The Leibnitz Rule .....	129
10.2. Establishing a Recurrence .....	134
10.3. The Recurrence and Examples .....	136
10.4. Evaluating B-splines Through Recurrence .....	139
10.5. Compact Support, Positivity, and the Convex Hull Property .....	140
10.6. Practical Implications .....	144
10.6.1. B-splines of Different Order .....	144
10.6.2. Multiple Knots .....	146
10.6.3. Collinear Control Vertices .....	147
10.6.4. Multiple Vertices .....	148
10.6.5. End Conditions .....	148
11. Bézier Curves .....	149
11.1. Increasing the Degree of a Bézier Curve .....	150
11.2. Composite Bézier Curves .....	151
11.3. Local versus Global Control .....	152
11.4. Subdivision of Bézier Curves .....	152
11.5. Bézier Curves From B-splines .....	156
11.6. A Matrix Formulation .....	160
11.7. Converting Between Representations .....	161

11.8. Bézier Surfaces .....	163
12. Preliminaries Regarding Knot Refinement .....	164
12.1. Knots and Vertices .....	164
12.2. A Representation Result .....	169
13. The Oslo Algorithm .....	174
13.1. Discrete B-spline Recurrence .....	174
13.2. Discrete B-spline properties .....	179
13.3. Control-vertex Recurrence .....	192
13.4. Illustrations .....	193
14. Rendering and Evaluation .....	199
14.1. Derivatives of B-splines .....	199
14.2. B-Spline Evaluation .....	203
14.3. Conversion to Segment Polynomials .....	206
14.4. Rendering Curves: HornerMs Rule & Forward Differencing .....	207
14.5. Partial Derivatives and Normals .....	213
14.6. Locality .....	213
14.7. Scan-line Methods .....	214
14.8. Ray-Tracing Cubic B-spline Surfaces .....	215
14.8.1. Refinement Preprocessing .....	215
14.8.2. Tree Construction .....	216
14.8.3. Intersection Processing .....	217
14.8.4. The Newton Iteration .....	218
15. A Retrospective and Selected Applications .....	220
15.1. The Hermite Basis and $C^1$ Key-Frame Inbetweening .....	222
15.2. A Cardinal-Spline Basis for Interpolation .....	232
15.3. Interpolation Using B-Splines .....	234
15.4. Catmull-Rom Splines .....	238
15.5. Representing Powers and One-Sided Powers by B-Splines .....	240
15.5.1. MarsdenMs Lemma .....	242
15.5.2. Discrete B-splines .....	254
15.5.3. The Discrete B-Spline Recurrence Again .....	259
15.6. B-Splines and Least-Squares Fitting .....	263
16. Interlude .....	268
17. Parametric vs. Geometric Continuity .....	269
17.1. Geometric Continuity .....	269
17.2. First Derivative Continuity .....	270
17.3. Second Derivative Continuity .....	271
18. Uniformly-Shaped Beta-splines .....	275
18.1. Uniformly-shaped Beta-spline Surfaces .....	282

<b>19. Continuously-Shaped Beta-splines</b> .....	<b>284</b>
<b>19.1. Locality</b> .....	<b>286</b>
<b>19.2. Bias</b> .....	<b>287</b>
<b>19.3. Tension</b> .....	<b>287</b>
<b>19.4. Convex Hull</b> .....	<b>289</b>
<b>19.5. End Conditions</b> .....	<b>290</b>
<b>19.6. Evaluation</b> .....	<b>293</b>
<b>19.7. Continuously-Shaped Beta-spline Surfaces</b> .....	<b>295</b>
<b>20. Discretely-Shaped Beta-splines</b> .....	<b>299</b>
<b>20.1. A Truncated Power Basis for the Beta-splines</b> .....	<b>299</b>
<b>20.2. A Local Basis for the Beta-splines</b> .....	<b>302</b>
<b>20.3. Evaluation</b> .....	<b>306</b>
<b>20.4. Properties</b> .....	<b>307</b>
<b>20.5. Locality</b> .....	<b>307</b>
<b>20.6. Uniform Cubic Discretely-Shaped Beta-splines</b> .....	<b>308</b>
<b>20.7. Examples</b> .....	<b>311</b>
<b>21. Acknowledgments</b> .....	<b>319</b>
<b>22. References</b> .....	<b>320</b>
