

Table of contents

Section I – Course overview

Table of Contents	I-2
Course Description	I-6

Section II – Fundamentals

History	II-2
Basic Display Technologies	II-4
Storage Tube	II-5
Vector Refresh	II-5
Raster Scan	II-6
Some Basic Concepts	II-7
The Pixel	II-7
Colors	II-7
LUT (look up table)	II-8
True Color / Pseudo Color	II-8
2D and 3D Coordinate Spaces	II-9
2D Drawing Fundamentals	II-11
Drawing Primitives	II-11
Transformations	II-12
Who Uses Graphics and Where – The Current Market	II-14
The Market – Not Simple to Define	II-14
A Sample Market Segmentation	II-14

Section III – Modeling

Outline of Talk	III-2
Reprint of <i>Three-Dimensional Representations for Computer Graphics and Computer Vision</i>	III-9
Glossary on Modeling and Rendering	III-17

Section IV – Rendering

What is Rendering	IV-2
-------------------------	------

Viewing Geometry	IV-2
Flat Projection	IV-2
Perspective Projection	IV-2
Common Methods of Rendering	IV-3
Wire Frame	IV-3
Depth Buffer (or Z Buffer)	IV-7
Ray Tracing	IV-9
Color Determination	IV-13
Direct Evaluation (The Phong Model)	IV-13
Color Interpolation	IV-18
Flat Shading	IV-18
Bi-Linear (Gouraud) Shading	IV-19
Phong Shading	IV-19
Mach Bands	IV-21
Compositing	IV-21
Overlay Where Not Zero	IV-22
Alpha Buffer	IV-22
Chroma-keying	IV-22
Aliasing	IV-23
Very Brief Theoretical Background	IV-23
How to Keep the Jaggies out of Your Image	IV-24
Temporal Anti-Aliasing	IV-24
Dithering	IV-25
Data Requirements for an Image	IV-26
Run Length Encoding	IV-27

Section V – User Issues

Outline of Talk	V-2
Material from Presentation	V-4
Slides from Presentation	V-4
Computer Graphics Environment	V-14
Computer Graphics System Block Diagram	V-15
Computer Graphics Configurations	V-16
Color Considerations	V-17
Reprint of <i>Engineering Workstations – An Overview</i>	V-19

Computer Graphics Software Model	V-31
Dumb / Smart / Intelligent Workstations	V-32
Centralized Versus Distributed Computing Power	V-33
How Networks are Built	V-34
Impact on Central Computing with the Growth of Intelligent Workstations	V-35
Improved Individual Productivity	V-36
Summary of ASW Tactical Display	V-37
Reprint of <i>The Role of Computer Graphics in CAD/CAM</i>	V-39
Lists of Representative Vendors	V-55
Computer-Aided Design and Drafting Systems	V-56
Interactive Graphics Displays	V-71
Computer Graphics I/O Devices	V-83
Software	V-97
Digital Paint Systems	V-107
Workstations	V-113
Automatic Digitizers	V-119
Personal Computer CAD/CAM	V-123
Technical Publishing Systems	V-131
Graphics Oriented PC Add-on Boards	V-133
Picture Co-Processors	V-137
Graphics Arts Systems	V-141

Section VI – Watching Demos

Section VII – Where to go for More Information

Reference Index	VII-2
Bibliography	VII-29
Reprint of <i>Background and Source Information About Computer Graphics</i>	VII-35
