

# INTRODUCTION TO WINDOW MANAGEMENT

## COURSE # 11

### CHAIR:

**Jonathan Steinhart**  
*Indepedent Consultant*

### SPEAKERS:

**Mark Callow**  
*Silicon Graphics, Inc.*

**David LaVallee**  
*Sun Microsystems, Inc.*

**Richard Greco**  
*Tektronix, Inc.*

ACM SIGGRAPH / 89

*Boston, Massachusetts*  
*31 July - 4 August 1989*

## CONTENTS

<b>Chapter 1 - Introduction</b> .....	<b>1</b>
1.1 Introduction .....	1
1.2 Prerequisites .....	1
1.4 History .....	1
1.5 Note .....	1
1.6 Trademarks .....	1
<b>Chapter 2 - Window Management "Operating" Systems</b> .....	<b>3</b>
2.1 Introduction .....	3
2.2 The External View of Window Management .....	3
2.3 The Application Program Interface .....	4
2.4 Kernel Topics .....	6
2.4.1 Device Drivers .....	6
2.4.2 The Area Management Unit .....	8
2.4.3 The Input Management Unit .....	10
2.4.4 Task Scheduling .....	11
2.4.5 The Control Store .....	12
2.5 User Topics .....	13
2.5.1 Toolkits .....	13
2.5.2 Window Managers .....	14
2.5.3 Virtual Terminals .....	14
2.5.4 Application Programs .....	15
2.6 Conclusions .....	15
<b>Chapter 3 - Considerations in Selecting an Application Program Interface</b> .....	<b>17</b>
3.1 Introduction .....	17
3.2 Choice of Transport Mechanism .....	17
3.3 Application Portability .....	18
3.3.1 Application Portability through Enumeration .....	18
3.3.2 Application Portability through Device Independence .....	19
3.3.3 Input Considerations for Application Portability .....	19
3.4 Output Considerations .....	20
3.4.1 Categories of Output .....	20
3.4.2 Level of Output Functions .....	20
3.5 Input Considerations .....	21
3.5.1 Categories of Input .....	22
3.5.2 Input Feedback .....	22
3.5.2.1 A Menu Using 2-Dimensional Objects .....	23
3.5.2.2 A Menu Using a Single Window .....	24
3.5.2.3 A Menu Using Multiple Windows .....	25
3.5.2.4 A Menu Using Programmable Input Devices .....	26
3.6 Policy Considerations at the Application Program Interface .....	27
3.6.1 Loosely Coupled Policy Makers .....	27
3.6.2 Tightly Coupled Policy Makers .....	28
3.7 Process Model Considerations .....	28
3.7.1 Single Processor Environments .....	28
3.7.2 Multi-Processor Environments .....	29
3.8 Conclusions .....	29
<b>Chapter 4 - Area Management</b> .....	<b>31</b>
4.1 Introduction .....	31
4.2 Policy versus Mechanism .....	31

4.2.1 Tiled Windows	31
4.2.2 Overlapping Windows	31
4.2.3 Hierarchical Overlapping Windows	32
4.3 Coordinate Systems	32
4.4 Rectangular Area Management	33
4.4.1 Intersection Calculation	34
4.5 Batching	35
4.6 Hierarchical Area Management	35
4.7 Non-Rectangular Area Management	35
4.7.1 Quadtrees	36
4.7.2 Y-Sorted Rectangle Lists	36
4.7.3 Y-Sorted Lists of X-Sorted Rectangles	36
4.7.4 An Implementation of Non-Rectangular Windows	37
4.7.4.1 Shape Algebra	37
4.7.4.1.1 Data Structures	37
4.7.4.1.2 Union, Difference, Intersection	38
4.7.4.1.3 Utility Functions	39
4.7.4.2 Area Management	40
4.7.4.2.1 Data Structures	40
4.7.4.2.2 Create Window	41
4.7.4.2.3 Locate Window	41
4.7.4.2.4 Install Window	41
4.7.4.2.5 Uninstall Window	42
4.7.4.2.6 Delete Window	42
4.7.4.2.7 Process Hierarchy	42
4.8 Transparent Windows	43
4.9 Other Topics	43
4.9.1 Area Based Input Distribution	43
4.9.2 Area Management Hardware	44
4.9.3 Distributed Graphics	44
4.10 Conclusions	44
<b>Chapter 5 - Device Drivers for Monochrome Frame Buffers</b>	<b>45</b>
5.1 Architecture of a Monochrome Frame Buffer	45
5.2 Characteristics of a Frame Buffer	45
5.3 Simple Graphics in a Frame Buffer	45
5.3.1 Scan Converting Lines	46
5.3.2 Special Requirements	46
5.4 Mathematical Clipping	47
5.5 Scissoring to a Single Rectangle	47
5.6 Scissoring to Multiple Rectangles	48
5.7 Scan Converting Occluded Areas	49
5.8 Clipping to Arbitrary Regions	49
5.9 Drawing Using Shape Algebra	51
5.10 Damage from Raster Operations	53
5.11 Drawing Cursors	53
5.12 Conclusions	53
<b>Chapter 6 - Device Drivers for Frame Buffers with Color Maps or Gamma Correctors</b>	<b>55</b>
6.1 Architecture of a Color Frame Buffer	55
6.1.1 Changes to Frame Buffer Organization	55
6.1.2 Changes to the Video Display System	55
6.1.2.1 What is a Color Map	56

6.1.2.2 What is a Gamma Corrector .....	56
6.2 Dynamic Versus Static Attributes .....	56
6.2.1 Private Copies .....	56
6.2.2 Sharing One Physical Color Map .....	57
6.2.3 Color Maps in the X Window System™ .....	57
6.2.4 Fixed Color Map Entries/Dithering .....	57
6.3 Cursors .....	58
6.4 Conclusions .....	58
<b>Chapter 7 - Device Drivers for Graphics Processors .....</b>	<b>59</b>
7.1 Introduction and Overview .....	59
7.2 Using a Graphics Processor Chip .....	59
7.3 Context Management .....	59
7.4 Clipping .....	61
7.5 Hardware Cursors .....	62
7.6 Ideal Graphics Processor .....	62
7.7 3-D Processors .....	63
7.8 Related Issues .....	63
7.8.1 Display Modes .....	63
7.8.2 Double Buffering .....	63
7.8.3 Overlay Planes .....	64
<b>Chapter 8 - Device Drivers for Video Mixer Devices .....</b>	<b>65</b>
8.1 Introduction .....	65
8.2 Characteristics of a Video Mixer .....	65
8.3 Graphics in a Video Mixer Architecture .....	65
8.4 Limitations of a Video Mixer Architecture .....	65
8.4.1 Cost .....	66
8.4.2 Physical Memory Usage .....	66
8.4.3 Other Approaches are Catching Up .....	66
8.5 Drawing Cursors Using Video Mixers .....	66
8.6 Conclusions .....	66
<b>Chapter 9 - Input .....</b>	<b>67</b>
9.1 Introduction .....	67
9.2 What Is Input? .....	67
9.3 Input Generation .....	67
9.3.1 Timers and Time Stamps .....	67
9.3.2 Input Event Ordering .....	68
9.3.3 Input Events .....	68
9.4 Input Distribution .....	69
9.4.1 Real-Estate Based Input Distribution .....	69
9.4.2 Listener Based Input Distribution .....	69
9.5 Application Based Input Distribution .....	69
9.5.1 Race Conditions .....	70
9.5.2 Performance .....	71
9.5.3 Improved Application-Based Distribution .....	71
9.5.3.1 A Sample Programmable Policy Engine .....	71
9.5.3.1.1 Event Masks .....	72
9.5.3.1.2 Event Duplication .....	72
9.5.3.1.3 The Window Search Path .....	72
9.5.3.1.4 Traps .....	74
9.6 X Windows Input Distribution .....	74
9.7 NeWS™ Input Distribution .....	74

9.8 A More Detailed Look At Input .....	75
9.8.1 Synthetic Input .....	75
9.8.2 Window Manager .....	75
9.8.3 Keyboard Focus .....	76
9.8.4 Input Compression .....	76
9.9 Implementation Details .....	76
9.9.1 Event Masks and Traps .....	76
9.9.2 The Pointer Window .....	77
9.9.3 Distribution .....	77
9.10 Conclusions .....	77
<b>Chapter 10 - Task Management and Scheduling .....</b>	<b>79</b>
10.1 Introduction .....	79
10.2 Scheduling Algorithms .....	79
10.3 Task Context .....	79
10.3.1 Heavyweight and Lightweight Tasks .....	79
10.3.2 Critical Regions .....	80
10.3.3 Round-Robin Scheduling .....	80
10.3.4 Priority-Based Scheduling .....	80
10.3.5 Preemptive Scheduling .....	81
10.4 Task Classification .....	81
10.5 Thread Scheduling .....	81
10.6 Process Scheduling .....	82
10.7 Scheduling in X and NeWS™ .....	82
10.8 Multiprocessing Considerations .....	82
10.9 Conclusions .....	83
<b>Chapter 11 - The Control Store .....</b>	<b>85</b>
10.1 Introduction .....	85
10.2 Writable Control Store Systems .....	85
10.2.1 The Blit .....	85
10.2.2 NeWS™ .....	85
10.3 Writable Control Store Uses .....	85
10.3.1 Application-Specific Interface Tailoring .....	85
10.3.2 Downloadable Policy .....	85
10.3.3 User Interface Support .....	85
10.4 Conclusion .....	86
<b>Chapter 12 - User Space Overview .....</b>	<b>87</b>
12.1 Introduction .....	87
12.2 Job Control Programs .....	87
12.3 Programmer Toolkits .....	88
12.4 Libraries .....	89
12.5 Compatibility Packages .....	90
12.6 User Interface Standards .....	90
12.7 User Toolkits .....	90
12.8 Conclusions .....	90
<b>Chapter 13 - Job Control Programs or Window Managers .....</b>	<b>91</b>
13.1 What does a Window Manager Do? .....	91
13.2 What does it need to do it? .....	91
13.3 What is the Impact on the API? .....	91
13.4 What is the Impact on Applications .....	91
13.5 Session Managers .....	91

13.6 Summary .....	92
<b>Chapter 14 - Toolkits .....</b>	<b>93</b>
14.1 Introduction .....	93
14.2 What is a Toolkit? .....	93
14.3 Toolkit Components .....	93
14.3.1 Panes .....	93
14.3.2 A Button .....	93
14.3.3 A Slider .....	94
14.4 Adding the Look .....	94
14.5 Building a new gadget .....	95
14.6 Input .....	95
14.7 Toolkit Interfaces .....	95
14.8 Packaging the Gadgets .....	95
14.9 Selections .....	95
14.10 User Interface Management Systems .....	96
14.11 Conclusion .....	96
<b>Chapter 15 - Object Oriented Programming for Toolkits .....</b>	<b>97</b>
15.1 The Problem of Programming .....	97
15.2 An Objective Solution .....	97
15.3 Building an Object-Oriented House .....	97
15.4 Applying the Paradigm to Window Programming .....	98
15.5 Conclusion .....	99
<b>Chapter 16 - User Interface Standards .....</b>	<b>101</b>
16.1 The Desire for UI Standards .....	101
16.2 The Scope of the Standards .....	101
16.3 Quantum Effects of Standards .....	101
16.4 Components: Look and Feel Dissected .....	102
16.4.1 Philosophy .....	102
16.4.2 Containers .....	103
16.4.3 Controls .....	103
16.4.4 Interactions .....	103
16.5 Visual Surveys .....	104
16.6 Macintosh Human Interface Guidelines .....	104
16.6.1 Philosophy .....	104
16.6.2 Containers .....	104
16.6.3 Controls .....	105
16.6.4 Interactions .....	105
16.7 OPENLOOK .....	105
16.7.1 Philosophy .....	105
16.7.2 Containers .....	105
16.7.3 Controls .....	106
16.7.4 Interactions .....	106
16.8 That's Not All .....	106
<b>Chapter 17 - Survey of Current Toolkits .....</b>	<b>107</b>
17.1 Introduction .....	107
17.2 Xtk .....	107
17.3 SunView/XView .....	107
17.4 MacApp .....	107
17.5 Andrew .....	107
17.6 InterViews .....	107

17.7 TNT	108
17.8 Motif	108
17.9 OpenLook	108
17.10 Conclusion	108
<b>Chapter 18 - User Toolkits</b>	<b>109</b>
18.1 Window System Components for Users	109
18.2 Relationship of Application to Data	109
18.3 What Constitutes the Common Set	109
18.3.1 Current Limitations	109
18.4 A Tool to Create Tools	109
<b>Chapter 19 - Writing Applications for Window Managed Systems</b>	<b>111</b>
19.1 The Nature of Window Applications	111
19.2 Traditional Interactive Programs	111
19.3 Window Programs	111
19.4 Controller-Model-View Abstraction	111
19.4.1 Model	111
19.4.2 View	112
19.4.3 Controller	112
19.5 Pitfalls of Window Programming	112
19.6 Applications in a Light Weight World	112
19.7 Applications in a Multiprocessing World	112
19.8 Conclusion	112
<b>Chapter 20 - Survey of Window Systems</b>	<b>115</b>
20.1 Introduction	115
20.2 Smalltalk	115
20.3 DLisp	115
20.4 Tajo, Docs, Star, Viewers	115
20.5 NU	116
20.6 Oriel	116
20.7 SunView™	116
20.8 Andrew™	117
20.9 The Macintosh™	117
20.10 The W Window System	118
20.11 VGTS	118
20.12 The X Window System™	119
20.13 NeWS™	120
<b>Chapter 21 - Conclusions</b>	<b>123</b>
21.1 Introduction	123
21.2 Operating System Support	123
21.3 Networking	123
21.4 Creeping Features	123
21.5 User Interface	123
21.6 Input Device Support	124
21.7 Graphics Hardware Advances	124
21.8 Standards	124
21.9 Blind Alleys	124
<b>Bibliography</b>	<b>127</b>
<b>Appendix A - Course Slides</b>	<b>133</b>

A.1 Slides for Chapter 1 .....	133
A.2 Slides for Chapter 2 .....	137
A.3 Slides for Chapter 3 .....	145
A.4 Slides for Chapter 4 .....	151
A.5 Slides for Chapter 5 .....	165
A.6 Slides for Chapter 6 .....	175
A.7 Slides for Chapter 7 .....	181
A.9 Slides for Chapter 9 .....	189
A.10 Slides for Chapter 10 .....	199
A.12 Slides for Chapter 12 .....	203
A.13 Slides for Chapter 13 .....	209
A.14 Slides for Chapter 14 .....	213
A.15 Slides for Chapter 15 .....	219
A.16 Slides for Chapter 16 .....	229
A.17 Slides for Chapter 17 .....	239
A.18 Slides for Chapter 18 .....	245
A.19 Slides for Chapter 19 .....	249
A.21 Slides for Chapter 21 .....	253
<b>Appendix B - Related Papers .....</b>	<b>258</b>
<b>B.1 PIX, the latest NeWS, Wm Leler, Cogent Research .....</b>	<b>258</b>
