

**CONTEMPORARY APPROACHES TO  
GEOMETRY FOR COMPUTER GRAPHICS &  
COMPUTER-AIDED DESIGN**

**COURSE # 14**

**CHAIR:**

***Ron Goldman***  
*University of Waterloo*

**SPEAKERS:**

***Tony DeRose***  
*University of Washington*

***Tom Sederberg***  
*Brigham Young University*

***Brian Barsky***  
*University of California*

ACM SIGGRAPH **89**

*Boston, Massachusetts*  
*31 July - 4 August 1989*

## TABLE OF CONTENTS

| PAGE    | CONTENTS  | SPEAKER       |
|---------|---|---------------|
| 1-1     | Slides  | Tony DeRose   |
| 1-19    | Papers<br><i>Geometric Programming</i>  |               |
| 2-1     | Slides  | Ron Goldman   |
| 2-14    | Papers<br><i>Recursive Curves and Surfaces</i>  |               |
| 2-149   | <i>What is the Natural Generalization of a Bezier Curve?</i>  |               |
| 2-201   | <i>Recursive Polynomial Curve Schemes and Computer-Aided Geometric Design</i>                                 |               |
| 2-255   | <i>B-Splines, Polya Curves and Duality</i>  |               |
| 3-1     | Slides  | Brian Barsky  |
| 3-19    | Papers<br><i>Geometric Continuity</i>   |               |
| 3-47    | <i>Basic Results on B-Continuous Functions</i><br>"B-CONTINUITY AND ITS APPLICATION TO RATIONAL BETA-SPLINES" |               |
| 3-67    | <i>Introducing the Rational Beta-Spline</i>   |               |
| 3-78    | <i>Rational Continuity</i>  |               |
| 3-100   | <i>Geometric Continuity, Shape Parameters, and Geometric Constructions for Catmull-Rom Splines</i>            |               |
| Page 1  | Papers<br><i>Cubic Surfaces</i>   | Tom Sederberg |
| Page 56 | <i>PAC Parametrization</i>  |               |
| Page 77 | <i>PAC Intersection</i>   |               |
