

Course Syllabus

1. Introduction (Goshtasby, 10 min)	1
2. Transformation Functions (Goshtasby, 30 min)	8
3. Image Warping (Wolberg, 10 min)	20
4. Image Morphing (Wolberg, 30 min)	33
5. The Correspondence Problem (Szeliski, 20 min)	42
6. Image Registration (Szeliski, 20 min)	62
7. Correcting Image Distortions (Goshtasby, 10 min)	74
8. Fusion of Volumetric Images (Goshtasby, 15 min)	79
9. Robust Log-Polar Registration (Wolberg, 25 min)	89
10. Video Sequence Interpolation (Szeliski, 15 min)	96
11. Image-Based Rendering (Szeliski, 15 min)	99
12. Summary and Conclusions (Goshtasby, 10 min)	110

Table of Contents

1. Introduction.....	1
2. Transformation Functions.....	8
3. Image Warping.....	20
4. Image Morphing	33
5. The Correspondence Problem.....	42
6. Image Registration.....	62
7. Correcting Image Distortions.....	74
8. Fusion of Volumetric Images.....	79
9. Robust Log-Polar Registration	89
10. Video Sequence Interpolation.....	96
11. Image-Based Rendering.....	99
12. Summary and Conclusions.....	110
Appendix 1: Transformation Functions	
Appendix 2: Correcting the Color and Geometry of Images	
Appendix 3: Image Metamorphosis with Scattered Feature Constraints	
Appendix 4: Image Morphing: A Survey	

To obtain sample demonstration programs on image warping and image registration, please visit : <http://www.cs.wright.edu/~agoshtas/sig99course2software.html>
