

# Sketch-to-Art: Synthesizing Stylized Art Images From Hand-drawn Sketches With No Semantic Labeling

## Event Type

Real-Time Live!

## Interest Areas

Gaming & Interactive New Technologies

## Description

Sketch-to-Art is an AI tool that allows creatives to sketch an idea and get fully rendered images, stylized the way they want in real time. Users can define a style by either choosing a reference image, or a group of images, and selecting an artist, or an art movement.
