COURSES

1. Introduction to Computer Graphics	27
2. Introduction to Color Raster Graphics	28
3. Color Perception	29
4. How to Design Computer-User Interfaces	30
5. Advanced Topics—Human Factors in Computer Graphics Systems	31
6. Implementing GKS—Architecture and Algorithms	32
7. An Introduction to PHIGS: The Programmer's Hierarchical Interactive Graphics Standard	33
8. How to Evaluate and Shop For Computer Graphics Hardware	34
9. Introduction to Computer Animation	35
10. Advanced Computer Animation	36
11. State of the Art in Image Synthesis	37
12. Image Rendering Tricks	38
13. True Three-Dimensional Display Technology and Techniques for Computer Generated Images	39
14. High Performance Image Generation Systems	40
15. Fractals: Basic Concepts, Computation and Rendering	41
16. Geometry for Computer Graphics and Computer Aided Design	42
17. The Use of B-Splines and Beta-Splines to Model Freeform Curves and Surfaces	43
18. Introduction to Solid Modeling	44
19. Advanced Topics in Solid Modeling	45
20. VLSI for Computer Graphics	46
21. Computer Graphics for Designers and Artists	47
22. Today's Problemsolvers: Graphics Workstations	48
23. Aesthetic Issues in Computer Graphic Art for Mass Media	49
24. Computer Animation Using Video Techniques	50

25. Quadtrees, Octrees and Related Hierarchical Data Structures	51
26. Introduction to Image Processing	52
27. Building Scientific and Engineering Graphics Applications	53

CONFERENCE EVENTS

TECHNICAL PROGRAM AND PANELS

The technical program and panels are held concurrently Wednesday through Friday. Thirty-five formally refereed papers are presented during 11 technical program sessions. Eleven panel sessions explore current topics and issues in the computer graphics field.

This year, the emphasis for papers is on original research results. The SIGGRAPH '85 technical program committee received 175 submissions, representing an approximate 50 percent increase over previous years. After a thorough review process, the best papers have been chosen for presentation in the technical program and for publication in the conference proceedings (*COMPUTER GRAPHICS*, Vol. 19, No. 3). Additional copies of the proceedings are available for sale.

Panels complement the formal technical papers and course offerings by providing opportunities for lively exchange about trends and emerging developments in the field of computer graphics. Panels facilitate the discussion of material not yet in publishable form, ongoing research and controversial topics.

The technical program and panels are held at the Moscone Convention Center. Papers are presented in Hall A. The panels are held in combined Halls F, G and H.

Each technical program and panels registrant is entitled to one copy of the SIGGRAPH '85 proceedings, the art show catalog and the film and video show catalog, in addition to admission to all technical paper sessions and panels, the exhibition and the art show.

Technical program and panels attendees also receive a ticket to one night of the film and video show. Please note that the Tuesday and Wednesday evening film and video shows are identical this year. Tickets for the Tuesday or Wednesday evening show may be exchanged in the registration area, based on availability.

The conference badge with the technical program and panels insert admits an attendee

to the Thursday night dinner reception held at the California Academy of Science. The Academy of Science is a natural history museum which houses the Steinhart Aquarium and is located in Golden Gate Park. Transportation between this reception and all conference hotels listed in this program will be provided.

COURSES

The SIGGRAPH '85 courses offer themes never before addressed at a SIGGRAPH conference, as well as many of the most popular topics from other years. The courses committee studied evaluations from previous years and for the first time formally solicited and reviewed proposals; out of 44 proposals, 27 were chosen.

SIGGRAPH '85 courses are held Monday and Tuesday at several conference hotels and at the Moscone Convention Center. For more information about the location of a particular course, consult the fast reference sheet provided in the registration packet and posted at other conference locations. Courses begin at 8:30 a.m. on Monday and Tuesday and conclude at 5 p.m. on both days. Shuttle buses running at regular intervals connect conference hotels listed in this program to all course locations and the Moscone Convention Center.

Luncheon for the appropriate day(s) are included in the course registration. The conference badge with a course insert admits course attendees to the luncheon.

Course registrants receive notes for the course(s) for which they are registered, a copy of the film and video show catalog and a copy of the art show catalog, in addition to admission to their confirmed course(s), the exhibition and the art show.

Course attendees also receive a ticket to one night of the film and video show. Please note that the Tuesday and Wednesday evening film and video shows are identical this year. Tickets for the Tuesday or Wednesday evening show may be exchanged in the registration area, based on availability.

The conference badge with a course insert admits an attendee to the Monday night course reception held at the Exploratorium, a unique hands-on science museum. During this dinner reception the Exploratorium's many interactive exhibits will be open. Transportation between this reception and all conference hotels listed in this program will be provided.

EXHIBITION

Exhibition hours:

Tuesday, July 23 10 a.m.-6 p.m.

Wednesday, July 24 10 a.m.-6 p.m.

Thursday, July 25 10 a.m.-3:30 p.m.

This internationally attended exhibition is the industry standard for new product introductions as well as a comprehensive showplace for the tools of the computer graphics trade. The SIGGRAPH exhibition has grown from a handful of exhibits at the first equipment show in 1975 to more than 220 internationally recognized exhibitors filling 80,000 net square feet at the Moscone Convention Center this year. More product and service categories than ever before are represented, demonstrating not only the state of the art in computer graphics hardware and software, but also prototypes for the future.

ART SHOW

The SIGGRAPH '85 art show features the latest achievements of artists and designers using computer graphics and interactive techniques in all media. The on-site exhibition, juried by artists, curators and art educators, is located at the Moscone Convention Center east wing in rooms 200 through 212 and rooms 220 through 226, Monday through Friday.

The art show includes prints, large scale sculptures, interactive installations, a display of computer graphics on frame buffers and an intimate viewing environment for videotapes of experimental computer graphics pieces. This year, the art show also provides visual documentation of the creative process.

A student poster competition and exhibition is being held in conjunction with the School of Visual Arts in New York and the Academy of Art College in San Francisco. Posters de-

signed by students using computer graphics are on display July 15 to 29 at the Academy of Art College Gallery, located at 688 Sutter Street.

"Input/Output: Computer Graphics Festival" is an interactive installation, mounted at the San Francisco Museum of Modern Art located at Van Ness at McAllister, in conjunction with the SIGGRAPH '85 art show. This hands-on exhibit enables people to explore the tools and processes used by artists and designers in computer graphics. It is open to SIGGRAPH '85 attendees and their guests on Sunday and Monday, July 21 and 22, from 10 a.m. to 5 p.m. Look for signs in the upper lobby of the Moscone Convention Center.

Two installations are offered by the Exploratorium in conjunction with the SIGGRAPH '85 art show. These installations are open during the Monday evening course reception at the Exploratorium and to the general public. "Frontiers of Chaos" features the work of mathematician Heinz-Otto Peitgen and physicist Peter Richter in experimental dynamic systems. This exhibit is made possible by the Goethe Institute. It is open July 16 to September 2. "Invisible Cities," an interactive computer graphics work based on the Italo Calvino novel of the same name, will have its American premiere. This exhibit was conceived and created by Jeffrey Shaw. It is open July 20 to 28.

SIGGRAPH '85 art show events and a copy of the catalog are included in conference registration fees unless registration is for the general exhibition only. Admission fees for exhibition only registrants will be \$3 for adults and \$1 for students and seniors. Additional copies of the art show catalog are available for sale.

FILM AND VIDEO SHOW

The annual SIGGRAPH film and video show has achieved an international reputation for creative and technical excellence. The SIGGRAPH '85 film and video show will consist of two identical showings on Tuesday and Wednesday evenings at 8 p.m. in Hall A of the Moscone Convention Center.

This year a jury of well-known artists and computer graphics professionals selected 36 pieces out of 185 entries. Due to the high number of submissions and the reduction of the show time, the presentation has become considerably more selective and tightly edited. For the first time, the film and video show catalog contains a representative frame from each piece in the show.

Admission to one evening of the film and video show and a copy of the catalog is included in an attendee's technical program and panel registration and/or course registration. Tickets for the Tuesday or Wednesday night show may be exchanged in the registration area, based on availability. Additional copies of the film and video show catalog are available for sale.

Presented in an excellent aural/visual environment, the SIGGRAPH '85 film and video show is an educational and memorable viewing experience.

ONGOING ANIMATION SCREENING

In addition to the evening film and video show there is an ongoing, juried animation screening Wednesday through Friday, throughout the day, in order to present high quality, longer pieces and demo reels. This screening is located in Hall K of the Moscone Convention Center adjacent to the technical program and exhibition so that attendees may drop in at their convenience.

EXHIBITION OPENING CEREMONY

All SIGGRAPH '85 attendees are invited to attend the brief opening ceremony for the equipment exhibition at 10 a.m. Tuesday, outside of the exhibition hall.

ACM SIGGRAPH EXECUTIVE COMMITTEE MEETING

The ACM SIGGRAPH executive committee holds an open meeting on Thursday, July 25 from 5:15 p.m. to 7:15 p.m. in the Sauternes I room at the Hotel Meridien.

SOCIAL FUNCTIONS

Traditionally, SIGGRAPH '85 receptions are reunions for old friends as well as places to meet new colleagues. These catered dinner receptions feature local San Francisco cuisine and California wines. Two complimentary drinks (soft drinks, beer or wine) are included with admission. A cash bar is also available. Shuttle bus service between receptions and all conference hotels listed in this program is provided.

The conference badge with a course insert admits an attendee to the Monday night course reception beginning at 7 p.m. at the Exploratorium, a unique hands-on science museum. During this reception the Exploratorium's many interactive exhibits will be open.

The conference badge with a technical program and panels insert admits an attendee to the Thursday night technical program and panels reception beginning at 8 p.m. at the California Academy of Science. The Academy of Science is a natural history museum which houses the Steinhart Aquarium, located in Golden Gate Park.

BIRDS-OF-A-FEATHER SESSIONS

Birds-of-a-feather sessions are held Monday through Friday in rooms 216 and 218 of the Moscone Convention Center. SIGGRAPH '85 attendees are welcome to use these rooms for informal small group discussions. A sign-up board is located in upper lobby of the Moscone Convention Center.

USER GROUPS AND SPECIAL INTEREST GROUPS

The following user groups and special interest groups are planning to meet during SIGGRAPH '85. For details about the groups, contact the people indicated below. Check the upper lobby of the Moscone Convention Center for updated group information and announcements of additional group meetings.

GENERAL INFORMATION

AIRLINE INFORMATION

An American Airlines office is located adjacent to the Westin St. Francis hotel. American Airlines can issue tickets and reconfirm or change reservations for conference attendees at this office.

A/V SERVICE

A/V headquarters

A/V headquarters is in room 270 of the Moscone Convention Center and provides speakers with general A/V assistance, including 35mm slide trays and blank slides. A/V headquarters is open Sunday, 9 a.m.-9 p.m., and Monday-Friday, 7:30 a.m.-6 p.m. The telephone number is (415) 896-2119.

Speaker film/video prep room

A film/video prep room is available in Moscone Convention Center rooms 258 and 260 for speakers to review 16mm films and 3/4-inch U-Matic NTSC videotapes. The room is open Sunday, 9 a.m.-9 p.m., and Monday-Friday, 7:30 a.m.-6 p.m.

Speaker slide prep room

A slide prep room is available in Moscone Convention Center room 256 for speakers to review 35mm slides. Slide viewer/sorters and projectors are available Sunday, 9 a.m.-9 p.m., and Monday-Friday, 7:30 a.m.-6 p.m.

Film and video show office

The film and video show office is located in the lounge area between rooms 218 and 238 of the Moscone Convention Center. It is open Sunday from 1 p.m.-11 p.m. for delivery of final show materials as per previous arrangements with the film and video show committee. The office is open for contributors to pick up their films and videotapes during registration hours.

CHILD CARE

Child care services are provided by most SIGGRAPH '85 hotels. Contact the concierge desk or the guest services department of your hotel for information on types of child care services offered.

CONFERENCE MATERIALS DESK

SIGGRAPH '85 course notes, proceedings, slide sets, t-shirts, posters, mugs, art show catalogs and film show catalogs are available for pick-up in rooms 232 and 234 of the Moscone Convention Center. Attendees may also buy SIGGRAPH video reviews, 1983 Japanese computer graphics art show catalogs and merchandise from previous SIGGRAPH conferences.

A shipping desk is located in rooms 232 and 234, near the conference materials desk. Conference materials may be shipped to domestic and international locations.

Both rooms are open during registration hours plus Friday afternoon until 5 p.m.

CONFERENCE OFFICE

To assist registrants with any special needs or questions throughout the conference, SIGGRAPH '85 staff members are available in rooms 274 and 276 of the Moscone Convention Center.

CONFERENCE SPONSORSHIP

SIGGRAPH '85 is sponsored by the Association for Computing Machinery's Special Interest Group on Computer Graphics in cooperation with Eurographics and the IEEE Technical Committee on Computer Graphics.

CURRENCY EXCHANGE

International visitors may exchange their currency for United States dollars at Deak-Perera, a local money broker located near the Moscone Convention Center at 100 Grant Ave. Deak-Perera is open Monday-Friday, 9 a.m.-5 p.m., and Saturday, 9:30 a.m.-2:30 p.m. The telephone number is (415) 362-3452. An exchange facility also is located at Citicorp in the San Francisco International Airport on the second floor in the central terminal. The hours are 7-11 p.m. daily. In addition, several local banks handle international money exchanges.

DRESS

Casual dress is acceptable at all SIGGRAPH '85 conference functions. Casual dress is also acceptable at many San Francisco dining establishments. However, jackets and ties may be required in some locations. The SIGGRAPH '85 conference committee recommends that guests check dress code requirements when restaurant reservations are made.

FIRST AID

Paramedics are on duty Sunday-Friday during the following hours: Sunday, 8 a.m.-11 p.m.; Monday, 8 a.m.-8 p.m.; Tuesday, 8 a.m.-10 p.m.; Wednesday, 8 a.m.-10:30 p.m.; Thursday, 8 a.m.-9 p.m.; and Friday, 8 a.m.-5 p.m.

The first aid room is located across the corridor from Hall C of the Moscone Convention Center. The telephone number is (415) 974-4280.

FOODSERVICE

Two concession stands are located at the rear of the exhibits hall in the Moscone Convention Center. The stands are open Monday-Friday from 8 a.m.-5 p.m.

HOUSING ASSISTANCE

A representative from the San Francisco Convention and Visitors Bureau is available at the housing desk in the upper lobby of the Moscone Convention Center on Sunday from 1 p.m.-11 p.m. and Monday and Tuesday from 7 a.m.-7 p.m. to assist SIGGRAPH '85 registrants in making hotel accommodations in San Francisco.

SIGGRAPH '85 registrants needing housing assistance Wednesday, Thursday and Friday can contact the San Francisco Convention and Visitors Bureau between 8:30 a.m. and 5 p.m. at (415) 974-6900.

INFORMATION AND ASSISTANCE CENTER

The conference information and assistance center is located in the upper lobby of the Moscone Convention Center. Personnel are available to handle questions beginning at 1 p.m. on Sunday and thereafter during registration hours.

MESSAGE CENTER

A message center for SIGGRAPH '85 attendees is located in the upper lobby of the Moscone Convention Center. The message center telephone number is (415) 896-2100.

Message center personnel also accept personal messages from one conference participant to another. The message center is open beginning at 1 p.m. on Sunday and thereafter during registration hours.

PRESS BRIEFING

The highlights of SIGGRAPH '85 are presented during the press briefing on Tuesday, July 23, at 8:30 a.m. in rooms 236 and 238 of the Moscone Convention Center. Following a short question and answer session, early admission to the exhibition floor is granted to members of the press.

PRESS ROOM

Rooms 236 and 238 in the Moscone Convention Center are the center for press activities during SIGGRAPH '85. Members of the press should come directly to the press room to register and pick up press badges. Press kits, telephones, typewriters, conference course notes and proceedings are available in this room. Individual interviews with SIGGRAPH '85 spokespersons, exhibitors and others may be scheduled here. The press room is open Sunday, 3 p.m.-6 p.m.; Monday-Thursday 8 a.m.-6 p.m.; and Friday 8 a.m.-Noon.

REGISTRATION

Attendees who have pre-registered for courses or the technical program and panels may pick up their conference materials at the Moscone Convention Center beginning on Sunday, July 21, at 1 p.m. Please note that there are no remote registration or materials distribution at the course sites.

Registration is open from 1 p.m. until 11 p.m. on Sunday in order to allow Monday course registrants ample time to pick up their materials.

GENERAL INFORMATION

All on-site registrations are handled in the registration area of the Moscone Convention Center during the registration hours:

Sunday, July 21	1 p.m.-11 p.m.
Monday, July 22	7 a.m.-7 p.m.
Tuesday, July 23	7 a.m.-7 p.m.
Wednesday, July 24	8 a.m.-6 p.m.
Thursday, July 25	8 a.m.-6 p.m.
Friday, July 26	9 a.m.-1 p.m.

Members of the press should proceed directly to the press room for registration. Press badges are distributed in press room 236 in the Moscone Convention Center.

RESTAURANT INFORMATION

Menus of local restaurants are available at the restaurant information desk in the lower level lobby of the Moscone Convention Center. Personnel will assist conference attendees in making reservations at area restaurants. This desk will be open during registration hours.

SHIPPING DESK

A shipping desk is located near the conference materials desk in rooms 232 and 234 of the Moscone Convention Center. Conference materials may be shipped to domestic and international locations.

SLIDE SETS

Three slide sets have been created for SIGGRAPH '85 that demonstrate advanced technology, substantial artistic merit and innovative application. The *technical set* depicts new research and applications of computer graphics from many disciplines. The *industry set* is representative of the companies participating in the SIGGRAPH '85 exhibition. Computer graphics hardware, software, applications and services are featured in this set. The *art show set* features examples of prints, sculptures, installations and design.

All slide sets can be purchased at the registration desk and picked up at the conference materials desk in rooms 232 and 234 of the Moscone Convention Center.

SMOKING POLICY

There is no smoking allowed in conference locations.

TELEPHONE NUMBERS

A/V headquarters

Press room
(415) 892-2105

Registration area
(415) 896-2109

San Francisco Convention
and Visitors Bureau
(415) 974-6900

TOURS

Tours of the San Francisco area can be arranged at the local activities desk in the lower lobby of the Moscone Convention Center. Information describing local sites in San Francisco is provided at this desk.

TRANSPORTATION

Public transportation, including historic cable cars, is abundant in the San Francisco area. There are airport limousines and buses available to and from conference hotels. Complimentary shuttle bus service is provided between all SIGGRAPH '85 hotels listed in this program and the Moscone Convention Center.

1
INTRODUCTION TO COMPUTER
GRAPHICS
MONDAY AND TUESDAY

CHAIR

Stephen R. Levine

LECTURERS

Michael J. Bailey, Purdue University CADLAB,
W. Lafayette, IN/Megatek Corporation, San
Diego, CA

John Blunden, Lawrence Livermore National
Laboratory, Livermore, CA

Maxine Brown, Maxine Brown Associates,
Los Angeles, CA

Stephen R. Levine, Computervision
Corporation, Bedford, MA

Stephanie Moore, Compugraphics
Corporation, Wilmington, MA

Bernice Rogowitz, IBM Research, Yorktown
Heights, NY

Susan Stearman, Computervision
Corporation, Bedford, MA

TOPICS

Introduction, key concepts and
terminology/Levine

Color and vision/Rogowitz

Hardware, math and algorithms/Levine

Film/Blunden

Engineering applications/Bailey

Business-graphics/Brown

How to buy a computer graphics
system/Moore

A live demo/Stearman

2

INTRODUCTION TO COLOR RASTER GRAPHICS

MONDAY

CHAIR

Donald P. Greenberg

LECTURERS

Ted Crane, Cornell University, Ithaca, NY

**Donald P. Greenberg, Cornell University,
Ithaca, NY**

Peter Kochevar, Cornell University, Ithaca, NY

Gary Meyer, Cornell University, Ithaca, NY

**Channing Verbeck, Cornell University,
Ithaca, NY**

TOPICS

Introduction/Greenberg

Raster concepts/Meyer

Frame buffer architecture/Crane

Raster algorithms/Verbeck, Kochevar

Color and color spaces/Meyer

**Illumination models and
reflection/Greenberg**

Applications/Verbeck, Kochevar

3

COLOR PERCEPTION

TUESDAY

CHAIR

William B. Cowan

LECTURERS

William B. Cowan, National Research Council of Canada, Ottawa, Ontario, Canada

Colin Ware, University of Waterloo, Waterloo, Ontario, Canada

TOPICS

Introduction/Cowan

Color in the environment

- The physics of color generation/Cowan
- The colored environment/Ware

Classical colorimetry

- Physiology of the eye/Cowan
- Color matching/Cowan
- Measurement of light and color/Ware

Elementary color coding

- Physiology of the retina/Cowan
- Psychophysics of color coding/Cowan
- Color difference/Cowan
- Color order systems—color naming/Cowan

Higher visual function

- Physiology of the visual cortex/Cowan
- Color appearance/Ware
- Color for data display/Ware
- Color and attention/Cowan

4

HOW TO DESIGN COMPUTER-USER INTERFACES

MONDAY

CHAIR

James D. Foley

LECTURERS

James D. Foley, George Washington
University, Washington, D.C.

Jack D. Grimes, Intel Corporation, Santa
Clara, CA

John Sibert, George Washington University,
Washington, D.C.

TOPICS

Course overview/Foley

Introduction/Grimes

Design principles/Grimes

Design process

- User requirements/Grimes
- Conceptual, dialogue, semantic, syntactic,
lexical design/Foley
- Design review and interface
debugging/Foley

Design issues

- Documentation/Foley
- Design guidelines/Foley
- Design style guide/Foley

Interaction devices and techniques/Sibert

Questions and answers/Foley, Grimes, Sibert

5

**ADVANCED TOPICS—HUMAN FACTORS
IN COMPUTER GRAPHICS SYSTEMS
TUESDAY**

CHAIRS

Jack D. Grimes

Michael E. Atwood

LECTURERS

Michael E. Atwood, ITT-Advanced Technology
Center, Shelton, CT

James Foley, George Washington University,
Washington, D.C.

Jack D. Grimes, Intel Corporation, Santa
Clara, CA

TOPICS

Introduction/Grimes

Advanced topics

- Experimental methods/Foley
- User models/Grimes
- Visual perception/Grimes
- User interface tools/Foley
- Mixed media/Grimes

Guide to literature/Atwood

Future directions of human factors
research/Atwood

Questions and answers

6

**IMPLEMENTING GKS—ARCHITECTURE
AND ALGORITHMS
MONDAY**

CHAIR

Peter R. Bono

LECTURERS

Peter R. Bono, Graphic Software Systems,
Inc., Wilsonville, OR

Chris Osland, Rutherford Appleton
Laboratory, Chilton, Didcot, Oxon., UK

Gunther Pfaff, GTS-GRAL, Darmstadt, West
Germany

TOPICS

Introduction and overview/Bono

Architecture and the viewing pipeline/Osland

Data structures, inquiry and error
handling/Osland

GKS workstation interface: control and data
structures/Pfaff

GKS attributes and input/Pfaff

WISS and pick input/Osland

Text and metafiles/Bono

Microcomputer considerations/Bono

7

**AN INTRODUCTION TO PHIGS: THE
PROGRAMMER'S HIERARCHICAL
INTERACTIVE GRAPHICS STANDARD
TUESDAY**

CHAIR

Richard Ehlers

LECTURERS

Albert Bunshaft, IBM, Kingston, NY
Richard Ehlers, Evans and Sutherland
Computer Corporation, Salt Lake City, UT
Richard Puk, Puk Consulting Services,
Carlsbad, CA
David Shuey, McDonnell Douglas,
St. Louis, MO

TOPICS

Introduction/Ehlers
PHIGS constituency/Shuey
PHIGS structures and structure
editing/Bunshaft
PHIGS display traversal/Bunshaft
Name sets and classes/Puk
PHIGS pipeline/Ehlers
Deferral modes/Ehlers
Input models/Puk
Relation to GKS-3D/Puk
PHIGS trial implementation/Bunshaft
Summary/Shuey

8

HOW TO EVALUATE AND SHOP FOR COMPUTER GRAPHICS HARDWARE TUESDAY

CHAIR

James R. Warner

LECTURERS

**James R. Warner, Precision Visuals, Inc.,
Boulder, CO**

**Randall Wise, Graphics Communications,
Inc., Waltham, MA**

TOPICS

Introduction/Warner

**Review of hardware technology—display
terminals and workstations/Warner**

**Review of hardware technology—hardcopy
devices and personal computers/Wise**

**General criteria when shopping for graphics
hardware—minis and mainframes/Warner**

**Specific buying criteria—display terminals
and workstations/Warner**

**General criteria when shopping for graphics
hardware—personal computers/Wise**

**Specific buying criteria—hardcopy devices
and personal computers/Wise**

**Tips and pitfalls when evaluating hardware
vendors/Warner, Wise**

9

**INTRODUCTION TO COMPUTER
ANIMATION**

MONDAY

CHAIR

Frederic I. Parke

LECTURERS

J. J. Larrea, New York Institute of Technology,
Old Westbury, NY

Frederic I. Parke, New York Institute of
Technology, Old Westbury, NY

David Sturman, New York Institute of
Technology, Old Westbury, NY

David Zeltzer, Massachusetts Institute of
Technology, Cambridge, MA

TOPICS

Introduction/Parke

Relationship of computer animation to
conventional animation/Larrea

Modeling/Parke

Shape parameterization/Parke

Articulated models/Sturman

Explicit control/Sturman

Keyframing/Sturman

Interpolation/Sturman

Scripted systems/Sturman

Goal directed animation/Zeltzer

Robotics & animation/Zeltzer

Rendering issues/Parke

Animation environments I/Zeltzer

Animation environments II/Larrea

10

**ADVANCED COMPUTER ANIMATION
TUESDAY**

CHAIR

Judson Rosebush

LECTURERS

Philippe Bergeron, Montreal, Quebec

David Fox, Lucasfilm Ltd., San Rafael, CA

Craig Reynolds, Symbolics, Los Angeles, CA

**Judson Rosebush, Judson Rosebush
Company, New York, NY**

TOPICS

Introduction/Rosebush

**The control of time in computer
animation/Reynolds**

**The control of character in computer
animation/Bergeron**

Small system strategies—do it yourself/Fox

Facilities considerations and wrap/Rosebush

11

**STATE OF THE ART IN IMAGE SYNTHESIS
MONDAY**

CHAIR

Rodney Stock

LECTURERS

Thad Beier, Pacific Data Images,
Sunnyvale, CA

Edwin Berlin, Jr., Cubicomp Corporation,
Berkeley, CA

Robert L. Cook, Lucasfilm Ltd., San Rafael, CA

Stephen Gabriel, Gabriel Electronic
Consulting, Orlando, FL

Michael Kaplan, Kobra Graphics,
Beaverton, OR

Kenneth Perlin, The Courant Institute for
Mathematics and Sciences, New York, NY

Rodney Stock, Arstock Services, San
Anselmo, CA

TOPICS

Spline interpolation of rotations/Gabriel

Modeling techniques for boolean operations
on polygonal objects/Beier

Efficiency issues in image synthesis/Berlin

New uses of spatial coherence in ray
tracing/Kaplan

The application of Monte Carlo integration to
image synthesis algorithms/Cook

Designing graphic algorithm design
languages/Perlin

12

IMAGE RENDERING TRICKS

TUESDAY

CHAIR

Robert L. Cook

LECTURERS

Jim Blinn, Jet Propulsion Laboratory,
Pasadena, CA

Loren Carpenter, Lucasfilm Ltd.,
San Rafael, CA

Richard Chuang, Pacific Data Images,
Sunnyvale, CA

Robert L. Cook, Lucasfilm Ltd., San Rafael, CA

Turner Whitted, University of North Carolina/
Numerical Design Ltd., Chapel Hill, NC

TOPICS

The philosophy of sophisticated hackery/Cook

Lookup table alchemy/Cook

Cutting corners where it counts/Cook

Doing more with less/Whitted

Ray tracing with PCs/Whitted

Shading tricks/Whitted

How to scrounge cycles/Whitted

Rendering for television/Chuang

What you can and cannot get away
with/Chuang

Don't solve problems you can avoid/Chuang

Avoid rendering whenever possible/Chuang

The ancient Chinese art of CHI-Ting/Blinn

Real-time hidden-line fractals on an Atari
400/Carpenter

Lightening atmospheres/Carpenter

Painless patches/Carpenter

13

**TRUE THREE-DIMENSIONAL DISPLAY
TECHNOLOGY AND TECHNIQUES FOR
COMPUTER GENERATED IMAGES**

MONDAY

CHAIR

David F. McAllister

LECTURERS

**Larry F. Hodges, North Carolina State
University, Raleigh, NC**

**David F. McAllister, North Carolina State
University, Raleigh, NC**

**Woodrow E. Robbins, North Carolina State
University, Raleigh, NC**

TOPICS

Introduction/McAllister

Role of color and perception in 3D/Robbins

Introduction to 3D technologies/Robbins

Stereo pairs/Hodges

Alternating pairs/Hodges

Holography/McAllister

Vari-focal mirrors/McAllister

Laser scan techniques/McAllister

14

**HIGH PERFORMANCE IMAGE
GENERATION SYSTEMS
MONDAY**

CHAIR

Roy Latham

LECTURERS

Glenn Davis, Link Flight Simulation Division,
Sunnyvale, CA

Peter Doenges, Evans and Sutherland
Computer Corporation, Salt Lake City, UT

Roy Latham, Link Flight Simulation Division,
Binghamton, NY

David Peters, Link Flight Simulation Division,
Binghamton, NY

Johnson Yan, Link Flight Simulation Division,
Sunnyvale, CA

TOPICS

What is high performance?/Latham

Introduction to system requirements and
system organization/Doenges

Scene management and prioritization/Davis

Hardware implementation

- Geometric and video processing

- Architecture/Latham

- Texture/Yan

Display system/Peters

15

**FRACTALS: BASIC CONCEPTS,
COMPUTATION AND RENDERING
TUESDAY**

CHAIR

Benoit B. Mandelbrot

LECTURERS

Loren Carpenter, Lucasfilm Ltd.,
San Rafael, CA

Benoit B. Mandelbrot, IBM Research Center,
Yorktown Heights, NY and Harvard University,
Cambridge, MA

Heinz-Otto Peitgen, University of Bremen,
Bremen, West Germany

Alvy Ray Smith, Lucasfilm Ltd.,
San Rafael, CA

Richard F. Voss, IBM Research Center,
Yorktown Heights, NY

TOPICS

Introduction to fractals, recursive rules,
midpoint displacement/Mandelbrot
Approximations to Mandelbrot fractal
reliefs/Voss

Fractal clouds/Mandelbrot

Formal languages and fractals/Smith

Adaptive fractal subdivision/Carpenter

Panel on realistic fractals and Julia

Mandelbrot sets/Peitgen

16

**GEOMETRY FOR COMPUTER GRAPHICS
AND COMPUTER AIDED DESIGN
MONDAY**

CHAIR

Ronald N. Goldman

LECTURERS

Bob Barnhill, University of Utah, Salt Lake City, UT

Ronald N. Goldman, Control Data Corporation, Minneapolis, MN

Tom Sederberg, Brigham Young University, Provo, UT

Tony Woo, University of Michigan, Ann Arbor, MI

TOPICS

Vector geometry/Goldman

Computational geometry/Woo

Algebraic geometry/Sederberg

Differential geometry/Barnhill

17

**THE USE OF B-SPLINES AND BETA-SPLINES
TO MODEL FREEFORM CURVES AND
SURFACES**

TUESDAY

CHAIR

John C. Beatty

LECTURERS

**Brian A. Barsky, University of California,
Berkeley, CA**

**Richard H. Bartels, University of Waterloo,
Waterloo, Ontario**

**John C. Beatty, University of Waterloo,
Waterloo, Ontario**

TOPICS

Introduction and terminology/Beatty

B-splines/Beatty

**The B-spline recurrence and the Oslo
algorithm/Bartels**

**Geometric continuity and Beta-splines/
Barsky**

Divided difference Beta-splines/Bartels

**Rendering and selected applications/Barsky,
Bartels**

18

INTRODUCTION TO SOLID MODELING
MONDAY

CHAIR

Jim Miller

LECTURERS

George Allen, McAuto, Cypress, CA

**Graham Jared, University of Cambridge,
Cambridge, UK**

**Jim Miller, Control Data Corporation,
Arden Hills, MN**

Herb Steinberg, MAGI, Elmsford, NY

TOPICS

**Background rationale and
representations/Miller**

CSG methods and applications/Steinberg

**Boundary representation methods and
applications/Jared**

User interfaces in solid modelers/Allen

19

**ADVANCED TOPICS IN SOLID MODELING
TUESDAY**

CHAIR

Tony C. Woo

LECTURERS

Alan Grayer, Shape Data Ltd., Cambridge, UK

**Robert Johnson, Johnson & Associates,
Ann Arbor, MI**

**Richard Volz, University of Michigan,
Ann Arbor, MI**

**Peter Wilson, General Electric, Schenectady,
NY**

**Tony Woo, University of Michigan, Ann Arbor,
MI**

TOPICS

Introduction/Woo

Data base for solid modeling/Johnson

Procedural interface to a modeler/Grayer

Feature extraction for process

planning/Wilson

Spatial properties for robot assembly/Volz

20

**VLSI FOR COMPUTER GRAPHICS
TUESDAY**

CHAIR

Henry Fuchs

LECTURERS

James Clark, Silicon Graphics, Inc.,
Mountain View, CA and Stanford University,
Stanford, CA

Henry Fuchs, University of North Carolina at
Chapel Hill

Karl Gutttag, Texas Instruments, Houston, TX

Gershon Kedem, Duke University and
Microelectronics Center of North Carolina
(MCNC)

Robert Schumacker, Evans and Sutherland
Computer Corporation, Salt Lake City, UT

TOPICS

Introduction: VLSI for beginners/Fuchs

Evolution of IC technology in flight
simulators/Schumacker

The present and future of commercial market
graphics IC's/Gutttag

VLSI for high performance graphics
workstations/Clark

VLSI for solid modeling/Kedem

VLSI for graphic input devices, "smart"
displays and logic-enhanced raster
memories/Fuchs

21

**COMPUTER GRAPHICS FOR DESIGNERS
AND ARTISTS**

MONDAY AND TUESDAY

CHAIR

Isaac V. Kerlow

LECTURERS

Susan Bickford, Computer Arts Forum, New York, NY

Charles Bigelow, Bigelow and Holmes, San Francisco, CA

Steve Feiner, Brown University, Providence, RI

Isaac Victor Kerlow, School of Visual Arts, New York, NY

Andy Kopra, Digital Effects, Inc., New York, NY

Mark Lindquist, Digital Effects, Inc., New York, NY

Barry Milliken, Skidmore, Owings & Merrill, New York, NY

Hilary Mills, Activision, San Francisco, CA

Michael O'Rourke, New York Institute of Technology, Old Westbury, NY

Judson Rosebush, Judson Rosebush Company, New York, NY

Susan VanBaerle, Cranston-Csuri Productions, Columbus, OH

James Ver Hague, Rochester Institute of Technology, Rochester, NY

TOPICS

The visual language of computers/Kerlow

Computer graphics in art and design education/Ver Hague

Principles of font design for the personal workstation/Bigelow

Two-dimensional computer animation and live action production/Lindquist

Computer-aided architecture at SOM/Milliken

How to produce and direct computer graphics/Rosebush

A classification methodology for computer-generated images/Kerlow

Educational and entertainment software/Mills

Three-dimensional computer animation/

Kopra

Three-dimensional character computer animation/VanBaerle

Purchasing the best computer graphics system/Bickford

Computers, sculpture and three-dimensionality/O'Rourke

First steps towards intelligent design systems/Feiner

22

**TODAY'S PROBLEMSOLVERS: GRAPHICS
WORKSTATIONS**

MONDAY

CHAIR

Bruce Eric Brown

LECTURERS

Bruce Eric Brown, The Quail Group, Orem, UT

Robert L. Judd, University of California,
Lawrence Livermore National Laboratory,
Livermore, CA

Steven G. Kensinger, Kensinger Associates,
Minnetonka, MN

TOPICS

Introduction/Brown

Engineering workstations/Kensinger

Art and animation workstations/Brown

Scientific workstations/Judd

Benchmarking workstations

• Calculations/Kensinger

• Networking/Judd

• Graphics/Brown

Making them work/Kensinger, Brown, Judd

23

**AESTHETIC ISSUES IN COMPUTER
GRAPHIC ART FOR MASS MEDIA**
MONDAY

CHAIR

Scott J. Jacobs

LECTURERS

Marcy Brafman, MTV: Music Television, New York, NY

Bill Feigenbaum, Feigenbaum Production, New York, NY

Scott J. Jacobs, Massachusetts College of Art, Boston, MA

John Ridgeway, GRFX, Inc. and *Entertainment Tonight*, Hollywood, CA

Drew Takahashi, Colossal Pictures, San Francisco, CA

TOPICS

Introduction/Jacobs

Practical design considerations for mass media

- Effective characteristics of frame composition/Jacobs

- Design considerations in computer generated imagery/Feigenbaum

Developing your aesthetic sensibilities

- Beyond print: the tube dimension/Ridgeway

- Opening yourself to more creative choices/Takahashi

- The romance of drawing on-screen/Brafman

24

**COMPUTER ANIMATION USING VIDEO
TECHNIQUES
TUESDAY**

CHAIR

Ed Kramer

LECTURERS

Mike Jackson, Image West, Ltd.,
Studio City, CA

Ed Kramer, EDITEL, New York, NY

Jerry Pojawa, Action Video, Hollywood, CA

Maury Rosenfeld, The Post Group,
Hollywood, CA

TOPICS

Video production techniques/Kramer

Quantel paint box/Pojawa

ADO techniques (Ampex Digital Optics)/
Jackson

Quantel Mirage and Bosch FGS-4000/
Rosenfeld

Animator/client interface and
storyboarding/Group

25

**QUADTREES, OCTREES AND RELATED
HIERARCHICAL DATA STRUCTURES**

TUESDAY

CHAIRS

Hanan Samet

Donald J. Meagher

LECTURERS

Donald J. Meagher, Phoenix Data Systems,
Albany, NY

Hanan Samet, University of Maryland,
College Park, MD

Clifford A. Shaffer, University of Maryland,
College Park, MD

Mark A. Yerry, Rensselaer Polytechnic
Institute, Troy, NY

TOPICS

Quadrees and related hierarchical data
structures for points, lines and areas/Samet

Quadtree methods for geographical data/
Shaffer

Octree methods for solid modeling/Meagher

Quadtree and octree methods for finite
element mesh generation/Yerry

26

INTRODUCTION TO IMAGE PROCESSING **MONDAY**

CHAIR

Cliff Stoll

LECTURERS

Brad Castalia, Idaeim Studios, Tucson, AZ

Kenneth Castleman, Perceptive Systems, Inc.,
Houston, TX

Cliff Stoll, University of California,
Berkeley, CA

TOPICS

Introduction/Stoll

- Image processing vs. image analysis vs. image synthesis
- What's easy; what's difficult; what's impossible to do

The nature of a digital image/Castalia, Stoll

- Pixel concepts
- Detector characteristics
- Display characteristics
- Representation of an image within a computer

Image processing/Castleman

- Overview
- Geometric manipulation
- Intensity manipulation
- Filtering
- Edge enhancement
- Image arithmetic

Image analysis/Castleman

- Overview
- Histograms
- Area classification
- Separation methods
- Quantitative image analysis
- Pattern recognition
- Other topics

27

**BUILDING SCIENTIFIC AND
ENGINEERING GRAPHICS APPLICATIONS
MONDAY**

CHAIR

David J. Kasik

LECTURERS

David J. Kasik, Boeing Computer Services,
Seattle, WA

Rik Littlefield, Battelle Northwest
Laboratories, Richland, WA

Jim Thomas, Battelle Northwest Laboratories,
Richland, WA

Kevin Weiler, General Electric,
Schenectady, NY

TOPICS

Introduction/Kasik

An architecture for graphics applications
development/Kasik

- Derivation of logical components in the architecture
- Description of functionality for each component
- Description of resulting applications built within architecture

Graphics technology and directions in an
application context/Weiler

- Graphics display pipeline
- Graphics input processing techniques
- Structure of graphics display systems software and hardware
- Future directions of graphics systems architecture

Specialized, limited audience applications/
Littlefield

- Analysis of a complete graphics application
- Derivation of software engineering principles within application

Iconic communication principles/Thomas

- Methods of graphics communication in an interactive application
- Analysis of techniques in an interactive genetic engineering application

An application-oriented guide to the exhibits/
Kasik

OPENING SESSION

9-10:30

SIGGRAPH '85 WELCOME

Pat Cole, Robert L. Heilman

SIGGRAPH REPORT

A CONFERENCE OVERVIEW

Panel

PERSPECTIVE—COMPUTER GRAPHICS IN EUROPE AND JAPAN

10:45-12:15

CHAIRS

Jose Encarnacao, Technische Hochschule Darmstadt

Tosiyasu L. Kunii, University of Tokyo

This panel will present noteworthy activities from Europe and Japan. The panelists will emphasize important and recent work from their respective regions. The topics will include general computer graphics, CAD/CAM and art.

MODERATOR

Bertram Herzog, Computer Graphics Consultants, Inc.

PANELISTS

X. Nicolas, Sogitec

Malcolm Sabin, FECS Ltd.

Yukari Shirota, University of Tokyo

W. Strasser, Technische Hochschule Darmstadt

Shunichiro Tsurumi, Hitachi Ltd.

Takao Wachi, Osaka City University

1985 SIGGRAPH AWARDS

Jon Meads

STEVEN A. COONS AWARD

Pierre E. Bézier

**COMPUTER GRAPHICS ACHIEVEMENT
AWARD**

Loren Carpenter

Paper

REFLECTANCE MODELS

10:45-12:15

CHAIR

Norman I. Badler, University of Pennsylvania

Anisotropic Reflection Models

James T. Kajiya, California Institute of
Technology

**Continuous Tone Representation of Three-
Dimensional Objects**

**Taking Account of Shadows and
Interreflection**

Tomoyuki Nishita, Fukuyama University
Eihachiro Nakamae, Hiroshima University

**The Hemi-Cube: A Radiosity Solution for
Complex Environments**

Michael F. Cohen, Cornell University
Donald P. Greenberg, Cornell University

Panel

ISSUES AT THE INTERFACE: AN HISTORICAL TRACE OF PROMPTING, CONCURRENCY, SIGNIFICATION AND EASE OF USE

1:45-3:15

CHAIR

Robert M. Dunn, The Cadware Group, Ltd.

Beginning with Sketchpad and continuing to Macintosh and beyond, designers and users of interactive graphics systems and applications have refined the nature of the working graphical interface between a person and a computer. The panel will trace the changing uses of graphical symbols and icons; address the evolution of concurrency in windows, menus and task activation; examine mechanisms for gaining attention and prompting for reactions; and focus on reducing visual, physical and psychological stress via improved screen design and applied principles of graphical presentation.

PANELISTS

Sara Bly, Xerox Office Systems

Richard Guedj, SiGRID

William Laaser, Metaphor Computer Systems

William J. Poduska, Apollo Computer Inc.

Paper

RENDERING TECHNIQUES

1:45-3:15

CHAIR

Henry Fuchs, University of North Carolina at Chapel Hill

Compositing 3-D Rendered Images

Tom Duff, AT&T Bell Laboratories

Bounding Ellipsoids for Ray-Fractal Intersection

Christian Bouville, CCETT

Efficient Alias-Free Rendering Using Bit-Masks and Look-Up Tables

Greg Abram, University of North Carolina at Chapel Hill

Lee Westover, University of North Carolina at Chapel Hill

Turner Whitted, Numerical Design Ltd.

Panel

SIZING THE MARKET: WHERE DO ALL THOSE NUMBERS COME FROM?

3:30-5:00

CHAIR

Carl Machover, Machover Associates Corporation

Forecasters say that 6.2 billion dollars worth of industrial computer graphics hardware, software and services will be sold in 1985, that 2.6 billion dollars worth of CAD/CAM equipment was delivered in 1984 and that "hardcopy" will grow an average of 25 percent per year over the next five years. How do they know?

The panel includes market forecasters from industry and leading market research companies. They will discuss how such forecasts are made, how accurate they are, how good past forecasts have been and what the problems are in developing these forecasts.

PANELISTS

Charles Foundyller, Daratech, Inc.

Robert H. Katzive, Gnostic Concepts, Inc.

Neil Kleinman, International Data Corporation

Christopher M. Saleh, Data General Corporation

Beth Tucker, Dataquest, Inc.

Paper

SAMPLING AND FILTERING

3:30-5:00

CHAIR

Franklin C. Crow, Xerox PARC

Statistically Optimized Sampling for Distributed Ray Tracing

Mark E. Lee, Amoco Production Center

Richard A. Redner, University of Tulsa

Samuel P. Uselton, University of Tulsa

Antialiasing Through Stochastic Sampling

Mark A.Z. Dippé, University of California, Berkeley

Erling Henry Wold, University of California, Berkeley

Integrated Analytic Spatial and Temporal Antialiasing for Polyhedra in 4-Space

Charles W. Grant, Lawrence Livermore

National Laboratory

A Two-and-a-Half-D Motion-Blur Algorithm

Nelson L. Max, Lawrence Livermore National Laboratory

Douglas M. Lerner, Ota Ku, Tokyo

Panel

ANIMATED COMPUTER GRAPHICS IN TELEVISION BROADCASTING

9:00-10:30

CHAIRS

Christine Barton, National Broadcasting
Company, Inc.

Carl Rosendahl, Pacific Data Images

Issues involved in computer generated video animation will be addressed by the producers of the video and the clients who use the product. The producers of computer generated video include independent production houses and production departments within the television networks. The clients include advertising agencies and the news, sports and entertainment departments of the television networks themselves. Topics to be discussed include design control, equipment used and cost. Issues such as in-house production vs. contracted production and daily production schedules vs. longer term promotional projects will also be discussed.

PANELISTS

Robert Brandel, National Broadcasting
Company, Inc.

Larry Elin, MAGI

Susan Rugtiv, Ketchum Advertising

Douglas Towey, Columbia Broadcasting
Systems, Inc.

Paper

HARDWARE

9:00-10:30

CHAIR

J. Nick England, Adage, Inc.

Fast Image Generation of Constructive Solid Geometry Using a Cellular Array Processor

Hiroyuki Sato, Fujitsu Laboratories, Ltd.

Mitsuo Ishii, Fujitsu Laboratories, Ltd.

Keiji Sato, Fujitsu Laboratories, Ltd.

Morio Ikesaka, Fujitsu Laboratories, Ltd.

Hiroaki Ishihata, Fujitsu Laboratories, Ltd.

FONT FORMATS

10:45-12:15

CHAIR

Charles Bigelow, Stanford University

Methods of font representation for typography on display screens and printers such as Metafont, PostScript and Ikarus will be presented. Issues to be discussed include: the form of representation, transformation, data compaction, processing speed, software and hardware implementation, device independence, interchange standards, output legibility and aesthetics.

AESTHETICS OF COMPUTER GRAPHICS

1:45-3:15

CHAIR

Mihai Nadin, Rhode Island School of Design

As graphics technology and software become more mature, it is critical to examine the aesthetics of computer generated images. Effective visual communication and artistic expression are dependent on aesthetic quality. Issues that emerge for artists, designers and computer scientists include: the formal attributes of images, aesthetic evaluation criteria and the desire to detect or implement aesthetic qualities. The panelists, having studied these and other issues, will present and debate their diverse viewpoints.

THE CREATION OF NEW KINDS OF INTERACTIVE ENVIRONMENTS IN ART, EDUCATION AND ENTERTAINMENT

3:30-5:00

CHAIR

**Stephen Wilson, San Francisco State
University**

Artists and researchers are using the computer's interactive capabilities to develop innovative kinds of responsive settings. The gestures, sounds and other participant activities are used to control the flow of computer-mediated graphic, sound and kinetic events. Illustrated descriptions of several responsive settings will be presented. Panelists will discuss implications for changing traditionally passive art, education and museum settings.

REAL-TIME SIMULATION IN THE REAL WORLD

9:00-10:30

CHAIR

Zsuzsanna Molnar, Silicon Graphics, Inc.

Flight simulation was the first well-known real-time simulation application using computer graphics. New computer architectures, combined with fast interactive graphics, extend the scope of simulation to encompass ever more realistic visual simulation as well as the modeling of objects and processes: computer prototyping. Panelists will discuss evolutionary trends, costs and effectiveness of real-time simulation citing examples from flight simulation, drug design, wind tunnel simulation, the testing of on-the-road car behavior and robotics.

FUNDAMENTAL ALGORITHMS: RETROSPECT AND PROSPECT

10:45-12:15

CHAIR

Rae A. Earnshaw, University of Leeds

Many advances and innovations have been made since the earliest line generation algorithm formulated by Bresenham in 1963. Extensions have been devised to allow the generation of arcs, conics and curves, and the exploitation of gray scale and color. Solutions to the aliasing problem have been devised; good quality pictures can now be produced on inexpensive displays. More recently, a study of program transformations has suggested new ways for the automatic generation of algorithms. Current progress will be reviewed and possible new developments and advances will be discussed.

COMPUTER GRAPHICS TECHNOLOGY

1:45-3:15

CHAIR

John Staudhammer, University of Florida

The extremely rapid growth of computer graphics is due, in large measure, to the application of leading-edge technology devices. Initially, these devices were not inspired by graphics applications. However, the market has become so large that display oriented semiconductor devices are becoming specialty product lines. In turn these devices are leading to different display hardware architectures which will profoundly influence emerging capabilities in computer graphics. The future will be shaped as much by these technical innovations as by the economic trends they engender. The panel will examine the forces behind these technological changes and estimate their influence on directions for the computer graphics industry.

SOLID MODELING WITH HARDWARE

3:30-5:00

CHAIR

Pierre J. Malraison, GE-Calma

This panel's focus is on special purpose hardware for solid modeling. Solid modeling concerns the definition, display, manipulation and analysis of objects stored as the complete, unambiguous representation of a bounded region of three-dimensional space. The three primary representation methods, constructive solid geometry, boundary representations and spatial enumeration, will be discussed. Recent developments in these representation methods and their hardware implementations will be described. The panel will conclude with a dialog with the audience to predict future developments.

Denise Ward**Sales Planning Manager**

AT&T's exhibit will highlight state-of-the-art technology. In addition, a full range of technical staff will be on hand to discuss the products. Stop by booth #1200 for an opportunity to see and try our latest innovations.

AUSCOM (A KMW SYSTEMS COMPANY)
Booth 1430

2007 Kramer Lane
Austin, Texas 78758
(512) 836-8080
Linda Lewis
Vice President, Sales

Auscom provides proven and reliable direct mainframe channel attachment for a wide variety of graphics systems and peripherals. These high-speed host connections are available using parallel interfaces or LANs. Auscom is exhibiting 3 varieties of channel interfaces: The 8300 Single Board, the Q-bus-based 8900A and the Multibus-based 8600.

AUTODESK INC.
Booth 1541

2320 Mainship Way
Sausalito, California 94965
(415) 332-2344
Stephanie Ford
Exhibit Manager

CAD/camera™ combined with AutoCAD allows you to take a picture of a drawing and automatically turn it into a CAD database. CAD/camera identifies, extracts, connects and rectifies lines from an original image. The resulting CAD database can be edited, viewed and plotted with AutoCAD software. CAD/camera runs on the IBM PC with the Datacopy™ scanner or on the Wang PIC system™. AutoCAD software will be demonstrated. Come see the newest features.

AUTOGRAPHIX, INC.

Booth 1553

100 Fifth Ave.

Waltham, Massachusetts 02154

(617) 890-8558

William Schultz

Marketing Manager

Autographix is a leading manufacturer of computer-generated presentation graphics systems—the top-of-the-line Autographix 200A, the highly-affordable Autographix 150, and the presentation software package Autographix 35. A nationwide network of Autographix Imaging Centers provides high-quality 35mm slides, transparencies, color prints, and black-and-white stats.

AVL

Booth 448

Paul Constantine
Vice President**

CELCO designs and manufactures state-of-the-art electron-beam control devices including CRT deflection yokes, focus coils, deflection amplifiers, function generators, hi-speed and resolution CRT display systems, and Color Film Recording systems.

CELCO is the designer and manufacturer of The **CELCO MACHINE**: an advanced ultra-high resolution CRT Color Film Recording System (16mm-105mm to 8x10").

The CELCO MACHINE high-speed, high-resolution CRT Color Film Recorder (& business graphics, animation, LANDSAT output) will be in operation and on display at the CELCO exhibit booth at SIGGRAPH '85.

CHARTPAK**Booth 1631****19700 Fairchild, Suite 230****Irvine, California 92715****(714) 752-4999****Jean E. Falco****Marketing Manager**

On display will be the Chartpak System 640 with Picture This... paint software CHART for automatic business graphics, ARTWORK 3-D/High resolution software and video-in. The System 640 runs on an IBM PC.

CHORUS DATA SYSTEMS, INC.**Booth 1453****6 Continental Blvd.****P.O. Box 370****Merrimack, New Hampshire 03054****(603) 424-2900****Richard Harrison****Product Marketing Manager**

Chorus will feature the IMiGIT PLUS low cost/high resolution image creator and graphic editing system. Images are captured with PC-EYE™ and an ordinary color video camera in their original color at a resolution of 512² by 256 colors. Captured images can then be enhanced via graphic editing tools such as: 1000 x 2000 virtual page resolution, annotation, coloring, scaling, word processor integration, line drawing and many others.

CHROMATICS, INC.**Booth 442****2558 Mountain Industrial Blvd.****Tucker, Georgia 30084****(404) 493-7000****Peggy Grimm****Manager, Marketing Communications**

Chromatics features the CX 1280 and CX 1536 Colorgraphic Display Systems, and the CAECO VLSI Designer III Workstation. The CX systems fully support GKS, and provide drawing speeds up to 500,000 fully transformed vectors/sec. Resolution ranges from 1280 x 1024 (CX 1280) to 1536 x 1152 (CX 1536). The CX 19-inch 60Hz non-interlaced monitor can display 16,000,000 colors. CAECO's Designer III Workstation, combining Chromatics' CX 1400 and Sun Microsystem's Model 2/120, features schematic capture, layout and DRC.

CHYRON CORPORATION

Booth 1729

**265 Spagnoli Road
Melville, New York 11747
(415) 332-7070
Larry Minzer
National Sales Manager for
Video Products**

**User Group Contact: Michael S. Piper
Manager, Engineering Services**

Chyron Corporation will exhibit two products at SIGGRAPH '85:

(1) New Chameleon Paint System featuring: NTSC Resolution of 768 x 482; 256 colors simultaneously displayable; Digitizing tablet and pen; Removable 10 Megabyte hard disc; NTSC or PAL and RGB output; Internal genlock and keyer; 256 level-of-gray camera capture (option); Graphic drawing tools; Cut and paste with resizing, etc.; and User definable brushes.

(2) VP-2 Character Generator featuring: 1510 x 482 Resolution; 16 colors displayable out of 512; Unlimited character overlap; Unlimited edge types; and 6 font capacity selectable from 160.

CMP PUBLICATIONS, INC.

Booth 1654

**600 Community Drive
Manhasset, New York 11030
(516) 365-4600**

Electronic Engineering Manager: Provides management directions for technical leaders. VLSI Design: The magazine for leading-edge technology.

COHU, INC., ELECTRONICS DIVISION Booth 254

5755 Kearny Villa Road
San Diego, California 92123
(619) 277-6700
Loren Whitley
O.E.M. Products Manager

User Group Contact: Loren Whitley

Cohu manufactures high performance quality closed circuit television cameras and systems. Products include high resolution, digitizable and other specialized video cameras. Cameras are available in single self-contained versions or two-piece systems for machine vision, microscopy and other measurement applications. We build to suit your needs. COHU for CCTV.

COMMODORE BUSINESS MACHINES Booth 1452

1200 Wilson Drive
West Chester, Pennsylvania 19380
(215) 431-9100
Frank Leonardi
Vice President

Commodore Business Machines will introduce the new Amiga-PC to the computer graphics field. The Amiga-PC combines outstanding graphics, animation and sound capabilities in one totally integrated package that's designed for use by the novice as well as the expert.

COMPUTER-AIDED ENGINEERING Booth 1441

Penton Plaza, 1111 Chester Avenue
Cleveland, Ohio 44114
(216) 696-7000
Ed Hypaver
District Manager

Computer-Aided Engineering is a technical journal which features editorial and advertising directed to the professionals who specify and buy computer-based equipment for design and manufacturing applications.

**COMPUTER GRAPHICS
LABORATORIES, INC.**

Booth 1330

**405 Lexington Ave.
New York, New York 10174
(212) 557-5130
Mark Miller
Promotion Director**

CGL, Inc. introduces IMAGES II +, an enhanced performance computer-based artist workstation. A full-color graphics system, IMAGES II +, offers many new features: *Full-color Scanning* from video camera, or freeze frame video. *Real-time Grab* will grab a single frame of video from a VTR. *Single Frame Record* supports remote operation of the VTR. *High Resolution Business Graphics and Text*. *High Resolution Rendering*. *Interpolation* produces animated effects with business graphics and text. Output at resolutions of 512 to 4096.

Managing Director

Fully integrated system for the production of high quality computer generated and video image.

DAIKIN INDUSTRIES LTD. **Booth 122**

c/o Daikin U.S. Corporation
910 Bern Court, Suite 100
San Jose, California 95112
(408) 280-6004
Katsutomo Kishimoto
Deputy General Manager

Daikin Industries designs, manufactures and markets ultra-high performance, intelligent color graphic display terminals. COMTEC DS301B is a powerful tool for productivity enhancement in a number of sophisticated CAD/CAM/CAE and image processing applications. Very high speed display processing is accomplished by using internal functionally separate micro processor architectures. For example, hidden surface removal, smooth color shading 3D Cursor, depth cueing and translucency are done locally to enable fast, realistic displays using solid models and surface models.

DALIM

Booth 900

For communicating ideas and information, quickly and effectively, the D-PICT family of graphics software offers a comprehensive and easy-to-use system for producing presentation quality graphics for business, science and application development. In addition, D-PICT software supports a complete range of graphics devices and runs in a variety of computer environments.

dB TIMES**Booth 145**

**P.O. Box 3491
Fort Saskatchewan, Alberta
Canada T8L 2T4
(403) 998-7683
Isabel Summers
General Manager**

Zypryx, designed and manufactured by Hartman Technica, is a 6-axis isometric 'force operated' joystick input device, using an RS232 feed-through interface. Direct output proportional to force or a positioning mode in which force controls velocity is available for each axis; scale and off-set may be programmed by the user. A prototype will be on display.

DE GRAFE**Booth 1550**

**25-27 rue Bargue
Paris, France 75015
(1) 734.97.55
Pierre A. Cotte
Managing Director**

DE GRAFE Graphic Computer is fully interactive. This graphic pad was designed for creative people without a computer background and allows 256 colors among 16 million, digitalization in real time and the mixing of two video sources.

DESIGN TECHNOLOGY

Booth 1351

**7760 Vickers St.
San Diego, California 92111
(619) 268-8194
Sherry Kuzara
Vice President, Marketing**

Design Technology, the leading manufacturer of high-resolution light pens, will be introducing two new models. The DT2000 is designed for applications up to 2000x2000 resolution. The DT184 is a low-cost, high-performance pen with a touch surface switch. Both pens feature state-of-the-art surface mount technology.

DICOMED CORPORATION

Booth 836

**12000 Portland Ave. S., P.O. Box 246
Minneapolis, Minnesota 55440-0246
(612) 885-3000
Laura Winter
Manager, Marketing Communications**

**User Group Contact: Kat Gilchrist-Roberts
Manager, Education**

DICOMED manufactures computer systems for sophisticated design and imaging of graphics for visual communications. Range of products includes Presenter™ PC business graphics software, the D38 Design Systems, IMAGINATOR™ Design Console, FLEXSCAN™ Scanner and D148 series of Image Recorders. The primary use is the production of slides and overheads for audio-visual purposes.

DIGITAL ENGINEERING, INC.**Booth 436****630 Bercut Drive****Sacramento, California 95814****(916) 447-7600****Patrick Struhs****Sales Manager****User Group Contact: Terri Gardner
Sales**

World's first high-speed, integrated bit mapped architecture in a low-cost graphics terminal. Featuring high resolution and drawing speeds of one million pixels per second. Available in monochrome (four levels of gray) and color (16 displayable colors) with non-interlaced monitors. Terminal emulations include DEC VT220, VT240 and VT241, Tektronix 4010, 4014, 4027 and 4105.

DIGITAL EQUIPMENT CORPORATION**Booth 1206****146 Main St.****Maynard, Massachusetts 01754****(617) 493-7440****Kevin W. Hughes****Marketing Communications**

Products displayed in the Digital Equipment Corporation booth will include the Professional 380 Series Graphics Workstation, the new VAXstation II (MicroVAX II—Based) Workstation, the new VAXstation 520 Color Workstation and Digital Equipment Corporation's line of graphics terminals and hard copy products featuring the LCPO1 Ink Jet Color Printing System.

DUBNER COMPUTER SYSTEMS**Booth 123****158 Linwood Plaza****Fort Lee, New Jersey 07024****(201) 592-6500****Alan Schoenberg****Director of Marketing**

**User Group Contact: Keith Thomson
Software Engineer**

Dubner Computer Systems manufactures a complete line of Video Graphics Systems for professional and broadcast television. At SIGGRAPH '85, Dubner will be exhibiting the CBG-2, a graphics and animation system including a character generator, a paint system, a 3-D modeling program and real-time digital animation playback from disk; and the VPS-1, a full-color video paint system based on a 4-field frame store.

DUNN INSTRUMENTS
Booth 728

**544 Second St.
San Francisco, California 94107
(415) 957-1600
Lyn Cameron
Director of Marketing**

DUNN Instruments will demonstrate the full line of color graphic cameras which output crisp high resolution color film from most RGB graphic terminal systems. Film formats include 35mm, SX-70, 4 x 5, 8 x 10, Kodak Instagraphics, 16mm and 35mm Cine, and Kodamatic. Dunn Instruments will exhibit the model 635, ProColor and Microcolor cameras.

DYNAIR ELECTRONICS, INC.
Booth 121

**5275 Market St.
San Diego, California 92114
(619) 263-7711
Thomas R. Meyer
Product Manager**

DYNAIR Electronics, Inc., a San Diego-based manufacturer of high resolution RGB graphics switching and distribution equipment will present a modular 1000 line RGB graphics switching system. Modular units which switch five (5) RGB signals to a single display and up to 1000 RGB signals to 1000 displays will be shown.

PRODUCTS: Five drafting plotter models; reduced HP 7580-family prices. Business graphics solutions with small format plotters. Independent software vendor solutions for business, technical and CAD applications. **NEW:** Disposable drafting pens; refillable drafting pens for the HP 7475A plotters. **INTRODUCING:** HP 2393A Graphics Terminal, dual mode 512 x 390 or 640 x 400 resolution, with Tektronix 4010/4014 compatibility. Other new products.

HITACHI AMERICA, LTD.

Booth 1126

50 Prospect Ave.

Tarrytown, New York 10591-4698

(914) 332-5800

Kenzo Isomoto

Assistant Manager

A full range of high resolution RGB color monitors including 14", 19" and 26" displays and 400 lines per inch color thermal printer will be featured. The HDH-111B digitizer that allows interactive graphics, data entry and menu selection to be performed will also be displayed.

HOUSTON INSTRUMENT

Booth 528

8500 Cameron Rd.

Austin, Texas 75783

(512) 835-0900

Kevin Higginbotham

Supervisor, Promotions

Houston Instrument is a 26-year Texas-based veteran of the computer graphics peripherals industry. We manufacture a complete line of digital plotters and graphic digitizers used in business graphics as well as architectural and engineering applications. Houston Instrument will exhibit the new 14-pen DMP-51/52 MP Series precision drafting plotters at SIGGRAPH.

HUMAN DESIGNED SYSTEMS, INC.

Booth 655

3440 Market St.

Philadelphia, Pennsylvania 19104

(215) 382-5000

Roger S. Pincus

Executive Vice-President for Marketing

The HDS200 Family of display terminals, designed to meet the needs of engineering,

scientific and business computer users includes ANSI, graphics and APL models. The HDS200G ANSI/graphics terminal combines Tektronix 4010/4014, Visual and Retrographics compatibility with a 15" quality monitor (720 x 350 resolution) and an appealing and extremely compact housing.

IBIS SYSTEMS, INC.**Booth 1457**

**5775 Lindero Canyon Road
Westlake Village, California 91362
(818) 706-2505
Richard W. Krueger
Manager, Applications Engineering**

IBIS manufactures the Model 1400 Disk Drive, with a storage capacity of 1.4 gigabytes and a data transfer rate of 12 megabytes per second. This high performance product is utilized in scientific computing and signal processing applications. IBIS products are based on proprietary 14-inch thin-film media and thin-film heads.

ID SYSTEMS**Booth 936**

Lee LeFleur
Sales

Integrated Computer Technologies offers the answer in the form of a full-featured CAD system that is suitable for a wide range of applications. I.C.T. has defined a new price/performance standard for CAD Systems. The IC-1200A is a 2-dimensional turnkey system which outperforms competitive systems.

INTERACTIVE MACHINES, INC.

Booth 117

733 Lakefield Road
Westlake Village, California 91361-2694
(818) 707-1880
Kenneth E. Dozier
President/CEO

IMI manufactures, markets and supports powerful computing systems designed for applications that require realtime 3D graphics. The IMI 400 and 500 products integrate the IMI graphics processor with a powerful general-purpose computer, UNIX operating system and Ethernet to provide the ideal solution for complex engineering, scientific and animation applications.

INTERNATIONAL IMAGING SYSTEMS (I²S)**Booth 356**

**1500 Buckeye Drive
Milpitas, California 95035-7484
(408) 262-4444
David B. Racionzer
Business Manager, Earth Resources**

**User Group Contact: Frank Croft
Manager, Applications Engineering**

I2S products range from add-on image array processors to turnkey workstations and custom systems. In addition, I2S is a primary supplier of OEM Digital Image Processors to the medical and industrial imaging markets. This year, I2S, will introduce high speed networking to interconnect workstations and mainframes within the System 600 Distributed Processing Environment together with a real-time disk option on the recently introduced M6700 Image Processor.

IRIS GRAPHICS**Booth 1618**

**41 Elm St.
Stoneham, Massachusetts 01280
(617) 438-1500
Tad Thompson
Communications Manager**

IRIS Graphics will introduce its new 2044 Color Ink Jet Printer. It produces high resolution, full-color hardcopy images in sizes up to 34 by 44-inches when linked to virtually any turnkey digital computer-aided design system. Images are at 240 by 240 dots per inch and applications include IC check plots, 3D modeling, complex process and instrumentation diagrams, remotely-sensed data and geographic and demographic mapping data.

ISLAND GRAPHICS CORPORATION

Booth 1738

**One Harbor Drive, Suite 300
Sausalito, California 94965
(415) 332-5400
Diane Ascher
Show Coordinator**

Island Graphics Corporation supplies powerful paint programs, business graphics packages and animation software to OEMs. Island's software is written in C and is available under both MS-DOS and Unix. Island is unique in that it tailors each program to the OEM's requirements and does not compete with its own customers.

ISSCO

Booth 716

**10505 Sorrento Valley Road
San Diego, California 92121
(619) 452-0170
John Otti
Director, Sales Programs**

**User Group Contact: Louise Courtier
Vice President, Contracts**

ISSCO develops, markets and supports a broad line of visual information system software used on mainframe and mini-computers to access and manipulate data and convert it into high quality graphics: bar, line, and pie charts, maps and diagrams and word charts in two and three dimensions. ISSCO celebrates its 15th anniversary in 1985.

C. ITOH ELECTRONICS, INC.

Booth 1710

**5301 Beethoven St.
Los Angeles, California 90066
(213) 306-6700
Ken Sandell
Marketing Specialist**

The new C. Itoh 24 and 36 inch electrostatic plotters are unique in the world of CAD/CAM output devices. The CI-2400 and CI-3600 both combine high resolution of 400 DPI and integrated vector-to-raster conversion for the first time in an electrostatic plotter.

JUPITER SYSTEMS, INC.**Booth 136A**

**1100 Marina Village Parkway
Alameda, California 94501
(415) 523-9000
Fred Dunn
Product Manager**

The Jupiter 12 Graphics System is a high performance color graphics terminal/workstation. The 1280 x 1024 screen resolution at a 60 Hz non-interlaced refresh rate offers up to 28 bits per pixel. The system is available as a terminal, Unix 4.2 BSD workstation, or board set for OEM's.

KING CONCEPT CORPORATION**Booth 255**

**5190 W. 76th St.
Minneapolis, Minnesota 55435
(612) 831-4466
Dan Lucariello
Director of Sales and Marketing**

Enterprise processes all standard photographic film and formats from 35mm up to 16 x 20 sheets including long rolls and disc. The machine features a one-piece molded outer shell with a microcomputer control system and membrane touch switches on the control panel. A built-in battery back-up system is standard equipment in each processor.

KLOSS VIDEO CORPORATION**Booth 553**

**640 Memorial Drive
Cambridge, Massachusetts 02139
(617) 577-1000
George Hand
Professional Sales**

VideoBeam® Model 2000 Professional Projection Monitor. 6.5-foot or 10-foot diagonal flat or curved screen images from floor or ceiling mount. NTSC, RGB/TTL (IBM-PC and 3279 compatible), Analog RGB inputs standard. Wideband circuitry for classroom 132-character or industrial and scientific hi-res graphics displays, high definition TV development, or full-resolution NTSC monitoring.

KMS ADVANCED PRODUCTS, INC.

Booth 1246

**3850 Research Park Drive, P.O. Box 1778
Ann Arbor, Michigan 48106
(313) 769-1100
Arnold Proehl
Product Manager**

Video Multiplexers from KMS permit multiple workstations to access a single hard copy device. These cost-effective devices are expandable in the number of connected workstations. Remote operation of the copier is performed at the workstation, through the multiplexer. KMS Video Multiplexers are already compatible with most popular video hard copy devices.

KMW SYSTEMS CORPORATION

Booth 424

**8307 Highway 71 W.
Austin, Texas 78735
(512) 288-1453
Jean Richards
Director Marketing Administration**

KMW will announce its new Series of Vector to Raster Converters and will display said series driving an electrostatic plotter. Also on display will be KMW's low cost VP10 graphic element processor that accepts graphic elements from a mainframe, rasterizes it and outputs to most raster hard copy devices.

KONTRON ELECTRONICS, INC.**Booth 1051**

**630 Price Ave.
Redwood City, California 94063
(415) 361-1012
Kenneth A. Charles
Product Manager,
Image Processing Systems**

Manufacturers of image processing systems. Stand-alone systems; add-on systems for an existing DEC-VAX host computer; and development systems using a 68000-based host computer, are available. Programming capability is provided for FORTRAN, PASCAL or C. Personal Computer CAD.

KURTA CORPORATION**Booth 456**

**4610 S. 35th St.
Phoenix, Arizona 85040
(602) 276-5533
Joanne Rush
Manager, Marketing Programs**

Kurta Corporation, a pioneer in the computer graphics industry, designs and manufactures a full line of graphics tablets and digitizers for the CAD/CAM/CAE and microcomputer workstation marketplace. Kurta recently introduced the revolutionary Penmouse +™ Input Device system which has only two components: a cordless pen and a 1/4" tablet.

LAZERUS PRODUCTIONS**Booth 1456**

**2821 Ninth St.
Berkeley, California 94710

Joanne P. Culver
Graphics Divison**

THE MEGA MACHINE...the high-performance computer for generating/animating 3-D Solids in Real-Time. MEGA has 1 Mbyte Local Memory expandable to 16 Mbyte; 4K Writable Control Store; Displays hi-res (1024 x 768 x

16/32) and NTSC (512 x 486 x 16/32) with sync generator/integral genlock. Ultimate graphics for IBM PC, AT, XT compatibles.

LEAR SIEGLER INC., DATA PRODUCTS DIVISION

Booth 1614

**901 E. Ball Road
Anaheim, California 92805
(714) 778-3500
Chuck Kewish
Product Manager**

Lear Siegler's Data Product Division, a pioneer in the display terminals market, will introduce its new 7105 and 7107 color graphics terminals. Designed for use in demanding CAD/CAM, scientific, process control and business applications, these terminals feature 640 x 480 resolution, 16 displayable colors from a palette of 4096 and numerous additional features, as well as independent color alphanumerals. In addition, the model 7107 features the display list capability which permits local manipulation and modification of graphics objects.

LEXIDATA CORPORATION

Booth 736

**755 Middlesex Turnpike
Billerica, Massachusetts 01865
(617) 663-8550
Joyce M. Anderson
Marketing Communications Specialist**

Lexidata designs, manufactures, sells and services high performance, ergonomically-designed graphics display systems used in defense, CAD/CAM, oil, medical and graphic arts applications. Products to be demonstrated include the LEX 90™ family, featuring a display list language and a virtual window manager; SOLIDVIEW™, Lexidata's patented solid modeling display technology; and the System 2000™ intelligent graphics terminal, featuring VT100™ and Tektronix Plot-10™ compatibility.

LUCASFILM LTD. (PIXAR)**Booth 148**

**P.O. Box 2009
San Rafael, California 94912
(415) 499-0239
Lynn DeKeyser**

The Pixar Image Computer[™] is the first general-purpose machine able to store, manipulate and display images with the spatial and color resolution of film. The system has the high resolution picture memory, fast picture processing speed, and programmability to excel in several applications, such as medical imaging seismic analysis, prepress and remote sensing.

LUNDY ELECTRONICS & SYSTEMS, INC.**Booth 940**

**One Robert Lane
Glen Head, New York 11545
(516) 671-9000
Barbara Brehm
Marketing Support Manager**

Lundy will display its new line of graphics display products. This includes the UltraGraf III color raster 3-D workstation, Lundy 2000 and 3000 stand-alone workstations and the GTC-327 terminal which operates with 4027-based software. All Lundy products are supported by the company's large and experienced service organization.

LYON LAMB VAS INC.**Booth 556**

**4531 Empire Ave.
Burbank, California 91505
(818) 843-4831
Gary Hooks
Sales Manager**

**User Group Contact: Sheldon Liebman
Director of Marketing**

Lyon Lamb introduces ENC VI Color Encoder/Sync Generator for RGB to NTSC conversion. Also showing VAS family of videotape animation controllers for precise frame by frame recording, editing and frame grabbing on a variety of Broadcast 1/2", 3/4" and 1" VTRs, including the Sony BVH-2500.

MACHINE DESIGN

Booth 1441

**Penton Plaza, 1111 Chester Avenue
Cleveland, Ohio 44114**

(216) 696-7000

Ed Nypaver

District Manager

Machine Design is a technical journal which features editorial and advertising directed to the professionals who specify and buy computer-based equipment for design and manufacturing applications.

MASSCOMP

Booth 257

One Technology Park

Westford, Massachusetts 01886

(617) 692-6200

Rattan Dhar

CAE Marketing Manager

MASSCOMP will display a family of systems for scientific and technical markets using MASSCOMP's Virtual Memory RTU. Systems on display include an 8-slot deskside, a 15-slot deskside dual processor system and a large cabinet configuration system each supporting high resolution monochrome and color graphics, Ethernet LAN, integrated array, and floating point processors. Each of the systems will be running engineering design application in mechanical or electronics.

MATRIX INSTRUMENTS, INC.**Booth 1216**

**1 Ramland Road
Orangeburg, New York 10962
(914) 365-0190
Kate Bochonko
Marketing Communications Manager**

**User Group Contact: John Patberg
Director, Marketing**

Matrix Instruments provides digital and video high resolution color film recorders for making 35mm slides, and 8 x 10 prints and transparencies for business presentation graphics using a wide variety of micro, mini and mainframe computers and compatible graphics software. Of key interest to attendees will be a) PCR-Personal Color Recorder which creates professional quality low-cost 35mm slides of business graphics and computer art in an office environment and b) QVP (Quick Vector Processor), a vector-to-raster co-processing system which drives the Matrix family of digital film recorders, as well as other color hard-copy output devices.

MATROX ELECTRONIC SYSTEMS LTD.**Booth 1336**

**1055 St. Regis Blvd.
Dorval, Quebec Canada H9P 2T4
(514) 685-2630
Stephen Davies
Marketing Representative**

MATROX is a world leader in the design and manufacture of board level graphics display controllers. MATROX's exhibit will feature demonstrations on the latest state-of-the-art graphic and image processors including IBM PC compatible controllers. Also on display will be MATROX's 1024 x 768 interactive graphics terminal: GXT-1000.

MCI/QUANTEL

Booth 1236

**3290 West Bayshore Road
Palo Alto, California 94303
(415) 856-6226
George Grasso
President
Hugh Boyd
Executive Vice President**

**User Group Contact: Tony Redhead
Design Consultant**

MCI/QUANTEL is exhibiting the most powerful TV graphics creation system available—the combination of Quantel paint box and digital library system. Artists use paint box to create original art, modify frozen live video, add captions and animate segments. The library system captures, stores and presents stills and also has production effects. Paint boxes and library systems can be interfaced via QUANTEL's digital link.

MEASUREMENT SYSTEMS INC.

Booth 147

**121 Water St.
Norwalk, Connecticut 06854
(203) 838-5561
Donald W. Fisher
Marketing Manager**

Measurement Systems offers a broad line of position entry devices including joysticks, stiff sticks, track balls and mouse controls. They are available in multi-axis configurations and with a variety of output interfaces including analog, pulse, coded digital either parallel binary or serial RS 232C or RS 422.

MEDIA CYBERNETICS, INC.

Booth 1651

**7050 Carroll Ave.
Takoma Park, Maryland 20912
(301) 270-0240
Para M. Wodiska
Marketing Manager**

Media Cybernetics, Inc. has developed and licensed fundamental device independent graphics and imaging tools for the PC environment. Products to be displayed include: The HALO graphics tools; Dr. HALO II; Nimbus; and Image Pro.

MEGATEK CORPORATION**Booth 636**

**9645 Scranton Road
San Diego, California 92121
(619) 455-5590
Gerry MacDonald
Manager, Exhibits and Events**

Megatek will exhibit the company's complete line of high resolution, high performance computer graphics systems including the MEGAstation 3300.

MEGAVISION**Booth 1736**

Santa Barbara, California 93160
(805) 964-1400
Ken Boydston
Applications/Systems**

**User Group Contact: Richard Colvin
Director of Engineering**

MegaVision offers the 1024XM, a 44MIPS interactive time thousand line image acquisition, processing and display system. To augment the performance of the 1024XM neighborhood processor, MegaVision announces the Pixel Data Flow Board. The PDF will perform a variety of recursive and global operations at interactive speeds on million pixel images.

MERCURY COMPUTER SYSTEMS, INC.**Booth 756**

**600 Suffolk St.
Lowell, Massachusetts 01854
(617) 458-3100
John Montelione
Vice President, Marketing**

The ZIP 3200 programmable array processors include the 3216 (block floating point) optimized for signal & image processing, and the 3232 (floating point) optimized for scientific and graphic processing. They easily interface to popular micros, can acquire data either through a framegrabber on the host or directly from A/Ds, cameras, or Mercury's ZIP Video I/O Converter.

METHEUS CORPORATION

Booth 1416

5510 NE Elam Young Parkway

Hillsboro, Oregon 97123

(503) 640-8000

John Hughes

Vice President of Sales and Marketing

Metheus Corporation designs and manufactures high-performance color graphics subsystems, supplying many of the world's most-demanding OEM's in CAD, imaging, simulation and graphic arts. Metheus will introduce its Ω 200/PC series of IBM-PC and AT&T-compatible color display controllers, featuring resolution of 1024 x 768, state-of-the art drawing speed and PIXBLT pixel-block moves. Metheus will also demonstrate its new Ω 2530 controller, including front-end processor and display-list memory and two Ω 530 display controllers in imaging applications.

MICROTOUCH SYSTEMS, INC.

Booth 1724

400 W. Cummings Park

Woburn, Massachusetts 01801

(617) 935-0080

James D. Logan

President

The MicroTouch Screen, a new touch technology, employs a glass sensor and offers a unique combination of durability, optical clarity, high resolution and low cost. Kits and monochrome or color touch monitors are available. A complete set of software tools is also available for developing touch screen applications.

MINDSET CORPORATION**Booth 956****965 Maude Ave.****Sunnyvale, California 94086****(408) 737-8555****Mary Michelli****Marketing Services Coordinator**

MINDSET CORPORATION will be demonstrating its line of cost effective computer graphics systems: the Professional Graphics System and the Professional Video/Graphics System. MINDSET will feature its advanced paint, titling and real-time animation software, as well as its newly introduced Image Capture System that instantly digitizes any NTSC source image.

MINOLTA CORPORATION**Booth 1352****101 Williams Drive****Ramsey, New Jersey 07446****(201) 825-4000****John T. McCasland****Sales Manager**

Minolta TV Color Analyzer II—To objectively set white balance of a color monitor. Meters to measure Luminance, Illuminance and Color Temperature of a light source.

MITSUBISHI INTERNATIONAL CORPORATION**Booth 1253****520 Madison Ave.****New York, New York 10022****(212) 605-2344****Wayne G. Dengel****Sales/Marketing Manager**

A graphics workstation and family of color printers will be exhibited and demonstrated. GRAPHICA COMPUTER CORPORATION high resolution systems are state-of-the-art hardware and software solutions designed to meet the needs of performance minded users. SHINKO ELECTRIC color printers, featuring thermal transfer technology and low consumables cost, offer high resolution B-size archival quality documents.

**User Group Contact: Jim Anderson
Director Sales and Marketing**

High density Discrete Wired Circuit Boards for prototype and production. Meets ANSI/IPC-DW-425. Advanced manufacturing services available for surface mountable devices and projects requiring engineering intervention.

NATIONAL COMPUTER GRAPHICS ASSOCIATION

Booth 1655

**2722 Merrilee Drive, Suite 200
Fairfax, Virginia 22031
(703) 698-9600
Pamela Wellman
Exhibits Manager**

National Computer Graphics Association will have information on its conferences and expositions. Available will be *Computer Graphics Today*, NCGA's official publication, published by Media Horizons Inc. Membership services also are provided.

NEC ELECTRONICS INC.

Booth 443

**401 Ellis St.
Mountain View, California 94039
(415) 960-6000
Mark Lapin
Public Relations Manager**

NEC imaging/graphics semiconductors include: the uPD7220A, a high-performance graphic display controller; the uPD41264, a 256K Dual Port Video RAM which teams with

7220A to eliminate CPU-graphics-memory bottlenecks; the uPD41221, a 256K Serial Access Memory; and the uPD7281, the first non-von Neumann Image Pipelined Processor.

NEO-VISUALS, INC.

Booth 1557

**201 Consumers Road, Suite 202
Willowdale, Ontario
Canada M2J 4G8
(416) 491-8485
Steve White
Vice President, Technology**

Neo-Visuals will present high quality, device independent, 2D/3D modeling, simulation and animation systems.

NEW ENGLAND TECHNOLOGY GROUP

Booth 1732

**400 W. Cummings Park, Suite 6000
Woburn, Massachusetts 01801
(617) 938-8833
Harry St. Onge
Vice President, Marketing**

Tech Graphics II: Computer graphic design station. Includes freehand illustration, business graphics software, video scanning and special effects. Output to 35mm, 4" x 5", 8" x 10", video, etc.

NEW GEA CORPORATION

Booth 328

**335 Oser Ave.
Hauppauge, New York 11788
(516) 434-8400
Nick Hughes
Director of Marketing**

NEW GEA is exhibiting its full line of distributed processing high performance intelligent graphic displays. The newest in the product line is the NWX-237 3D graphic display that supports 4096 simultaneous colors, 8 MB local display list and ultra fast writing speeds.

NICOLET'S COMPUTER GRAPHICS DIVISION

Booth 416

**777 Arnold Drive
Martinez, California 94553
(415) 372-7568
Susan J. Keeley
Marketing Communications Supervisor**

**User Group Contact: Andrew Sorensen
Senior Applications Engineer**

Nicolet's Computer Graphics Division will exhibit its comprehensive line of ZETA digital pen plotters. The ZETA 8 and ZETA 887 (with a built-in, direct interface to IBM cluster controllers) are ideal for business graphics applications. A choice of four ZETA plotters meet CAD/CAM plotting needs—the ZETA 824 and ZETA 824CS (24" plotters) and the ZETA 836 and ZETA 836Cs (36" plotters). The new Deluxe Stand with automatic paper feed and take-up will also be demonstrated.

N.I.S.E., INC.

Booth 1151

**20018 State Road
Cerritos, California 90701
(213) 860-6708
Roelof R. Jonker
General Manager**

"REMBRANDT" 3500-C. The Low Cost Color Graphics Film Recorder from N.I.S.E., Inc. is available for both RS-170 or RS-343 with RGB or TTL Video Input. No knobs, no dials, simple keyboard entry powered by microprocessor. Camera options from 35mm to full 8 x 10. Many now in use and still growing. Customer and dealer inquiries invited.

NOVA GRAPHICS INTERNATIONAL

Booth 1146

**1015 Bee Cave Woods
Austin, Texas 78746
(512) 327-9300
Harold Blair
President**

**User Group Contact: Clinton N. Waggoner
Senior Vice President**

Nova Graphics International is a single source vendor for standard graphics software, supporting processors ranging from the IBM PC to the Cray. NOVA*GKS, tightly coupled to NOVA*CGI, is a distributed, level 2B implementation of GKS with both Fortran and C bindings, and is now available for the IBM 3270 PC/G/GX.

**NUMBER NINE COMPUTER
CORPORATION****Booth 1426**

**691 Concord Ave.
Cambridge, Massachusetts 02138
(617) 492-0999
Will Frentz
Executive Vice President**

**User Group Contact: Stan Bialek
President**

Number Nine introduces the new single-board REVOLUTION 1280 x 4 PC graphics controller board, the industry's first PC graphic board capable of running at 100 MHz pixel rate. The board has a 2K x 2K pixel addressable window and a non-interlaced 1280 x 1024 viewable window, 4-bit planes deep. The entire REVOLUTION board family will be exhibited including the 512 x 512 x 8 bit plane, the 512 x 512 x 32 bit plane and the 1024 x 1024 x 8 bit plane board configurations.

NUMONICS CORPORATION**Booth 156**

**418 Pierce St.
Lansdale, Pennsylvania 19446
(215) 362-2766
Morris B. Bowles
National Sales Manager**

NUMONICS manufacturers a complete line of restrained and free-cursor digitizers for the OEM and the end-user. The MODEL 2200 is a

low-cost, compact electromagnetic tablet with user-specification of output data in absolute measurement or number of user-defined minimum increments. The 5400 SERIES are microprocessor-based plotters with ASCII control commands, embossed roller design for low-inertia paper transport and produces exceptionally high-line quality. The 5600 SERIES Multi-Pen Plotters automatically exchanges its magazine mounted pens, has grit-rollers and has syncho-belt drive for pen position control.

Anti-glare glass panels and filters that virtually eliminate glare from the face of visual displays while maintaining high character resolution.

OMNICOMP GRAPHICS CORPORATION

Booth 1436

**1734 West Belt North
Houston, Texas 77043
(713) 464-2990
Tony Masraff
President**

Omnicom Graphics Corporation manufactures and markets high performance, high resolution color graphics display subsystems used in CAD/CAM, process control, geo-seismic, biomedical, artificial intelligence and simulation. Omnicomp will be introducing the OMNI 2000 GDS, a modular family of high end graphics display subsystems. Additionally, Omnicomp will exhibit the OMNI 1000 GDC, a GKS compatible, 1024 x 1024 x 8 resolution

graphics display controller and complimentary software libraries and specialized hardware interface products. Omnicomp markets its products to OEM's, systems integrators and sophisticated end users.

**AXBERRY DIV. OF RICHMARK
CAMERA SERVICE, INC.**

Booth 1646

**180 Broad St.
Carlstadt, New Jersey 07072
(201) 935-3000
James Aneshansley
Director of Marketing**

Oxberry will be exhibiting the MX-Cine camera for off-loading computer graphic systems which use the Matrix Q.C.R. Film Recorder. Also to be shown is the MX-4 Slide Camera for business graphics and the Pro 3 Animation Stand for conventional business graphics production.

**PANASONIC INDUSTRIAL COMPANY
COMPUTER COMPONENTS DIVISION**

Booth 348

**One Panasonic Way
Secaucus, New Jersey 07094
(201) 392-4077
Margaret Lopez
Marketing Assistant**

A 200 and a 400 DPI Color Thermal Transfer Printer, 19" High Speed Graphic Terminals, Ultra High Resolution Color CRTs and Data Displays, and two 2 PC Workstations will be on display.

PANASONIC INDUSTRIAL COMPANY
Booth 355

**One Panasonic Way
Secaucus, New Jersey 07094
(201) 392-4603
Marty Frange
Product Manager**

Panasonic will display its Optical Memory Disc Recorder line including the TQ-2025; a black and white read/write system; the TQ-2024; a playback only system in color; the TQ-2023; a color read/write system capable of storing up to 13.3 minutes of video.

PARALLAX GRAPHICS INC.

Booth 248

**1095 E. Duane Ave.
Sunnyvale, California 94086
(408) 720-1600
M. Michael Strozza
Vice President, Marketing**

Parallax Graphics offers OEMs and system integrators three series of high-speed color graphics and video/graphics controllers: the 600, 1000 and 1200 Series. These intelligent controllers draw complex images at 88 million pixels/second, offer real-time video digitization and overlay and are available for PC/AT, VMEbus, Multibus and Q-bus.

PARIS 8 UNIVERSITY OF ARTS AND TECHNOLOGIES OF IMAGE

Booth 900

**2 Rue de 12 Liberte
Saint-Denis Cedex 02, France 93526
(1) 821-6364
Edmond Chouchot
Director de la Formation**

A.T.I. (ARTS & TECHNOLOGIES OF IMAGE) is a special educational university programme leading up to a master's degree. It trains the art students in computer graphics and computer animation. The studies last two years. The courses are the following:
Introduction to computer graphics. Vax 11/780, PDP 11, SM 90.
Programmation 2D, 3D. Vax 11/780, SM 90.
Digital video. Apple 2.
Aesthetics of digital image, arts and technologies.
Others activities: artistic research and computer graphic software.

PERCEPTICS CORPORATION**Booth 1055**

**Pellissippi Corporate Center,
Pellissippi Parkway
Knoxville, Tennessee 37932
(615) 966-9200
B. James George
Director of Marketing**

Perceptics Corporation is a Knoxville, Tennessee, high technology company specializing in the field of image processing, computer vision and machine intelligence.

PERITEK CORPORATION**Booth 1040**

**5550 Redwood Road
Oakland, California 94619
(415) 531-6500
Joannie Shizuru
Customer Service Administrator**

Available for viewing at Peritek's Booth #1040 is the new Perigraf™ series of small, desk-side systems for graphics development and custom graphics, OEM application. The Perigraf™ systems series complements Peritek's existing line of performance-oriented hardware for the Q-Bus and unibus. Peritek board and accessory products include a full line of color and monochrome raster graphics display interfaces.

PERSPECTIVE TECHNOLOGIES**Booth 1536**

**8930 Route 108
Columbia, Maryland 21045
(301) 964-0431
Greg Gustin
Vice President and General Manager**

Perspective Technologies SM-2 Real-time 3-D full-shaded graphics processor...host independent...operates at 62 MFlops, performing 640,000 floating point 3-D coordinate transformations/sec, resulting in 50,000 polygons/sec (1600 at 30 Hz) with

hidden surface removal...2 full 24 bit frame buffers (48 bit planes)...uses in Animation, CAD/CAM and Simulation.

POLAROID CORPORATION

Booth 746

**575 Technology Square, 2S
Cambridge, Massachusetts 02139
(617) 577-2377**

**Charles L. Sharp
Marketing Manager**

Polaroid's several significant roles in visual communications are exemplified in an exhibit incorporating an inexpensive color film recorder and direct screen camera system for instant photography hardcopy, contrast enhancement filters for VDT screens, flexible magnetic diskettes and a diskette duplication service. Centerpiece is Polaroid's Palette computer image recorder for instant 35mm slides, overhead transparencies or full-color prints of personal computer images.

POLHEMUS NAVIGATION SCIENCES DIVISION

**McDONNELL DOUGLAS ELECTRONICS
COMPANY**

Booth 1157

**1 Hercules Drive
P.O. Box 560
Colchester, Vermont 05446
(802) 655-3159**

**Jack Scully
Marketing Manager**

Polhemus' line of six dimensional (6D) input devices will be demonstrated. Products are the 3SPACE Digitizer, Tracker and our new low cost Isotrak. All return position (X, Y, Z) and orientation (azimuth, elevation, roll) data via RS-232 to host computer. 3SPACE is ideally suited for incorporation as a 6D peripheral to graphic workstations employing 2D and 3D software and high resolution, real time manipulation of solid models.

PRECISION VISUALS, INC.**Booth 916**

**6260 Lookout Road
Boulder, Colorado 80301
(303) 530-9000
Brenda G. Honeyman
Marketing Services Coordinator**

**User Group Contact: Carol Webster
Customer Service Coordinator**

Precision Visuals produces versatile, standards-based graphics software tools packages, featuring device and machine independence. They include DI-3000, based on the Core standard, and GK-2000, a GKS implementation. Others are the Metafile System and Contouring System. GRAFMAKER and PicSure are special business graphics packages, and DI-TEXTPRO offers publication-quality text.

PRINTACOLOR CORPORATION**Booth 1041**

**2830 Peterson Place
Norcross, Georgia 30071
(404) 448-2675
Thomas Hebert
Applications Manager**

**User Group Contact: Philip Frick
General Manager**

PrintaColor's family of TC1040 color ink jet printers combines both graphics and text printing capabilities with silent printing ideal for today's office or workstation environments. The TC1040 system design was conceived with the ideal printer in mind: reliable, easy to use, flexible in application, and inexpensive.

PRINTRONIX, INC.**Booth 1131**

**17500 Cartwright
Irvine, California 92713
(714) 863-1900
Connie Twiggs
Exhibits Coordinator**

Printronic will demonstrate the 4160 graphics printer, a high resolution matrix line printer designed for CAD/CAM/CAE output. Based on patented Printronix hammerbank technology, the 4160 offers an alternative to electrostatic plotters. The 4160 features outstanding reliability, ease of operation and low cost of ownership.

PRIOR DATA SCIENCES LTD.

Booth 1152

**Bell Mews Plaza
39 Highway 7, Suite 232
Ottawa, Ontario, Canada K2H 8R2
(613) 820-7235
Don Waterman
Director of Marketing, New Products**

PRIOR employs 75 real-time graphics/software people and offers GKS/C, a "C" version of GKS for all UNIX and UNIX-like systems as well as VAX/VMS at level 2C. A level 2B Version is available for the PC under DOS.

QMS, INC.

Booth 1516

**1 Magnum Pass

LASERGRAFIX™ Family of non-impact laser printers all capable of bit-mapping an 8½" x 14" page. The QMS SmartWriter™ laser printer with 128K user-accessible memory. **CONCEPT 100™** personal publishing system for IBM PC. FormMaker™, WYSIWYG forms composition software. **POSTSCRIPT™** graphics and page composition controller.

QUINTAR CORPORATION**Booth 1036**

**2525 Maricopa St.
Torrance, California 90503
(213) 320-5700
Molly S. Morgan
Director of Marketing and Sales**

Quintar demonstrates its color graphics controllers: (1) the stand-alone Q1080 interfaces to any computer via RS-232, displays 832 x 630 resolution, 16 colors simultaneously out of 4096, and has hardware font cartridges for fast preview and top-quality slides; (2) the GraphPort, a color graphics board for the IBM PC, XT, AT, or IBM bus-compatibles. The GraphPort displays 640 x 480 non-interlaced or 832 x 630 interlaced with up to 120 shades of color simultaneously.

QUME CORPORATION**Booth 1450**

**2350 Qume Drive
San Jose, California 95131
(408) 942-4036
Han Park
Graphics Marketing Manager**

Qume Corporation will demonstrate its full line of graphics terminals designed for business, engineering, scientific and CAD/CAM applications. Qume will feature the QVT 511 GX™, its full-color graphics terminal, with graphics emulation of the Tektronix 4105 and 4010/4014. Also displayed will be Qume's monochrome QVT 311GX™ terminal with the graphics emulation of the Tektronix 4010/4014 and DEC VT 125. The Qume QVT 211GX™ graphics terminal emulates the Tektronics 4010/4014 and comes in green or amber.

RAMTEK CORPORATION

Booth 816

**2211 Lawson Lane
Santa Clara, California 95050
(408) 988-2211
Regina Muccillo
Marketing Communicator
Mike Tyler
Product Manager**

Ramtek is a manufacturer of high performance graphics and imaging display systems, processors, terminals, workstations and peripherals. Ramtek products range from low priced color bit mapped desktop terminals to high performance 3-D shaded surface generators for complex 3-D design and animation.

RASTER TECHNOLOGIES, INC.

Booth 336

**9 Executive Park Drive
North Billerica, Massachusetts 01862
(617) 667-8900
Richard M. Fichera
Director of Marketing**

**User Group Contact: Eric Zweigel
Product Marketing Manager**

Manufactures high performance graphics terminals, ranging from the desktop Model One/10 to the Model One/380 with local 3-D transformations, shading and advanced local light modeling. The entire Model One product family features a compatible instruction set, integral debugger and support by a wide variety of third party software.

RECOGNITION CONCEPTS, INC.

Booth 1500

**P.O. Box 8510
Incline Village, Nevada 89450
(702) 831-0473
John E. Sample
National Sales Manager**

RCI will introduce a new Real Time Disk (RTD) and an interface (LFI) to 3M's Laser Image film recorder for its Trapix 5500 Image Processors. Both are digital devices. Based on Fujitsu's Eagle technology, the RTD can store and replay nearly 2 minutes of live or processed images while the film recorder can produce hard copy with up to 4K x 4K x 8-Bit resolution.

RIDGE COMPUTERS**Booth 548**

**2451 Mission College Blvd.
Santa Clara, California 95054
(408) 986-8500
Carol Byram
Manager, Marketing Communications**

**User Group Contact: Tod Snook
Graphics Project Manager**

Ridge Computers manufactures a full line of 32-bit supermini-computers. All have a Reduced Instruction Set Computer (RISC) architecture and a UNIX * System V/Berkeley 4.2-based Ridge Operating System (ROS). ROS is designed for scientific, engineering and graphics applications.

*UNIX is a trademark of Bell Labs.

SABER TECHNOLOGY CORPORATION**Booth 1156**

**2381 Bering Drive
San Jose, California 95131
(408) 945-9600
Barbara Davidson
Manager, Marketing Services**

The SaberStation is a UNIX based, office-oriented graphics system with the power and versatility of a super minicomputer. The 19" ultra-high resolution display produces a picture quality (1664 x 1248) offering higher resolution and greater brightness (35 foot Lamberts) than any other system on the market. System performance can be further enhanced by the use of hardware accelerators for shading, tiling, scaling, clipping, etc. The stand-alone workstation, capable of interfacing over local area network, can be used in any CAD, CAM, CAE and image processing environment.

SAS INSTITUTE INC.

Booth 1346

**Box 8000, SAS Circle
Cary, North Carolina 27511-8000
(919) 467-8000
Software Sales Department**

SAS/GRAPH[®] software includes ready-to-use procedures for vertical and horizontal bar charts, pie, star and block charts; a variety of plots; choropleth, surface, prism and block maps; text for slides; and three-dimensional displays. Recent enhancements to SAS/GRAPH include multiple graphs on the same screen and customized graphics.

SCHOELLER TECHNICAL PAPERS, INC.

Booth 1647

**Centerville Road, P.O. Box 250
Pulaski, New York 13142
(315) 298-5133
Richard W. Hess
Marketing Research Analyst**

**User Group Contact: Arlon F. King
Color Hard Copy Task Force Manager**

Schoeller will display its family of CompuColor[™] high intensity ink jet papers. Designed exclusively for ink jet printing, these papers are available in a variety of coating formulations, each providing a specific amount of dot spread. Schoeller's new Color Thermal Ribbon paper will also be shown, designed for thermal ribbon transfer printers.

SCRIPTEL CORPORATION

Exhibits Co-chairs

Beverly Aquino

Sue Keeley

SIGGRAPH '86, the Thirteenth Annual Conference on Computer Graphics and Interactive Techniques, meets August 18-22 in Dallas, Texas. SIGGRAPH '86 is sponsored by the Association for Computing Machinery's Special Interest Group on Computer Graphics in cooperation with the IEEE Technical Committee on Computer Graphics. In the call for participation at the end of this program, we invite your contribution to making the 1986 conference another success. Posters, buttons and call for participation flyers will be distributed at the booth. For conference information contact: (312) 644-6610; for exhibition information contact: (212) 752-0911.

SILICON GRAPHICS

Booth 826

630 Clyde Court

Mountain View, California 94043

(415) 960-1980

Alice E. Ahlgren

Marketing Communications Manager

Silicon Graphics will be demonstrating the IRIS 2400 engineering workstation which functions as either a personal workstation or as a node in a distributed environment. Application programs which will be demonstrated on the IRIS 2400 include: solids

modeling, finite element modeling and analysis, molecular modeling, and graphic arts and animation.

**SINGER COMPANY,
LINK FLIGHT SIMULATION DIVISION**
Booth 1612

**1077 East Arques Avenue
Sunnyvale, California 94088
(408) 720-5500
Fred Mulholland
Director, New Business Development**

The Link Flight Simulation Division of the Singer Company is the world's largest producer of simulation equipment. The company's line of real-time computer image generation equipment covers commercial, military, and space training and research applications. Research and product areas include state-of-the-art real-time computer graphics software and custom high performance hardware.

**SKAN GROUP INTERNATIONAL,
A CLAL Company**
Booth 1608

**5198 E. Weaver Place
Littleton, Colorado 80121
(303) 771-0017
Robert Bornhofen
General Manager, North American
Operations**

Manufacturers of large format optical scanners featuring high resolution, thruput and accuracy at modest cost. Applications include mapping, image capture, digital libraries, etc. The digitized output can be stored on a variety of electronic media.

SKY COMPUTERS, INC.
Booth 1737

**Foot of John Street
Lowell, Massachusetts 01852
(617) 454-6200
Mike Drumm
Director of Marketing**

SKY Computers designs and manufactures arithmetic peripherals for microcomputers. Products offered and displayed include floating point array processors, floating point scalar accelerators, and fixed point signal and image processors. Applications for these products include graphics, CAD/CAE, seismic processing, medical imaging, bio-technics, robotics and many others. SKY offers contract hardware maintenance and software up-date services, telephone hotline support and volume discounts to OEM's.

SLIDETEK, INC.

Booth 1546

**3304 Geary Blvd., Suite 500
San Francisco, California 94118

Jim Schreiber

Director of Marketing Services

3Display™ stereoscopic 3D computer graphics hardware provides true depth perception for users of display terminals. 3Display hardware acts as a plug-compatible peripheral to the user's own computer. The high-res, full-color stereoscopic image provided by 3Display technology offers valuable visual information impossible to duplicate in monoscopic "3D" systems.

STORAGE CONCEPTS, INC.

Booth 1719

3198-G Airport Loop Drive

Costa Mesa, California 92626

(714) 557-1862

Martin Bock

Marketing Manager

Storage Concepts, Inc. offers real-time-disk subsystems for imaging storage and retrieval. On display will be the Concept 21 and Concept 15 real-time-disk subsystems.

SUMMAGRAPHS CORPORATION

Booth 316

777 State Street Extension

Fairfield, Connecticut 06430

(203) 384-1344

Susan Burns

Sales Communications Administrator

**User Group Contact: John Makuch
Director, Product Management**

Summagraphics will be exhibiting a variety of products: TXHE MM Series/Bit Pad Two digitizing tablets are high performance with the flexibility of a built-in mouse; the Microgrid Series high resolution tablets feature an array of host programmable functions; the SummaMouse is a low-cost, high resolution optical, digital mouse. The two new personal computer products include the MacTablet that turns the Apple Macintosh into a graphics workstation and the SummaSketch which is IBM PC compatible.

SUN MICROSYSTEMS, INC.**Booth 648**

**2550 Garcia Ave.
Mountain View, California 94043
(415) 960-1300
Nancy Perroton
Promotions Manager**

**User Group Contact: Stephanie Skieczius
User Group Coordinator**

Sun Microsystems, Inc. is exhibiting its line of general-purpose workstations for technical professionals. Sun workstations integrate Motorola 68000-family processors, high-resolution graphics and Ethernet local area networking with Sun's operating system, based on the Berkeley 4.2 version of UNIX.

SYMBOLICS GRAPHICS DIVISION**Booth 1316**

**1401 Westwood Blvd.
Los Angeles, California 90024
(213) 478-0681
Larry Schnur
Manager, Graphics Division Marketing**

The Symbolics Graphics Division develops and supplies high performance, integrated

graphic hardware and software for the Symbolics 3600 family of symbolic processors. Software products include S-Paint, S-Geometry, S-Render and S-Dynamics. Hardware products include frame buffers, broadcast resolution frame grabber and the genlock interface.

SYSTEMS RESEARCH LABORATORIES, INC.
Booth 1137

2800 Indian Ripple Road
Dayton, Ohio 45440
(513) 426-6000
Jacqueline Townsend
Marketing Representative

User Group Contact: Bill Stephen
Project Engineer

SRL exhibits an entire family of high performance raster CRT displays. All units demonstrate 100 MHz video bandwidth, user selectable scan frequencies (vertical range is 15.75 to 66.2 kHz between two units) and the best possible convergence. Also available, SRL Model 2142 (ruggedized display), custom engineering and specialized displays.

TALARIS SYSTEMS INC.
Booth 1347

5160 Carroll Canyon Road
San Diego, California 92121
(619) 587-0787
Linda E. O'Sullivan
Marketing Coordinator

Talaris Systems, a laser printer software and hardware supplier, will display its line of high-resolution laser printers—the T800 (8 ppm), T1200 (12 ppm) and T2400 (24 ppm)—and applications software. Talaris will present the recently released Talaris 810 (8 ppm) which has text processing and business graphics capabilities.

**TANDBERG DATA, INC.,
TERMINAL DIVISION**
Booth 1720

**1590 S. Sinclair
Anaheim, California 92806
(714) 978-6771
Richard McGowan
Vice President, Terminal Group**

**User Group Contact: Per Otto Dyb
Technical Support Manager**

Tandberg Data will be demonstrating its ergonomically designed, interactive TDV 2200S graphics display terminal with extended typographical capabilities such as proportional spacing. Also to be shown is an interactive optomechanical mouse and the TDP 8800 ink jet graphics printer. The TDV 2200 emulates the Tektronix 4010 and 4014 protocol with a 720 x 336 resolution.

TASVIR CORPORATION
Booth 140

**2490 Charleston Road
Mountain View, California 94043
(415) 969-5602
Karen D. Thorton
Marketing Communications Manager**

SUPERCADS™ 3-D mechanical design system features on-screen dynamic menus structured in the popular verb noun modifier syntax, on-line help, 360° rotation, unlimited pan and zoom, model and drawing mode, automatic associative dimensioning and relational design database. Systems are available on IBM PC/AT, Silicon Graphics Iris, ELXSI System 6400, Apollo Domain and DEC VAX.

TAT GRAPHICS GROUP, INC.
Booth 1552

**1270 Lawrence Station Road
Building E
Sunnyvale, California 94089
(408) 734-2202
Avery Blake
President**

CAD/Engineering Graphics Display Systems for P.C. and P.C. compatible microcomputers. T.A.T.'s SEXTANT subsystems and GALAXY controllers provide high resolution (1024 x 1024), high performance (noninterlaced) displays for users of AutoCAD, VersaCAD and other CAD systems. Also introducing Tektronix 4107/4109 and 4105 terminal compatibility. National sales representatives for QUME Graphics Terminals.

TECHEXPORT, INC.

Booth 1057

**244 Second Ave.
Waltham, Massachusetts 02154
(617) 890-6507
Donald F. Berman
President**

Techexport specializes in the export distribution of computer graphics products. A subsidiary of the Shawmut Bank of Boston, Techexport has offices in England, France, Germany, Switzerland, Italy, and Israel, and distributors in all other significant markets.

TECHNICAL MARKETING LTD.

Booth 1300

**9418 Annapolis Road, Suite 106
Lanham, Maryland 20706
(301) 459-3600
David L. Wilson
President**

Technical Marketing Ltd. is a marketing consulting firm specializing in the computer graphics industry. The company offers market research, market development and promotional expertise and assistance to companies involved in new product or new market introductions.

TEKTRONIX, INC.**Booth 616****P.O. Box 500****Beaverton, Oregon 97077****(503) 627-7111****Ralph Show****Senior Exhibits Manager**

Tektronix Information Display Group will exhibit its new 6000 Series of 32-bit Intelligent Graphics Workstations. Also: 4120 Series workstations demonstrating 2D to 3D migration; 4100 Series Color Graphics Terminals compatible with DEC and IBM; 4692 Color Graphics Copier and PLOT 10 TekniCad (drafting) and TekniCap (presentation) software.

TELEVISION EQUIPMENT ASSOCIATES**Booth 1660****Box 393****South Salem, New York 10590****(914) 763-8893****Bill Pegler****President**

Electronic Design Engineers and equipment manufacturers working in the field of electronic imaging will want to see a wide range of Matthey low pass video filters. These are passive 75 ohm units, only half inch high and ideal for removing aliasing components from electronic pictures. Digital Engineers will be pleased to see factory tested analog filters which solve problems.

TELEX COMMUNICATIONS, INC.**Booth 1340****9600 Aldrich Ave. S.****Minneapolis, Minnesota 55420****(800) 828-6107—In MN: (612) 887-5531****Daniel M. Paulnock****Director of Marketing****User Group Contact: Daniel M. Paulnock****Director of Marketing**

Caramate front and rear screen combination slide projectors and high performance wall screen slide projectors, full line of Sestar fixed focal length and variable zoom slide projector lenses.

TELMAT SA

Booth 961

10 Rue Des Charrons, BP 12

Soultz, France 68360

(89) 48 25 72

Claude Wagner

Systems Engineer

CUBI 7 is a color graphics system for 3-D image synthesis with animation of modular and evolutionary design. Its target is low-cost production. Therefore, it is particularly well adapted to meet the needs of the following sectors: Audio/Visual facilities: credits, games, films, advertising spots. Service facilities: CAD (mechanics, architecture), TV games, TV education, videotex. Simulation: medical, mechanical, military.

TEMPLATE, THE SOFTWARE DIVISION OF MEGATEK CORPORATION

Booth 536

9645 Scranton Road

San Diego, California 92121

(619) 455-5590

Rick Kreysar

Manager, TEMPLATE Product Marketing

TEMPLATE® displays six software packages: TEMPLATE®, FORTRAN subroutine library for 3D engineering and scientific graphics; 2D TEMPLATE®, FORTRAN subroutine library for 2D graphics; DIMENSION-GKS™, level 2b implementation of the ANSI GKS standard; MICROTEMPLATE®, graphics subroutine library for the IBM PC/XT; CONTEMPLATE™, a charting and graphing package; and their implementation of the draft standard PHIGS.

**TEXAS INSTRUMENTS
SEMICONDUCTOR GROUP**
Booth 1052

**P.O. Box 809066
Dallas, Texas 75380-9066
(713) 274-2297
Barbara Appel
MOS MEM Merchandising**

Semiconductors for Graphics Applications:
including Video RAMs, Video System
Controllers, 32-bit Microprocessors, Very High
Speed 8-bit bit slices and 32-bit Digital Signal
Processors.

TEXAS MEMORY SYSTEMS, INC.
Booth 950

**9888 Bissonnet #470
Houston, Texas 77036
(713) 771-8200
Holly Frost
President**

The SAM-600 mass memory system will be
displayed. The SAM system has a single
chassis capacity of 128 Mega-Bytes, supports
an 80MB/sec transfer rate, and up to 12 I/O
ports. SAM high speed interfaces are
available to Floating Point Systems AP's and
Gould-SEL, Perkin-Elmer, Digital Equipment
Corp. computers. Also, high speed disk drives
(9MB/sec) and graphics displays (32MB/sec)
may be attached to the SAM system.

THOMSON DIGITAL IMAGE
Booth 900

**173 Boulevard Haussmann
Paris, France 75008
(1) 561.96.00
Gerard Alain
Technical Manager
Hubert de Maximy
Marketing Manager**

Thomson Digital Image was formed in
September 1984. TDI works in the field of
computer generated images for TV shows and

broadcast, advertising and long range movies. TDI, issued from the Flying Simulators Division of Thomson, has developed its own software in computer graphics. TDI uses the most powerful computer in its field in Europe.

TIME ARTS, INCORPORATED

Booth 1547

**3436 Mendocino Ave.
Santa Rosa, California 95401
(415) 328-7176
Richard Luttrell
Director of Marketing**

**User Group Contact: David Krauss
Coordinator**

Lumena is available in several configurations to meet specific application requirements—Print, Graphics or Video. All options interface easily within Lumena—Animation & Special Effects, Video digitizing and NTSC, Fonts, Business Graphs, Enhanced Resolution, Print & Color Separation. Highlighting the exhibit is a true-color system, described as the "total design environment."

ULTRATEK

Booth 241

**23520 Telo Ave., Suite # 12
Torrance, California 90503
(213) 618-0141
Joseph Lai
President**

**User Group Contact: I-Teh Hsieh
Engineer**

ULTRATEK, a graphics terminal manufacturing company will display its new Model 6448, the first low-cost color graphics terminal. The 6448 features Tektronix 4105 compatibilities, has a non-interlaced resolution of 640 by 480 with 8 colors selected from a palette of 16, supports ISSCO, Precision Visual, SAS and many other graphics software. Also, supports Tektronix 4695 color copier, and works with IBM-PC keyboard and monitor.

UNIRAS, INC.**Booth 128**

**50 Mall Road, Suite 212
Burlington, Massachusetts 01803
(617) 272-7260
Alice B. Taylor
Technical Marketing Specialist**

UNIRAS, Inc. will present its mainframe and mini computer graphics applications software for business and presentation, mapping interpolation, seismic, GKS and solids modeling. We will be announcing new versions of interactive mapping, decision support software and versions for the IBM PC/AT.

UNIVERSAL DATA SYSTEMS, INC.**Booth 1458**

**5000 Bradford Drive
Huntsville, Alabama 35805-1953
(205) 837-8100
Terri McClellan
Marketing Specialist**

Universal Data Systems, of the Information Systems Group of Motorola, Inc., will show a full line of low, medium and high speed modems. As a complement to this line, UDS will display the EC100 Error Controller and the 9600A/B, the industry's first 9600 bps dial-up modems.

**UNIVERSAL TECHNICAL
GRAPHICS/GRAPHIC RESOURCES****Booth 127**

**5462 Research Drive
Huntington Beach, California 92649
(714) 895-4811
Ronald Ball
Marketing Coordinator**

Universal Technical Graphics demonstrates an array of Pen & Electrostatic Plotters, with an emphasis on cost effective, refurbished equipment. UTG gives the plotter users a second choice in purchasing first quality equipment. Drafting media and supplies for this type equipment are displayed by Graphic Resources Corporation.

VECTRIX CORPORATION

Booth 256

**2606 Branchwood Drive
Greensboro, North Carolina 27408
(919) 288-0520
Ned E. Lowder
Director of Sales**

Vectrix manufactures sophisticated, high resolution plug-in graphics cards for IBM personal computers and standalone graphics processors for any host computer. Turnkey CADAM Display and graphics arts systems are also available. Extremely fast (60 nanoseconds per pixel), 1024 x 1024, 60 Hz non-interlaced plug-in card being announced at SIGGRAPH.

VERMONT MICROSYSTEMS, INC.

Booth 342

**11 Tigan Street, P.O. Box 236
Winooski, Vermont 05404
(802) 655-2860
John M. Cushman
Marketing Manager**

**User Group Contact: Brian C. St. Armour
Applications Engineering**

Color graphics processors and an intelligent monitor will be exhibited by VMI. Each of these raster-scan graphics product families offers unique cost/performance factors to the OEM, system integrator and end user. Featured is the VM-8820 Graphics Processor for the IBM PC AT.

VERSA CAD

Booth 157

**7372 Prince Drive, Suite 106
Huntington Beach, California 92647
(714) 847-9960
Jennifer Aurand
Marketing Assistant**

VersaCAD is a general-purpose CAD system for IBM PC and related computers. Drawings up to 15,000 objects are accommodated, and the program includes more than 100 single-keystroke commands selected from on-screen menus. Coordinate entry may be from digitizer or keyboard, including polar, relative and absolute coordinates. Program automatically calculates area, moment of inertia, center of gravity, etc. Unlimited symbol library storage and high resolution color aid productivity.

VERSATEC, A XEROX COMPANY**Booth 628**

**2710 Walsh Ave.
Santa Clara, California 95051
(408) 988-2800
Annette Stransky
Advertising Manager**

Versatec is announcing at this show a second generation of electrostatic color plotters. Two new plotting widths, 24 and 36 inches, extend the previous color plotter line of 42 inches. Stop by the booth and see the widest range of electrostatic plotters in monochrome and color in the world in operation.

VERSICOLOR CORPORATION**Booth 1640**

**2560 Mission College Blvd.
Suite 106
Santa Clara, California 95050
(408) 727-6626
Richard A. Flores
President**

VersiColor Corporation is manufacturer and distributor of high resolution graphics terminals and workstations, plus input and output devices associated with engineering workstations.

VERTICOM, INC.

Booth 252

**545 Weddell Drive
Sunnyvale, California 94089
(408) 747-1222
Gerald A. Money Penny
Vice President, Marketing**

Verticom, Inc. designs and manufactures high performance graphics controllers and displays for IBM Personal Computers. Verticom's latest products, two plug-in, high speed controllers, draw images at 1,000,000 pixels per second, three to ten times faster than competitive products. The M-16 and M-256 controllers provide 16 and 256 colors respectively, from a palette of 4,096. The high speed drawing capability is generated by Verticom's proprietary, two-micron CMOS graphic controller chip set with an on-board Motorola 68000 CPU.

VIA VIDEO INC.

Booth 1136

**5155 Old Ironsides Drive
Santa Clara, California 95054
(408) 980-8009
Curt G. Thiem
Product Marketing Manager**

THE DESIGN CENTER from Via Video. A state-of-the-art picture processing system for the most demanding of professional artists. The Design Center integrates computer graphics, photography and video technologies. You control it all: millions of colors, flash scanning, and high resolution painting with multi media flexibility for corporate presentation graphics, design and illustration needs.

VIDEO MONITORS INC.

Booth 1662

**3833 No. White Ave.
Eau Claire, Wisconsin 54703
(715) 834-7785
J. E. Carpentier
Vice President, Sales and Marketing**

Video Monitors Inc. designs and builds monochrome and RGB color high speed raster scan video monitors for the OEM marketplace. Video Monitors Inc. pioneered the development of the high speed raster scan monitor. Tens of thousands are now used throughout the free world in CAD/CAM, AI and Medical Imaging Applications.

VISUAL ENGINEERING**Booth 1250**

**2680 N. First St., Suite 200
San Jose, California 95134
(408) 945-9055
Amy E. Christen
Product Marketing Manager**

**User Group Contact: Dave McMurdie
Customer Engineering Manager**

UNIX Graphics Software for 2D or 3D solids, offering both development tools and end-user applications. Introducing Visual: GensiSys, a state-of-the-art 3D scene modeling package. Four levels of realism provide a smooth tradeoff between compute time and image realism, including a proprietary highspeed ray-tracer. Also offering GKS and scientific/business presentation graphics.

VISUAL INTELLIGENCE CORPORATION**Booth 151**

**33 Boston Post Road West
Marlboro, Massachusetts 01752
(617) 485-6092
Cheryl McDermott
Director of Corporate Communications**

Visual Intelligence exhibits the DataViews family of graphics software products. DataViews: Menu-driven graphing package for displaying dynamic or static data. Wide range of graphic types (35 +) and display options allow users to build customized displays without programming. DV-Draw: DataViews' 2D drawing module for creating drawings which may incorporate dynamic elements and/or graphs. DV-Routines: Subroutine library for programming access to DataViews' graphics functionality.

WEST END FILM INC.

Booth 1637

**2121 Newport Place NW
Washington, District of Columbia 20037
(202) 331-8078
Bill Ferster
President**

West End produces artist interactive software and turnkey systems for video animation, presentation graphics and graphic design applications. West End currently markets Artwork, a 3-D, high resolution drawing package. Brushwork, a powerful video painting package with scanning capabilities. Chartwork, for business graphics and the Animate Series II, a complete video-animation system.

WESTERN GRAPHTEC, INC.

Booth 1240

**12 Chrysler St.
Irvine, California 92718
(714) 770-6010
Annette Comeau-Bowman
Manager, Advertising and Promotion**

Western Graphtec will display its complete line of intelligent multipen digital plotters as well as drum plotters.

WESTWARD TECHNOLOGY INC.

Booth 946

**90 Montvale Ave.
Stoneham, Massachusetts 02180
(617) 438-6623
Steven Feierstein
Technical Marketing Manager**

**User Group Contact: Ellen Radigan
Trade Show Coordinator**

Westward Technology markets a full range of raster graphics displays perfectly suited to the CAD/CAM CAE user. The 3219W

monochrome display features a non-interlaced screen with a resolution of 2048 x 1568. The color 3220W offers up to 256 colors from a palette of 16 million hues. Westward Technology is committed to excellence in product design and ergonomics which meet the needs of the CAD/CAM/CAE professional.

THE WINSTED CORPORATION**Booth 1730**

**9801 James Circle
Minneapolis, Minnesota 55431
(800) 328-2962
Gerald R. Hoska
Vice President**

Ergonomically engineered consoles and workstations. Perfectly suited for computer graphic and animation applications. Compact, space-saving units that conveniently position all the components for operator efficiency and comfort. Adjustable keyboard and digitizer pad shelves. Table also adjusts from 26"-30" high for proper working height to minimize fatigue.

XTAR ELECTRONICS, INC.**Booth 1742**

**2262 Landmeier Road
Elk Grove, Illinois 60007
(312) 364-4111
Emmett Powers
Chief Executive Officer**

XTAR will be announcing its "POLYGONE" two-board set based on its proprietary custom VLSI Graphics MicroProcessor and Video Shift Register chip sets. The board is designed to occupy one slot of an IBM PC, PC/XT or PC/AT. Also shown will be an evaluation module based on the chips.

**YAMAHA (NIPPON GAKKI COMPANY
LIMITED OF JAPAN)**

Booth 1726

**10-1 Nakazawa-cho
Hamamatsu, Shizuoka, Japan 430
(0534) 65-1111
Kazukiyo Ishimura
General Manager**

Products to be displayed include 2D
Intelligent Graphic Displays for micro to
mainframe environments. Features include
medium to high resolution 16.7 million color
palette and high price performance value.

SIGGRAPH: THE ORGANIZATION

SIGGRAPH is the Association for Computing Machinery's Special Interest Group on Computer Graphics. Its 11,500 plus members include engineers, architects and planners, artists, animators and filmmakers, software and hardware developers and manufacturers, scientists, mathematicians and many other professionals leading the fields of computer graphics theory, design, implementation and interactive techniques.

In the United States, local SIGGRAPH groups are active in Austin, Chicago, Cleveland, Denver/Boulder, Los Angeles, Minneapolis/St. Paul, New England, New York, Philadelphia, Princeton, Raleigh, San Francisco, Syracuse and Washington, D.C. In addition, SIGGRAPH chapters also are active in Australia, France and Toronto and Vancouver, Canada. ACM SIGGRAPH membership includes subscriptions to Computer Graphics, SIGGRAPH's quarterly publication.

Membership dues are \$18 for ACM members and associate members, \$10 for ACM student members and \$45 for non-ACM members.

Membership application requests should be addressed to:

Association for Computing Machinery
11 West 42nd Street
New York, New York 10036 USA
(212) 869-7440

ACKNOWLEDGEMENTS

CONFERENCE SUPPORT

SIGGRAPH '85 A/V would like to thank Jerrold P. Gundersen, manager, International Sales and Distribution, General Electric, for the use of their beautiful light value projectors.

SLIDES

SIGGRAPH '85 and the speaker slide chair wish to thank the companies and individuals who produced slides for the conference. These computer generated slides will be used in the courses, panels and technical paper presentations. We greatly appreciate companies' donations of time, equipment, software and in some cases, labor and materials.

We also wish to thank the volunteer artists for their valuable efforts and dedication.

**ACM SIGGRAPH '86
DALLAS, TEXAS
AUGUST 18-22, 1986**

The Thirteenth Annual Conference on Computer Graphics and Interactive Techniques is sponsored by the Association for Computing Machinery's Special Interest Group on Computer Graphics in cooperation with the IEEE Technical Committee on Computer Graphics.

Continuing the tradition of technical excellence in computer graphics, the conference will offer many opportunities for participation; Technical Program, Panel Sessions, Courses, Exhibition, Art Show and Electronic Theatre. This high-quality conference covers a wide spectrum of computer graphics technology, applications and products.

MAJOR DUE DATES

All deadlines are firm and will be strictly observed. This allows a fair selection process and time for production of printed materials.

Technical program	January 24, 1986
Panel sessions	December 20, 1985
Course proposals	December 20, 1985
Art and installations	March 7, 1986
Electronic theatre	May 16, 1986
Slides	April 18, 1986

TECHNICAL PROGRAM

The technical program is the primary activity of the annual SIGGRAPH conference and provides an important forum for the presentation of research results. The conference proceedings are a historic and indispensable reference in the field of computer graphics.

Paper submissions for the technical program are invited. Papers should present new and unpublished research results in computer graphics, interactive techniques or the synthesis of established techniques in new applications. Appropriate topics include, but are not limited to, algorithms, applications, modeling techniques, user interfaces, data base integration, geometric modeling, animation, image generation and graphics hardware.

Papers will be formally reviewed by the technical program committee. Accepted papers will be presented during the three days of technical sessions at the conference and published in the conference proceedings, which is a special issue of *Computer Graphics*. Papers will be reviewed on the basis of their contribution to computer graphics, interactive techniques or their application. Papers should include an abstract of 100 to 300 words, outline the problem, explain the relationship of this work to other work and the importance of the results obtained. Authors are encouraged to consult the Communication of the ACM publication standards (published in July 1982). Papers which exceed 20 double-spaced typewritten pages will not be accepted because of publishing restrictions.

Five copies of each submitted paper must be received by the technical program chair by *January 24, 1986*. Papers received after this date will not be accepted for review. Remember to include your return address and telephone number. Papers should be in finished form and support materials should be submitted with the paper. Authors will be notified of their paper's status early in April. Final camera-ready papers will be due late in May. Continued technical excellence is vital to the computer graphics field and SIGGRAPH. Your contribution will make the technical program of SIGGRAPH '86 stimulating, exciting and useful. For further information, please contact:

TECHNICAL PROGRAM COMMITTEE

Brian A. Barsky, University of California,
Berkeley/ENST Paris
John C. Beatty, University of Waterloo
R. Daniel Bergeron, University of
New Hampshire
Bruce Eric Brown, The Quail Group
Edwin E. Catmull, Lucasfilm Ltd.
Franklin C. Crow, Xerox PARC
A. R. Forrest, University of East Anglia
Tom Jensen, Evans & Sutherland Computer
Corporation
Gearold R. Johnson, Colorado State
University
James T. Kajiya, California Institute
of Technology
Jeffrey M. Lane, Daisy Systems
Dave Rogers, U.S. Naval Academy
Gary Rogers, Superset

PANEL SESSIONS

Proposals are invited for panel sessions at SIGGRAPH '86. The panels will be held in parallel with the technical program, and topics will complement the refereed paper presentations. Appropriate themes for a panel are industry issues, applications overviews, and emerging concepts in hardware and software. Courses or research overviews are not appropriate; these belong in their respective sessions.

A proposal for a panel session should include a brief discussion of the topic and a list of proposed panel members. This year, for the first time, panel proceedings will be transcribed and made available to attendees. Potential panel members should be aware of this and agree to publication of their remarks. Proposals should be received by the panel chair by *December 20, 1985*. For further information, please contact:

PANEL CHAIR

Richard L. Phillips
213 Aerospace Engineering Bldg.
University of Michigan
Ann Arbor, MI 48109
(313) 763-1328

COURSES

Proposals are invited for one- and two-day courses for SIGGRAPH '86. The courses will be given during the first two days of the conference and will complement both the technical program and the industry exhibition.

Courses will include introductory, intermediate and advanced concepts in all areas of computer graphics and interactive techniques. One-day courses on the design and development of user friendly, man/machine interaction are requested. Courses preceding the industry exhibition will feature 'How to' or 'What to Look for' topics to provide conference attendees with methods for comparing and/or selecting the hardware/software systems that best meet their needs.

A proposal should include a brief abstract of the material to be presented, an indication of level (introductory, intermediate, advanced), a detailed outline of major topics and time allotments, and a list of proposed lecturers. If previously presented, indicate when/where and estimated number of attendees.

Five copies of each submitted proposal must be received by the courses chair by *December 20, 1985*. All proposals will be reviewed and selections made based in part on information content vs. level vs. time to present. Course coordinators will be informed of the reviewers decision by February 10, 1986. For further information, please contact:

COURSES CHAIR

David D. Loendorf
Dept of Mechanical Engineering and
Materials Science
Duke University
Durham, NC 27706
Contact: Mary Shingleton
(919) 684-5764

EXHIBITION

More than 250 exhibitors will display and demonstrate their products and services. The exhibits and the entire SIGGRAPH conference should attract more than 25,000 attendees. SIGGRAPH '86 will prove to be the industry's 'showcase' for the latest in computer graphics technology. For further information, contact exhibition management.

ART SHOW

A retrospective exhibition of computer art will be held during SIGGRAPH '86. The computer art show will comprise multiple art forms including two-dimensional art works, three-dimensional works, sculpture, installations and performance which represent the 20 + year development of computer-aided art. Artists using computers may contribute slides of their work to the art show committee for consideration. For further information, please contact:

ART SHOW CHAIR

Patric Prince
160 W. Jaxine Drive
Altadena, CA 91001
(818) 797-7674

ELECTRONIC THEATRE

An outstanding and highly acclaimed event featuring the world's finest computer animation from research, industry, advertising and the arts. Acceptable media includes film, video, laser and realtime performance. All entries will be judged exclusively on creative and technical excellence. One show will be presented on two evenings. For further information, please contact:

ELECTRONIC THEATRE CHAIR

Patricia Moore
Cranston/Csuri Productions
1501 Neil Avenue
Columbus, OH 43201
(614) 421-2000

SLIDES

Three slide sets will be produced for the conference—art, technical and industry. The images submitted will be considered for promotion of the conference as well. Slides should be submitted by *April 18, 1986*. Submit all slides and requests for information to:

SLIDES CHAIR

Bruce Eric Brown
The Quail Group
561 East Quail Road
