Congratulations! Today you embark on the grandest of adventures!

Together with over 25,000 fellow explorers from around the world, you spark the SIGGRAPH 96 community alive to satisfy its greatest passions for computer graphics and interactive techniques.

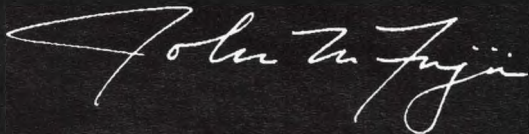

Let these pages guide you through the latest frontiers of theory, practice, education, and achievement. They serve as your treasure map to the people, ideas, and technologies defining our digital milestones in the next century.

Here in New Orleans, you will witness the Internet leap to its next levels of graphics and interactivity. Personal computers will unleash creativity at the farthest reaches of imagination and affordability. History will unfold to yield precious clues and set challenges for our next generation of dreamers.

And now you are here to carry the promise forward!

Over two years ago, the SIGGRAPH 96 Committee began charting a vision that celebrates human spirit and interaction. Next, we poured ourselves into delivering this unique moment. Now we proudly stand with you at the interdisciplinary crossroads of computer graphics and excellence for our year, 1996.

The last step is to complete this vision – together.

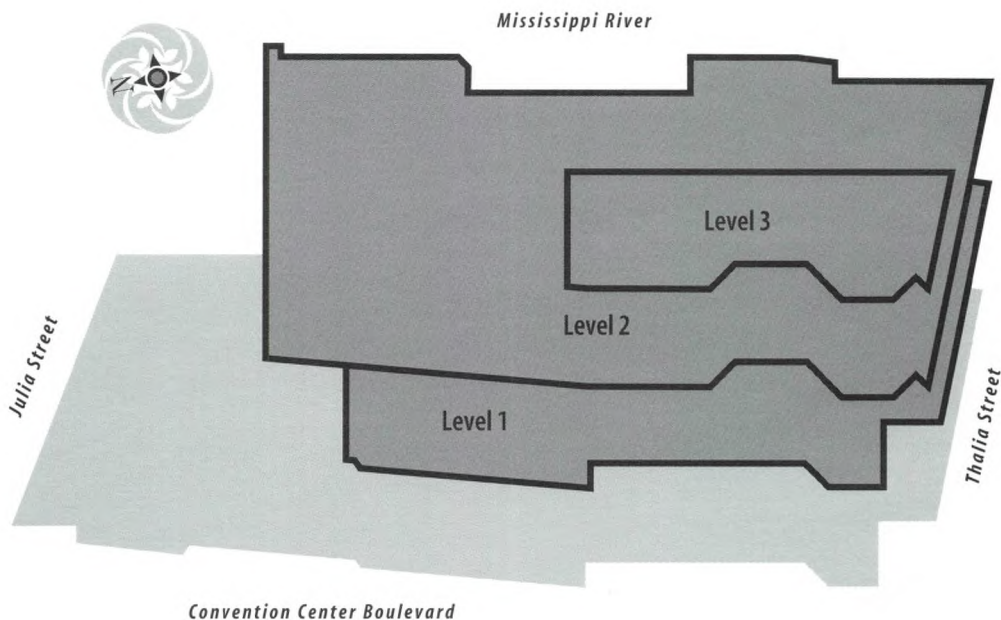

John M. Fujii
SIGGRAPH 96 Conference Chair

Information

Restrooms

Telephone

Sunday

4 August

2 pm to 5 pm

Fundamentals Seminar

Ballroom II A/B
Open to all SIGGRAPH 96 attendees.

An essential, accessible introduction to computer graphics jargon, concepts, techniques, and technologies. The perfect orientation for novices on the fast track.

6 pm to 8 pm

Welcome Reception

Digital Bayou enter through Hall C
Open to all SIGGRAPH 96 attendees.

Celebrate your arrival in America's favorite city for the world's favorite international conference on computer graphics and interactive techniques by meeting and greeting friends and colleagues, old and new, in the Digital Bayou.

Monday

5 August

8 pm to 11 pm

Course Reception

Cajun & Creole Queen Paddleboats and New Orleans International Cruiseship Terminal
Open to Conference and Courses Passport attendees.

Join the festive SIGGRAPH 96 New Orleans street parade! At 7:45 pm, the New Orleans Police Department, a high school marching band, and a host of revelers escort Course Reception attendees from outside the New Orleans Marriott on Canal Street to the Cajun & Creole Queen Paddleboats.

For attendees who cannot join the parade, shuttles are available directly to the paddleboats. For shuttle information, see page 65.

A Course Reception ticket is required for entry and includes two drink tickets for beer, wine, or soft drinks. Hors d'oeuvres stations are available throughout both paddleboats and the terminal.

Tickets for the Course Reception are included with the registration materials for Courses and Conference Passports. Tickets can also be purchased at SIGGRAPH 96 onsite registration, at the merchandise counter in Hall D, and at the entrance to the cruise-ship terminal at the reception.

Wednesday

7 August

8:15 am to 9:45 am

Keynote Address/Award

Room E2/E3
Open to all SIGGRAPH 96 attendees.

SIGGRAPH 96 keynote speaker Douglas Adams reviews the future of the galaxy. The 1996 Computer Graphics Achievement Award is presented to Marc Levoy for his pioneering work in volume rendering, a technique for displaying sampled data without first creating an intermediate surface representation.

Thursday

8 August

12:15 pm to 1:15 pm

Behind the Scenes

Room 5/7/9
Open to all SIGGRAPH 96 attendees.

The SIGGRAPH 96 Computer Animation Festival Committee reviews, explains, and answers questions about how material was chosen for this year's Electronic Theater.

8 pm to 11 pm

Papers/Panels Reception

New Orleans Marriott Grand Ballroom
Open to Conference and Papers/Panels Passport attendees.

Meet and exchange URLs with the intellectual leaders of the computer graphics community in the classic ambiance of a New Orleans soiree.

Each Papers/Panels Reception attendee receives two drink tickets for beer, wine, or soft drinks. Hors d'oeuvres stations are available throughout the ballroom.

For shuttle information, see page 65.

Tickets for the Papers/Panels Reception are included with the registration materials for Papers/Panels and Conference Passports. Tickets can also be purchased at SIGGRAPH 96 onsite registration, at the merchandise counter in Hall D, and at the door before and during the reception.

Friday

9 August

noon to 1:30 pm

Special Session

Springing into the Fifth Decade of Computer Graphics: Where We've Been and Where We're Going
Room E2/E3
Open to all SIGGRAPH 96 attendees.

In the 1950s, computer graphics was a solution in search of a problem. Now it's everywhere, in industry, science, academia, government, education, and entertainment. Six computer graphics pioneers, innovators, visionaries, and practitioners discuss their successes and foibles and where the discipline might be going from where it's been.

University of North Carolina at Chapel Hill

EDWIN E. CATMULL
Pixar

SYLVAN CHASEN

ROBERT M. DUNN
Enterprise Solutions International

BERTRAM HERZOG
University of Michigan

ANDRIES VAN DAM
Brown University

A thematic exhibition that explores connecting people, cultures, and society through innovative uses of computer graphics technology. The Bridge opened at the New Orleans Contemporary Arts Center (CAC) on 22 July and runs through 9 August. At the Ernest N. Morial Convention Center, five blocks away, The Bridge is presented 4-9 August. Employing interactive technologies and Internet links between the conference and the CAC, The Bridge educates and bridges important issues connecting artists, scientists, technologists, educators, and regional and international communities. The Bridge is documented in the SIGGRAPH 96 *Visual Proceedings*, the Visual Proceedings CD-ROM, and The Bridge Slide Set.

Convention Center
Rooms 61-66

Sunday
6 pm to 8 pm

Monday and Tuesday
9 am to 7 pm

Wednesday and Thursday
9 am to 6 pm

Friday
9 am to 1 pm

The world's most accomplished digital artists present the year's best computer-generated animations in video and film. This year's Festival features explanatory and documentary works.

The Computer Animation Festival presents a broad array of works in several formats and categories in the Festival Screening Rooms (open to all badged conference attendees). A representative selection of Festival entries is also shown in the evening Electronic Theater, presented this year at the historic Saenger Theatre in downtown New Orleans.

The Louisiana Bayou is not far from here, in every direction, and cyberspace surrounds us. Both are rich and complex ecosystems, with rapid speciation and a wealth of evolving lifeforms coexisting and competing for resources and a chance to reproduce. The Digital Bayou presents some of the most advanced interactive and graphics technologies on the planet, co-existing in one vibrant space, teeming with the nutrients for fresh ideas and for the explosive growth of new commercial, research, and entertainment life forms.

Artificial Dolphins

Artificial Dolphins enable human communication with an artificial life form in a virtual reality environment. Its dolphin-style simulated life forms are animated using physically-based modeling. Real-time computer graphics; motion planning; simulation of water, foams, sprays, and bubbles; and 3D sound bring the dolphins to life.

Bayou Sauvage

Approximately 20 different vendors of computer hardware, software, and systems are participating in a common game across the SIGGRAPH 96 Exhibition floor and Digital Bayou. Participants start in different vehicles from different locations and race across the Bayou to reach a wayward alien spaceship. They encounter active and passive obstacles, not the least of which is each other, in a complex 3D world.

BE NOW HERE (Welcome to the Neighborhood)

This study contrasts the familiar with the foreign, over space and over time. In part, it is an attempt to re-awaken our sense, essence, and sanctity of place through place-scale media. And it is a simulation of what public media spaces could be like in the context of live, high-bandwidth, global networking.

Cypress Adventure

In this interactive experience set in a cypress swamp, participants interact with the background and navigate through the experience singly or in pairs. The experience is based on optical, non-contact, real-time tracking of markers placed on the participants' hands. It consists of two components: the Chase sequence, for one or two participants, and the Design sequence, for one participant at a time.

Deceiving Manipulation with a Palmtop Display

Using a new concept in unencumbered VR interfaces, participants construct a "Mikoshi" (a Japanese portable shrine). The system integrates a large-screen video projector's "window" into a virtual world, a robot arm that functions as a three-axis haptic display, and, mounted to the end of the arm, a small color LCD video monitor and a magnetic position sensor.

d-rhum

A dynamic, constantly evolving space in which participants begin to see that their personal boundaries are fuzzy. As they move, so do the walls, blurring the traditional limited expectations of an architectural space. Certain combinations of movements cause deformations and sound emissions, but it is never clear which movements generate which reactions.

Haptic Challenge:

An I-FORCE Computer Game

In this multi-user gaming environment, two players propel a virtual puck at the opponent's goal. They are armed with virtual paddle controllers in a full dynamic simulation that allows them to feel the puck interacting with the paddle with such realistic fidelity that they can actually take advantage of fine manual dexterity to put spin on the puck.

Overcoming Phobias Using Virtual Reality

A team of therapists and computer scientists has demonstrated that virtual reality can be very effective in reducing acrophobic subjects' anxiety and avoidance of heights, and in improving attitudes toward heights. In this project, acrophobia is treated with four different scenarios: a glass elevator, a canyon with bridges, balconies overlooking a city, and an airplane flight.

Special Interest Groups are for attendees who think and work in similar environments and technologies. Special Interest Group meetings are open to all attendees. They are usually informal. At some, general subjects are discussed; others convene around topics related to specific product vendors.

Birds of a Feather meetings are impromptu gatherings. They can be scheduled at any time, to discuss any subject. To organize your own impromptu meeting, simply use the sign-up board in the Hall D lobby area where late additions and revisions to the Special Interest Groups and Birds of a Feather schedule are posted.

Courses/Full Day

- 8:30 am to 5 pm
- 9 Introduction to Computer Graphics *Room E2/E3*
 - 10 Procedural Modeling and Animation Techniques *Room 58/59/60*
 - 11 Implicit Surfaces for Geometric Modeling and Computer Graphics *Room 2/4/6*
 - 12 Graphic Design for Usable GUIs *Room E1*
 - 13 Wavelets in Computer Graphics *Room 41/42/43*
 - 14 Introduction to Virtual Reality *Room 90/91/92*
 - 15 A Practical Guide to Recording Video Animation from Computer Graphics *Room 5/7/9*
 - 16 Visualizing Scientific Data and Information: Focusing on the Physical and Natural Sciences *Room 10/12/14*
 - 25 Life-Like, Believable Communication Agents *Ballroom II C*

Courses/Half Day AM

- 8:30 am to noon
- 17 Creating and Manipulating Sound to Enhance Computer Graphics I: Algorithms and Techniques *Room 44*
 - 19 High-Tech Marketing: An Introduction to Key Concepts and Tools for Strategic Marketing of Technology Products *Room 40*
 - 20 Introduction to Digital Compositing *Ballroom II A/B*
 - 23 Programming with OpenGL: Advanced Rendering *Room 37/38/39*

Courses/Half Day PM

- 1:30 pm to 5 pm
- 18 Creating and Manipulating Sound to Enhance Computer Graphics II: Applications and Demonstrations *Room 44*
 - 21 Intermediate Digital Compositing *Ballroom II A/B*
 - 22 OpenGL and Window System Integration *Room 37/38/39*
 - 24 How to Survive as a Computer Graphics Entrepreneur *Room 40*

Course Notes

Conference Passport and Courses Passport registrants receive all course notes on CD-ROM. Subject to availability, printed course notes can be purchased at the merchandise-only counter in Hall D.

Course Categories

Beginning

No prerequisites for introductory courses, but prior experience with computing or graphics may be helpful.

Intermediate

Attendees should have working knowledge of the subject, based on introductory courses, reading, and practical experience. Intermediate-level courses supply substantial technical content in detail, such as algorithms, techniques, and architectures.

Advanced

Narrow topics covered in substantial depth. Presentations may include challenging mathematical concepts and programming examples.

Chair

SCOTT SENFTEN

Landmark Graphics Corporation

Administrative Assistant

BRENDA HASH

Committee

WAYNE CARLSON

The Ohio State University

DAVID S. EBERT

University of Maryland Baltimore County

BARB HELFER

1

The Making of "Toy Story"

Room E2/E3

Sunday / Full Day / Beginning

An inside look into the production of "Toy Story," the world's first feature-length computer-animated film. Presentations by members of the crew take the audience through each stage of the production pipeline: art and design, modeling, shading, layout, animation, lighting, and effects.

Who Should Attend

Anyone with an interest in traditional filmmaking/animation or computer graphics/animation who would like to know more about the thought processes and techniques involved in the making of a computer-animated feature film.

Organizer

GRAHAM WALTERS

Pixar

Lecturers

JOE RANFT

Pixar

2**3D Graphics Programming with QuickDraw 3D***Room 10/12/14***Sunday / Half Day / Beginning**

An overview of and programming introduction to QuickDraw 3D, a customer driven, cross-platform, extensible 3D graphics architecture available for Windows 95, Windows NT, and MacOS. QuickDraw 3D offers a rich set of geometries, metafile support, a user interface layer, and a plug-in architecture to extend the core API.

The course includes real-world examples of QuickDraw 3D-based applications, as well as other samples and demos. Course materials, especially the CD-ROM, allow attendees with knowledge of C programming to develop a working QuickDraw 3D application.

Who Should Attend

Application and scientific programmers or technical managers involved in developing 3D graphics applications or 3D graphics software components (plug-in renderers, shaders, and geometries). The course is particularly recommended for anyone interested in adopting or replacing a commercial and cross-platform 3D graphics library for application development.

Organizer

FÁBIO PETTINATI
Apple Computer, Inc.

Lecturers

PABLO FERNICOLA
ROBERT DIERKES
RICHARD LAWLER
PHILIP SCHNEIDER
Apple Computer, Inc.

3**Creative Design for the Internet***Room 90/91/92***Sunday / Half Day / Beginning**

Creative interface design is essential for a successful Internet experience. This course focuses on design issues that should be considered when developing content and experiences using HTML and the Palace. It enables attendees to be more creative as they develop content for the Internet.

Who Should Attend

Anyone who develops or is interested in developing interactive content for the Internet using HTML and anyone interested in designing creative experiences in the Palace.

Organizer

BONNIE MITCHELL
Syracuse University

Lecturers

JIM BUMGARDNER
Time Warner

ANDREW FARRIS
Syracuse University

4**Programming with OpenGL: An Introduction***Room 37/38/39***Sunday / Half Day / Beginning**

An introduction to programming interactive graphics programs using the OpenGL API (OpenGL 1.0 and the OpenGL 1.1 additions) with an emphasis on computer graphics fundamentals.

Who Should Attend

Programmers who want to write interactive graphics applications and who have little or no experience with OpenGL.

Organizer

TOM McREYNOLDS
Silicon Graphics, Inc.

Lecturer

KATHLEEN DANIELSON
Silicon Graphics, Inc.

5**Design and Application of Object-Oriented 3D Graphics and Visualization Systems***Ballroom II C***Sunday / Half Day / Intermediate**

3D graphics and object-oriented systems have emerged as premier technologies for creation of flexible, extensible, and intuitive software applications. This course shows you how to design your own applications to take advantage of object-oriented techniques and methods in 3D graphics and visualization.

Who Should Attend

Users, developers, and researchers of 3D graphics and visualization systems, or practitioners who want to use graphics and visualization in their own applications.

Organizer

WILLIAM SCHROEDER
General Electric Corporate Research and Development

Lecturers

WILLIAM LORENSEN
KENNETH MARTIN
General Electric Corporate Research and Development

TOM CITRINITI
Rensselaer Polytechnic Institute

JEAN FAVRE
Swiss Center for Scientific Computing

6**The Physics of Rendering Illumination and Shadows of Smokes and Clouds**

has been cancelled due to withdrawal of support beyond the control of the organizer and SIGGRAPH 96.

7**Global Illumination in Architecture and Theater***Room 41/42/43***Sunday / Half Day / Beginning**

Global illumination techniques such as Monte Carlo ray tracing and radiosity enable us to accurately model lighting designs and create physically realistic renderings for architectural, theater and stage, and entertainment applications. This course reviews these techniques, with an emphasis on useful solutions, available software and hardware tools, and real-world case studies.

Who Should Attend

Anyone interested in using computer graphics to model lighting designs and create physically realistic renderings for architectural, theater and stage, and entertainment applications. This includes computer graphic artists, software developers, theater and stage set designers, entertainment imagineers, architects, and lighting designers.

Organizer

IAN ASHDOWN
Ledalite Architectural Products, Inc.

Lecturers

STUART FELDMAN
Lightscape Technologies, Inc.

ROBERT SHAKESPEARE
Indiana University

GREG WARD
Lawrence Berkeley National Laboratory

Sunday

4 August

8

Information Visualization

Room 58/59/60

Sunday / Half Day / Beginning

This course gives participants a working knowledge of effective visualization approaches for presenting information. Visual representation of information requires merging data visualization methods, computer graphics, design, and imagination. In contrast with scientific spatial data, information spaces are abstract and different from physical data spaces and thus require different visualization approaches. The course covers types of information and visualization of retrieved information in the World Wide Web (browsing and searching), large document collections, and databases. Attendees learn about usability studies and how to make sense of information with visualization. Practical applications are illustrated through specific case studies on and off the Internet.

Who Should Attend

People who would like to improve interaction of users with information, would like to be able to produce effective presentations on the World Wide Web with scientific visualization, and would like to extend the scope of their work.

Organizer

NAHUM D. GERSHON
The MITRE Corporation

Lecturers

STUART CARD
Xerox PARC

STEPHEN EICK
AT&T Bell Laboratories

Monday

5 August

9

Introduction to Computer Graphics

Room E2/E3

Monday / Full Day / Beginning

The SIGGRAPH conference is an exciting event, but it is often a daunting experience for a first-time attendee. This course is designed to ease newcomers into the SIGGRAPH conference experience by presenting the fundamental ideas and vocabulary at a level that can be readily understood. At the end of the day, attendees will be well prepared to understand, appreciate, and learn from the rest of SIGGRAPH 96.

Who Should Attend

The complete beginner who needs to be able to appreciate and understand the rest of the SIGGRAPH conference.

Organizer

MIKE BAILEY
University of California at San Diego

Lecturers

ANDREW GLASSNER
Microsoft Research

PATRICIA WENNER
Bucknell University

10

Procedural Modeling and Animation Techniques

Room 58/59/60

Monday / Full Day / Advanced

This course imparts a working knowledge of procedural approaches in modeling, shading, and animation. Procedural approaches include solid texturing, hypertextures, volume density functions, character animation, fractals, artificial evolution, L-systems, and implicit surfaces. The course provides participants with details that are often omitted from technical papers, explores the design of procedures, and presents new material in procedural modeling and animation.

Who Should Attend

Individuals interested in procedural modeling, shading, and animation techniques; the procedural design approaches of several researchers; and a toolbox of procedures for producing realistic images.

Organizer

DAVID EBERT
University of Maryland Baltimore County

Lecturers

JOHN HART
Washington State University

F. KENTON MUSGRAVE
Bethesda Softworks

KEN PERLIN
New York University

KARL SIMS
Genetic Arts

BRIAN WYVILL
University of Calgary

11

Implicit Surfaces for Geometric Modeling and Computer Graphics

Room 2/4/6

Monday / Full Day / Intermediate

In this course, researchers from academia and industry introduce the basic concepts and uses of implicit surfaces in geometric modeling and computer graphics. In particular, the course covers techniques for modeling, visualizing, and animating implicit algebraic patches, skeletal surfaces, and fractal surfaces. Also covered: new twists related to dual boundary and constructive solid geometry representation schemes, parallel hardware for direct processing, and implicit techniques for non-manifold geometry.

Who Should Attend

Engineers involved with CAD, scientists involved with visualization, animators, programmers, or managers who use or build computer animation or geometric modeling tools.

Organizers

JAI MENON
IBM T. J. Watson Research Center

BRIAN WYVILL
University of Calgary

Lecturers

JULES BLOOMENTHAL
Microsoft Corporation

CHANDRAJIT BAJAJ
Purdue University

BAINING GUO
York University

JOHN HART
Washington State University

GEOFF WYVILL
University of Otago

12

Graphic Design for Usable GUIs

Room E1

Monday / Full Day / Beginning

This course explains what user interfaces are and how to design them well. Lectures reveal principles of effective visual communication for developing high-quality user interfaces for productivity tools, multimedia, and online services. Case studies and short design exercises show how to develop user-centered, task-oriented metaphors, mental models, navigation, appearance, and interaction that dramatically improve the usability and appeal of advanced products.

Who Should Attend

Users of user interface construction or multimedia/online authoring tools, programmers, and their managers, who are responsible for researching new tools or for ensuring the market success of applications, products, or services, and who want to acquire an understanding of user interfaces and techniques for designing them well.

Organizer

AARON MARCUS
Aaron Marcus and Associates, Inc.

Lecturers

JOHN ARMITAGE
VOLKER FRANK
PAMELA TIEN
Aaron Marcus and Associates, Inc.

13

Wavelets in Computer Graphics

Room 41/42/43

Monday / Full Day / Intermediate

This course is designed to introduce computer graphics practitioners to the many applications of wavelets: multi-resolution curve and surface modeling, image compression and processing, radiosity and radiance computations, solution of PDEs, and constrained optimization problems. It covers both wavelet fundamentals and application-driven algorithms, which can be put to immediate use by the participants.

Who Should Attend

Practitioners (students, researchers, implementors) in the field of computer graphics who want to come up to speed rapidly on this important new set of tools, as well as people already familiar with wavelets who want to find out about the current state of the art.

Organizers

PETER SCHRÖDER
California Institute of Technology

WIM SWELDENS
AT&T Bell Laboratories

Lecturers

DAVID SALESIN
University of Washington

MICHAEL COHEN
Microsoft Research

TONY DEROSE
Pixar

14

Introduction to Virtual Reality

Room 90/91/92

Monday / Full Day / Beginning

An introduction to virtual reality using immersive displays. This course covers system requirements, hardware, design of applications, and implementation of virtual worlds. The emphasis is on practical issues that must be addressed to begin working in virtual environments.

Who Should Attend

Those who wish to create immersive virtual environments.

Organizers

ANSELMO LASTRA
HENRY FUCHS
University of North Carolina at Chapel Hill

Lecturers

PAT GELBAND
Sense8

STEPHEN GHEE
Division Limited

HANS WEBE
University of North Carolina

RANDY PAUSCH
University of Virginia

15

A Practical Guide to Recording Video Animation from Computer Graphics

Room 5/7/9

Monday / Full Day / Beginning

From presentations to scientific visualization to education, from the World Wide Web to multimedia desktop systems, video is playing an increasingly important role in our computing environment. Most producers of these new video applications need to increase the quality of their productions. This course provides entry-level education for the growing worldwide community of novice video producers.

Who Should Attend

People starting or planning to build a computer-based video animation recording system, including desktop video or visualization centers for industrial and presentation uses.

Organizer

ROBERT JUDD
Los Alamos National Laboratory

Lecturers

JIM COSTIGAN
University of Illinois at Chicago

ROSS GAUNT
Lawrence Livermore National Laboratory

JOHN MAREDA
Sandia National Laboratories

ANDY MARTINEZ
Los Alamos National Laboratory

Monday

5 August

16

Visualizing Scientific Data and Information: Focusing on the Physical and Natural Sciences

Room 10/12/14

Monday / Full Day / Intermediate

This course demonstrates the application of visualization tools and interactive techniques for examination and interpretation of scientific datasets. Highly illustrative atmospheric, oceanographic, and geographic examples are demonstrated in real time. Also highlighted: the process of developing effective visualization paradigms for supporting high-speed networking, database management, heterogeneous computing platforms, user interface design, collaborative computing, science education, implementation of animation techniques, convergence of visualization methods with the World Wide Web, and the relationship between animation techniques and scientific information exploration.

Who Should Attend

Scientific researchers, educators, and computer graphics specialists interested in exploring particular issues associated with handling visual display of scientific information and large scientific datasets. Experience with scientific visualization systems and terminology is helpful, as well as understanding of graphics programming.

Organizer

THERESA-MARIE RHYNE
Lockheed Martin/US EPA
Scientific Visualization Center

Lecturers

MIKE BOTTS
University of Alabama in Huntsville

BILL HIBBARD
University of Wisconsin-Madison

LLOYD TREINISH
IBM Corporation

17

Creating and Manipulating Sound to Enhance Computer Graphics I: Algorithms and Techniques

Room 44

Monday / Half Day / Intermediate

An introduction to concepts of digital sound synthesis and manipulation: theory, algorithms, and issues in the computation of sound alone and sound combined with graphics. Specific topics include psycho-acoustics, algorithms for audio synthesis and processing, and networked audio. Source and binary code are available via ftp.

Who Should Attend

Engineers and people interested in sound for long-range development involving virtual environments, VRML, and multimedia.

Organizer

PERRY COOK
Princeton University

Lecturers

ROBIN BARGAR
University of Illinois at Urbana-Champaign

XAVIER SERRA
Pompeu Fabra University

ADRIAN FREED
University of California, Berkeley

18

Creating and Manipulating Sound to Enhance Computer Graphics II: Applications and Demonstrations

Room 44

Monday / Half Day / Intermediate

Specific applications and demonstrations illustrating the use of sound synthesis to enhance graphics applications. This course presents alternatives to sampling synthesis for those who want to apply more expression in the control of audio. Specific topics include sound in GUI-controlled applications, animations, virtual reality, HTML, and VRML. Source and binary code are available via ftp.

Who Should Attend

Engineers and people interested in sound for long-range development involving virtual environments, VRML, and multimedia.

High Technology Marketing: An Introduction to Key Concepts and Tools for Strategic Marketing of Technology Products

Room 40

Monday / Half Day / Beginning

This course presents key concepts in strategic marketing that are critical to both startups and established firms. Concepts are presented using Web-based tools and information to show how to develop successful product marketing strategies and plans.

Who Should Attend

All entrepreneurs, product or engineering managers, and executives in startup or established companies who are involved in defining or directing business and marketing strategies.

Organizer

RANDY NICKEL
Technology Marketing Consulting

Lecturer

TIM SHETLER
Informix Software Inc.

20

Introduction to Digital Compositing

Ballroom II A/B

Monday / Half Day / Beginning

This course covers the basic terms and processes required to understand compositing, particularly as it applies to a production environment. It details the basic operations used to combine multiple image elements into a single seamless image or image sequence, including how to prepare and repair elements, and what is needed for a clean final composite.

Who Should Attend

Anyone who needs to create an image or sequence of images that contains elements from different sources. The course is presented from a production viewpoint, but the concepts apply to graphic design, engineering, scientific visualization, and fine art.

Organizer

RON BRINKMANN
Sony Pictures Imageworks

Lecturers

GARY JACKEMUK
Digital Domain

JEROME CHEN
Sony Pictures Imageworks

21

Intermediate Digital Compositing

Ballroom II A/B

Monday / Half Day / Intermediate

This course continues where Introduction to Digital Compositing ends. It summarizes how elements are prepared and repaired before compositing and explains several more advanced techniques typically used to seamlessly integrate images from multiple sources. Specific examples from real-world productions are discussed and analyzed.

Who Should Attend

Anyone who needs to create an image or sequence of images that contains elements from different sources. The course is presented from a production viewpoint, but the concepts apply to graphic design, engineering, scientific visualization, and fine art.

Organizer

RON BRINKMANN
Sony Pictures Imageworks

Lecturers

GARY JACKEMUK
Digital Domain

JEROME CHEN
Sony Pictures Imageworks

22

OpenGL and Window System Integration

Room 37/38/39

Monday / Half Day / Intermediate

Development options for writing portable, high-performance, OpenGL programs for the X Window System. In addition to the standard Xlib and Motif interfaces, the course introduces high-level toolkits and alternative OpenGL interfaces for non-X11 systems such as Win32, OS/2, and the Macintosh. It also explains how OpenGL is accelerated by various classes of 3D graphics hardware and how to tune the performance of OpenGL applications for these common hardware classes.

Who Should Attend

X or OpenGL programmers who want to learn how to write OpenGL programs that cleanly, efficiently, and portably interface with the X Window System. Also: programmers planning to port X11-based OpenGL applications to other window systems.

Organizer

MARK KILGARD
Silicon Graphics, Inc.

Lecturer

BRIAN PAUL
University of Wisconsin-Madison

23

Programming with OpenGL: Advanced Rendering

Room 37/38/39

Monday / Half Day / Intermediate

Moving beyond the straightforward images generated by the novice, this course demonstrates the more sophisticated and novel techniques that are possible with the OpenGL library. Explanations of the concepts and demonstrations of the techniques required to generate images of greater realism and utility provide deeper insights into OpenGL functionality and computer graphics concepts.

Who Should Attend

Developers who need to generate more challenging or realistic images using OpenGL, anyone interested in the practical application of advanced rendering techniques, and application developers who want to use OpenGL with increased understanding and competence.

Organizer

TOM McREYNOLDS
Silicon Graphics, Inc.

Lecturer

DAVID BLYTHE
Silicon Graphics, Inc.

24

How to Survive as a Computer Graphics Entrepreneur

Room 40

Monday / Half Day / Beginning

Helpful approaches to finding the answer to a basic question: "Can I survive as a computer graphics entrepreneur?" Course presenters provide practical knowledge and experience, business advice, and an audience-participation session.

Who Should Attend

Individuals in the computer graphics field who intend to start or wish to investigate the possibility of launching their own computer-graphics-oriented business.

Organizer

MARK LEON
Forward Edge Technologies

Lecturers

DAVID HAMBY
Lightspan Partnership

NANCY COLLIER

Barking Dog Software

25

Life-Like, Believable Communication Agents

Ballroom II C

Monday / Full Day / Intermediate

This course is designed to give attendees a clear idea of how humans will be able to interact and communicate with computer agents of the future in a natural and life-like manner. The course first discusses the concept and characteristics of "believable" communication agents. Various state-of-the-art technologies are then presented with an emphasis on how they can be integrated with computer graphics technologies to realize next-generation agents.

Who Should Attend

Researchers who are interested in computer agents, especially investigators who have a background in computer vision and computer graphics and are willing to utilize computer agents.

New York University

Tuesday

6 August

26

Introduction to Curves and Surfaces

Room 40

Tuesday / Full Day / Beginning

The most commonly encountered concepts from CAGD are introduced using interactive demos and animations in an electronic book. Concepts include Bézier and B-spline curves and surfaces, their salient properties, and methods to handle them. Breakout sessions with all four speakers will be provided after the main presentation, both morning and afternoon.

Who Should Attend

CAD developers, programmers, analysts, animators, technical managers, researchers, and educators who want an introduction to curve and surface theory.

Organizer

ALYN ROCKWOOD
Arizona State University

Lecturers

HANS HAGEN
Universität Kaiserslautern

PETE CHAMBERS
VLSI Technology

THOMAS MCINERNEY
Apple Computer, Inc.

27

Fractal Models for Image Synthesis, Compression, and Analysis

Room 58/59/60

Tuesday / Full Day / Intermediate

As fractal geometry matures, its applications are extending beyond computer graphics image synthesis to closely related fields such as image analysis and image coding. This course teaches fractal concepts for modeling and analysis for computer graphics. It clarifies subtle differences in fractal representations, explains fractal image compression, and provides both presentation-quality and interactive methods for visualizing 3D fractal models. It develops a rigorous theory for demonstrated applications, ranging from botanical modeling to analysis of medical imagery.

Who Should Attend

Students and professionals who want a comprehensive view of fractals in computer graphics, with an emphasis on recent results.

Digital Color*Room 90/91/92***Tuesday / Full Day / Intermediate**

Computers have been used to generate synthetic images since the first SIGGRAPH conference, and to generate color images for nearly that long. But only recently has it become practical to create and reproduce digital images with predictable, accurate color, and easily move images from the SIGGRAPH world into video, film, and print. This course explains the science behind color reproduction, image digitization, and image reproduction in video, film, print, and computer graphics.

Who Should Attend

Hardware and software engineers, system designers, digital cinematographers, and advanced end users, including digital photographers.

Organizer

CHARLES POYNTON
Poynton Vector Corporation

THOR OLSON
Management Graphics

MICHAEL BOURGOIN
Adobe Systems, Inc.

JAN DE CLIPPELEER
Agfa-Gavaert

Representations of Geometry for Computer Graphics*Room 41/42/43***Tuesday / Full Day / Advanced**

The latest research on the most important computational representations of geometry used in computer graphics. The emphasis is on their strengths and weaknesses and how to build a coherent system that supports multiple representations.

Who Should Attend

Industrial software engineers engaged in the implementation of computer-graphics, geometric-modeling, or visualization-based systems, and anyone who is conducting research in these "geometric computation" areas.

Organizer

BRUCE NAYLOR
Spatial Visions

Lecturers

CHANDRAJIT BAJAJ
Purdue University

HERBERT EDELSBRUNNER
University of Illinois

ARIE KAUFMAN
State University of New York at Stony Brook

JAREK ROSSIGNAC
IBM Corporation

Pixel Cinematography: A Lighting Approach for Computer Graphics*Room E2/E3***Tuesday / Full Day / Intermediate**

A comprehensive approach to lighting for computer graphics. Four experts from both traditional cinematography and digital studio backgrounds offer insight on several issues, including real-world lighting and how it relates to CG lighting, material properties, integration and compositing issues, and how lighting relates to storytelling.

Who Should Attend

Anyone interested in computer lighting from a visual perspective. Attendees should have some experience with computer graphics.

Organizer

JOHN KAHRS
Blue Sky Productions

Lecturers

SHARON CALAHAN
Pixar

STEVEN POSTER
A.S.C.

EUAN MACDONALD
Industrial Light & Magic

Practical 3D User Interface Design*Room E1***Tuesday / Full Day / Intermediate**

Principles and techniques for creating 3D user interfaces (3D UIs) for modeling, animation, information visualization, multimedia, video games, and other emerging interactive systems with an emphasis on real-world 3D UI problems and practical solutions. Speakers from leading-edge companies and the research community address their design principles and processes and the results of their final implementations. Special attention is focused on: working with low-end platforms, supporting the World Wide Web, mixing 3D and 2D workspaces, and scalability. The course includes spirited roundtable discussions, live demonstrations, and case-study presentations.

Who Should Attend

UI product designers and software engineers who wish to create new 3D UIs or extend their current UIs by incorporating 3D UI techniques into production-quality applications. Researchers can also gain an understanding of the demanding 3D UI needs of real-world systems, including scalability, robustness, consistency, and breadth of functionality.

Organizer

DANIEL ROBBINS
Microsoft Corporation

Lecturers

MARK MINE
University of North Carolina at Chapel Hill

32

Introduction to VRML*Ballroom II A/B***Tuesday / Full Day / Beginning**

How to use VRML (Virtual Reality Modeling Language) to author 3D virtual worlds on the World Wide Web. Participants learn the syntax of VRML, typical usage patterns, how to avoid common mistakes, and tricks and techniques for increasing performance and realism. The course includes details and techniques not available in the VRML specification or published texts.

Who Should Attend

This course is intended for those who are interested in authoring their own virtual worlds on the Web using VRML.

Organizer

DAVID NADEAU
San Diego Supercomputer Center

Lecturers

JOHN MORELAND
San Diego Supercomputer Center

MICHAEL HECK

Template Graphics Software, Inc.

33

Designing Real-Time 3D Graphics for Entertainment*Ballroom II C***Tuesday / Full Day / Intermediate**

This course explores creation of real-time 3D games on platforms ranging from game consoles to location-based entertainment systems. Topics include the hardware architectures of game machines, visual simulation tricks, 3D modeling, character animation, and game prototyping, programming, and tuning to the metal. Recent efforts to enable reuse of content across platforms are also explored, including cross-platform renderers, game authoring systems, VRML, and 3D toolkits for Java. Speakers draw examples from development of actual games, tools, and production environments.

Who Should Attend

Programmers, modelers, and individuals with technical backgrounds in computer graphics who are interested in how 3D games are created.

Organizer

JAMES HELMAN
Silicon Graphics, Inc.

Lecturers

STEVE ROTENBERG
Angel Studios

PHILIPPE TARBOURIECH
Electronic Arts

SCOTT WATSON
Walt Disney Imagineering

ANDY BIGOS

34

Volume Visualization: Principles and Practice*Room 2/4/6***Tuesday / Full Day / Intermediate**

Volume visualization is a key technology for visualizing 3D-sampled, simulated, and synthetic datasets. This course provides an overview of the nomenclature, the technology, and the techniques, with an emphasis on algorithms, software tools, and applications. It covers different approaches in surface extraction, volume viewing, volume shading, volume synthesis, volumetric global illumination, commercially available software, and applications. Slides, videos, and live demos demonstrate state-of-the-art techniques.

Who Should Attend

Computer scientists and professionals who develop visualization techniques for volume data, and professionals in scientific, engineering, and biomedical disciplines who use or plan to use these techniques.

Organizer

ARIE KAUFMAN
State University of New York at Stony Brook

Lecturers

RICK AVILA
WILLIAM LORENSEN
LISA SOBIERAJSKI
General Electric Corporate Research and Development

RONI YAGEL
The Ohio State University

35

Interactive Walkthrough of Large Geometric Databases*Room 10/12/14***Tuesday / Full Day / Intermediate**

Techniques, algorithms, data structures, and databases for interactively displaying very large geometric databases (greater than one million polygons drawn at least 10 frames per second). Beginning with a discussion of basic techniques and leading to state-of-the-art algorithms, speakers address key issues in walkthrough, including visibility computations, automatic object simplification, and memory management through database subset pre-fetching. Speakers show real applications of these algorithms to a variety of areas, including visual simulation, virtual reality, architecture, and digital mockup.

Who Should Attend

Workers in simulation, animation, virtual reality, architecture, CAD, medical imaging, and scientific visualization who deal with geometric databases much larger than the interactive display capacity of their workstations.

Organizer

ERIC BRECHNER
Microsoft Corporation

36

Artificial Life for Graphics, Animation, Multimedia, and Virtual Reality

Room 37/38/39

Tuesday / Full Day / Intermediate

This course investigates the increasingly important role that artificial life concepts are playing across the breadth of computer graphics, including image synthesis, modeling, animation, multimedia, and virtual reality. Attendees are systematically introduced to techniques for realistically modeling and animating living things. They also explore graphics techniques that emulate phenomena fundamental to biological organisms, such as biomechanics, behavior, growth, and evolution. Topics include modeling and animation of plants, animals, and humans; behavioral animation; communication and interaction with autonomous agents in virtual worlds; and artificial evolution for graphics and animation.

Who Should Attend

Graphics researchers and practitioners, including animators and VR enthusiasts, who seek a close encounter with "life" at the leading edge of graphics modeling.

Organizer

DEMETRI TERZOPOULOS
University of Toronto

37

So Real I Can Almost Touch It: The Use of Touch as an I/O Device for Graphics and Visualization

Room 44

Tuesday / Full Day / Advanced

The sense of touch is under-exploited as an input/output device for computer graphics and scientific visualization. This course explores various tactile technologies and how to adapt them for use in human-computer interaction.

Who Should Attend

Graphics users who are working to enhance the human-computer interface by any means possible. The course is designed for the intermediate attendee, someone who has moderate 3D graphics programming experience and is now hoping to enhance that experience with knowledge of haptic input devices.

Organizer

MIKE BAILEY
University of California at San Diego

38

Scene Modeling Tools in Open Inventor

Room 5/7/9

Tuesday / Half Day / Intermediate

Open Inventor is a high-level, cross-platform, object-oriented, 3D interactive graphics and animation toolkit. This course covers the knowledge required to create and organize scenes and objects in Open Inventor, including scene graph organization, shapes, properties, groups, lights, cameras, textures, Windows interfacing, VRML, and release 2.1 extensions. Basic concepts are illustrated with demonstration programs that execute on one screen while attendees examine associated source code on another.

Who Should Attend

Application developers, including those who are creating 3D, interactive, animated applications for Windows and UNIX platforms; multimedia developers who wish to use the Inventor library to handle rendering, interaction, and animation; OpenGL jocks who want to step up to a higher level of object-oriented specification; and graphics tinkerers with Windows boxes who want to develop cool models and applications.

Organizer

The Future of Virtual Reality: Head-Mounted Displays Versus Spatially Immersive Displays

Room E2/E3

The head-mounted display (HMD) is the de facto display device for "true" virtual reality (VR) systems. However, walk-in spatially immersive displays (SIDs) such as CAVE and domed projection environments promise to challenge the HMD's role in VR display. This panel compares the ultimate utility of HMDs and SIDs in various VR applications. Issues include user mobility, single- and multi-user interactivity, stereoscopic viewing, applicability to augmented reality, visual quality, viewer fatigue, and sense of presence.

The Soul of the Machine: The Search for Spirituality in Cyberspace

Ballroom II A/B

In 1964, Marshall McLuhan prophesied a collective consciousness made possible by electronic technology. Thirty years later, through the Internet, virtual reality, and mass digitization, McLuhan's vision is being realized beyond even his wildest dreams. This panel brings together a diverse array of individuals actively involved in creating work that explores the spiritual impact and meaning of life in the digisphere.

PANEL

Issues in Networking for Entertainment, Graphics, and Data

Room E2/E3

The next generation of networking combines the telecommunications and data communications industries. Experts discuss this phenomenon and other technologies and issues related to networking in the entertainment, graphics, and media fields. The discussion focuses on the technology behind integrated networking for film, video, and audio distribution, as well as generic computer networking.

Thursday
3:30 pm to 5:15 pm

PANEL

Cognition, Perception, and Experience in the Virtual Environment: Do You See What I See?

Ballroom II A/B

Panelists compare and contrast cognitive, perceptual, and experiential modes of learning as they relate to immersive, interactive, real-time simulations. They also formulate an approach for applying these modes to design of useful virtual environments. This panel intends to establish a precedent: panelists and the audience will launch an effort within the SIGGRAPH community to establish a much-needed stylistic guide to designing, building, and displaying virtual environments.

PANEL

Building Compelling VRML Worlds

Ballroom II A/B

This panel explores and compares several different directions in large-scale sites that use VRML to show what 3D on the Web can offer: multimedia, responsive, changeable, and expandable worlds. Being "large-scale" is not necessarily correlated with the heft of the files. A better goal is a balance between ideas, visual design, and navigability. With this balance in mind, each panelist explores one of several domains: formation of a vocabulary for "virtual architecture," reconstruction of a lost archaeological site, exploration of hybrid narrative and creation of a "procedural cinema," and creation of a VRML-based Web site business. Panelists present the ideas behind their work and address issues they all have in common: how one weaves motion, lighting, architecture, sound, history, navigation, and narrative into a fabric of interactive experience.

PANEL

Live Computer Animation

Ballroom II A/B

General-purpose graphics workstations typically used for computer-aided design, scientific computation, visual simulation, and film special effects have become highly sophisticated. They are able to generate high-quality, real-time computer animation for live creation of graphics and effects for television broadcast, a field typically dominated by special-purpose video processing hardware. And they are beginning to appear in a variety of innovative applications. The panel presents some of those innovative applications, reviews the advantages and difficulties of using general-purpose computers for television, discusses technical and business issues related to these applications, and speculates about future directions.

Imaging Features in Advanced Computer Graphics Architectures

Room E2/E3

Something new is happening in computer graphics. In addition to traditional polygonal rendering, the latest commercial graphics systems now incorporate 2D imaging and 3D volumetric capabilities. Why? This panel presents the different approaches used in commercially available systems and concludes with a discussion of which applications will be enabled by these capabilities.

Member Discounts

You must include your current national ACM or SIGGRAPH membership numbers to receive member discounts. If you do not provide a valid membership number, you will be charged non-member rates. If you are a student, you must show a copy of your 1996 ACM student membership card or your valid student identification card. If you do not show your ACM membership card or your valid student identification card, you will be charged the full non-member registration fee.

Registration Hours

If you registered by Tuesday, 16 July, please go to the advance registration Hall D lobby. Otherwise, proceed to onsite registration in Hall D. Registration hours:

Saturday, 3 August	7 pm to 10 pm
Sunday, 4 August	10 am to 9 pm
Monday, 5 August	8 am to 7 pm
Tuesday, 6 August	8 am to 7 pm
Wednesday, 7 August	8 am to 6 pm
Thursday, 8 August	8 am to 6 pm
Friday, 9 August	8:30 am to 1 pm

Media Headquarters Hours

<i>Room 97</i>	
Sunday, 4 August	10 am to 7 pm
Monday, 5 August	8 am to 7 pm
Tuesday, 6 August	8 am to 7 pm
Wednesday, 7 August	8 am to 6 pm
Thursday, 8 August	8 am to 6 pm
Friday, 9 August	8:30 am to 1 pm

Media Registration

Media representatives must register in the Media Headquarters office.

Media-only Information and Events

Media Briefing
 Tuesday, 6 August
 8 am to 8:45 am
Room 100/102

The official SIGGRAPH media briefing is the place for you to hear about what's new and what's hot at SIGGRAPH 96. See a preview of the Electronic Theater, and receive insight into new venues such as the Digital Bayou, The Bridge, and Applications.

Media Tours

Exhibition Floor Tour
 Immediately Following the Media Briefing
 Tuesday, 6 August
 9 am to 10 am

Gain access to the exhibit floor before its opening to the general public for a "sneak preview" of the latest products and applications offered by more than 250 exhibitors. Small groups of media representatives will be escorted onto the exhibit floor.

Exhibitor Media Events

A schedule of various exhibitor media events will be available in the Media Headquarters office (*Room 97*).

Special Policies

- The Exhibition is only open to badged attendees.
- Children under 16 are not permitted in the Exhibition. For more information on child care, see page 60.
- No cameras or recording devices are permitted at SIGGRAPH 96.

SIGGRAPH 96 and the Ernest N. Morial Convention Center offer several services during the conference to make your week more enjoyable.

Audio/Visual Services

Hall F

Direct all questions about audio/visual needs to this office. Office hours are Sunday – Thursday, 7 am to 7 pm and Friday, 7 am to 2 pm. For more information on audio/visual services for speakers, see Speaker Prep Room, page 61.

The Bridge: SIGGRAPH 96 Art Show Office

Room 66

Contributors can gather here to exchange ideas, leave messages, or discuss questions and concerns.

Business Center

Hall E Lobby

Exhibitor Concierge is on hand to provide copy, fax, courier, desktop publishing services and office supplies for a fee.

Career Center

Room 85/86

Saturday, 3 August	7 pm to 10 pm
Sunday, 4 August	10 am to 9 pm
Monday, 5 August	8 am to 7 pm
Tuesday, 6 August	8 am to 7 pm
Wednesday, 7 August	8 am to 6 pm
Thursday, 8 August	8 am to 6 pm
Friday, 9 August	8:30 am to 5 pm

If you're looking for a new position, or if you're searching for talented employees, check out the SIGGRAPH 96 Career Center. Post your employment opportunities. Request resumes from job candidates. Ask us to distribute your resume to specific employers. Schedule interviews in private meeting rooms.

Career Center facilities and services are available free of charge to SIGGRAPH 96 exhibitors and attendees who are exploring job opportunities. Non-exhibitor employers must make arrangements with the Exhibition Management office to use the Career Center.

Check Room

Hall E Lobby

Luggage check services for briefcases, backpacks, and other small items are available during registration hours. Items cannot be checked overnight. Charges are \$2 for bags and \$1 for coats. Any items left in the check room after 5 pm on 9 August will be turned over to the Ernest N. Morial Convention Center security.

Child Care

Rooms 11 and 13

To leave messages for the Child Care area contact Accent on Arrangements: +1.504.524.1227

Accent on Arrangements provides age-appropriate child care activities for children from three months to 16 years of age at the Ernest N. Morial Convention Center. Children must be registered for a minimum of three hours. Individualized evening child care is also available on a limited, first-come, first-served basis.

If you need to cancel a registration, you must call 24 hours in advance to qualify for a full refund of your child care fees. The Accent on Arrangements staff is certified in infant and child CPR. Child care services are guaranteed to be available during the following hours:

Sunday, 4 August	11:30 am to 7 pm
Monday, 5 August	8 am to 6 pm
Tuesday, 6 August	8 am to 7 pm
Wednesday, 7 August	8 am to 7 pm
Thursday, 8 August	8 am to 6 pm
Friday, 9 August	8 am to 6 pm

Onsite registration prices: \$7 per hour for the first child per family; all others from the same family \$5 per hour per child.

Fees include snacks and beverages in the morning and afternoon.

Computer Animation Festival Office

Room 83

Contributors can gather here to exchange ideas, leave messages, or discuss questions and concerns.

Conference Management Office

Room 89

If you have questions regarding SIGGRAPH 96, call +1.504.544.6004 or stop by this office at anytime.

Conference Policies

- Smoking is not permitted at any of the conference locations.
- No cameras or recording devices are allowed.
- Children under 16 are not permitted on the Exhibition floor.
- SIGGRAPH 96 is not responsible for lost badges. Lost badges must be repurchased by the attendee.

Digital Bayou Office

Hall C

Contributors can gather here to exchange ideas, leave messages, or discuss questions and concerns.

Electronic Theater Tickets

See Tickets, page 62.

Ernest N. Morial Convention Center Accessibility

The convention center is wheelchair accessible. It has no curbs, and there are elevators to the second and third floors.

Ernest N. Morial Convention Center Parking

SIGGRAPH 96 attendees can park in two lots adjacent to the Ernest N. Morial Convention Center:

- Downtown Parking, between the New Orleans Hilton and the Convention Center, 6 am to midnight, \$7 for 4-10 hours, no in/out privileges.
- Fulton Street Garage, across the street from Hall C, 6 am to 9 pm, \$5/day, no in/out privileges.

Exhibition Management Office

Hall F

If you have questions regarding the SIGGRAPH 96 Exhibition, feel free to call +1.504.544.6006 or visit a staff member here.

Exhibitor Registration

Hall F

Exhibitors should pick up their badges at the exhibitor registration counter, which is open during the registration hours.

First Aid

Hall E

A registered nurse or paramedic is on duty at the first aid areas during registration hours.

Food Services

The Ernest N. Morial Convention Center operates several food concession areas for the convenience of SIGGRAPH 96 attendees, including the Cafe between Halls B & C and a temporary restaurant in Hall F. Food carts and casual seating are also available throughout the convention center.

Information Booths

Hall D Lobby and Hall F Lobby

Stop here for answers to questions about SIGGRAPH 96 and information on how to find conference destinations.

Internet Access Center

Hall F

Complete Internet access to your home, office, and colleagues around the world, available to all attendees every day during registration hours beginning Sunday.

Lost and Found

Security

All items should be turned over to the Ernest N. Morial Convention Center security office. To inquire about lost items, call +1.504.582.3040 (24 hours a day, seven days a week).

Merchandise

Hall D

SIGGRAPH 96 merchandise is available for sale in Hall D. Merchandise must be purchased and picked up by 1 pm, Friday, 9 August.

Merchandise Sold After the Conference

SIGGRAPH 96 Conference Proceedings and Proceedings CD-ROM. The SIGGRAPH 96 technical program at the conference, including Papers and abstracts of Panels.

SIGGRAPH 96 Visual Proceedings and Visual Proceedings CD-ROM. The art and interdisciplinary programs at SIGGRAPH 96, including The Bridge, the Computer Animation Festival, Sketches, Applications, and Digital Bayou.

SIGGRAPH 96 Course Notes CD-ROM. Notes from all courses presented at the conference.

SIGGRAPH 96 Slide Set Bundle. The Technical and Art Show slide sets.

SIGGRAPH Video Review. Animations presented in the Electronic Theater and Festival Screening Rooms.

orders@acm.org

Message Center

Hall F Lobby

Messages are posted on bulletin boards in the Message Center.

Registration

Advance Registration

Hall D Lobby

Onsite Registration

Hall D

Registration counters are open:

Saturday, 3 August	7 pm to 10 pm
Sunday, 4 August	10 am to 9 pm
Monday, 5 August	8 am to 7 pm
Tuesday, 6 August	8 am to 7 pm
Wednesday, 7 August	8 am to 6 pm
Thursday, 8 August	8 am to 6 pm
Friday, 9 August	8:30 am to 1 pm

Restaurant/Tour Information Desk

Hall D Lobby

Menus from local restaurants are available here. Staff members can assist you with restaurant selection and reservations. Information on New Orleans attractions, tours, and diversions is also available. The desk is open during registration hours.

Shipping Desk

Hall D

For your convenience, a shipping desk at SIGGRAPH 96 provides next-day air, second-day air, and regular ground shipping services to destinations throughout the world.

Speaker Prep Room

Room 52

Saturday, 3 August	2 pm to 8 pm
Sunday-Thursday, 4-7 August	7 am to 7 pm
Friday, 9 August	7 am to 2 pm

All speakers must check in at the Speaker Prep Room at least 24 hours before their presentation.

Speakers and contributors should use the contributor registration desk in the Hall D Lobby to pick up registration credentials.

Speakers use the Speaker Prep Room to prepare for their presentations, preview slides and videotapes, sort slides, and obtain slide carousels.

Changes in audio/visual equipment needs in presentation rooms should be directed to the speaker prep room.

Special Assistance Desk

Hall D Lobby

Staff members at the special assistance desk help attendees resolve a wide range of possible problems and concerns, including:

- Credit card problems (validations, errors)
- Lost badges
- Misspelled names on conference materials
- Payments submitted without registration forms
- Registration forms submitted without payments
- Substitute registration (only if authorized on company letterhead)

Tickets

Additional Purchases

Electronic Theater

One ticket per person is included with Conference, Courses, and Papers/Panels Passport registrations. Every attempt is made to accommodate your requested Electronic Theater evening. All performances contain the same material.

Badged attendees may purchase up to four Electronic Theater tickets (subject to availability) at onsite registration beginning at 7 pm Saturday. If additional tickets are available, they will be sold at the Saenger Theatre box office just before showtime. Last-minute tickets may be available at the door.

Receptions

Badged attendees may purchase additional tickets for the course reception and papers/panels reception at onsite registration.

The SIGGRAPH information booths provide information about these services and activities.

ACM

Hall E Lobby

ACM, the first society in computing and sponsor of the SIGGRAPH conference, serves as an umbrella organization to information-technology professionals. Through its magazines, journals, books, and conferences, ACM offers its members access to information on the latest developments in cutting-edge technology, the transfer of ideas from theory to practice, and opportunities for information exchange. ACM is the resource for lifelong learning in the rapidly changing information technology field.

SIGGRAPH One More Time

Hall D

SIGGRAPH once again makes back issues of all publications, including slide sets, proceedings, and CD-ROMs of the SIGGRAPH conference, as well as other conference proceedings, available to SIGGRAPH 96 attendees. Come early – many interesting materials are in very short supply.

For more information contact:

STEPHEN SPENCER
spencer@siggraph.org

SIGGRAPH Professional Chapters

Hall E Lobby

The Professional Chapters of ACM SIGGRAPH, formerly called Local Groups, exist in over 30 cities in 10 countries around the world. They form an international multi-cultural network of like-minded people who develop, continue, and extend the work and achievements presented at the annual ACM SIGGRAPH Conference. Each chapter includes members involved in education, research, development, industry, and entertainment who are interested in the development of computer graphics and its related technologies and applications. Here is your opportunity to continue your SIGGRAPH experience by joining a professional chapter. If there is no professional chapter in your local area, inquire at the SIGGRAPH Professional Chapters Booth about how to form one.

For more information contact:

SCOTT LANG
SIGGRAPH Director for Professional Chapters
lang@siggraph.org

SIGGRAPH Video Review

Hall D

SIGGRAPH Video Review is the world's most widely circulated video-based publication. Since 1979, SIGGRAPH Video Review has illustrated the latest concepts in computer graphics and interactive techniques/technologies. Over one hundred programs provide an unequalled opportunity to study advanced computer graphics theory and applications. SIGGRAPH Video Review tapes are available at SIGGRAPH 96 in NTSC VHS and PAL VHS.

SIGGRAPH Travel Coordinator

Hall D Lobby

A representative from Flying Colors (SIGGRAPH Travel Coordinator) is available to assist you with your travel and housing needs at the following times:

Saturday, 3 August	7 pm to 10 pm
Sunday, 4 August	10 am to 9 pm
Monday, 5 August	8 am to 7 pm
Tuesday, 6 August	8 am to 7 pm
Wednesday, 7 August	8 am to 6 pm
Thursday, 8 August	8 am to 6 pm
Friday, 9 August	8:30 am to 1 pm

If you wish to rent a car, special discounted rates have been arranged with Alamo Rent A Car, Inc. Your Flying Colors agent can book a car reservation for you or you can call Alamo directly at 800.732.3232 and mention SIGGRAPH ID #75148.

Shuttle Service

SIGGRAPH 96 provides free shuttle service between most conference hotels and the Ernest N. Morial Convention Center. Schedules are displayed at the hotels. See the Conference Locator for complete details on shuttle service. For assistance with handicap service, please call +1.504.592.1991. SIGGRAPH 96 provides buses with wheelchair lifts and tie-downs.

Ernest N. Morial Convention Center Shuttles to Receptions, the Electronic Theater, and the Contemporary Arts Center

Course Reception – Monday

Cajun & Creole Queen Paddleboats and New Orleans International Terminal

Shuttles to join the Course Reception parade begin departing for the Marriott at 7 pm from all hotels except those within walking distance (Routes 2, 4, and 7). Shuttles directly to the Cajun & Creole Queen Paddleboats begin departing from all hotels except the Hilton, which is within walking distance, at 7:30 pm.

Return transportation is available until 11:30 pm.

Papers/Panels Reception - Thursday

New Orleans Marriott Grand Ballroom

Beginning at 7:30 pm, shuttles depart from all hotels except those within walking distance (Routes 2, 4, and 7). Return transportation to most conference hotels is available until 11:30 pm.

Electronic Theater - Monday Through Thursday

Saenger Theatre

Shuttles from Hall F, Ernest N. Morial Convention Center, to the Saenger Theatre begin service one hour prior to show time. For the 9 pm Tuesday showing, shuttle service begins at 8 pm from all conference hotels. Shuttles also provide transportation directly from the Saenger Theatre to the Course and Papers/Panels Receptions. See the Conference Locator for details.

Contemporary Arts Center

Shuttle service is available from the Ernest N. Morial Convention Center to The Bridge: SIGGRAPH 96 Art Show at the Contemporary Arts Center. See the Conference Locator for details.

Airport Shuttle

Hall D Lobby

Airport Shuttle booth hours:
Wednesday - Thursday, 8 am to 6 pm
Friday, 8:30 am to 1 pm

One way \$10. If you make your return reservation at the Airport Shuttle Desk, you will receive \$1 off. Return reservations should be made at least one day prior to your departure. You may call Airport Shuttle direct at +1.504.522.3500.

Overview

Computer networking has become an integral part of both the computer graphics community and the SIGGRAPH conference. As part of the conference infrastructure, SIGGRAPH 96 has installed a state-of-the-art intranet linking programs and exhibitors within the conference to the global graphics community. The networked graphics environment created at SIGGRAPH 96 provides an international communications forum for attendees, exhibitors, contributors, and remote participants.

Creating such an environment requires supporting the transport of full-motion video, high-resolution graphics, audio, and raw data. A high-bandwidth, low-latency, reliable network is required to support such transport. The ATM-based switched internetwork that was considered technical innovation as recently as SIGGRAPH 95 is now expected by contributors and exhibitors.

The process for meeting the above requirements began with an analysis of the multitude of applications supported last year and expected growth at SIGGRAPH 96. This analysis led to the design and implementation phase that resulted in this year's GraphicsNet configuration.

Requirements

A major growth area in the design was the requirement for more Internet support. This was driven by exhibitors and contributors relying on the World Wide Web for their demonstrations. Additionally, all of the technical programs have networked computers for access to the WWW during presentations. Internet access will be available to all conference participants. The SIGGRAPH 96 information kiosks, composed of clusters of Hewlett-Packard workstations, connect to the conference Web server and provide onsite up-to-date information about the conference. Each individual connection is not a significant consumer of bandwidth by itself. However, the aggregate bandwidth is well above 10 Mbps, necessitating a T3 (45Mbps) Internet connection as part of the solution.

Internal to the conference, there are several high-bandwidth applications that require the ATM transport capability. For instance, live video from the Keynote Address is distributed into the Digital Bayou and Applications area. Also, some exhibitors and Digital Bayou contributors are participating in interactive simulations using the Distributed Interactive Simulation (DIS) virtual environment. Yet another high-bandwidth application is an onsite oceanographic simulation with real-time access to a remote supercomputer. External WAN (wide-area network) connec-

tions are required in at least two areas. The Bridge: SIGGRAPH 96 Art show will have two sites, one at the convention center and another at the New Orleans Contemporary Arts Center (CAC). These two sites require a network link for presentation of interactive technologies and collaborative efforts. The second WAN is for offsite speakers in the Papers and Panels programs.

Architecture

This year, GraphicsNet features LAN Emulation over ATM (ATM Forum LANE 1.0 standard). LANE provides transparent support for multiple network protocols over an ATM backbone. Using ATM and LANE allows segregation of the logical network design from the physical network infrastructure. This leads to a simplified flat addressing network design, that supports high-bandwidth requirements and multicasting. Direct ATM-attached workstations, ATM/Ethernet (edge of backbone) devices providing distributed routing functions, and the T3 Internet and WAN services are connected to a backbone of ATM switches distributed throughout the convention center.

Design and Implementation

The main SIGGRAPH 96 networking goal was an intranet that was simple to setup, easy to maintain, reliable, and state-of-the-art. The Ernest N. Morial Convention Center has an extensive network infrastructure in place. The facility provides fiber and 10BaseT connectivity to almost any internal location on a timely basis and at a competitive price. Using network utilization information from SIGGRAPH 95, ATM technology, and the existing cable plant design, we quickly developed a baseline network backbone design.

NetSuite Professional Design software was used to help design the network. This tool provided network diagrams, physical design and topology validation, a database for IP address planning and asset reporting, and automatic HTML generation. In effect, NetSuite was the network database, ideal tool for design, implementation, and management of this complex network.

Network Software

Sun's Netra Internet Servers are being used to host Web and email services and provide Domain Name Services (DNS) for SIGGRAPH 96. The servers use the POP2/3 and IMAP mail protocols and include the latest available software from JavaSoft and Netscape with a complete security/firewall facility. The DNS configuration and management are handled by Inter Commerce Corporation (ICC). ForeThought networking software is used to manage the ATM switch backbone infrastructure and the LANE intranetwork. This software also supports VLAN bridging and router support within the intranet. The network management platform is ForeView running under SunNetManager on Sparcstations.

Network Hardware

The ATM backbone is composed of one FORE Systems ForeRunner ASX-1000 ATM switch and 25 FORE Systems ForeRunner ASX-200BX ATM switches. The ASX-1000 is the main switch, and each of the other switches is linked to it by either a 155 Mbps multi-mode OC-3c connection or a 622 Mbps multi-mode OC-12c connection. The switches are placed in equipment rooms, catwalks above the exhibit floor, or individual rooms.

The T3 Internet link is connected to a Cisco 7500 series router located in the convention center's demarcation room. This router is directly connected to an ASX-200BX switch and to another Cisco 7500 series router at the CAC. The T3 Internet link and the circuit between the CAC and the convention center are provided by Inter Commerce Corporation. External WAN connections also terminate in the demarcation room and are connected to the ASX-200BX located there.

Ethernet connectivity is via FORE Systems ES-3810 Ethernet Workgroup Switches and FORE Systems PowerHub 7000 Intelligent Switching hubs. The ES-3810s provide ATM LANE connectivity for 10BaseT desktop ports or four port Ethernet hubs. The PowerHubs provide distributed routing functionality for the LANE intranetwork and additional 10BaseT segments. The switches and hubs are located in the catwalks above the exhibit floor or the convention center telephone closets.

Individual computers are connected to the network in one of three ways: direct ATM connection, 10BaseT switched Ethernet connection, or 10BaseT shared Ethernet connection. Ethernet hubs from both LANCAST and D-Link Systems are connected to the ATM/Ethernet switches to provide shared Ethernet connections.

Video is distributed over the ATM backbone with Nemesys Research's ATM video encoding and decoding products: the AVA 300 and ATV 300.

The Network Operations Center is the central point for configuring, monitoring, and maintaining GraphicsNet. It is located in Room 8 on the second floor of the convention center. Two other troubleshooting areas are located in the Digital Bayou offices and the Exhibitor Service Center.

The SIGGRAPH 96 Online kiosks use Hewlett-Packard C110 Visualize-48 workstations.

All the tools that power the digital revolution. This year's most advanced hardware. Software that converts inspiration to reality. Systems that solve problems and support creativity. And a vast array of expertise and experience. All in the largest annual gathering of companies that supply the world's most dynamic industry. The SIGGRAPH 96 Exhibition features a special innovation:

STARTUP PARK (see page 111 for list of exhibitors)

New technology from the small companies that hope to become tomorrow's industry leaders. This area of the exhibition offers emerging suppliers of the latest products and services an easy entry into the ever-expanding computer graphics marketplace.

President

3D Builder software makes it easier and faster to build dimensionally accurate 3D models of your real-world data from photos. It features automatic texture mapping from the photo and optional camera calibration for improved accuracy. Offering a valuable alternative to constructing 3D models of existing objects, 3D Builder works seamlessly with the major rendering and animation packages, freeing you to concentrate on the creative possibilities.

Catherine Crawford
Marketing and Sales Coordinator

3Dlabs is leading the revolution in high-performance 3D graphics on the PC, selling silicon, software, and technology for 3D acceleration. The new GLINT 500TX provides workstation-class 2D and 3D graphics on a single PCI chip, accelerating Gouraud shading, depth buffering, anti-aliasing, and texture mapping to 500,000 polygons/second. The GLINT Delta accelerates the 3D geometry pipeline to one million polygons per second on a standard PC. The new PERMEDIA provides high-performance 2D, video, and 500,000 texture-mapped 3D polygons per second in a single low-cost chip. 3Dlabs supplies reference designs and optimized drivers for OpenGL, Direct3D, Heidi, and QuickDraw 3D, enabling OEMs to rapidly integrate 3D into their products.

Ehud Spiegel

Integrate automated video retouching, rotoscoping, painting, and special effects into your post-production software and systems. AutoMasker - AUTOMATED VIDEO MASK CUTTER - the world's first software for accurate isolation of colored, moving, and changing objects, from any dynamic background, in a fraction of the time used in conventional masking, "manual" keying or "cleaning" techniques. Following initial rough marking, AutoMasker locates the exact object border in subsequent frames. TV-Technology NAB96 top 10.

The AXA Animation Series is the leading digital ink and paint system used in professional animation studios to produce Saturday morning cartoon series like "Casper the Friendly Ghost," TV commercials like Cheerios, CD-ROMs, CD-Is and video games. Hand-drawn images are quickly captured into a traditional exposure sheet for storage and timing control. AXA Pencil Test lets you preview multiple scenes with up to 100 levels of animation, including camera moves and a synchronized sound track. Running on a PC under Windows (3.1, 95, NT), the AXA Animation Series is the easiest and most cost-efficient digital ink and paint system available.

Marketing Manager

Balboa Capital offers a variety of leasing and financing products for a wide range of equipment. We specialize in financing high-tech, high-obsolescence items including audio/video, multimedia, and computer equipment. We provide no-penalty upgrades, varied payment schedules to match cash flow, and equipment value curves and plans that maximize tax benefits and preserve bank lines.

If you can imagine the shape,
you can build it with

form•Z the 3D form synthesizer

- Model designs with ease and versatility, whatever your profession or style of design may be.
- Sketch your ideas, then explore and articulate your creations with accuracy and detail, using a design tool with unparalleled capabilities and a range of modeling tools not found in any other software package.

• With over ten continuously updated import/export formats, form•Z models can easily be transported to other rendering and animation applications running on a variety of platforms.

Available for
Mac OS and
Windows 3.1, NT, and 95

CREDITS: Clockwise from left:
Piano by M. Del Grosso;

Speed Razor Mach 3.5 for Windows NT coming soon. This amazing product includes: the ability to mix audio levels as the video and audio play back in real-time, and the ability to relocate the position of an audio clip while the audio is playing. Plenty of new effects. Markers: users press the TAB key to place markers on the timeline while playing the audio track, as well as SNAP TO while dragging or trimming. Looped playback of project or section. Enhanced frame accurate print-to-tape-and-deck control. Ability to turn off rendering of effects and transitions. A sticky jog-shuttle on the timeline. And the ability to size the library icons.

TDZ 3D Workstations

The crème de la crème of 3D acceleration, TDZs have powerful NEW RealizM™ graphics, featuring:

- Real-time performance with no compromise in texture quality, display resolution, or picture color depth
- 1.2 million lit, 50-pixel triangles per second
- Up to 64 MB of texture memory; 32 MB of frame buffer memory
- True color at 1,824 x 1,368 resolution

Five-star cuisine for Windows NT® applications

such as animation, CGI/video production, virtual reality, visual simulation, solid modeling, and games, RealizM accelerates more graphical effects than any other graphics system available. In addition to the OpenGL® and Heidi® libraries, RealizM accelerates RenderGL™, a library of special effects that includes:

- Phong shading
- Bump maps
- Shadows
- Solid 3D textures

For the budget gourmet,
prices start below
\$10,000.

MultiGen develops the leading real-time 3D authoring software toolset for visual simulation, entertainment and CAD visualization applications. MultiGen products are used to create, edit, optimize, and view realtime 3D scenes for implementation on any hardware platform. At SIGGRAPH 96, MultiGen features SmartScene, MultiGen II Pro, and GameGen II, plus a networked DIS demonstration in collaboration with strategic partners.

A TRIP DOWN THE GRAPHICS PIPELINE

Meet The Master

Jim Blinn will sign copies of his new book at SIGGRAPH on Wednesday afternoon at Morgan Kaufmann booth #1611

Jim Blinn's Corner: A Trip Down the Graphics Pipeline

by Jim Blinn, Microsoft Research

Eminent computer graphicist Jim Blinn has coupled his scientific knowledge and artistic abilities to foster the growth of the computer graphics field. This book, a compendium of 20 articles from his column in *IEEE Computer Graphics and Applications*, leads you through the "graphics pipeline" offering a wealth of tips and tricks. In his entertaining and inspirational style, Blinn explores a variety of topics to help computer graphics software and application developers recognize and solve graphics programming problems. Focusing on geometry and the graphics pipeline he shares:

- interesting algorithms for clipping, viewing, lighting, and rendering
- explanations of difficult concepts gleaned from years of teaching
- examples of tricky special cases that cause conventional algorithms to fail

1996; 300 pages; paper; ISBN 1-55860-387-5; \$34.95

Interactive Curves and Surfaces: A Multimedia Tutorial on CAGD

Alan Rockwood, Arizona State University and Peter Chambers, VLSI Technology, Inc.

This interactive software/book tutorial teaches foundational CAGD concepts and discusses fast-growing applications in such areas as geological and molecular modeling, commercial advertising, and animation. Using interactive examples and animations to illustrate the mathematical concepts, this hands-on multimedia tutorial enables users who may not have a substantial mathematical background to quickly gain an understanding of CAGD.

1996; approx 200 pages; paper; 3.5" disks for windows; ISBN 1-55860-405-7; \$59.95

Introduction to Data Compression

Khalid Sayood, University of Nebraska, Lincoln

1996; 475 pages; cloth; ISBN 1-55860-346-8; \$69.95

Wavelets for Computer Graphics: Theory and Applications

Eric J. Stollnitz, University of Washington, Tony D. DeRose, Pixar Animation Studios, David H. Salesin, University of Washington

Stressing intuition and clarity, this distinctly accessible introduction to wavelets provides graphics professionals and researchers with the mathematical foundations for understanding and applying this new and powerful tool. This book focuses on a generalized theory that naturally accommodates the kinds of objects that commonly arise in computer graphics, including images, open curves, and surfaces of arbitrary topology. 1996; approx 250 pages; cloth; ISBN 1-55860-375-1; \$49.95

Radiosity and Global Illumination

Francois Sillion and Claude Puech

1993; 251 pages; cloth; ISBN 1-55860-277-1; \$49.95

Principles of Digital Image Synthesis

Andrew S. Glassner, Microsoft Research

This sweeping work provides an introduction to the human visual system, digital signal processing, and the interaction of matter and energy. Glassner demonstrates how these disciplines are elegantly orchestrated into modern rendering techniques such as radiosity and ray tracing.

1995; 1600 pages/2 volumes; cloth; ISBN 1-55860-276-3; \$89.95

Readings in Human-Computer Interaction Toward the Year 2000, Second Edition

Written and edited by Ronald M. Baecker, Jonathan Grudin, William Buxton, and Saul Greenberg

The latest in HCI; hypertext, multimedia, GUIs, and more... Combines reprints of key articles and case studies with synthesizing survey material and analysis by the editors.

1994; 950 pages; paper; ISBN 1-55860-246-1; \$59.95

Web Server Technology: The Advanced Guide for World Wide Web Information Providers

Nancy J. Yeager and Robert E. McGrath, National Center for Supercomputing Applications

This authoritative presentation of Web server technology takes you beyond the "how-to" guides to provide an understanding of the underlying principles and technical details of how Web servers work. Architects of the award-winning NCSA WWW service, the authors share the experience and insight they've gained by establishing and maintaining one of the most popular sites on the Web.

1996; 428 pages; paper; ISBN 1-55860-376-X; \$34.95

Drums also provides access to compelling imagery, T-1 connectivity to the Internet, and a directory of users.

The power SGI behind the universe.

At Silicon Graphics, we continue to generate high-end technology that's transforming the world. Changing the way people work, invent and dream. Powering the creative evolution in high-performance visual computing and enterprise systems technologies.

And the power behind the SGI universe?

The people who use the technology and the people who make the technology possible.

From the awesome power of new interactive 3D graphics to the latest innovations in multiprocessing supercomputing technologies, discover for yourself the brave new worlds being explored by Alias/Wavefront, MIPS Technologies, Cray Research, Silicon Studio, and more by visiting SGI at SIGGRAPH '96.

Talk to us at Siggraph about career opportunities or check out our website at www.sgi.com/MISC/Jobs/

Silicon Graphics
Computer Systems

See what's possible

5 Gflops FFT Box

- Four S2 Processors
- 2 GB System Memory
- 1200 MB/s Bandwidth
- 6 I/O Ports (200 MB/s)

**1K CFFT
in 11 usec**

**64K CFFT
in 850 usec**

The **Viper-5** DSP system is designed to execute FFT-intensive scientific DSP routines very efficiently. It is based on the S2 super vector processor board which utilizes the **TM-66 swiFFT chip**. With four S2 vector processing boards, one scalar Alpha-based processing board, and a large, fast, shared memory, the Viper-5 can be attached as a **fast back-end scientific processor** to one or more workstations (**DEC, SGI, SUN**). High level program development takes place on the workstation, and the compiled code executes on the Viper-5. Also, with six fast I/O ports and a low overhead software executive, the Viper-5 makes for an ideal **real-time system**. The basic Viper-5 system (w/S2, 256 MB) costs \$55,000.

Introducing Mega Monitor:TM

with 250 MHz video input bandwidth,
1800 x 1440 @ 76Hz and a
30-115 KHz horizontal scan range,

what else could you call it?

Announcing the ViewSonic P815 21" (20" viewable) monitor. It's the latest innovation from ViewSonic®, the recognized leader in color monitor technology. And it's a mega hit.

More power to you.

Talk about unbelievable numbers: Resolutions up to 1800 x 1440 at a 76Hz refresh rate. A whopping 250MHz video input bandwidth. A horizontal scan rate up to 115KHz. And a 0.25mm dot pitch. All high water marks in the industry.

It's the new standard for high-end CAD, document imaging and other precision-oriented applications. The text is the sharpest available today. The images are flicker-free, virtually eliminating eye strain. It displays more information faster than any monitor you've seen before and with BNC and VGA connectors you can easily switch between two separate systems.

Compared to other monitors there is no comparison.

Although its performance rating is the highest in the industry, its price is not—it's a real mega value. It comes with ARAG® anti-reflection, anti-glare screen coating, a limited 3 year warranty on CRT, parts and labor (the best in the business), and an optional Express Exchange™ Service program that insures 48 hour replacements.

If all this doesn't convince you that the ViewSonic P815 is truly a "mega monitor," then seeing it certainly will. Call (800) 888-8583 for your nearest dealer.

It prowls the murky caves of your imagination, finds the fierce native creativity residing there, releases it and speed swims it to the surface.

Stand Back

It may be strange, but, hey, it's yours. And it deserves a chance to be expressed. Yes, it's your creativity. Your vision. The reason you got into this animating dodge in the first place.

The people who brought you PRISMS just raised the stakes. With a non-linear 3-D animation environment that seamlessly unifies the tools you have in place and tops them off with the slick, next-generation tools you want. Suddenly, you're blazing your way, unconstrained, through your projects.

That's because Houdini naturally inherits Side Effects Software's legendary open architecture and widely acclaimed flexibility. And now features an artist-friendly user interface and powerful modeler - one that fully supports NURBS as well as providing the ability to revise your work without manual rebuilding.

The result?

A dynamic, holistic way of working you simply have not experienced before. And a faster, more efficient way to get the job done on time and on budget.

Visit us at SIGGRAPH (booth 317) or at our Internet site (www.sidefx.com) and find out for yourself what our beta-site testers are finding now.

We didn't name it Houdini for nothing.

It not only runs all
the leading CAD/CAM/CAE applications,
it also excels at games.

The RS/6000 Workstation When you're designing an event that brings the world together, you need a workstation that's equal to the challenge. For the 1996 Olympic Games in Atlanta, that meant using a proven champion: the RISC System/6000® workstation.

From designing athletic venues to selecting camera angles to creating a dynamic 3-D tour of the stadium, RS/6000™ workstations helped engineers and architects plan many aspects of the Games.

It's what you'd expect from a family of workstations

that's skilled at running all the leading design software: CATIA/CADAM, Pro/ENGINEER, Unigraphics, CADDS 5, I-DEAS Master Series and Euclid 3. And it's why more than 10,000 athletes and a global audience of billions will experience the Games like never before.

For a closer look at how the RS/6000 can handle your biggest design challenges, get our free guide, "What to look for in a Workstation." Call 1 800 IBM-3333, ext. FA225, or drop by www.rs6000.ibm.com on the Net.

And enjoy the Games.

Coming next summer

Exhibition 5-7 August 1997
Conference 3-8 August 1997

SIGGRAPH

LOS ANGELES

The word "SIGGRAPH" is written in large, stylized, 3D letters. The letters are pink with black outlines and shadows, giving them a three-dimensional appearance. They are arranged in a slightly curved line across the top of the page.

SIGGRAPH

A close-up photograph of a splash of orange liquid, possibly water or juice, with a bright white highlight in the center of the splash.

A wave shimmers on the horizon. In a year it will wash ashore in LA. The City of Angels will take flight as SIGGRAPH 97 floods the metropolis with an international cast of over 40,000 scientific seers, digital artists, interactive engineers, and hardware and software connoisseurs.

A stylized logo consisting of a pink 'S' shape with a black outline and shadow, positioned to the left of the main text area.

HELP MAKE SIGGRAPH 97 THE DEFINITIVE ADRENALINE RIDE.

A close-up photograph of a splash of yellow liquid, similar to the orange splash, with a bright white highlight in the center.

The search has begun for the ultimate in digital imagination, scientific jamming, and interactive frontiers. Jump in. Submit your best proposal. Show us what you have to offer. Papers. Panels. Artwork. Animations. Don't hesitate to get your feet wet. SIGGRAPH 97 is especially interested in contributors who have never participated in a SIGGRAPH conference before. Just be sure to observe the submission deadlines and requirements. If it's accepted, your original work will help define the next wave of digital technology.

CALL FOR PARTICIPATION
<http://www.siggraph.org/s97/>

A large, vibrant blue water splash that fills the right half of the page. It has a bright white highlight in the center, creating a sense of motion and energy.

SUBMISSION TIMELINE

A close-up photograph of a splash of pink liquid, similar to the other splashes, with a bright white highlight in the center.

25 SEPTEMBER 1996

Early proposals for Panels, Courses, Sketches, the Electric Garden, and Computer Animation Festival

13 NOVEMBER 1996

Final Online Panel submissions

11 DECEMBER 1996

Final Course submissions

8 JANUARY 1997

Final Educators Program submissions

15 JANUARY 1997

Papers from North America
Final Panel submissions

17 JANUARY 1997

Papers from outside North America

29 JANUARY 1997

Final Electric Garden submissions

12 FEBRUARY 1997

Ongoing: The Fine Arts Gallery final submissions

12 MARCH 1997

Student Volunteer applications, Pioneer Grant applications

19 MARCH 1997

Technical Slide Set submissions

16 APRIL 1997

Final Sketches submissions for publications

23 APRIL 1997

Final Computer Animation Festival submissions

PAPERS

Research, systems, and applications papers in the world's most respected forum for advanced work in computer graphics and interactive techniques.

PANELS

Debate, disputation, and Q&A on the past, present, and future of computer graphics.

COURSES

Erudition and illumination for the neophyte to the technophile.

SKETCHES

Early insights, intellectual adventures, tentative results, and informed speculations.

SIGGRAPH TV

Live programming, special venues, animations, and video coverage of all aspects of SIGGRAPH 97.

ELECTRIC GARDEN

The most adventurous and imaginative interactive computer systems in industry, education, and entertainment.

ONGOINGS:**THE FINE ARTS GALLERY**

An in-depth look at computer-based artists and their work.

COMPUTER ANIMATION FESTIVAL

The world's finest computer-generated animations, video, and film.

EDUCATORS PROGRAM

Computer graphics and interactive techniques in learning environments at all levels.

THE EXHIBITION

Over 300 exhibitors, the largest annual marketplace of computer graphics hardware, software, and services.

24TH INTERNATIONAL CONFERENCE ON COMPUTER GRAPHICS AND INTERACTIVE TECHNIQUES

CONFERENCE
3-8 AUGUST 1997

"I miss LA. I love it."

John Gregory Dunne

"It's not one language, one culture, but people of different backgrounds. LA is becoming the ultimate middleman, not only for Asia, but for Mexico, the Midwest, and the South. LA is the place to trade globally. It's the new Hong Kong."

Gourmet Graphics**TDZ 3D graphics workstations
with New RealizM™ graphics**

- Real-time performance with no compromise in texture quality, display resolution, or picture color depth
- 1.2 million lit, 50-pixel triangles per second
- Up to 64 MB of texture memory; 32 MB of frame buffer memory
- True color at 1,824 x 1,368 resolution
- Accelerates more special effects than any other graphics system available

For the budget gourmet,
prices start below **\$10,000.**

no more.

The new HP VISUALIZE workstation with PA-8000 performance.

The longer you have to wait for your workstation, the longer it takes to get your product to market. But with our new line of HP VISUALIZE workstations, you can have blindingly fast access to information as you visually navigate through data, no matter where it resides in your organization. These workstations let you and your colleagues work simultaneously in real time from different locations. In fact, seamlessly and quickly connecting people, processes and information across your virtual enterprise is the hallmark of our HP VISUALIZE workstation line. So why wait? Visit us at www.hp.com/go/workstations.

Keep Up with

The Latest In Digital Design From VNR

DIGITAL IMAGING

The Art of 3-D Computer Animation and Imaging
Isaac Victor Kerlow, Vice President, Creative Resources, Disney Interactive

This book presents a non-platform approach to 3-D computer graphics and animation. With helpful chapter summaries, trouble shooting tips, and step-by-step examples you can easily learn this process. **Author book signing—Wednesday, August 7th from 2-3 P.M. at the VNR Booth. 0-442-01896-7 Paperback \$49.95**

Creating Digital Illusions: The Blackman Portfolio
Barry Blackman

Using his own prestigious clients as case studies, Blackman gives step-by-step instructions for the creation and manipulation of digital images. Written in a non-technical writing style, this easy to follow book is a must have for computer graphic specialists, graphic designers, art directors, and photographers. **0-442-02141-0 Hardcover \$49.95**

Digital Photo Illustration
Jeremy Gardiner

Everything currently known about electronic photo assembly can be found in this indispensable guide that covers basic and advanced techniques. Explains how to digitize, distort, layer and manipulate images with easy-to-follow production notes that will help you quickly master this new technology. **0-442-01167-9 Hardcover \$42.95**

Computer Graphics for Designers and Artists
Isaac Victor Kerlow and Judson Rosebush
Second Edition

Find the latest techniques on imaging, interface design, and two-and three-dimensional applications. With expanded information on fractals and ray tracing, this edition features a new chapter on animation that covers 3-D synthetic animation, 2-D cell animation, and production steps. It also features computer graphics applications for beginners along with new concepts for the more advanced. **0-442-02417-7 Paperback \$34.95**

DESIGN MEDIA

Digital Design Media
William J. Mitchell and Malcolm McCullough
Second Edition

Digital Design Media is more than the ordinary computer guide book. It constructs a lasting theoretical framework that relates to current and future programs. This second edition is imperative for anyone who wants to go beyond production drafting systems in CAD. This conceptual guide has a clear structure, numerous historical references, and hundreds of illustrations. **0-442-01934-3 Paperback \$29.95**

What is ACM SIGGRAPH?

ACM SIGGRAPH is the world's largest professional society for persons working in computer graphics and interactive techniques. It has members all over the world and in every facet of the computer graphics field. SIGGRAPH is one of over 35 Special Interest Groups of ACM, the Association for Computing Machinery.

SIGGRAPH is dedicated to the advancement of computer graphics and interactive techniques through activities that foster the exchange of information among graphics professionals of all kinds. The organization has a long tradition of bringing together a wide variety of people – users, researchers, teachers, product developers, artists, designers, and media developers – in an exciting exchange of ideas that benefit our entire community. We are proud of SIGGRAPH's rich, interdisciplinary nature and we invite you to become an active part of it.

How can I get involved?

The heart of SIGGRAPH is its active, talented core of volunteers, and we are always looking for new people with new ideas to keep SIGGRAPH vibrant. Your opportunities for involvement are as varied as our activities, some of which we describe below.

It's easy to find SIGGRAPH volunteers at SIGGRAPH 96. Many very involved volunteers will be in the SIGGRAPH organization's booth in the Hall E Lobby. To make it easy for you to find out how you can become involved in SIGGRAPH, we've organized a joint open house with the SIGGRAPH 97 conference called "Get Involved with SIGGRAPH." Come by and learn about both organization and conference opportunities from senior volunteers. If you can't make it to this get-together, drop by the SIGGRAPH booth and leave your name and areas of interest, or go by the meetings in your interest area that are listed on the next page and ask there.

How to be a SIGGRAPH volunteer

Opportunities to volunteer for the SIGGRAPH organization and the SIGGRAPH 97 conference, and a chance to meet highly involved SIGGRAPH volunteers, will be at the "Get Involved with SIGGRAPH" open house:
 Wednesday, 7 August
 5:30 pm to 7 pm
 Room 95, Ernest N. Morial Convention Center

Why should I join SIGGRAPH?

Being a member of SIGGRAPH demonstrates your involvement in the computer graphics community and your support for SIGGRAPH's goals and activities – activities that support this entire community. The strength of SIGGRAPH's voice on issues important to our field depends on its activities and on the number and quality of our membership.

As a SIGGRAPH member, you receive the *Computer Graphics* newsletter, the *Conference Proceedings* and *Proceedings CD-ROM*, and the *Visual Proceedings* and *Visual Proceedings CD-ROM*. You may also choose a less expensive "Lite" membership that includes only the newsletter. All members enjoy discounts on SIGGRAPH conferences and publications, and have the opportunity to subscribe to the proceedings of other computer graphics-related conferences through the Member Plus program.

How do I join SIGGRAPH?

You can join SIGGRAPH at the conference at the ACM booth in the main lobby of the Ernest N. Morial Convention Center, or look for membership information at SIGGRAPH's online site, <http://www.siggraph.org/>

What does SIGGRAPH do?

Besides sponsoring the annual conference, SIGGRAPH has many activities that go on throughout the year and around the world. Many of the activity areas mentioned below have open meetings during SIGGRAPH 96; many of these are listed on the next page. Find an area that fits your interest, check out the schedule, and join us.

Education

SIGGRAPH has a very active Education Committee that supports computer graphics education in many fields as well as the use of computer graphics in education. The Education Committee has ongoing activities at many levels and in many disciplines involving educators from around the world. Among these activities are curriculum studies, a quarterly newsletter for educators, educational projects, and many annual conference activities for educators.

Education is the word most often used to describe SIGGRAPH's overall mission. The Education Committee welcomes new ideas and new volunteers to help us fulfill our educational mission. For information, contact Marc Barr, SIGGRAPH Director for Education, at the Education booth in the main lobby of the Ernest N. Morial Convention Center, or at barr@siggraph.org.

Publications

SIGGRAPH's Publications Committee is responsible for all of SIGGRAPH's publications in print, on CD-ROM, on video, and online. The committee is made up of people with skills in editing, writing, and producing different media, and is a great place for someone skilled in these areas to help others learn about computer graphics and interactive techniques. For information, contact Stephen Spencer, SIGGRAPH Director for Publications, at spencer@siggraph.org.

Other Conferences

SIGGRAPH sponsors or has formal cooperation with about a dozen other conferences each year. These include such events as the Interactive 3D Graphics Workshop, the Computational Geometry conference, the ACM Multimedia conference, the Volume Visualization symposium, UIST: User Interface Software and Technology conference, and the Solid Modeling conference. SIGGRAPH works with the organizers of SIGGRAPH-sponsored conferences and coordinates relationships with other conferences. For information, contact Chuck Hansen, SIGGRAPH Director at Large, at hansen@siggraph.org.

Professional Chapters

The SIGGRAPH Professional Chapters span the globe and form an international network of like-minded people who work throughout the year to develop, continue, and extend the work and achievements presented at the annual conference in ways that meet the needs of their local communities. Chapters meet regularly to explore a wide variety of program topics.

Each Professional Chapter draws its membership from a particular area or region where there are professionals in education, research, development, industry, art, design, or entertainment who are interested in the advancement of computer graphics, its related technologies, and its applications. Active Chapters are listed in the back of the *Conference Proceedings* and the newsletter. For information, contact Scott Lang, SIGGRAPH Director for Professional Chapters, at lang@siggraph.org.

Public Policy

SIGGRAPH's Public Policy Committee provides information on relevant external activities, such as proposed legislation, to SIGGRAPH members and others of the technical community and to provide education on the implications of technology to the non-technical community. For information, contact Bob Ellis, Chair of the Public Policy Committee, at ellis@siggraph.org.

SIGGRAPH meetings at the conference

Take a look at SIGGRAPH in action at committee and task force meetings during the conference. Find a group that fits your interest and join us. If you want more information, if you can't find a group that covers your interest, or if you aren't able to attend the meetings of a group that does, come by the SIGGRAPH booth in the lobby of the Ernest N. Morial Convention Center and leave a message for the appropriate group.

Business meetings

Contact:
STEVE CUNNINGHAM
SIGGRAPH Chair

Annual SIGGRAPH Business Meeting
Thursday, 8 August
5:30 pm to 7 pm
Room E1

SIGGRAPH Executive Committee Meeting
Saturday, 10 August
10 am to 3 pm
Marriott Hotel, Bacchus Room

Other committee meetings at the conference

Get Involved with SIGGRAPH –
Meet the SIGGRAPH 97 Committee and Executive Committee
Wednesday, 7 August
5:30 pm to 7 pm
Room 95, Ernest N. Morial Convention Center

Computer Graphics Education –
Open Meeting
Thursday, 8 August
3 pm to 4 pm
Prince of Wales, Hilton Riverside

Computer Graphics Education – Art
Thursday, 8 August
4 pm to 5 pm
Prince of Wales, Hilton Riverside

Computer Graphics Education –
Computer Science
Thursday, 8 August
4 pm to 5 pm
Chequers, Hilton Riverside

Computer Graphics Education – Engineering
Thursday, 8 August
4 pm to 5 pm
Eglinton & Winton, Hilton Riverside

Computer Graphics Education – K-12
Thursday, 8 August
4 pm to 5 pm
Cambridge, Hilton Riverside

Public Policy Task Force Special Interest Group Meeting
Thursday, 8 August
10:30 am to 12:30 pm
Windsor Room, Hilton Riverside

SIGGRAPH Small Conferences – Organizing and Information on SIGGRAPH
Thursday, 8 August
1:30 pm to 2:30 pm
Mardi Gras Ballroom Salon A, New Orleans Marriott

How to contact us

SIGGRAPH uses email extensively in its day-to-day business, and the contact people listed above can be reached by sending them email as noted. The usual way to reach someone is by sending them email at lastname@siggraph.org, but to differentiate between SIGGRAPH volunteers who have the same last name (for example, Judith R. Brown and Maxine Brown), simply add the first initial to the last name (for example, jbrown@siggraph.org and mbrown@siggraph.org). A complete listing of SIGGRAPH email addresses can be obtained by sending email to people@siggraph.org.

The persons above whose title includes Director are also members of the SIGGRAPH Executive Committee. You can find full contact information for these persons, including telephone and fax numbers, on the inside cover of the *Conference Proceedings* or any issue of the *Computer Graphics* newsletter.

Exhibition Floor Plan

more than
motion capture,
it's
humanimation.

ULTRATRAK™ PRO is redefining the boundaries of motion capture and translating human movement to the animation process—with a system so advanced, and results so life-like, we call it HUMANIMATION™.

Polhemus' Academy Award®-winning team* has made ULTRATRAK PRO the only motion capture system to provide true real-time, six-degree-of-freedom position and orientation data from a virtually unlimited number of sensors, at up to 120 Hz for high-dynamic, fast motion situations.

Because data can be captured and processed in real-time, ULTRATRAK PRO is the system of choice for live broadcast and virtual set applications. And, unlike systems that require days of post-processing, directors can monitor motion as it's happening. All within a working area that covers a phenomenal 700 square feet. ULTRATRAK PRO—the advent of HUMANIMATION!

ULTRATRAK™
pro

For a complete update on ULTRATRAK PRO, and the latest advances in HUMANIMATION from Polhemus, call us at 1-800-357-4777. Outside North America, 802-655-3159.
<http://www.polhemus.com/trackers> E-mail: humanimation@polhemus.com

Drivers available for all major software packages including: Alias/Wavefront, SoftImage, Side Effects, 4DVision (formerly Schreiber) and Hash Animation, with more in the works.

*Polhemus engineers received the 1994 TECHNICAL ACHIEVEMENT AWARD from the Academy of Motion Picture Arts and Sciences. ACADEMY AWARD® is the registered trademark and service mark of the Academy of Motion Picture Arts and Sciences.

The next threshold in image technology is Image Tech.[®]

Cover Image:
Program and Buyer's Guide
SIGGRAPH 96

Image Tech is honored
to have been selected
to produce the SIGGRAPH 96
cover 3D hardcopy.
It gives proof that our
unsurpassed 3D imaging
technology produces
breathtaking, true-to-life
3D images.

Image Tech[®] 3D hardcopies
can be produced from
digital and/or photographic
data for a wide range
of applications, including
design, advertising, science
and medicine, engineering
and CAD – virtually
anywhere two-dimensional
images are used.

See us in booth #338,
where we also have limited
edition SIGGRAPH 96
3D cameras available.

“The 3D image on our Program and Buyer’s Guide
symbolizes an important window of SIGGRAPH 96 –
the cutting edge future of computer graphics
and interactive techniques in a real 3-dimensional world.”

–John Fujii, SIGGRAPH 96 Conference Chair

Whether you are interested in our three-dimensional imaging services or in the technology
that creates these images, give our service bureau a call.
