# Catch the Excitement!

As a kid growing up in LA, I used to surf the ocean waves, and now I'm surfing the waves of changing digital technology with all of you, at SIGGRAPH 97. All of us on the SIGGRAPH 97 Committee welcome you to this festival of the future.

In LA this week, you'll meet the creators of that future. The people who are developing the new algorithms, hardware, and software to create the next wave of change. The SIGGRAPH artists, the most creative riders/surfers of the new waves.

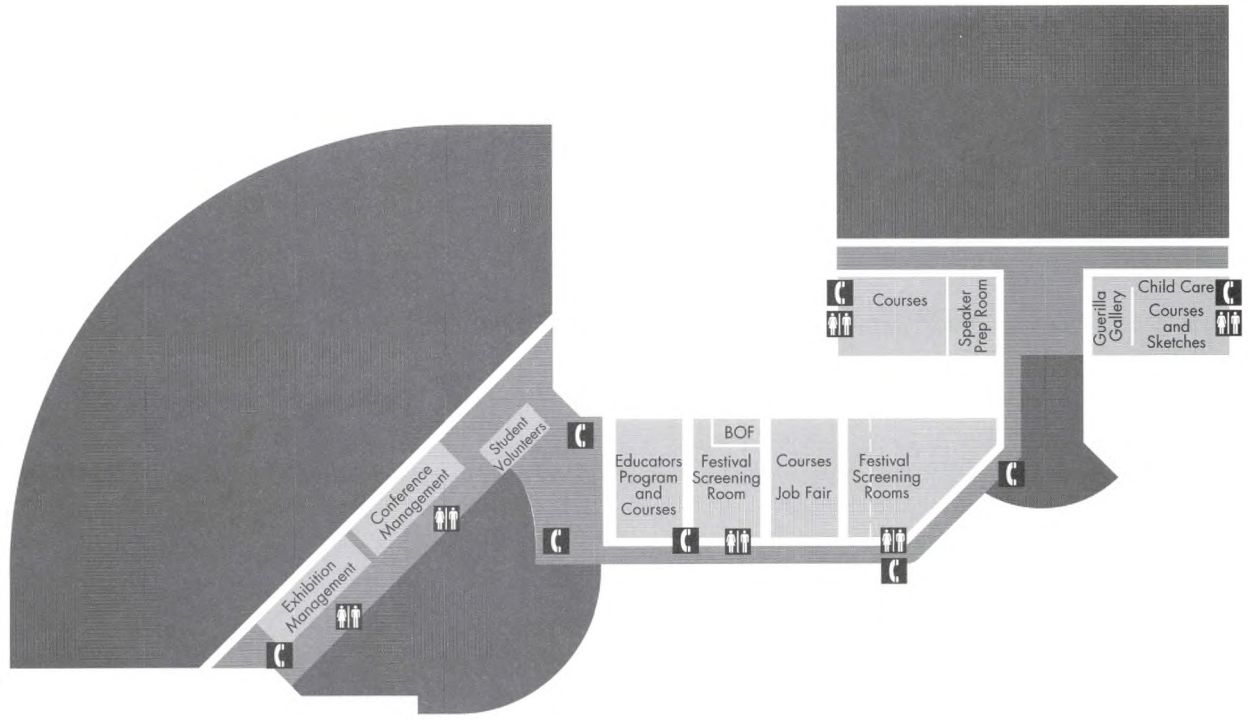

3D interactive graphics are becoming increasingly important and SIGGRAPH 97 is where you'll learn more about the basics and about the applications, from the World Wide Web to artificial life!

SIGGRAPH is about more than technology. It is a celebration of our community, the annual gathering of the graphics clans. It is your opportunity to interact with the graphics gurus at our technical breakouts, receptions, and social events.

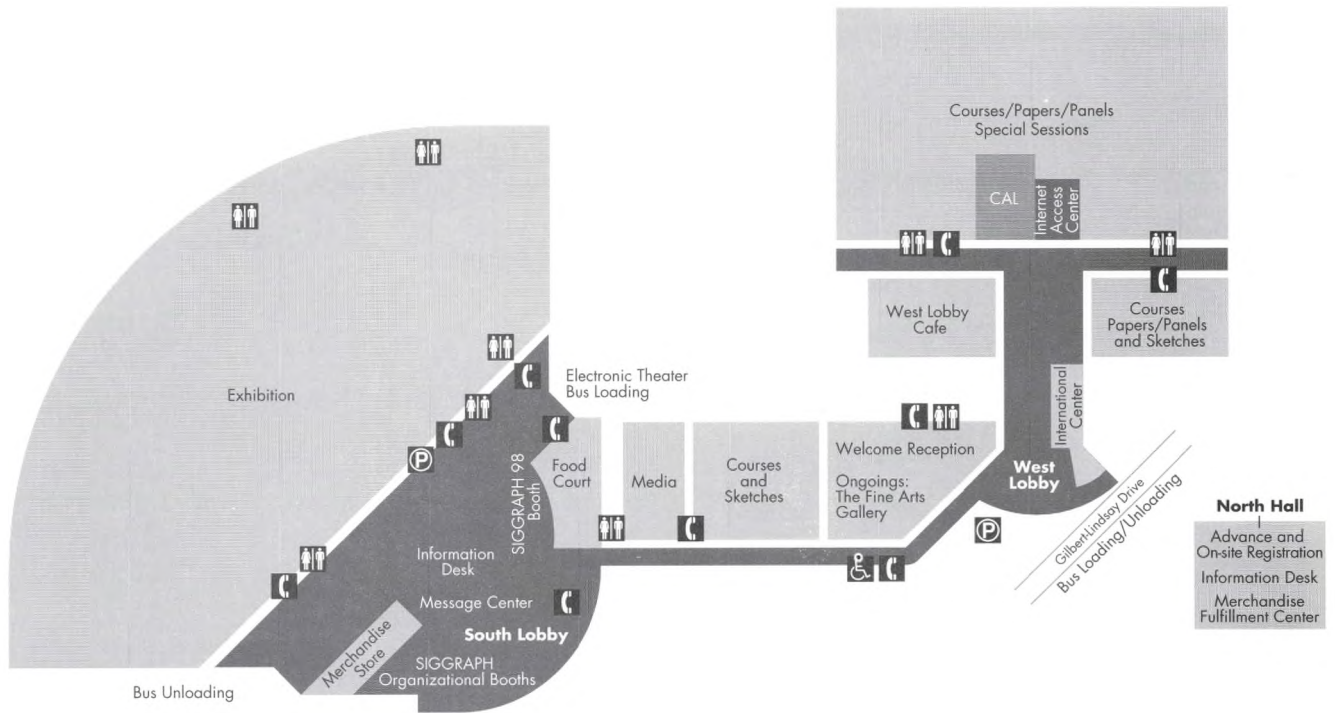

The SIGGRAPH 97 Committee and contributors have combined to help you to learn, educate, participate, and enjoy the future of computer graphics and interactive techniques. Surf's up! Join the party!

**G. Scott Owen**

SIGGRAPH 97 Conference Chair

LEVEL TWO

LEVEL ONE

LOWER LEVEL

**THROUGHOUT THE WEEK**

**Career Center**

At the SIGGRAPH 97 Career Center, registered attendees can make résumés available to the industry's leading employers and also look at job openings. See page 68 for additional information.

**new** The Career Center hosts an all-day Job Fair on Wednesday, 6 August. See page 68 for details.

LOCATION

Career Center  
Lower Level | Kentia Hall

Job Fair

Level Two | Room 408

**International Center**

In the International Center, members of the International Committee are available to answer questions, provide information about SIGGRAPH 97, assist with translations, and help you find your way around Los Angeles. See page 69 for a list of the International Committee.

LOCATION

Level One | West Lobby

**Internet Access Centers**

Two fully networked areas in the Los Angeles Convention Center provide complete Internet access to your home, office, and colleagues around the world.

LOCATION

West Hall A, Kentia Hall (closes Friday, 1 pm)

**SIGGRAPH TV**

Live events, recorded programming, and video coverage of SIGGRAPH 97 distributed throughout the Los Angeles Convention Center, across North America via satellite, and globally on the Internet.

LOCATION

Level Two | Room 404

**Special Interest Groups & Birds of a Feather**

Special Interest Groups (SIGs) are for attendees who think and work in similar technologies and environments. Topics, times, and locations for SIGs schedules by 25 June are listed on pages 70 and 71. SIGs scheduled by Thursday, 3 July are posted in the South Lobby along the Merchandise Store wall.

Birds of a Feather are impromptu gatherings organized by anyone who posts a notice on the Birds of a Feather sign-up board in the South Lobby.

**SUNDAY 3 AUGUST**

**Fundamentals Seminar**

An essential, accessible introduction to computer graphics jargon, concepts, techniques, and technologies. The perfect orientation for novices on the fast track.

LECTURERS

**Mike Bailey**  
University of California, San Diego and Supercomputer Center

**Wayne Carlson**  
The Ohio State University

**John Fujii**  
Hewlett-Packard Company

LOCATION

Level One | Room 151

DAY/HOURS

Sunday, 3 August | 2 pm to 5 pm

**Welcome Reception**

Mingle and chat with a fascinating and diverse group of people: industry leaders, software pioneers, hardware visionaries, academic theorists, and inspired artists.

LOCATION

Electric Garden & Ongoing:  
The Fine Arts Gallery

DAY/HOURS

Sunday, 3 August | 6 pm to 8 pm

**MONDAY 4 AUGUST**

**Course Reception**

Food, refreshments, and socializing at downtown LA's outdoor WaterCourt, where water elements perform solo and in harmony. The most prominent element: a huge matrix of air-powered water plumes.

Tickets for the Course reception are included with registration materials for Full Conference registration. Tickets can also be purchased at on-site registration in North Hall.

LOCATION

The WaterCourt at California Plaza

DAY/HOURS

Monday, 4 August | 8 pm to 11 pm

**WEDNESDAY 6 AUGUST**

**Keynote Address/Awards**

Bran Ferren, Executive Vice President for Creative Technology and Research & Development, Walt Disney Imagineering, delivers the SIGGRAPH 97 keynote address. Immediately before the keynote, SIGGRAPH presents two awards:

- Przemyslaw Prusinkiewicz receives the 1997 Computer Graphics Achievement Award for his work pertaining to modeling and visualizing biological structures.
- James Foley receives the 1997 Steven A. Coons Award for Outstanding Creative Contributions for his strong and sustained leadership in computer graphics education and research, and for his dedication to the profession.

LOCATION

Level One | West Hall B

DAY/HOURS

Wednesday, 6 August | 8:15 am to 9:45 am

**WEDNESDAY 6 AUGUST**

**SIGGRAPH Get Involved**

SIGGRAPH invites all attendees, exhibitors, and contributors to explore opportunities to get involved. Your ideas, experience, and enthusiasm, and your time and energy, are welcome. Please come to SIGGRAPH Get Involved, introduce yourself, and tell us how you would like to help. We'll help you find the right opportunity!

LOCATION

Level Two | Room 301

DAY/HOURS

Wednesday, 7 August | 5:30 pm to 7 pm

**THURSDAY 7 AUGUST**

**Special Session**

**FIX New Realities in Film Production:**

**The Process of Creating Digital Visual Effects**

Creative leaders and innovators from The Industry confront realistic production challenges at various stages of the development process, from concept through post-production, and explore solutions that rely on today's (and tomorrow's) technologies.

MODERATOR

**Michael Backes**  
American Film Institute

LOCATION

Level One | West Hall B

DAY/HOURS

Thursday, 7 August | 12:15 pm to 1:45 pm

**THURSDAY 7 AUGUST**

**Panels/Papers Reception**

Three thousand of the world's leading computer graphics explorers gather in the lawns and alcoves of downtown LA's historic Pershing Square for food, refreshments, and games.

Tickets for the Papers/Panels reception are included with the Full Conference registration. Tickets can also be purchased at on-site registration in the North Hall.

LOCATION

Pershing Square | Olive and 6th Streets

DAY/HOURS

Thursday, 7 August | 8 pm to 11 pm

**FRIDAY 8 AUGUST**

**Special Session**

**A Framework for Realistic Image Synthesis**

Although high-quality virtual reality simulations abound, are these images correct? Would they accurately represent the scene if the environment actually existed? This presentation provides guidelines for developing and evaluating techniques whose goal is to synthesize images that are visually and measurably indistinguishable from real-world scenes. This presentation provides a research roadmap for a rigorous program to reach this goal.

**Donald P. Greenberg, James Arvo, Eric LaFortune, Kenneth E. Torrance, James A. Ferwerda, Bruce Walter, Peter Shirley, Sumanta Pattanaik, and Sing-Choong Foo**  
Cornell University

LOCATION

Level One | West Hall B

DAY/HOURS

Friday, 8 August | 12:15 pm to 1:15 pm

## TRACKS

Tracks are common threads that pass through more than one part of the technical program. They do not define a taxonomy of technical content, nor do they encompass all elements of the technical program. Attendees interested in a particular topic may find track identifiers useful for scheduling their time spent in the technical sessions.

## COURSES

EDUCATORS  
PROGRAM

## Virtual Reality

VR

Creation of and immersive interaction with virtual environments.

- 6 Stereo Computer Graphics for Virtual Reality
- 15 Applied Virtual Reality
- 23 Artificial Life for Graphics, Animation, Multimedia, and Virtual Reality
- 29 Programming Virtual Worlds
- 30 Making Direct Manipulation Work in Virtual Reality

- Virtual Reality in K-12 Education
- Technology as Facilitator

## Big Data

BD

Construction, manipulation, management, and display of extremely complex graphical databases.

- 4 Exploring Gigabyte Datasets in Real-Time: Algorithms, Data Management, and Time-Critical Design
- 12 Interactive Walk-Through of Complex Environments
- 25 Multiresolution Surface Modeling
- 31 Principles of Volume Visualization
- 32 Advances in Volume Visualization

## Animation &amp; Special Effects

FX

Producing and using computer graphics techniques for animation, special effects, and other entertainment applications.

- 1 Motion Capture in Practice
- 13 Digital Color
- 16 Interactive Movies: Techniques, Technologies, and Contents
- 17 Virtual Humans: Behaviors and Physics, Acting, and Reacting
- 23 Artificial Life for Graphics, Animation, Multimedia, and Virtual Reality
- 27 Scanning and Recording of Motion Picture Film
- 34 Warping and Morphing of Graphical Objects

- Computer Science

## Art &amp; Design

AD

New technologies and techniques for art and design, and examples of artistic expression using computer graphics.

- 2 Creative Design for the World Wide Web
- 22 Mastering Visible Wisdom: Graphic Design for Usable GUIs of Productivity Tools, Multimedia, and the Web
- 33 Principles of Visual Perception and Its Applications in Computer Graphics

- The Visual Arts
- Where Computer Science and Art Meet
- Technology as Facilitator
- Web and Multimedia Design

## API

API

Descriptions and comparisons of graphics programming standards.

- 3 Programming with OpenGL: An Introduction
- 5 Sound Bytes: VRML Authoring for Noisy Worlds
- 9 Introduction to VRML
- 11 Programming with OpenGL: Advanced Techniques
- 24 OpenGL and Window System Integration
- 28 Authoring Compelling and Efficient VRML 2.0 Worlds
- 35 Introduction to Java3D

- Computer Science

**PANELS****PAPERS****SKETCHES**

- Experiences with Virtual Reality Applications
- Narrative Environments: Virtual Reality as a Storytelling Medium
- Putting a Human Face on Cyberspace: Designing Avatars and the Virtual Worlds They Live In
- Interfacing Reality: Exploring Emerging Trends Between Humans and Machines

- Virtual Reality and Applications

*Technical Sketches*

- 3D UIs and VE

*Applications Sketches*

- Virtual Environments

*Art & Design Sketches*

- Moving: Agency for Virtual Spaces

- Visibility
- Surface Simplification

*Technical Sketches*

- Level of Detail

*Applications Sketches*

- Visualization

- Can We Get There From Here?: Current Challenges in Cloth Modeling, Design, and Animation
- Motion Capture and CG Character Animation

- Illumination
- Fur, Film, and Light
- Animation
- Texture, Reflection, and Design

*Technical Sketches*

- Simulation and Natural Phenomenon
- Animation
- Fur, Film, and Textures

*Animation Sketches*

- Full Body Animation
- Visual Styles
- Dynamics and Character Motion
- Mutts, Machines, and Molten Monsters: The Making of . . .
- Tracking and Talking

- Narrative Environments: Virtual Reality as a Storytelling Medium
- The Differences Between Here and There: What Graphic Design Brings to E-Space
- Community/Content/Interface: Creative Online Journalism
- Medical Illustration & Visualization: Why Do We Use CG and Does It Really Make a Difference in Creating Meaningful Images?
- Sounding Off on Audio: The Future of Internet Sound

- Non-Photorealistic Rendering

*Technical Sketches*

- Artistic Rendering
- Papers, Lines, and Letters

*Application Sketches*

- Art Applications

*Art & Design Sketches*

- Artist Session 1, Artist Session 2
- Moving: Agency for Virtual Spaces
- Sitting: The Seat for Virtual Travel
- Saying: Words for Electronic Discourse
- Tooling: Implements for Creativity
- Bending: Corn, Face, and Gender for Social Provocation

- What 3D API for Java Should I Use and Why?

**Creative Applications Lab**

This new venue at SIGGRAPH 97 connects to other parts of the conference and increases opportunities for hands-on learning. The goal is to enhance learning by providing the latest computer graphics hardware and software, and highly interactive access to the techniques and ideas presented at the conference.

LOCATION

Level One | West Hall A

DAYS/HOURS

Sunday, 3 August	1 pm to 6 pm
Monday, 4 August	9 am to 6 pm
Tuesday, 5 August	9 am to 6 pm
Wednesday, 6 August	9 am to 6 pm
Thursday, 7 August	9 am to 6 pm
Friday, 8 August	9 am to 5:30 pm

CHAIR

**Steve Anderson**  
Silicon Graphics, Inc.

COMMITTEE

**Evie Rozanski**  
Rochester Institute of Technology

**Steve May**  
The Ohio State University

**Garry Paxinos**  
Metrolink Incorporated

**Jeanie Taus**  
Silicon Graphics, Inc.

**Pat Johnson**

**Allison Cohen**  
Starbelly Productions

Reservations for lab access are available to Conference Select and Full Conference registrants.

Some examples of how attendees can use the CAL:

- A course might have "homework." Attendees can continue their learning experience while the course material is still fresh in their minds.
- Technical program contributors might have "office hours" in the lab for one-on-one discussions about their research.
- A paper or panel might have demo software available in the lab so attendees can explore the technology that created examples from the presentation.
- Hands-on workshops might be presented as part of the Educators Program.
- Artists might use the software in the lab to create an image.
- Attendees might meet other attendees (or contributors) and arrange remote collaborations between their own labs.

The CAL is also a gathering space for technical session break-outs and mingling. Lots of "white board" space is available so attendees can explore concepts informally.

On Friday afternoon, a special sketch session showcases the work accomplished in the CAL. For more details, consult the lab monitors in the CAL.

**Guerilla Gallery**  
Level Two, Room 511

Guerilla Gallery is an exciting digital studio and print shop where art can be created and printed using the latest technologies. It fosters unique collaborations among scientists, artists, and educators.

Come interact with experienced digital print artists and see artwork created during the conference. Look for impromptu presentations and educational sessions about creating art for digital printing and getting the most from your output devices. Learn some of the secrets from a master printer.

Register for hands-on access to advanced and unique equipment used for digital printing.

**CAL PROGRAMS AND EVENTS**

PAPERS

- Design Galleries: A General Approach to Setting Parameters for Computer Graphics and Animation
- Guaranteeing the Toplogy of an Implicit Surface Polygonization for Interactive Modeling
- A Model for Simulating the Photographic Development Process on Digital Images
- The Robust Haptic Display of Complex 3D Graphical Environments
- Virtual Voyage: Interactive Navigation in the Human Colon

PANELS

- Motion Capture and CG Character Animation
- Putting a Human Face on Cyberspace: Designing Avatars and the Virtual Worlds They Live In
- Narrative Environments: Virtual Reality as a Storytelling Medium
- Image-Based Rendering: Really New or Deja Vu?
- Can We Get There From Here?: Current Challenges in Cloth Modeling, Design, and Animation
- Sounding Off on Audio: The Future of Internet Sound
- Experience with Virtual Reality Applications
- The Difference Between Here and There: What Graphic Design Brings to E-Space
- Medical Illustration and Visualization: Why Do We Use CG and Does It Really Make a Difference in Creating Meaningful Images?

COURSES

- 3 Programming with OpenGL: An Introduction
- 7 Design and Application of Object-Oriented 3D Visualization Systems
- 11 Programming with OpenGL: Advanced Techniques
- 14 New Frontiers in Modeling and Texturing
- 15 Applied Virtual Reality
- 24 OpenGL and Window System Integration
- 25 Multiresolution Surface Modeling
- 26 3D Computer Animation Workshop
- 28 Authoring Compelling and Efficient VRML 2.0 Worlds
- 31 Principles of Volume Visualization
- 32 Advances in Volume Visualization

EDUCATORS PROGRAM

- Alice: Easy to Learn Interactive 3D Graphics
- Combining Art SKills with Programming in Teaching Computer Art Graphics
- NICE: Combining Constructionism and Collaboration in a Virtual Learning Environment
- Teaching Graphics through Video Games

SKETCHES

*Technical*

- The Haptic Lens
- Intelligent Transmission of 3D Polygonal Models
- A Low-Cost Digital Panoramic Camera
- LiveType: A Parametric Font Model Based on Features and Constraints
- Motion Tracking for Special Effects in the Film Industry
- Varying Spring Constants for Accurate Simulation of Elastic Materials
- Volumetric Modeling with Implicit Functions: A Cloud is Born

*Art and Design*

- Agree to Disagree Online
- Design Speech Acts: "How to do things with words" in Virtual Communities
- izzy bombus and the story of flight
- Making Caricatures with Morphing
- MultiMedia Interactive Artist's Archive and Retrospective
- Technophobia
- The Virtual Harvester Project
- A Zooming Sketchpad, a Multiscale Narrative: Pad++, PadDraw, Gray Matters

*Animation*

- Ubiquitous Animation: An Element-Based Concept to Make 3D Animations Commonplace
- Isaacks: From Life Forms Choreography to Animation

*Applications*

- Hardware-Assisted Volume Rendering for Oil and Gas Exploration

Please note: Registration and Merchandise Fulfillment are open Saturday, 2 August from 7 pm to 9 pm.

## Computer Animation Festival

The year's finest computer-generated animations on film and video: technical adventures, major movie effects, scientific visualizations, and new visions. The Computer Animation Festival presents a broad array of works in several categories in the Festival Screening Rooms. A representative selection of Festival entries in a variety of formats is also shown in the Electronic Theater, which returns to LA's historic Shrine Auditorium.

### LOCATIONS

Electronic Theater  
Shrine Auditorium

665 West Jefferson Boulevard  
+1.213.972.7200

### Festival Screening Rooms

Level Two | Rooms 406, 409, Theater

### DAYS/HOURS

Electronic Theater

Monday, 4 August | 7 pm to 9 pm

Tuesday, 5 August | 7 pm to 9 pm

Wednesday, 6 August | 7 pm to 9 pm

Thursday, 7 August | 7 pm to 9 pm

### Electronic Theater Matinée

Tuesday, 5 August | 2 pm to 4 pm

Wednesday, 6 August | 2 pm to 4 pm

### Festival Screening Rooms

Sunday, 3 August | 6 pm to 8 pm

Monday, 4 August | 9 am to 6 pm

Tuesday, 5 August | 9 am to 6 pm

Wednesday, 6 August | 9 am to 6 pm

Thursday, 7 August | 9 am to 6 pm

Friday, 8 August | 9 am to 5 pm

Courses	
---------	--

**Lectures, seminars, and interactive instruction on every aspect of computer graphics: theory, programming, design, commercialization, and tomorrow's applications. Course categories range from beginning to advanced. All Courses are located in the Los Angeles Convention Center.**

**LOCATIONS**

See pages 26–34 for course locations.

**DAY/HOURS**

Half day pm

Sunday, 3 August | 1:30 pm to 5 pm

Tuesday, 5 August | 1:30 pm to 5 pm

Half day am

Tuesday, 5 August | 8:30 am to noon

Full day

Monday, 4 August | 8:30 am to 5 pm

Tuesday, 5 August | 8:30 am to 5 pm

**CHAIR**

**Barb Helfer**  
The Ohio State University/  
Ohio Supercomputer  
Center

**COMMITTEE**

**Andy Daniel**  
Alliance Semiconductor

**Jeffrey J. McConnell**  
Canisius College

**Nan Schaller**  
Rochester Institute of  
Technology

**Andrew Scott**  
Central State University

**Scott Senften**  
Silicon Graphics, Inc.

**Harry Smith**  
University of North  
Carolina

**Courses Registration**

Full Conference registration allows attendees access to all SIGGRAPH 97 Courses. Seating in courses is on a first-come, first-served basis. Please be sure to arrive early to get seating for the course(s) you wish to attend.

**Course Notes**

Full Conference registrants receive all course notes on CD-ROM. Printed course notes may be purchased at the Merchandise Store in the South Lobby.

**Course Categories**

**BEGINNING**

No prerequisites for introductory courses, but prior experience with computing or graphics may be helpful.

**INTERMEDIATE**

Attendees should have working knowledge of the subject, based on introductory courses, reading, and practical experience. Intermediate-level courses supply substantial technical content in detail, such as algorithms, techniques, and architectures.

**ADVANCED**

Narrow topics covered in substantial depth. Presentations may include challenging mathematical concepts and programming examples.

1

**FIX** Motion Capture in Practice

Sunday | Half Day | Intermediate

Petree Hall D

Topics in this course on the practical, daily production aspects of motion capture include: integration of motion capture data into the production pipeline, animation issues, and client/creative interaction with motion capture actors.

## WHO SHOULD ATTEND

The audience for this course includes those interested in examining the animation production process (from both a technical and management perspective) as it relates to motion capture.

## ORGANIZER

**Scott Dyer**  
Windlight Studios

## LECTURERS

**Scott Dyer**  
**Eric Flaherty**  
Windlight Studios

**Veronique Benquey**  
Medialab

2

**AD** Creative Design for the World Wide Web

Sunday | Half Day | Beginning

Petree Hall C

Creative interface design is essential for a successful Internet experience. By focusing on design issues that should be considered when developing content and experiences using HTML, Java, JavaScript, or VRML, this course develops visual and critical thinking skills and enables attendees to use the elements and principles of design when developing for the World Wide Web.

## WHO SHOULD ATTEND

Anyone who develops, or is interested in developing interactive content for the Internet using HTML, Java, JavaScript, or VRML.

## ORGANIZER

**Bonnie Mitchell**  
Syracuse University

## LECTURERS

**Bonnie Mitchell**  
Syracuse University

**Lynda Weinman**  
New Riders Publishing

3

CAL

**API** Programming with OpenGL: An Introduction

Sunday | Half Day | Beginning

Room 502A

An introduction to programming interactive graphics programs using the OpenGL API (OpenGL 1.0 and the OpenGL 1.1 additions), with an emphasis on computer graphics fundamentals.

## WHO SHOULD ATTEND

Programmers who want to write interactive graphics applications and who have little or no experience with OpenGL.

## ORGANIZER

**Kathleen E. Danielson**  
Silicon Graphics, Inc.

## LECTURERS

**Edward Angel**  
University of New Mexico

**Kathleen E. Danielson**  
Silicon Graphics, Inc.

4

**BD** Exploring Gigabyte Datasets in Real-Time: Algorithms, Data Management, and Time-Critical Design

Sunday | Half Day | Intermediate

Room 515A

Modern datasets arising from computational physics are extremely large and involve complex, difficult-to-exhibit phenomena. Real-time interactive interfaces are useful in analyzing these datasets, but real-time performance has been difficult to achieve with such large volumes of data. This course discusses the issues that arise in real-time interactive visualization of very large (>100 gigabytes) datasets and presents solution strategies emphasizing time-critical design, which impact architectures, interfaces, algorithms, and data management.

## WHO SHOULD ATTEND

Current or potential scientific visualization system developers who wish to implement a system for visualization of very large datasets.

## ORGANIZER

**Steve Bryson**  
MRJ Technology Solutions/NASA  
Ames Research Center

## LECTURERS

**Steve Bryson**  
**Michael Cox**  
**David Kenwright**  
MRJ Technology Solutions/NASA  
Ames Research Center

**5****API Sound Bytes: VRML Authoring for Noisy Worlds**

Sunday | Half Day | Beginning

Room 403A

This introduction to VRML sound capabilities and techniques covers the basics of all the VRML sound-related nodes, then uses several specific examples to cover techniques for creating worlds with realistic ambient background, local sounds, and event-related sound.

**WHO SHOULD ATTEND**

VRML authors who are interested in using sound or making better and more efficient use of sound in their VRML scenes.

**ORGANIZER**

**Geoff Brown**  
Silicon Graphics, Inc.

**LECTURERS**

**Geoff Brown**  
**Ed Allard**  
Silicon Graphics, Inc.

**6****VR Stereo Computer Graphics for Virtual Reality**

Sunday | Half Day | Intermediate

Room 515B

This course presents an introduction to depth perception, techniques for generation of stereoscopic images, stereo displays, and discussion of stereoscopic algorithms. Many examples of stereo images are shown.

**WHO SHOULD ATTEND**

Computer graphics professionals, programmers of virtual reality applications, and others who need a true three-dimensional representation to disambiguate depth information and detail in complex models.

**ORGANIZER**

**Lou Harrison**  
North Carolina State University

**LECTURERS**

**Martin Dulberg**  
**Lou Harrison**  
**David McAllister**  
North Carolina State University

**7****CAL****Design and Application of Object-Oriented 3D Visualization Systems**

Sunday | Half Day | Intermediate

Room 502B

3D graphics and object-oriented systems have emerged as premier technologies to create flexible, extensible, and intuitive software applications. This course demonstrates how to design applications to take advantage of object-oriented techniques and methods in 3D graphics and visualization.

**WHO SHOULD ATTEND**

Users, developers, and researchers of 3D graphics and visualization systems, or practitioners who want to employ graphics and visualization in their own applications.

**ORGANIZER**

**Ken Martin**  
General Electric Corporate R&D Center

**LECTURERS**

**Tom Citriniti**  
Rensselaer Polytechnic Institute

**William E. Lorensen**  
**Ken Martin**  
General Electric Corporate R&D Center

**Tamara Munzner**  
Stanford University

**8****Texture Synthesis with Line Integral Convolution**

Sunday | Half Day | Intermediate

Room 408A

Line Integral Convolution (LIC) is a powerful texture-based approach for conveying directional information that has numerous applications in scientific visualization, special effects, and art. This intensive course teaches the basic LIC algorithm and its optimization and provides attendees with an opportunity to interactively experiment with these implementations. It also shows how LIC techniques can be used to portray flow over arbitrary surfaces, visualize three-dimensional vector fields, and create non-photorealistic illustrations.

**WHO SHOULD ATTEND**

LIC has such a wide application that this course is suitable for people with an interest in visualization texture synthesis, special effects, and art.

**ORGANIZER**

**Kwan-Liu Ma**  
Institute for Computer Applications in Science and Engineering

**LECTURERS**

**Brian Cabral**  
Silicon Graphics, Inc.

**Hans-Christian Hege**  
**Detlev Stalling**  
Konrad-Zuse-Zentrum für Informationstechnik

**Victoria L. Interrante**  
**Kwan-Liu Ma**  
Institute for Computer Applications in Science and Engineering

9

**API** Introduction to VRML

Monday | Full Day | Beginning

Room 151

Attendees learn how to use VRML (the Virtual Reality Modeling Language) to author their own 3D virtual worlds on the World Wide Web. Topics include the syntax of VRML, typical usage patterns, how to avoid common mistakes, animation and scene design technique, and tricks for increasing performances and realism.

## WHO SHOULD ATTEND

This course assumes a basic understanding of computers and algebra as well as a beginning-level understanding of 3D graphics concepts, such as that obtained via the SIGGRAPH beginning graphics course. No programming or advanced math background is required.

## ORGANIZER

**David Nadeau**

San Diego Supercomputer Center

## LECTURERS

**Mike Heck**

Template Graphics Software, Inc.

**John Moreland****David Nadeau**

San Diego Supercomputer Center

10

## Introduction to Computer Graphics

Monday | Full Day | Beginning

Room 152

The SIGGRAPH conference is an exciting event, but the volume of new terms, new concepts, and new products can be intimidating for first-time attendees. This course is designed to ease newcomers into the SIGGRAPH conference experience by presenting the fundamental ideas and vocabulary at a level that can be readily understood.

## WHO SHOULD ATTEND

Complete beginners who need to be able to understand the rest of the SIGGRAPH conference. Attendees will leave prepared to take other classes, attend the panel sessions, appreciate the Electronic Theater, and understand the concepts and products displayed in the Exhibition.

## ORGANIZER

**Mike Bailey**

University of California at San Diego and San Diego Supercomputer Center

## LECTURERS

**Mike Bailey**

University of California at San Diego and San Diego Supercomputer Center

**Andrew Glassner**

Microsoft Network

**Olin Lathrop**

Cognivision, Inc.

**Patricia Wenner**

Bucknell University

11

CAL

**API** Programming with OpenGL: Advanced Techniques

Monday | Full Day | Intermediate

Room 502A

This course focuses on rendering high-quality images, describes some of the more subtle OpenGL techniques, and provides a practical grounding in some of the central computer graphics concepts in use today.

Attendees will:

- Gain greater insight into important OpenGL capabilities.
- Be able to use OpenGL to solve challenging rendering problems.
- Strengthen their understanding of core computer graphics concepts.
- Become familiar with graphics techniques for increasing image realism, creating special effects, and solving domain-specific imaging problems.
- Learn how to identify and evaluate multiple approaches to solving rendering problems.
- Receive code examples for generating high-quality graphics images.

## WHO SHOULD ATTEND

Developers who need to generate more challenging or realistic images using OpenGL. Anyone interested in the practical application of advanced rendering techniques.

## ORGANIZER

**Tom McReynolds**

Silicon Graphics, Inc.

## LECTURERS

**David Blythe****Celeste Fowle****Brad Grantham****Simon Hui****Tom McReynolds****Paula Womack**

Silicon Graphics, Inc.

12

**BD** Interactive Walk-Through of Complex Environments

Monday | Full Day | Intermediate

Room 403A

This course focuses on interactive systems and algorithms for displaying complex geometric databases that require sophisticated scene management techniques to achieve frame rate. Beginning with a discussion of basic techniques and leading to state-of-the-art algorithms, speakers address key issues in walk-through, including visibility computations, automatic object simplification, and memory management through database subset pre-fetching. Speakers also show real applications of these algorithms to a variety of areas, including game development, visual simulation, virtual reality, architecture, and digital mockup.

## WHO SHOULD ATTEND

Workers in simulation, animation, games, virtual reality, architecture, CAD, medical imaging, and scientific visualization who deal with geometric databases much larger than the interactive display capacity of their workstations.

## ORGANIZER

**Michael Hopcroft**

Silicon Graphics, Inc.

## LECTURERS

Army Research Office

**Dinesh Manoch**

University of North Carolina

**Turner Whitted**

Numerical Design Limited

13

**FX Digital Color**

Monday | Full Day | Advanced

Petree Hall D

Computers have been used to generate synthetic images since the first SIGGRAPH conference and to generate color images for nearly that long. But only recently has it become practical to create and reproduce digital images with predictable, accurate color, and only recently has it become reasonably easy to move images from the SIGGRAPH world into video, film, and print. This course explains the science behind color reproduction, image digitalization, and image reproduction in video, film, print, and computer graphics.

## WHO SHOULD ATTEND

Hardware and software engineers, and systems designers.

## ORGANIZER

**Charles Poynton**

Poynton Vector Corporation

## LECTURERS

**Michael Bourgojn**

CAL

**New Frontiers in Modeling and Texturing**

Monday | Full Day | Advanced

Petree Hall C

Warning: this course contains some implicit scenes. It describes many new interactive and procedural tools for modeling and texturing surfaces, and shows how to model hands, graft branches, blow smoke, comb fur, trim shrubs, and paint dogs. The course covers advanced topics in polygonization, particle systems, constraints, texture mapping, geometric texturing, solid texturing, procedural modeling, and surface topology. One-hour presentations, 300 pages of course notes, and several megabytes of CD-ROM space allow the speakers to provide more detailed information on these techniques than is possible in their paper presentations.

## WHO SHOULD ATTEND

Those who have already taken most of the other SIGGRAPH courses.

## ORGANIZERS

**John Hart**

Washington State University

**David Ebert**

University of Maryland Baltimore County

## LECTURERS

**Jules Bloomenthal**

Microsoft Corporation

**David Ebert**

University of Maryland Baltimore County

**Kurt Fleischer**

Pixar

**John Hart**

CAL

**VR Applied Virtual Reality**

Monday | Full Day | Intermediate

Room 515A

This course addresses virtual reality from the end-user's perspective and focuses on "what we can do" with VR technology, not "how to develop" the technology, and provides attendees with criteria to identify whether or not VR technology might be a useful tool in their working environments. The course covers several working VR applications in academia and industry, and reviews their design processes.

## WHO SHOULD ATTEND

Engineers, designers, scientists, product developers, artists, managers, and anyone interested in obtaining a general understanding of the concepts and design methodologies for effective virtual reality applications.

## ORGANIZER

**Carolina Cruz-Neira**Iowa Center for Emerging Manufacturing/  
Iowa State University

**FX Interactive Movies: Techniques, Technologies, and Contents**

Monday | Full Day | Intermediate

Room 515B

The concept of interactive movies has existed for a long time, and recent advances in visual, sound, graphics, and interaction technologies are rapidly converging to create a new paradigm. This course gives attendees the knowledge necessary to create interactive movies and illustrates integration of these technologies to realize this new type of entertainment.

## WHO SHOULD ATTEND

Researchers who are interested in interactive movies, especially those who have a background in computer vision and computer graphics.

## ORGANIZERS

**FX Virtual Humans: Behaviors and Physics, Acting, and Reacting**

Monday | Full Day | Intermediate

West Hall B

This course is intended to demonstrate the state of the art in motion synthesis for virtual humans. It covers the essential elements for interactive and real-time (synthesized, non-captured) animation via behavior, physics, signal processing, scripting, and reactive techniques.

## WHO SHOULD ATTEND

Animators, managers, software developers, students, and scientists interested in synthesizing human motions in real time.

18

**Beyond Bottlenecks and Roadblocks: Internetworked Computer Graphics**

Monday | Full Day | Beginning

Room 502B

Although networking and computer graphics are considered distinct disciplines, they have begun to converge. For example, graphics and networking must be considered together when using 3D for collaborative explorations, information visualization, and large-scale virtual environments. This course presents an introduction to networking concepts for using and developing interactive Internet-based graphics applications.

Software and tools associated with the Multicast Backbone (MBone), hypertext transfer protocol (http), and the Virtual Reality Modeling Language (VRML) are demonstrated. A collaborative remote design project is presented as a case study. The course also includes first-hand examples of the capabilities and tradeoffs involved when interactive 3D graphics are combined with the World Wide Web and live information streams across the Internet.

## WHO SHOULD ATTEND

Computer graphics users interested in understanding networking and graphics integration issues.

## ORGANIZER

**Theresa-Marie Rhyne**  
Lockheed Martin/US EPA Scientific  
Visualization Center

## LECTURERS

**Bob Barton**  
**Mike Mccedonia**

19

**Physically Based Modeling: Principles and Practice**

Monday | Full Day | Intermediate

Room 408A

A systematic introduction to physically based modeling techniques, including differential equation basics, dynamics of particles and mass/spring systems, continuum methods for simulating non-rigid objects, rigid body dynamics, kinematic and dynamic constraints, and collision and contact. Detailed examples of the application of these techniques to animation production are presented.

## WHO SHOULD ATTEND

This course is targeted at computer graphics researchers and implementors who wish to develop a solid understanding of physical methods as applied to animation and modeling. It will be of particular interest to those who wish to implement physically based modeling techniques and/or read and critically appraise technical papers in the field.

## ORGANIZERS

20

**Computer Animation Using Digital Video for the Web, Multimedia, and Broadcast**

Monday | Full Day | Intermediate

Room 403B

Worldwide, computer animation has recently enjoyed an enormous increase of use in a wide range of video applications. Computer graphics artists, programmers, and animators need to interface with digital video systems. The World Wide Web and CD-ROM online interactive information systems have created even more outlets for digital video animations. This course provides the information that these potential video producers need to develop their video skills.

## WHO SHOULD ATTEND

Anyone starting or planning to build a computer-based digital video animation recording system, or who is converting their present systems to digital video; Web-page builders who work with video information; CD-ROM designers who work with interactive video; and producers of visualization centers.

## ORGANIZER

**Bob Judd**  
Los Alamos National Laboratory

### Designing Real-Time Graphics for Entertainment

Monday | Full Day | Intermediate

West Hall A

New arcade games, videogame consoles, personal computer games, and theme park virtual reality attractions are the most widely experienced applications of real-time computer graphics. This course offers detailed insights from developers at the forefront of this area. Topics include hardware and software design, game design and programming, rendering tricks, and themed attraction development. Attendees learn the best known practices in contemporary entertainment application development.

#### WHO SHOULD ATTEND

Entertainment developers who hope to enhance their skills with the latest development techniques.

#### ORGANIZER

**Michael Jones**  
Silicon Graphics, Inc.

#### LECTURERS

**John Carmack**  
ID Software

**Sharon Clay**  
Silicon Graphics, Inc.

**Mike Goslin**  
Walt Disney LBE

22

### Mastering Visible Wisdom: Graphic Design for Usable GUIs of Productivity Tools, Multimedia, and the Web

Tuesday | Full Day | Intermediate

Room 403A

This introduction to terminology, theory, practical principles of good design, case studies, and design process provides practical guidance for research and commercial product development, and active experience through simple pen-and-paper exercises.

#### WHO SHOULD ATTEND

Staff members or managers in the following fields: product development engineering, software engineering, product marketing, application development for a user group, human factors design, graphic design, industrial design, and technical editing.

#### ORGANIZER

**Aaron Marcus**  
Aaron Marcus and Associates, Inc.

#### LECTURERS

**John Armitage**  
**Aaron Marcus**  
**Andrew Thompson**  
**Pamela Tien**  
**Frank Volker**

Aaron Marcus and Associates, Inc.

23

### Artificial Life for Graphics, Animation, Multimedia, and Virtual Reality

Tuesday | Full Day | Intermediate

West Hall B

This course investigates the increasingly important role that concepts from the field of artificial life are playing across the breadth of computer graphics, including image synthesis, modeling, animation, multimedia, and virtual reality. Attendees are systematically introduced to techniques for realistically modeling and animating objects that are alive. They also explore graphics techniques that emulate phenomena fundamental to biological organisms, such as biomechanics, behavior, growth, and evolution. Topics include modeling and animation of plants, animals and humans, behavioral animation, communication and interaction with autonomous agents in virtual worlds, and artificial evolution for graphics and animation.

#### WHO SHOULD ATTEND

Graphics researchers and practitioners, including animators and VR enthusiasts who are seeking a close encounter with "life" at the leading edge of graphics modeling.

#### ORGANIZER

**Demetri Terzopoulos**  
University of Toronto

CAL

### OpenGL and Window System Integration

Tuesday | Half Day | Intermediate

Room 502A (am)

This practical course explains the application development options for writing portable, high-performance OpenGL programs for both the X Window System and Microsoft's Windows 95 and NT. The emphasis is on Windows programming and Motif-based approaches to writing real OpenGL applications. Topics include: techniques for ensuring portability between different platforms; high-level toolkits and alternative OpenGL interfaces; and advanced areas such as stereo, printer hardcopy, effective debugging, and exotic input devices.

#### WHO SHOULD ATTEND

Win32, Motif, and OpenGL programmers who want to learn how to write OpenGL programs that cleanly, efficiently, and portably interface with the X Window System. Also: programmers planning to port OpenGL applications to different window systems.

#### ORGANIZER

**Mark Kilgard**  
Silicon Graphics, Inc.

#### LECTURERS

CAL

**BD** **Multiresolution Surface Modeling**

Tuesday | Full Day | Intermediate

Petree Hall C

This course summarizes the best current techniques for simplifying complex polygonal surface models in order to accelerate rendering. Topics include: use of multi-resolution models that describe 3D shapes at multiple levels of detail, and applications in CAD, Web publishing, geographic information systems, computer vision, and virtual reality.

## WHO SHOULD ATTEND

Users, developers, and researchers working with complex polygonal models.

## ORGANIZER

**Paul Heckbert**  
Carnegie Mellon University

## LECTURERS

**Paul Heckbert**  
Carnegie Mellon University

**Hugues Hoppe**

26

CAL

**3D Computer Animation Workshop**

Tuesday | Full Day | Intermediate

West Hall A

This course is a hands-on workshop that introduces attendees to high-end 3D computer animation capabilities. The course is divided into several segments, each consisting of a brief lecture on specific principles of 3D animation, a brief demonstration of how those principles are implemented, and an extended exercise in which participants work on a short animation that utilizes those principles.

## WHO SHOULD ATTEND

Those who have an interest in, but very limited or no experience with, 3D computer animation.

## ORGANIZER

**Michael O'Rourke**  
Pratt Institute

ASSISTANTS  
**Khalida Lockheed**  
**Annie O'Donnell**  
**Wei Yi Lin**  
**Abbey Klotz**  
**Lillian Shieh**  
**Mioko Iwata**  
**Marc Meyer**  
**Lena Yamaguchi**  
Pratt Institute

**SPECIAL NOTE: A limited number of course attendees will be selected to perform the exercises during the course. Other attendees will be able to schedule later times in the CAL to complete the exercises.**

27

**FIX** **Scanning and Recording of Motion Picture Film**

Tuesday | Full Day | Intermediate

Room 515B

Film scanning and recording technologies enable computer graphics to reach mainstream cinema. This course presents the technology and craft of scanning motion picture film into the digital film or digital video domain for processing, and recording digital images back to motion picture film.

## WHO SHOULD ATTEND

Digital cinematographers, production technicians, and computer animators.

## ORGANIZERS

**George Joblove**  
Warner Digital Studios

28

CAL

**API** **Authoring Compelling and Efficient VRML 2.0 Worlds**

Tuesday | Full Day | Intermediate

Room 515A

This course provides authors with a concrete toolset for overcoming the limitations and exploring the unique capabilities of VRML 2.0. Attendees learn creative and efficient techniques from examples created by expert authors and emerge with new tools and approaches they can use to solve their creative challenges.

## WHO SHOULD ATTEND

VRML authors who are interested in creating compelling high-performance content.

## ORGANIZER

**David Story**  
Silicon Graphics, Inc.

## LECTURERS

**David Marsland**  
**David Story**  
Silicon Graphics, Inc.

**Delle Maxwell**  
Independent Computer Graphic Designer

29

**VR Programming Virtual Worlds**

Tuesday | Full Day | Intermediate

Room 403B

An introduction to virtual reality, primarily using immersive displays. Topics include: hardware system requirements, design of applications, an introduction to haptics, and implementation of virtual worlds. The emphasis is on the practical issues that must be addressed to begin working in virtual environments.

**WHO SHOULD ATTEND**

Those who wish to create immersive virtual environments.

**ORGANIZER**

**Anselmo Lastra**  
University of North Carolina  
at Chapel Hill

**LECTURERS**

**Stephen Ghee**

30

**VR Making Direct Manipulation Work in Virtual Reality**

Tuesday | Half Day | Intermediate

Room 502A (pm)

Direct manipulation interfaces are becoming increasingly important in the design of useful virtual reality applications, but poor interface hardware performance and poor understanding of human factors make them difficult to implement. This course covers the issues that arise in design of direct-manipulation interfaces for virtual reality applications. Human factors, tracker error compensation, and widget design are discussed from the perspective of task performance, with an emphasis on application design.

**WHO SHOULD ATTEND**

Current or potential virtual reality application developers who wish to implement a direct manipulation interface.

CAL

**BD Principles of Volume Visualization**

Tuesday | Half Day | Intermediate

Room 502B (am)

An overview of the nomenclature, the technology, and the techniques of volume visualization, with the emphasis on algorithms, software tools, and applications. Topics include: different approaches to surface extraction, volume shading, volume viewing, software tools, and applications. Slides, videos, and live demos demonstrate state-of-the-art techniques.

**WHO SHOULD ATTEND**

Computer scientists and professionals who develop visualization techniques for volume data, and professionals in scientific, engineering, and biomedical disciplines who use or plan to use these techniques.

**ORGANIZER**

**Arie Kaufman**  
State University of New York

**LECTURERS**

**Rick Avila**

33

**AD Principles of Visual Perception and Its Applications in Computer Graphics**

Tuesday | Full Day | Intermediate

Room 151

An introduction to the study of visual perception and its applications in computer graphics. This course surveys the field of visual psychophysics and presents fundamental findings on how we perceive light, color, pattern, motion, texture, shape, and depth. These experimental results are presented in the context of how they can be used in real applications in computer graphics, including realistic image synthesis, scientific and information visualization, virtual environments, and graphic design.

**WHO SHOULD ATTEND**

This course will be of interest to a wide range of graphics researchers and practitioners who want to understand how the images they create are interpreted by the human visual system.

**ORGANIZERS**

**Victoria L. Interrante**  
Institute for Computer Applications in Science and Engineering

**Penny Rheingans**

**Thaddeus Beier**  
Hammerhead Productions

35

**API Introduction to Java3D**

Tuesday | Full Day | Intermediate

Petree Hall D

This course presents the Java3D graphics API. It introduces the basic concepts and technology used in the Java3D definition, such as the use of scene graph to define a retained-mode model, compilation of a scene graph into a compiled-retained structure, the use of behavior nodes to manipulate both types of structures (without regard to which mode is in use), and ancillary considerations that turn these concepts into a useful application or applet.

**WHO SHOULD ATTEND**

Programmers interested in developing applications or tools using Java3D API and those interested in learning about Java3D.

## Toco the Toucan

Deb Roy  
Perceptual Computing Section  
MIT Media Laboratory  
20 Ames Street, Room E15-388  
Cambridge, Massachusetts  
02139 USA  
dkroy@media.mit.edu

Toco the Toucan is a synthetic creature created at the MIT Media Laboratory. Participants can walk up to the display, sit down, and begin interacting with the toucan using a combination of speech and gesture. A constrained, but not entirely predetermined, story ensures that the highly interactive experience includes some structure and an overall plot.

## The Grimm Show

M.R. Petit  
104 Suffolk Street, #3  
New York, New York 10002  
USA  
petit@echonyc.com

The Grimm Show (or The Story of the Youth Who Went Forth to Learn What Fear Was) is a 60-minute multi-media performance/interpretation of the parable by the Brothers Grimm. The story recounts the experiences of a youth who goes forth into the world to learn the meaning of "shuddering in fear."

JPL Space Garden:  
Space Data Visualization

William B. Green  
Jet Propulsion Laboratory  
Mailstop 168-527  
4800 Oak Grove Drive  
Pasadena, California 91109-  
8099 USA  
Bill\_Green@iplmail.jpl.nasa.gov

The JPL Space Garden features systems in current use at JPL for processing and visualization of science data returned by instruments flown on various NASA spacecraft.

## Nerve Garden

Bruce Damer  
BIOTA Special Interest Group of  
the Contact Consortium  
P.O. Box 66866  
Scotts Valley, California 95067-  
6866 USA  
bdamer@ccon.org

How can we forget the fascination that our terrariums, aquariums, or chemical crystal gardens held over us when we were children? Watching beautiful and functional structures emerge and then decay taught us a great deal about life and our own ultimate destiny. The Nerve Garden allows users to plant seeds in a digital terrarium and witness the growth of familiar and strange plant and animal structures.

## d-rhum

Daniel Schwartz  
RomeBlack, Inc.  
180 Varick Street, Suite 12A  
New York, New York 10014  
USA  
dls@romeblack.com

d-rhum (drum room) is a room that responds to the presence and movement of its occupants. Computers translate sensor data into commands sent to motors. The motors stretch, push, strike with mallets, and move sections of the walls or the walls themselves. The walls are built of malleable materials such as latex and silicone.

Bodymaps: Artifacts of Touch  
(The Sensuality and Anarchy of Touch)

Thecla Schiphorst  
Digital EARTH  
1128 Rose Street  
Vancouver, British Columbia V5L  
4K8 CANADA  
thecla@cs.sfu.ca

Bodymaps: Artifacts of Touch is a computer interactive sound and video installation that subverts the visual/objective relationship between the object and the eye, between click and drag, between analysis and power, to create a relationship between participant and technology that transgresses rules of ownership and objectivity, and begs questions of experience, power, and being.

### Multiple Identities MAP

Richard Yelle  
Parsons School of Design  
66 Fifth Avenue  
New York, New York 10011  
USA  
yeller@newschool.edu

A digital map of New York City that incorporates avatars (visual embodiments of concepts, personas, identities, or intelligence in virtual reality) acting as urban guides who lead travelers through unique experiences in the metropolis.

### Iamascope: An Interactive Kaleidoscope

Sidney Fels  
ATR Media Integration &  
Communication Research  
Laboratories  
Seika-cho, Soraku-gun  
Kyoto 619-02 JAPAN  
fels,mase@mic.atr.co.jp

This interactive project introduces a multimedia experience using an interactive kaleidoscope. The Iamascope uses a video camera lens as the eye of a kaleidoscope and projects a kaleidoscopic image of the participant onto a large screen. A vision subsystem is coupled to the electronic eye to control musical tones using a sustained algorithm. A wireless microphone produces echoes corresponding to the audio analogue of the kaleidoscopic reflections.

### Virtual Basketball

Makoto Sato  
Precision and Intelligence  
Laboratory  
Tokyo Institute of Technology  
226 Yokohama  
4259 Nagatsuta-cho  
Midori-ku, JAPAN  
msato@pi.titech.ac.jp

In this cave-like virtual space, participants use visual, auditory, and tactile sensations to perceive and interact with objects. A new human-scale haptic device, Big SPIDAR, couples haptic sensations with vision and audition, and displays various aspects of force feedback associated mainly with contact, weight, and inertia.

### ants under a mushroom

Amy Alexander  
School of Film/Video  
California Institute of the Arts  
24700 McBean Parkway  
Valencia, California 91355 USA  
amy@emsh.calarts.edu

In ants under a mushroom, the participant "paints" with moving and still images, examines the relationship between the formal elements of a non-fiction image and its content, and in the process examines the notion that an image can be real (non-fictional, representational) or non-real (abstract).

### The Multi-Cultural Recycler

Amy Alexander  
School of Film/Video  
California Institute of the Arts  
24700 McBean Parkway  
Valencia, California 91355 USA  
amy@emsh.calarts.edu  
<http://shoko.calarts.edu/~alex/recycler.html>

When a visitor accesses the Multi-Cultural Recycler, the Recycler selects two or three camera web sites at random and captures the live or latest image from their cameras. The Recycler then performs digital image processing on these images to "recycle" them into a new image. Since the actual process used is also selected at random, each access to the Recycler site produces a unique image.

### Virtual Orchestra Performance

Tapio Takala  
Department of Computer Science  
Helsinki University of Technology  
02150 Espoo, FINLAND  
tapio.takala@hut.fi  
<http://www.cs.hut.fi/~tta/>

In a room with large-screen walls, where animated virtual players hold different musical instruments, the visitor, wearing data gloves, conducts a musical performance, leading the tempo with one hand and, with the other, directing aspects of the performance (a string crescendo, for example). The players show features of human behavior: they pay attention when the conductor begins, and they continue playing for awhile if the conductor ceases, but they soon return to playing nonsense. Through amplified speakers, the visitor can also experience the acoustics of the surrounding virtual concert hall. Alternative acoustic environments (open space, concert hall, church) and pieces in different musical styles can be selected from a menu.

### Fixed-Base Driving Simulator

James Gruening  
Iowa Center for Emerging  
Manufacturing Technology  
Iowa State University  
2062 Black Engineering  
Ames, Iowa 50011 USA  
honyamda@iastate.edu  
<http://www.icemt.iastate.edu>

This virtual reality application is used as a testbed for Intelligent Vehicle Highway Systems and virtual prototyping. One of its main goals is to investigate the level of fidelity required for various human factors studies.

### Garnet Vision

Hiroo Iwata  
Institute of Engineering Mechanics  
University of Tsukuba  
Tsukuba, 305 JAPAN  
iwata@kz.tsukuba.ac.jp

In Garnet Vision, the emphasis is on how to build a full solid-angle display in a limited space. Two criteria were established to optimize space utilization:

1. Pixel efficiency (how many pixels are projected on each polygon of a polyhedral screen).
2. Space efficiency (the ratio of displayed polyhedra to overall dead volume of the rear-projection screen).

Thorough examination of these criteria led to selection of a rhombic dodecahedron. The dodecahedron screen, in which a viewer can stand, was built with 12 projectors in a space the size of a normal room. Each projector also has a speaker that generates sound.

### Journey into the Brain

Karen G. Littman  
Morphonix  
94 Windsor Drive  
San Rafael, California 94901  
USA  
KMorphonix@aol.com

Journey into the Brain is a story-based interactive CD-ROM funded by a research grant from the National Institute of Mental Health. It takes children between seven and 11 years of age on an adventure inside the most complex and mysterious organ of all: the human brain.

**Multi Mega Book in the Cave**

Yesi Maharaj Singh  
F.A.B.R.I.CATORS  
Via Fratelli Bronzetti 6  
20129 Milano, ITALY  
fabricat@galactica.it

The Multi Mega Book is an up-to-date electronic book sculpture – a magic and stimulating journey through some of the most intense moments of media, technology, science, architecture, and culture. It was developed as a fully immersive interactive installation with high-resolution stereoscopic images.

Users explore and freely experience the different dimensions of the 15th Century and the 20th Century through virtual reality, stereoscopic 3D sound, and holophonic effects that generate a magical interactive navigation technique.

**Alice: Easy to Learn Interactive 3D Graphics**

Jeff Pierce  
User Interface Group  
Carnegie Mellon University  
5000 Forbes Avenue  
Pittsburgh, Pennsylvania 15213  
USA  
jpiercet@cs.cmu.edu

A development environment for creating interesting and interactive 3D worlds. It is designed for ease of learning and use by non-engineering high school and undergraduate students.

**Cyber Bunraku**

Kiyoshi Arai  
Central Research Laboratory  
Hitachi, Ltd.  
1-280 Higashi Koigakubo,  
Kokubunji  
Tokyo 185, JAPAN  
arai@crl.hitachi.co.jp

Cyber Bunraku is an experimental system that supports manipulation of CG characters in real time. A facial expression tracker is used by the facial performer, while the puppeteering device for body movement is used by a traditional Bunraku puppeteer. The two performers create the 3D CG character's movements, behaviors, and emotions, which allows the audience to enjoy a brand-new traditional art form.

**Journey to Anahuac**

Tomas J. Filsinger  
Apartado postal 5-325  
Las Palmas  
Cuernavaca, Morelos C.P.  
62051 MEXICO  
<http://www.emersis.com.mx>

Ensclosed in a structure suggesting an Aztec ceremonial temple, participants discover a richly detailed, interactively evolving map illustrating the rise and fall of civilizations in the Valley of Mexico over 3,000 years and the ensuing ecological transformation of the basin.

**Project ScienceSpace**

R. Bowen Loftin  
Virtual Environment Technology  
Laboratory  
University of Houston  
4800 Calhoun, MS CSC-3475  
Houston, Texas 77204-3475  
USA  
bowen@uh.edu

One objective of Project ScienceSpace is to investigate whether sensorially immersive, constructivist learning can remediate typical misconceptions in the mental models of reality held by many students. Another is to study whether mastery of traditionally difficult subjects (relativity and quantum mechanics, for example) is enhanced through learning-by-doing.

**Mind Garden**

Paras Kaul  
Paras West Productions  
University of California, Santa  
Barbara  
11714 Goshen Avenue, #204  
Los Angeles, California 90049  
parasw@well.com

The project combines the technologies associated with EEG, digital brainwave analysis, system design, the World Wide Web, and the synthesis of digital audio, visual, and linguistic media. Participants are asked to relax and focus their attention, which generates frequency variations in their brainwave signals, which in turn determine forms, sounds, and word objects. The journey is determined by the brainwave activity derived from each user's own imagination.

**Wango: COMPOST**

Cassandra Lehman  
The CADRE Institute  
San Jose State University  
One Washington Square  
San Jose, California 95192 USA  
cas@riverview.com

Wango: COMPOST (Compost) is an interactive system that places the audience in control of live video and audio feeds while they navigate through a real-time interface.

**Cyber Space Adventure**

Nobuo Masuda  
Cyber Entertainment, Inc.  
5111 Denny Avenue, #10  
North Hollywood, California  
91601 USA  
masuda@cyber-net.co.jp

This simulation program was developed as a children's attraction for a municipal science museum. Participants choose one of two roles. They either join a team of astronauts on an interstellar voyage or stay in Mission Control here in our Solar System, where they help the spaceship crew look for the secrets of the universe.

**Dancing Fire and Water**

Vigdis Holen  
Vig's Kunstlab  
Firdavegen 22  
68960 Sandne, NORWAY  
vigdis@axp1.vestdata.no

Dancing Fire and Water is an artistic expression of sounds and images of two of the earth's great energies: Norway's Jostedal glacier and Japan's Owakudani volcano. It is an encounter between fire and water, two of the four fundamental elements in the universe. Live communication via ISDN is maintained between Jostedalsbreen, a growing glacier; Owakudani, an active volcano in Japan's Hakone; and SIGGRAPH 97 in Los Angeles.

**Fantasy<sup>3</sup>**

J. Michael Moshell  
University of Central Florida  
Computer Science Department  
Orlando, Florida 32751 USA  
moshell@cs.ucf.edu

Fantasy<sup>3</sup> is a year-long Senior Design Project involving 30 undergraduate students from six academic departments, four faculty members, and several graduate students. The animated film concerns a group of aliens in a tour bus/spacecraft who visit the park and have typical tourist experiences, with a twist. The virtual world is similar, and some of the same experiences are available, but the story may turn out differently.

**PRoP: Personal Roving Presence**

Eric Paulos  
Computer Science Department  
University of California, Berkeley  
387 Soda Hall  
Berkeley, California 94720 USA  
paulos@cs.berkeley.edu

The Electric Garden is populated with special tele-robots, including several ground-based surface cruisers and a few space-browsing airborne blimps to provide the sensation of tele-embodiment. Drivers and pilots control these PRoPs and experience their remote world through live two-way audio and video.

### **Advanced Technologies for Virtual Environments**

Mary Whitton  
Department of Computer Science  
University of North Carolina  
Chapel Hill, North Carolina  
27599-3175 USA  
whitton@cs.unc.edu  
<http://www.cs.unc.edu/~walk>  
<http://www.cs.unc.edu/Research/nano>.

#### **WALKTHROUGH**

In this interactive experience, the user walks through a very large, complex model. It illustrates a variety of model-management techniques, such as visibility culling, dynamic tessellation of higher-order surfaces, static and dynamic model simplification, and textured impostors, to enable rendering at interactive rates.

#### **NANOMANIPULATOR**

The nanoWorkbench adds a PHANTOM force-feedback device to a rear-projected display to allow the user to touch the objects that are displayed. This overlay of the visual with haptic spaces provides the sense of a solid object that can be prodded and molded by the user.

#### **Sunset Boulevard**

Scott Minneman  
Xerox PARC  
3333 Coyote Hill Road  
Palo Alto, California 94304 USA  
minneman@parc.xerox.com

Interactive narrative hits the street. Motorists on Hollywood's legendary Sunset Boulevard activate and control a drive-by soap opera playing on two outdoor billboard-sized TVs at Billboard Live, a high-tech nightclub. Viewers at the Los Angeles Convention Center also observe and participate in the Sunset proceedings.

#### **Faery Garden**

Eben Gay  
2 Moore Road  
Southboro, Massachusetts 01772 USA  
eben@ergeng.com

Faery Garden uses virtual reality, MIDI sound, theatrical techniques, and real world objects to blur the real and imaginary worlds together into a compelling visit to a magical place.

### **The Land of Time**

Youn H. Lee  
11215 Research Boulevard,  
#2168  
Austin, Texas 78759 USA  
youn@sva.edu

The Land of Time is a 3D puzzle that consists of two different stages. In the game part, a puzzle is presented. The images and/or animations in the result stage are personal impressions of time and people. We are all bound to time; there are no exceptions. While time itself is rather hard for us to feel, a clock provides the illusion that it is controlling us with its own power.

#### **Virtual Environment ATC Tutor (VEAT)**

Chuck Lexa  
Human Resources Directorate  
Armstrong Laboratory  
7909 Lindbergh Drive  
Brooks Air Force Base, Texas  
78235 USA  
lexa@alhrt.brooks.af.mil

The VEAT is a three-dimensional interactive tutor designed to teach and refresh students on the fundamentals of air traffic control. It utilizes virtual environments, voice recognition, 3D sound, and artificial intelligence to provide a complete adaptive training system.

#### **MEDIA<sup>3</sup>: the Virtual Hologram**

Masahiko Inami  
Tachi Laboratory  
MEIP Faculty of Engineering  
University of Tokyo  
7-3-1 Hongo, Bunkyo-ku  
Tokyo 113, JAPAN  
minami@star.t.u-tokyo.ac.jp

The MEDIA<sup>3</sup> (MEDIA CUBE) consists of liquid crystal displays arranged in the shape of a cubic body. In coordination with the motion of an operator's head and the MEDIA<sup>3</sup>, synthesized images of virtual objects (an insect, a tropical fish, artworks, a medical image, etc.) located inside the MEDIA<sup>3</sup> appear on each LCD. The effect is exactly the opposite of that generated by an OMNIMAX or CAVE system.

### **Big Head Racer**

Valerie Dunford  
VIVID GROUP  
317 Adelaide Street West,  
Suite 302  
Toronto, Ontario M5V 1P9  
CANADA  
valerie@vividgroup.com  
<http://www.vividgroup.com>

A revolutionary, entirely new prototype, Big Head Racer has been created with the objective of personalizing video racing entertainment experiences. It allows participants to see a live video image of themselves in the cockpit of a futuristic racing machine, competing against other drivers (whose heads also appear in their cars) in a race for the finish line!

#### **Ultra Magic Paper Interface**

Hiroshi Usuda  
Architecture Laboratories  
Sony Corporation  
6-7-35 Kitashinagawa,  
Shinagawa-ku  
Tokyo 141, JAPAN  
usuda@sys.ptg.sony.co.jp

Currently, the personal computer is the core of most intelligent, integrated consumer electronics and communication systems. Like GUI's in the computer industry, these intelligent audio/visual, computer/communication (AVCC) systems lack a standardized, truly intuitive user interface. This presents a serious problem for novice users. Ultra Magic Paper Interface is a new type of user interface based on tactile input on plain paper, featuring ease-of-use and unified operation for AVCC systems.

### **Virtual Explorer**

Kevin Dean  
Senses Bureau  
University of California,  
San Diego  
9500 Gilman Drive, 0339  
La Jolla, California 92093 USA  
kld@chem.ucsd.edu  
<http://www-wilson.ucsd.edu/ve/>

This virtual environment simulates the viewscreen of a nanobot that has been injected into a human body. It includes detailed, biologically accurate models of cells and proteins of the immune system and bloodstream, which are rendered in real time during the simulation.

#### **WonderSpace: Interactive 3D Animation Browser**

Toshiya Naka and Yoshiyuki Mochizuki  
Multimedia Development Center  
Matsushita Electric Industrial Co., Ltd.  
1006 Kadoma, Kadoma-shi  
Osaka 571, JAPAN  
naka@isl.mei.co.jp  
Mochik@isl.mei.co.jp

Through human-like avatars, WonderSpace realizes voice or sound communication in multi-user cyberspace. Technical features include compression/decompression of shape data and motion data, modified motions generated from a base motion, motion connecting, and synchronizing motion with sound.

### Direct Manipulation Scene Creation in 3D: Estimating Hand Postures from Multiple- Camera Images

Akira Utsumi  
ATR Media Integration &  
Communications Research  
Laboratories  
2-2 Hikaridai, Seika-cho, Soraku-  
gun  
Kyoto 619-02, JAPAN  
utsumi@mic.atr.co.jp

With this system, participants create virtual 3D scenes by giving pre-defined commands with their own hands, to which no sensing devices are attached. Since the virtual scenes are displayed on a 3D display, participants feel as though the virtual scenes are real 3D spaces, even though they are not encumbered by technological equipment.

### HORIZONS by TeleCommunity

Robert Dunn  
Arc Vertuel, Inc.  
School of Education  
Duchesne University School of  
Education  
111 The Oaks  
Pittsburgh, Pennsylvania 15215  
USA  
rd1s+@andrew.cmu.edu  
<http://www.telecommunity.org>

In a studio atmosphere extending across time zones, students imagine and filter realities and cultures, and offer personal views on life potentials. They share art, visions, experiences, and adventures through creative efforts in animation, multimedia, Web site development, and telecommunications.

### 3D Imaging Sensing Technology

Atsushi Yokoyama  
Hashimoto Signal Processing Lab  
Sony Corporation  
6-7-35 Kitashinagawa,  
Shinagawa-ku  
Tokyo 141, JAPAN  
ayoko@ius.ptg.sony.co.jp

This project presents two 3D imaging systems:

1. A stereo camera system that acquires a dense z-map for a scene.
2. A real-time rangefinder that utilizes a dual-laser and single camera to calculate and display range information at video frame rates.

### Point of View, Point of You / Body to Body

Elsa Mazeau  
89, passage Emile Boutrais  
94120 Fontenay sous Bois,  
FRANCE

In these two installations, participants enter two different rooms (which can be kilometers apart from each other) and virtually interact with each other in real time.

### Optical Gesture Recognition System

Seiji Kobayashi  
Advanced Development  
Laboratories  
Sony Corporation  
6-7-35 Kitashinagawa,  
Shinagawa-ku  
Tokyo 141, JAPAN  
seiji@devom.crl.sony.co.jp

In this real-time human gesture recognition system, video images of a person are sent to a recognition module. The system does not require any sensors or cables to be attached to the subject's body. The key technology here is optical information processing. In the recognition module, video images taken by a CCD camera are presented to a holographic device that generates a vector representation of the gesture. The vector is then analyzed electronically to determine the gesture in real time.

### Talking Head

Gesellschaft für Mediales  
Gestalten GmbH  
"The Virtual Company"  
Kantstrasse 165  
10623 Berlin, GERMANY  
chris@well.com

Talking Head is a prototype product for a new generation of video conferencing. Video images projected on a bust give participants a true three-dimensional impression of their conversation partners, and implemented compensation algorithms generate eye-to-eye contact during the communication.

### Traffic Control

Gesellschaft für Mediales  
Gestalten GmbH  
"The Virtual Company"  
Kantstrasse 165  
10623 Berlin, GERMANY  
chris@well.com

Through virtual reality, Traffic Control offers a unique, interactive, highly entertaining, and completely new way of understanding traffic in urban environments. Users navigate in a very detailed model of Berlin, interactively choose their viewpoints (birds-eye, driver, bicycle, walking adult, little child), and interactively control traffic lights, signs, and vehicles.

### Magic Morphin Mirror: Face-Sensitive Distortion and Exaggeration

T. Darrell, H. Baker, F. Crow,  
G. Gordon, and J. Woodfill  
Interval Research Corporation  
1801 Page Mill Road, Building C  
Palo Alto, California 94304 USA  
trevor@interval.com

This system combines real-time special effects such as image morphing and texture synthesis with new advances in computer vision for face tracking and expression analysis. By distorting one or more aspects of a user's face in real time, Magic Morphin Mirror creates a self-referential experience with an image that is clearly neither really oneself nor entirely synthetic nor autonomous.

A representative selection of outstanding computer-based work presenting an in-depth look at each artist's ongoing creative vision. The gallery will exhibit a small number of artists, each of whom will display a body of work.

LOCATION

Level One | Room 153, West Concourse

DAYS/HOURS

Sunday, 3 August	6 pm to 8 pm
Monday, 4 August	9 am to 6 pm
Tuesday, 5 August	9 am to 6 pm
Wednesday, 6 August	9 am to 6 pm
Thursday, 7 August	9 am to 6 pm
Friday, 8 August	9 am to 1 pm

amc11@ra.msstate.edu

Anna Chupa received her Master of Fine Arts degree at the University of Delaware and a Master of Arts in Liberal Studies at Dartmouth College. Her primary artistic disciplines prior to working in digital media were painting, textiles, printmaking, and performance art. She has published a book and several essays on Jungian archetypes in African-American fiction. Her digital photography and mixed media installations have been exhibited at SIGGRAPH, the Digital Salon, and the Silicon Gallery in Philadelphia.

<http://www.sirius.com/~fenster>

Diane Fenster creates both fine art and illustration using a Macintosh computer. Her style is an innovative combination of her own 35mm photography, video, still video, and scanned imagery. Fenster's fine art has been exhibited internationally, and her images appear in numerous publications and CD's on digital art including the APERTURE monograph "METAMORPHOSIS: PHOTOGRAPHY IN THE ELECTRONIC AGE." She is guest lecturer at many seminars, conferences, and art schools. Her illustration style is an outgrowth of the explorations she has taken with her personal work, and her commissions range from editorial to advertising to Web sites. Fenster's clients include Apple Computer, Inc., IBM Corporation, Dell Computer Corporation, Adobe Systems, Inc., Oracle, Inc., and Silicon Graphics, Inc.

**Michael O'Rourke**

Pratt Institute  
44 Tompkins Place, #1  
Brooklyn, New York 11231 USA  
morourke@interport.net

Michael O'Rourke studied sculpture and computer graphic art for his MFA at the University of Pennsylvania, producing both physical sculpture and real-time interactive virtual sculpture between 1979 and 1982. He subsequently worked for seven years as a Senior Research Staff Artist at the New York Institute of Technology, where he produced computer-aided sculpture, animation and graphics. He now teaches at Pratt Institute, and continues working in a variety of media, both digital and traditional, producing graphic works and animation. His work has been exhibited widely and internationally since 1983.

roman@mcad.edu  
<http://www.mcad.edu/home/faculty/verostko/roman.html>

Roman Verostko has pioneered the development and creative use of an artist's personal expert system. Recipient of the Golden Plotter First Prize (1994, Gladbeck, Germany) and an Ars Electronica honorable mention (1993), his work has been exhibited in major art and technology exhibitions on five continents. A past Board Member of the Inter-Society for Electronic Art and Program Director for the Fourth International Symposium on Electronic Art, Verostko has published articles and lectured internationally on the subject of Art and Algorithm. Recent work includes a binary version of a Universal Turing Machine illuminated with algorithmically generated designs. A Professor Emeritus of the Minneapolis College of Art and Design, he currently resides in South Minneapolis, where he maintains an experimental studio with one work station reserved for research and development.

## Keynote Address/Awards

Wednesday, 6 August | 8:15 am - 9:45 am | West Hall B

Bran Ferren, Executive Vice President for Creative Technology and Research & Development, Walt Disney Imagineering, delivers the SIGGRAPH 97 keynote address.

Immediately before the keynote, SIGGRAPH presents two awards:

- Przemyslaw Prusinkiewicz receives the 1997 Computer Graphics Achievement Award for his work pertaining to modeling and visualizing biological structures.
- James Foley receives the 1997 Steven A. Coons Award for Outstanding Creative Contributions for his strong and sustained leadership in computer graphics education and research, and for his dedication to the profession.

## Papers

Wednesday, 6 August | 10:15 am - noon | West Hall B

### VR Virtual Reality and Applications

CHAIR

**Frederick P. Brooks** University of North Carolina, Chapel Hill

- **Quantifying Immersion in Virtual Reality**  
**Randy Pausch, Dennis Proffitt, George Williams** University of Virginia
- **Moving Cows in Space: Exploiting Proprioception as a Framework for Virtual Environment Interaction**  
**Mark R. Mine, Frederick P. Brooks** University of North Carolina, Chapel Hill  
**Carlo H. Sequin** University of California, Berkeley
- **Virtual Voyage: Interactive Navigation in the Human Colon** CAL

**Shigeru Muraki** Electrotechnical Laboratory  
**Arie Kaufman** State University of New York at Stony Brook  
**Dirk Bartz** Universität of Erlangen-Nuremberg  
**Taosong He** Bell Laboratories, Lucent Technologies
- **Interactive Simulation of Fire in Virtual Building Environments**  
**Richard William Bukowski, Carlo Sequin** University of California, Berkeley

## Panel

Wednesday, 6 August | 10:15 am - noon | Petree Hall C

### Deconstructing Play: Theory and Practice

Play is more than make believe. It is a transformational activity that facilitates every individual's cognitive, affective, and social development. This panel of theorists and practitioners addresses important issues and opposing stances regarding aspects of play and human development, especially as they relate to design of computational toys that high-technology content providers might never think about.

ORGANIZER

**Bill Kolomyjec** Pixar

PANELISTS

**Justine Cassell** MIT Media Lab

**Yasmine B. Kafai** University of California, Los Angeles

**Mary Williamson** University of California, Berkeley

## Panel

Wednesday, 6 August | 10:15 am - noon | West Hall A

### Facial Animation: Past, Present, and Future

Not surprisingly, facial animation is now attracting more attention than ever before in its 25 years as an identifiable area of computer graphics. Imaginative applications of animated graphical faces are found in sophisticated human-computer interfaces, interactive games, multimedia titles, VR telepresence experiences, and, as always, in a broad variety of production animations. Graphics technologies underlying facial animation now run the gamut from keyframing to image morphing, video tracking, geometric and physical modeling, and behavioral animation. Supporting technologies include speech synthesis and artificial intelligence. Following a brief historical perspective, this panel assesses the state of the art and speculates about the exciting future directions of facial animation.

MODERATOR

## Panel

Wednesday, 6 August | 2 pm - 3:45 pm | West Hall B

## FIX Can We Get There From Here?: Current Challenges in Cloth Modeling, Design, and Animation CAL

Cloth and clothing have been part of the human experience for thousands of years. Why is the design of cloth and clothing not fully computerized? This panel looks at the state of the art in cloth and clothing modeling, design, and animation and explores the technical, economic, and marketing hurdles that prevent wider deployment of this technology. The panelists bring wide-ranging perspectives and experience from graphics research labs, an animation studio, an engineering lab, and the apparel CAD industry.

ORGANIZER

Michael Kass Pixar  
Nadia Magnenat Thalmann University of Geneva  
Maurizio Vecchione ModaCAD Inc.

## Panel

Wednesday, 6 August | 2 pm - 3:45 pm | Petree Hall C

## AD VR Narrative Environments: Virtual Reality as a Storytelling Medium CAL

Simply put, a VRML environment is a space that tells a story. In the world of matter, this art has been perfected by theme park designers, who have created some of the finest real narrative environments in the world. But in the virtual world, exploration of space as a narrative medium is just beginning. Current applications focus on three dimensions and ignore the fourth: time. This panel discusses the potential and challenges of using virtual reality to tell a story and features examples from designers and artists who have been putting these ideas into practice.

Victoria L. Interrante Institute for Computer Applications in Science and Engineering

## Panel

**online panel**

Wednesday, 6 August | 4 pm - 5:45 pm | West Hall B

## FIX Motion Capture and CG Character Animation CAL

Are classical animation techniques better suited to imparting life to computer-animated characters than performances captured from an actor or puppeteer via motion capture or digital input devices? The panel focuses on the application and value of the many forms of motion-capture technology in CG character animation: full-body motion capture systems, digital and stop-motion armatures, and other real-time physical input media.

ORGANIZER

Gordon Cameron Softimage, Inc.

PANELISTS

Andre Bustanoby Digital Domain

## Panel

Wednesday, 6 August | 4 pm - 5:45 pm | Petree Hall C

## AD The Differences Between Here and There: What Graphic Design Brings to E-Space CAL

In the fluid medium of e-space, the primary difference between Web sites, broadcasts, and other forms of communication is visual structure. What do the history and practice of graphic and information design have to offer to a medium created within the technical-scientific community? In this panel, designers discuss the process involved in creating interfaces and the need for a shared vocabulary and set of conventions for electronic spaces.

MODERATOR

**VR** Interfacing Reality: Exploring Emerging Trends Between Humans and Machines

The spontaneous growth of the World Wide Web over the past several years has resulted in a plethora of remote-controlled mechanical devices, all of them accessible from any networked computer in the world. This panel brings together a diverse collection of pioneers who are actively engaged in exploring future directions and implications of Internet-based robots and machinery – in essence, the newly emerging human-machine interface. The panel discusses current and future applications of such technology and several extremely relevant social issues, including: cultural impact, human acceptance, interaction, authenticity, responsibility, privacy, and security.

**API** What 3D API for Java Should I Use and Why?

The Java slogan ("Write once, run anywhere.") has attracted a great deal of attention. Today, 3D graphics professionals are wondering if the slogan can also apply to 3D graphics applications development. This panel brings together representatives from groups that are developing 3D APIs for Java and challenges them to compare and contrast their products' features, differences, performance, portability, and limitations.

**AD** Community/Content/Interface: Creative Online Journalism

The age of information has opened wide ideological doors on the Internet for online journalism. New topics, new forms, and revised (often updated) formats of traditional print media have sprung up around the world like digital weeds. The Web is determined by the cultural fabric of our moment – a product of the zeitgeist of the age of information. How does the technology of the Web determine the quality of online journalism?

**AD Medical Illustration & Visualization: Why Do We Use CG and Does It Really Make a Difference in Creating Meaningful Images?**

Creating effective illustration requires a clear grasp of the information to be conveyed as well as a visual strategy for making the message clear to the audience. As visualizers, medical illustrators may spend as much time gathering information as finding ways to make the message captivating to particular audiences. With access to high-end 3D animation technology and development tools for creating interactive and simulation products, medical illustrators can create a greater variety of visual solutions than they can with traditional art media. This roundtable discussion promotes critique and evaluation of how computer graphics has made a difference in presenting visual information.

**AD Sounding Off on Audio: The Future of Internet Sound** CAL

This panel addresses current breakthrough developments in music and sound for the Internet. Beginning with presentations from several Net audio pioneers, the session evolves into an active discussion between the panelists and the audience. Issues include: 3D sound on the net; levels of detail in Web audio; Avatars and their voices; the move toward an interactive audio specification; general music on the Web; and sound communities. Examples of the panelists' work will be presented on high-end audio systems. This rare opportunity to join the leading developers in defining and understanding the issues and effects of music and audio on the Internet is not a "how-to" session. It addresses: "What's up, what's next, and why?"

**Image-Based Rendering: Really New or Deja Vu?** CAL

Image-based rendering (IBR), techniques that generate new images from other images rather than geometric primitives, appeared to burst onto the computer graphics scene in the last few years. This panel of pioneering IBR researchers defines IBR and places this emerging technology in a continuum of developments, then speculates on the long-term impact of IBR on computer graphics by addressing issues such as: What is IBR good for? Will IBR replace polygons? What could IBR mean for graphics on the Internet? What are the implications of IBR for hardware design?

## Special Session

Friday, 8 August | 12:15 pm - 1:15 pm | West Hall B

### A Framework for Realistic Image Synthesis

Donald P. Greenberg, James Arvo, Eric LaFortune, Kenneth E. Torrance, James A. Ferwerda, Bruce Walter, Peter Shirley, Sumanta Pattanaik, Sing-Chong Foo  
Cornell University

The goal is to develop physically based lighting models and perceptually based rendering procedures for computer graphics that will produce synthetic images that are visually and measurably indistinguishable from real-world images. Fidelity of the physical simulation is of primary concern.

The proposed research framework subdivides the system into three sub-sections: the local light reflection model, the energy transport simulation, and the visual display algorithms. The first two subsections are physically based, and the last is perceptually based.

This group's objective is to help establish a more fundamental, scientific approach for future rendering algorithms.

### The Rhetoric of the Synthetic: Images of the Body in Technology, Business, and Culture

What is it that makes Barbie, the Terminator, and the cyborg icons of popular culture? How and why are we using these symbols to represent the human body as beautiful, invincible, and immortal? How does cyberpunk, which exists only as literature, become an actual subculture with its own fashion, language, and values? This panel explores the rhetoric of synthetic images as they appear in technology, business, and culture. The panelists discuss representations of the body in their respective professions as a way of understanding what may be happening to us in the emerging world of digital culture.

### VR Experiences with Virtual Reality Applications CAL

Research in virtual reality is turning the corner from being focused primarily on technology to focusing more and more on what can be done using VR – the content. This panel brings together developers of VR applications in a variety of fields, from education to manufacturing. Panelists discuss how they have applied VR to a specific task, including the choices made during development (visual display paradigms, methods of travel, representation techniques, and technical implementation) and assess the benefits of VR in specific projects.

**Sketches**

Early insights, intellectual adventures, and tentative results. Sketches are presented in four categories:

**TECHNICAL**  
Room 515A, Petree Hall C, Petree Hall D

Late-breaking results, fresh ideas, useful insights, and works in progress. Technical Sketches are lively, less formal gatherings that delve deeply into technical issues.

**APPLICATIONS**  
Room 515A

Computer graphics applied to real-world problems. Application areas include education, industry, government, and research labs.

**ART AND DESIGN**  
Room 515B

Graphic designs and artwork that utilize unique and interesting ideas. Art and Design Sketches provide a forum for creative exchange of ideas among artists.

**ANIMATION**  
Room 151/152

The latest animation techniques, tales of production, and tricks of the trade. Animation Sketches also provide an opportunity to discover how selected pieces from the Computer Animation Festival were created.

Following each Sketches presentation, attendees and presenters are invited to meet in the Sketches Breakout Rooms located in the Creative Applications Lab, West Hall A, for continued discussion.

SKETCHES  
ADMINISTRATIVE  
ASSISTANT

**Susan Wrights**  
University of Maryland  
Baltimore County

**TECHNICAL SKETCHES**

**FIX** SIMULATION AND NATURAL PHENOMENA

Wednesday, 6 August | 10:15 am to noon | Petree Hall D | Chair: Holly Rushmeier

**Visual Simulation of Waterfalls and Other Water Phenomena**

Ashley T. Howes, A.R. Forrest  
Computational Geometry Project  
University of East Anglia  
Norwich NR4 7TJ  
UNITED KINGDOM  
ah,forrest@sys.uea.ac.uk

A set of relatively simple rules for use in modeling falling water, using a three-dimensional particle system. The rules have been applied to waterfalls, fountains, and rain.

**Volumetric Modeling with Implicit Functions: A Cloud is Born** CAL

David S. Ebert  
University of Maryland  
Baltimore County  
1000 Hilltop Circle  
Baltimore, Maryland 21250 USA  
ebert@cs.umbc.edu  
<http://www.cs.umbc.edu/~ebert>

A new, flexible, natural, intuitive, volumetric modeling and animation technique that combines implicit functions with turbulence-based procedural techniques. A cloud is modeled to demonstrate its advantages.

**A Fast Algorithm for Illumination From Curved Reflectors**

Gustavo A. Patow  
LIFIA - UNLP - ARGENTINA  
La Plata  
Buenos Aires 1900 ARGENTINA  
dagush@sol.info.unlp.edu.ar

Indirect illumination of a surface from a curved mirror is computed by considering the reflector as another light source. The illumination values are computed using only fast scan-line techniques.

**A General Model for Simulation of Room Acoustics Based On Hierarchical Radiosity**

Nicolas Tsingos, Jean-Dominique Gascuel  
iMAGIS-GRAVIR/IMAG  
BP53, F-38041  
Grenoble, Cedex 09 FRANCE  
Nicolas.Tsingos@imag.fr  
Jean-Dominique.Gascuel@imag.fr

A new method to compute the impulse response of a given virtual room based on hierarchical radiosity. Unlike previous work, this approach treats complex geometries and is listening-position-independent.

**Radial Basis Function Interpolation Surface On Space Mesh**

Baocai Yin  
Beijing Polytechnic University  
Beijing 100022, China  
ybc@jdl.mcel.mot.com

Wen Gao  
Department of Computer Science  
Harbin Institute of Technology  
Harbin 150001, CHINA

An algorithm for constructing a smooth interpolation surface on space mesh. The algorithm is a generalization of a radial basis function interpolation surface defined on an approximation surface.

**Automatic Reconstruction of Complex 3D Models from a Set of Polylines**

Toshi Chang, Luis Canales,  
Tom Ledoux  
CogniSeis Development  
2401 Portsmouth  
Houston, Texas 77098 USA  
toshi@cogniseis.com

A rapid, precise, and efficient algorithm for computation of 3D models such as those used by the CAD, medical, and scientific visualization industries.

**Using CSG Representations of Polygons for Practical Point-in-Polygon Tests**

Robert Walker and Jack Snoeyink  
University of British Columbia  
2366 Main Mall  
Vancouver, British Columbia  
V6T 1Z4 CANADA  
walker@cs.ubc.ca

A CSG representation for polygons is used to perform point-in-polygon tests and is compared to existing methods. It is far less memory-intensive than the grid method and faster than basic methods.

**Varying Spring Constants for Accurate Simulation of Elastic Materials** CAL

Allen Van Gelder and  
Jane Wilhelms  
University of California  
Santa Cruz  
Santa Cruz, California 95064  
USA  
avg@cs.ucsc.edu  
wilhelms@cs.ucsc.edu

A formula for varying the spring constants in an irregular triangulated spring mesh so that it accurately simulates an elastic membrane. Two QuickTime movies present test results.

## ILLUMINATION AND TONE MAPPING

**Display of High-Contrast Images using Models of Visual Adaptation**

Jack Tumblin and Jessica Hodgins  
Georgia Institute of Technology  
ccsupjt@cc.gatech.edu

Brian Guenter  
Microsoft Research

Two techniques for display of high contrast images: layering scales three image layers independently, and foveal display for best display of a region indicated by the mouse.

**A Visibility Matching Tone Reproduction Operator for High Dynamic Range Scenes**

Gregory Ward Larson  
(the computer artist formerly known as Greg Ward)  
Silicon Graphics, Inc.  
2011 North Shoreline Boulevard  
M/S 07U-553  
Mountain View, California 94043  
USA  
gregl@sgi.com

Holly Rushmeier  
IBM TJ Watson Research  
Laboratory

Christine Piatko  
JHU/APL

A tone-reproduction operator that preserves visibility in high dynamic range scenes. The method incorporates models for human contrast sensitivity, glare, spatial acuity, and color sensitivity.

**Validating Global Illumination Algorithms and Software**

Karol Myszkowski  
University of Aizu  
k-myszk@u-aizu.ac.jp

Andrei Khodulev, Edward A. Kopylov  
Keldysh Institute of Applied  
Mathematics  
Russian Academy of Sciences

Photographic images of real-world environments were compared to synthetic images of those environments in order to evaluate the accuracy of our lighting simulation both qualitatively and quantitatively.

**Composite Lighting Simulations with Lighting Networks**

Philipp Slusallek, Marc Stamminger, Wolfgang Heidrich  
Jan-Christian Popp,  
Hans-Pieter Seidel  
Computer Graphics Group -  
IMMD IX  
University of Erlangen  
Am Weichselgarten 9  
91058 Erlangen, Germany  
slusallek@informatik.uni-erlangen.de

This extension to multi-pass global illumination algorithms allows flexible combination of the advantages of several algorithms by connecting them in the form of a dataflow graph.

**Live Web Stationery: Virtual Paper Aging**

Doree Duncan Seligmann, and  
Stephan Vladimir Bugaj  
Bell Laboratories of Lucent  
Technologies  
101 Crawfords Corner Road  
Holmdel, New Jersey 07733 USA  
doree@bell-labs.com  
bugaj@bell-labs.com  
<http://www.multimedia.bell-labs.com>

Visualization of a Web page's life on the net by automatically generating a background image of paper subjected to a hostile environment and human handling.

**An Improvement on Line Scan-Conversion**

Jim X. Chen  
George Mason University  
jchen@leibniz.cadsim2.gmu.edu

A scan-converted straight line may contain many pixel segments of identical shapes. Therefore, instead of scan-converting the whole line step by step, multiple segments of a line can be scan-converted through copying and replicating.

**LiveType: a Parametric Font Model Based on Features and Constraints** CAL

Ariel Shamir and Ari Rappoport  
The Hebrew University  
Jerusalem 91904, ISRAEL  
{arik,arir}@cs.huji.ac.il  
<http://www.cs.huji.ac.il>

A new font model based on features, parameters, and constraints. Glyphs are composed of typographic features including constraints defined between geometric elements. Parameter modifications lead to real-time constraint evaluation.

## IMAGING

**Texture Maps from Orthographic Video**

Brian Jones  
Georgia Institute of Technology  
GCATT Building, Suite M14  
250 14th Street NW  
Atlanta, Georgia 30332-0130  
USA  
brian.jones@oip.gatech.edu

An attempt to enhance virtual spaces by providing a method for producing photographic-like texture maps from captured video.

**Disparity Morphing for Automatic Generation of Stereo Panoramas for Image-Based VR**

Ho-Chao Huang, Yi-Ping Hung  
Academia Sinica  
Taipei, Taiwan, ROC  
jet@iis.sinica.edu.tw  
hung@iis.sinica.edu.tw

High-quality stereo panoramas are difficult to achieve. This sketch describes a disparity morphing technique to correct the image disparities of adjacent images and produce high-quality stereo panoramas.

**Interactive Contour Modeling Applied to Image Querying**

Zhibin Lei, David B. Cooper  
Brown University  
Providence, Rhode Island 02912  
USA  
zbl@lems.brown.edu

An interactive contour modeling technique using implicit polynomial representations, and its application to content-based image querying.

**Curvelet Feature Extraction and Matching for Image Retrieval**

Zhibin Lei  
Brown University  
Providence, Rhode Island 02912  
USA  
zbl@lems.brown.edu

Yin Chan  
Princeton University  
Princeton, New Jersey 08540  
USA

A prototype image-query-by-sketch system that automatically extracts prominent geometric shape structures from images and uses them to compute the similarity values between images.

**Visual Behavior Programming with Automatic Script Code Generation**

Shigeo Nakagawa  
Hirofumi Ishida  
NEC Corporation  
4-1-1 Miyazaki Miyamae-ku  
Kawasaki 216 JAPAN  
naka@mmp.cl.nec.co.jp  
ishida@mmp.cl.nec.co.jp

A VRML2.0 content authoring tool with an intuitive visual behavior programming interface.

**Making Them Behave**

John Funge and Xiaoyuan Tu  
University of Toronto  
10 King's College Road  
Toronto, Ontario M5S 3G4  
CANADA  
{fung, tu}@cs.toronto.edu  
<http://www.cs.toronto.edu/~fung>

A logic representation to simplify specifying high-level behaviors for animated characters, including a character design workbench with examples of "merpeople" engaged in pursuit and evasion behaviors.

**Learning Fast Neural Network Emulators for Physics-Based Models**

Radek Grzeszczuk, Demetri Terzopoulos, Geoffrey Hinton  
University of Toronto  
radek@vis.toronto.edu

Generation of physically realistic animation using trained neural networks that can emulate non-trivial physics-based models one or two orders of magnitude faster than conventional numerical simulation.

**Combining Active and Passive Simulations for Secondary Motion**

Jessica K. Hodgins, James F. O'Brien, Victor B. Zordan  
Georgia Institute of Technology  
jkh@cc.gatech.edu

Secondary motion is generated by coupling active and passive simulations, and demonstrated with animations of jumping on a trampoline, vaulting onto a mat, and swinging while wearing a skirt.

**Rendering with Paintstrokes**

Ivan Neulander  
University of Toronto  
ivan@dgp.utoronto.ca  
<http://www.dgp.utoronto.ca/people/ivan/ivan.html>

A rendering meta-primitive based on the generalized cylinder and an algorithm that dynamically tessellates it into optimal arrangements of polygons relative to the viewer's position and orientation.

**Motion Tracking for Special Effects in the Film Industry** CAL

Maria Lando  
BOSS Film Studios  
13335 Maxella Avenue  
Marina Del Rey, California  
90292 USA  
maria@boss.com

Application of computer vision algorithms (particularly motion tracking) in the film industry, including an advantageous architecture for a 2D/3D tracking module and optimal motion recovery algorithms.

**Textured Rulers and Arcs**

Chris Shaw  
University of Regina  
3737 Wascana Parkway  
Regina, Saskatchewan, S4S 0A2  
CANADA  
cdshaw@cs.uregina.ca  
<http://www.cs.uregina.ca/~cdshaw>

Texture maps representing linear and arc measurement scales provide a visually accessible set of measurements without adding scene clutter or auxiliary measurement widgets.

**Texturing Implicit Surfaces with Particle Systems**

Ruben Zonenschein, Jonas Gomes, Luiz Velho  
IMPA  
110 - Jardim Botânico  
Rio de Janeiro, BRAZIL  
ruben@visgraf.impa.br

Luiz Henrique de Figueiredo  
Laboratório Nacional de Computação Científica

An intuitive yet effective method to apply bidimensional texture onto implicit surfaces. Unlike other methods, this approach includes effective tools for controlling the placement of the applied texture.

**Fast Polygonal Simplification with Vertex-Cluster Trees**

Joshua D. Mittleman, Jai Menon  
IBM TJ Watson Research Center  
Yorktown Heights, New York  
10598 USA  
{mittle, menon}@watson.ibm.com

A new data structure and algorithm for fast computation of static levels of detail, using vertex clustering and allowing adaptive simplification based on various geometric and topological criteria.

**Model Simplification Using Directional Clustering**

Dana Marshall, A.T. Campbell, III, and Donald S. Fussell  
The University of Texas at Austin  
Austin, Texas 78712 USA  
dane@cs.utexas.edu

Enhancement of model simplification with a non-topographic metric and a directional clustering algorithm that uses both geometry compression and real-time, animation-dependent calculation.

**A Wavelet-Based Multiresolution Polyhedral Object Representation**

Mike M. Chow, Marek Teichmann  
Massachusetts Institute of Technology  
{mchow, marekt}@graphics.lcs.mit.edu  
<http://graphics.lcs.mit.edu/~mchow>

Wavelet compression of a volumetric representation of polyhedral surfaces, which are represented by the zero set of a distance function.

**Intelligent Transmission of 3D Polygonal Models** CAL

Peter Brown  
University of Cambridge  
Cambridge CB2 3QG  
UNITED KINGDOM  
Peter.Brown@cl.cam.ac.uk  
<http://www.cl.cam.ac.uk/users/pjcb2/>

A framework offering improved Level of Detail handling in VRML. Models are decomposed into fragments, which are transmitted and rendered as required to meet user-specified resolution requirements.

**Delivering High Quality 3D to Every Desk**

Rick Humphrey  
Fujitsu Microelectronics, Inc.  
3545 North First Street  
San Jose, California 95134 USA  
rhumphre@fmi.fujitsu.com

Agha Ahsan  
MultiDimensional Consulting, Inc.

The Talisman 3D graphics architecture was designed for scalability. This sketch describes integration of Talisman into a cost-effective ASIC for high-volume Windows PC applications in 1998.

**Practical SIMD**

William Bryant  
Engineering Manager,  
New-Media Software  
Sun Microsystems, Inc.  
2550 Garcia Avenue,  
MSSUN02-104  
Mountain View, California  
94043-1100 USA  
william.bryant@eng.sun.com

Multimedia instruction sets using SIMD technology enable significant multimedia performance improvements. A low-level library like mediaLib offers easier use and accessibility to new media developers.

**The Haptic Lens** CAL

Michael Sinclair  
Georgia Institute of Technology  
250 14th Street NW  
Atlanta, Georgia 30332-0130  
USA  
michael.sinclair@oip.gatech.edu

3D sensor and supporting software that enables real-time visualization of the haptic sense of pressure. Applications include palpation, robotics, and a novel 3D input device.

**A Low-Cost Digital Panoramic Camera** CAL

Michael Sinclair  
Georgia Institute of Technology  
250 14th Street NW  
Atlanta, Georgia 30332-0130  
USA  
michael.sinclair@oip.gatech.edu

A method to convert a commercially available digital hand scanner to a digital panoramic camera. High-quality 360-degree images are produced for use in presentations like QuickTime VR.

**VR** 3D UIs AND VE**3D Digitizing Made Easier by Unstructured Sketching**

Song Han and Gerard Medioni  
Integrated Media Systems Center  
and Institute for Robotics and  
Intelligent Systems  
University of Southern California  
Los Angeles, California 90089  
USA  
han@seer.usc.edu

The user sketches a few strokes and sees a 3D "clay" prototype. When the user adds more random strokes, the prototype surface automatically adapts to follow the pen, and the crease and corner features are automatically detected and aligned.

**Feature Based Haptic Rendering: Architecture, Protocol, and Application**

Juli Yamashita, Cai Yi, Yukio Fukui  
National Institute of Bioscience  
and Human Technology  
1-1, Higashi  
Tsukuba, Ibaraki, 305 JAPAN  
juli@nibh.go.jp  
fukui@nibh.go.jp  
ycai@nibh.go.jp

Since haptic rendering requires very high control rate (~kHz), it must be separated from graphic rendering and modeling processes. Feature based haptic rendering is a new, general protocol for data exchanging between such decoupled processes.

**A Model for Managing Level of Detail with Head-Trackled Peripheral Degradation**

Benjamin Watson, Larry Hodges,  
Neff Walker  
Georgia Institute of Technology  
801 Atlantic Drive  
Atlanta, Georgia 30332-0280  
USA  
watsonb@cc.gatech.edu  
neff.walker@psych.gatech.edu  
larry@cc.gatech.edu

A psychophysically based model for reducing peripheral detail with head-tracking. The model indicates that central detail of 30 horizontal and vertical degrees is adequate. This sketch presents experimental confirmation.

**Virtual Backdrops**

Daniel G. Aliaga, Anselmo A. Lastra  
Computer Science Department  
University of North Carolina at  
Chapel Hill  
Chapel Hill, North Carolina  
27599-3175  
aliaga@cs.unc.edu

Simplification of architectural, CAD, and other indoor models by dynamically inserting textures into the model. This approach eliminates many of the geometric and temporal discontinuities present in texture-based simplification.

Friday, 8 August | 1:30 pm to 3:15 pm | Petree Hall D | Chair: F. Kenton Musgrave

**Linear Colour Contouring for Fine Art Printmaking**

Peter Lee  
15 Mayhill Road, Charlton  
London SE7 7JG  
UNITED KINGDOM  
george@camwell.demon.co.uk

A method to facilitate creation of colour-contoured depictions of 3D-modeled compositions and their subsequent transfer to traditional fine art print media.

**Integrating Digital Media and Autographic Fine Art Printmaking**

Raz Barfield  
28 Monkridge  
Crouch End Hill  
London N8 8DE  
UNITED KINGDOM  
george@camwell.demon.co.uk

A method for traditional printmakers to combat inexpensive output media and maintain a sense of creative freedom up to the moment of printing, with a more formally satisfying end result.

**Microscopic Structural Modeling of Colored Pencil Drawings**

Saeko Takagi, Issei Fujishiro  
Ochanomizu University  
Bunkyo-ku  
Tokyo, JAPAN  
{takagi,fuji}@imv.is.ocha.ac.jp

In order to realize a next-generation digital painting system, the functionality of colored pencil drawings, 3D microscopic structures of superficial layers of drawing papers, and pigment distribution are modeled.

**Rendering With Streamlines**

Richard Coutts  
Donald P. Greenberg  
580 Rhodes Hall  
Cornell University  
Ithaca, New York 14852 USA  
rcoutts@graphics.cornell.edu

In this technique for generating pen-and-ink drawings, vector field streamlines are used to approximate the hatch marks of traditional artists. The streamlines are calculated by a new one-pass algorithm.

CAL: CREATIONS FROM AND LESSONS LEARNED IN THE CREATIVE APPLICATIONS LAB

Friday, 8 August | 1:30 pm to 3:15 pm | Room 515A | Chair: Steve Anderson

DISPLAY TOOLS

Friday, 8 August | 3:30 pm to 5:15 pm | Petree Hall D | Chair: Larry Gritz

**Genetic Shaders: Interactive and Automatic Shader Generation**

Aladin M. Ibrahim and  
Donald H. House  
Texas A&M University  
College Station, Texas 77843  
USA  
aladin@viz.tamu.edu  
house@viz.tamu.edu

A system that generates procedural textures or shaders using genetic algorithm techniques. The system operates in both artist-directed or automatic texture matching modes.

**Sampling Procedural Shaders Using Affine Arithmetic**

Wolfgang Heidrich, Philipp  
Slusallek, Hans-Peter Seidel  
University of Erlangen  
Am Weichselgarten 9  
91058 Erlangen, Germany  
heidrich@informatik.uni-  
erlangen.de

By evaluating procedural shaders with affine arithmetic instead of normal floating-point arithmetic, it is possible to obtain tight, conservative error bounds for area samples of the shader.

**InvenTcl: Making Open Inventor Interpretive with Tcl/[incr Tcl]**

Sidney Fels, Silvio Esser, Armin  
Bruderlin, Kenji Mase  
ATR Media Integration &  
Communication  
Seika-cho Soraku-gun  
Kyoto 619-02, JAPAN  
fels@mic.atr.co.jp

An interpretive implementation of Open Inventor using Tcl/Tk that provides interpretive access to Open Inventor for object creation, object interaction, and animation.

**The Contour Spectrum**

Chandrajit L. Bajaj, Valerio  
Pascucci, and Daniel R. Schikore  
1398 Computer Sciences Building  
Purdue University  
West Lafayette, Indiana 47906  
USA  
{bajaj,pascucci,schikore}@  
cs.purdue.edu

A new user interface component for scientific visualization: a signature consisting of a variety of scalar data and contour attributes, presented to the user as 1D/2D plots for static/time-varying data.

## APPLICATIONS SKETCHES

### BD VISUALIZATION

Thursday, 7 August | 8:15 am to 10 am | Room 515A | Chair: Lloyd Trenish

#### Computer-Generated Physical Models for Scientific and Engineering Visualization:

##### VR - V = R

Michael J. Bailey and Dru Clark  
University of California at San Diego and San Diego Supercomputer Center  
P.O. Box 85608  
San Diego, California 92186 USA  
mjb@sdsc.edu  
dru@sdsc.edu  
<http://www.sdsc.edu/tmf>

A project that uses physical model making as an everyday aspect of scientific and engineering visualization. The equipment is interfaced to the Internet to make it easier to access remotely.

#### Hardware-Assisted Volume Rendering for Oil and Gas Exploration

Alan Y. Commike and Scott Senften  
Silicon Graphics, Inc.  
11490 Westheimer, Suite 100  
Houston, Texas 77077 USA  
{senften,commike}@sgi.com

Using 3D textures to both volume render a survey and map survey data onto embedded surfaces: a natural progression from massively parallel software volume renderers.

#### WormPlots

Geoffrey Matthews  
Western Washington University  
Bellingham, Washington 98225 USA  
matthews@cs.wvu.edu

Mike Roze  
Applied Software Technology, Inc.  
25 Central Way, STE 333  
Kirkland, Washington 98003 USA  
roze@astnet.com

A technique for visualizing multivariate time series. Time slices are summarized by group into polygons and the slices connected over time to make worm-like spacetime projections.

#### A Visualization of Music

Sean M. Smith  
Glen N. Williams  
Texas A&M University  
College Station, Texas 77843 USA  
seans@stlnet.com  
williams@cs.tamu.edu

The most popular method of visualizing music is music notation. However, most listeners are unfamiliar or uncomfortable with the complex nature of music notation. The goal of this project is to present an alternate method of visualizing music.

### VR VIRTUAL ENVIRONMENTS

Thursday, 7 August | 10:15 am to noon | Room 515A | Chair: Chuck Hansen

#### The Mirror: Reflections on Inhabited TV

Graham Walker  
BT Laboratories  
Admin 2/op6b, BT Laboratories  
Martlesham Heath, Ipswich  
IP5 7RE UNITED KINGDOM  
graham.walker@bt-sys.bt.co.uk

Rodger Lea  
Sony Distributed Systems Lab  
Suite 1140 Regency Plaza  
2350 Mission College Boulevard  
Santa Clara, California 95054 USA  
rodger@csl.sony.co.jp

The Mirror was a ground-breaking collaborative experiment in Inhabited TV. Six shared online VRML2.0 worlds were available to over 2,000 viewers of the BBC2 series "The Net" in early 1997.

#### Peloton: A VRML-Based Bicycling Simulator

J. Robert Ensor  
Gianpaolo U. Carraro  
Bell Laboratories  
101 Crawfords Corner Road  
Holmdel, New Jersey 07733 USA  
jre@dnrc.bell-labs.com  
paolo@dnrc.bell-labs.com

A simulator, suitable for athletic competition, that creates virtual environments for bicycle rides. It is an experiment to discover ways to build virtual reality systems on the Web.

#### The Electric Body Project

Thecla Schiphorst  
Sang Mah  
Credo Multimedia Software Inc.  
1128 Rose Street  
Vancouver, British Columbia  
V5L 4K8 CANADA  
thecla@cs.sfu.ca  
sang@cs.sfu.ca

A software tool for creating choreography using gestural sampling and mapping techniques. Movement is sampled using Ascension Technologies Flock of Birds and then metaphorically treated with user-defined filters and maps. This project has been sponsored by the Media Arts Section of the Canada Council.

**Visualization of the Best Approximation**

Li Chao  
University of Houston Victoria  
2506 East Red River  
Victoria, Texas 77901 USA  
chaol@cobalt.vic.uh.edu

A computer graphics project that visualizes the best approximation process in a linear algebra class. Given a subspace spanned by vectors  $U$  and  $V$ , a mouse or slider is used to search the projection of a vector  $W$  onto the subspace.

**RenderComp: The New Video Editing Workflow Paradigm for Digital Video Publishing**

Marcus Julian  
Vibrint Technologies  
23 Crosby Drive  
Bedford, Massachusetts 01730  
mfj@vibrint.com

RenderComp is an application that allows image rendering and MPEG compression to occur as a single real-time process, providing superior quality titles when compared to video constructed and compressed in separate systems.

**Text-Driven Deaf-Mute Sign Language Synthesis System**

Yibo Song, Wen Gao, Baocai Yin, Ying Liu, Lin Xu, Jie Yan, Haito Chen, and Jian Zhou  
Harbin Institute of Technology  
Harbin 150001, CHINA  
syb@vilab.hit.edu.cn  
wgao@jdl.mcel.mot.com  
ybc@jdl.mcel.mot.com

A text-driven sign language synthesis system that improves the kinetic control model of a 3D human hand and arm, a 3D human body geometric model, and experiment results.

**ART APPLICATIONS****Virtual Arts Therapies**

Rebecca Mercuri  
Ranjit Bhatnagar  
University of Pennsylvania  
P.O. Box 1166 - CSMT  
Philadelphia, Pennsylvania 19105  
USA  
mercuri@acm.org

A combination of traditional arts therapy techniques with computer technology to alleviate symptoms, enhance creativity, induce relaxation, and promote client well-being.

**Working within the Grid: Interactive Foundations Design Problems Using Grid Structures**

Patricia Nelson  
Barbara Giorgio-Booher  
Ball State University  
Muncie, Indiana 47306 USA  
pnelson@wp.bsu.edu  
bgiorgio@wp.bsu.edu

Loren Mork  
Cool Software Inc.  
355 NW 200th  
Seattle, Washington 98177 USA  
lmork@aol.com

Using short interactive programs authored in Director to explore visible and invisible grids.

**WordNozzle: Painting With Words**

Jason Lewis  
Interval Research Corporation  
1801c Page Mill Road  
Palo Alto, California 94103 USA  
lewis@interval.com

An experiment in "painting" with text that enables the user to select any text-only file as input to the "nozzle" and spray words in a continuous stream while controlling the font, size, style, and color of the text.

**Visualizing the Midway Face of the Dixie National Forest**

Donald House, Scott Arvin, and Greg Schmidt  
Visualization Lab  
Texas A&M University  
College Station, Texas 77843  
USA  
gschmidt@cs.tamu.edu  
<http://www-viz.tamu.edu/students/greg/greg.html>

Midori Kitagawa DeLeon  
The Ohio State University

The process used to create a highly realistic animated walk-through of an existing forest.

**ART AND DESIGN SKETCHES**

**AD** ARTIST SESSION 1 -  
ONGOINGS: THE SIGGRAPH 97 FINE ARTS GALLERY

Wednesday, 6 August | 10:15 am to noon | Room 515B

Chair: Jeremy Gardiner

**John S. Banks**  
Rising Star Ltd.

**Anna M. Chupa**  
Mississippi State University

**Diane Fenster**

**Chris S. Johnson**  
Northern Arizona University

**Michael O'Rourke**  
Pratt Institute

**Anna Ullrich**

**AD** ARTIST SESSION 2 -  
ONGOINGS: THE SIGGRAPH 97 FINE ARTS GALLERY

Wednesday, 6 August | 2 pm to 3:45 pm | Room 515B

Chair: Roger Malina, Leonardo

**Sheriann Ki-Sun Burnham**

**Phillip George**

**Madge Gleeson**  
Western Washington University

**Ken Gonzales-Day**

**Jean-Pierre Hibert**

**Tammy Knipp**  
Florida Atlantic University

**Roman Verostko**

**AD VR** MOVING: AGENCY FOR VIRTUAL SPACES

Wednesday, 6 August | 4 pm to 5:45 pm | Room 515B | Chair: Thecla Shiphorst

**Using Video to Create Avatars in Virtual Reality**

Joseph A. Insley, Daniel J. Sandin, and Thomas A. DeFanti  
University of Illinois at Chicago  
851 South Morgan Street, 1120  
Chicago, Illinois USA 60607 USA  
uinsley@evl.uic.edu

A collection of functions that can be used to add static, photo-realistic, three-dimensional representations of remote users, as well as other objects or agents, to virtual reality applications. The process involves obtaining views from 360 degrees around the person, then selecting two of these images, one for each eye, to represent the user in 3D space.

**Dream Grrrls: Metaphors**

Margaret Dolinsky, Grit Sehmisch  
Electronic Visualization Laboratory  
University of Illinois at Chicago  
851 South Morgan Street, 1120  
Chicago, Illinois USA 60607 USA  
dolinsky@evl.uic.edu

A virtual environment created in the CAVE that focuses on the immersive nature of dreams, Dream Grrrls allows users to experience their world in a new and dynamic way, much like an active or lucid dream.

**CyberHuman Dance Series: An Articulation of Body, Space, and Motion in Performance**

Katie Salen and Yacov Sharir  
University of Texas at Austin  
Austin, Texas 78712 USA  
zed@mail.utexas.edu

An experimental dance work exploring: simulations of physical and virtual phenomena in the context of performance, metaphors of virtual spaces and bodies, and exchange and modification of narrative identities.

**Disability in the Arts**

Jon Berge  
The Ohio State University  
753 Oak Street  
Columbus, Ohio 43205 USA  
jberge@cgrg.ohi-state.edu

Educating and encouraging people – regardless of prior experience, physical limitations, age, or ethnicity – to examine the relevance of art and accessibility in their own lives.

**AD** SITTING: THE SEAT FOR VIRTUAL TRAVEL

Thursday, 7 August | 10:15 am to noon | Room 515B | Chair: Diane Gromala

**Multimedia Metamorphosis (or making the medium shoe fit)**

M.R.Petit  
104 Suffolk Street  
New York, New York 10002 USA  
http://www.weirdos.com  
http://www.echonyc.com/~mrp  
http://www.somewhere.org  
petit@echonyc.com

A large portion of the author's work has entailed taking a theme or story and giving it life in a variety of media. This sketch examines the implications of traversing media (performance, CD-ROM, Web sites).

**Technophobia** **CAL**

Dooley Le Cappellaine  
284 Mott Street #9K  
New York, New York 10012 USA  
dooley@thing.net  
http://www.thing.net/dooley

An interactive exhibition of original multimedia art. In addition to the original multimedia artwork, the CD also provides access to studio visits with the artists.

**izzy bombus and the story of flight** **CAL**

Sandy Lowrance  
Art Department  
Campus Box 526715  
The University of Memphis  
Memphis, Tennessee 38152 USA  
sllowrnc@memphis.edu

A prototype CD-ROM consisting of an animated story with associated games and educational activities for children ages four through seven.

**An American Gothic ... or a Pound of Prevention**

Elliott Peter Earls  
The Apollo Program  
82 East Elm Street  
Greenwich, Connecticut 06830 USA  
elliott@theapolloprogram.com

Music, poetry, images, and QuickTime movies in two dual-format CD-ROMs.

**Design Speech Acts: "How to do things with words" in Virtual Communities** CAL

Anna Cicognani  
University of Sydney  
New South Wales 2006  
AUSTRALIA  
anna@arch.usyd.edu.au  
<http://www.arch.usyd.edu.au/~anna>

A first model for structuring and defining speech acts for design, so that a meta-language for design can be subsequently developed.

**Agree to Disagree Online** CAL

Janet Cohen, Keith Frank, Jon Ippolito  
345 Greenwich Street, #5A  
New York, New York 10013 USA  
cohen@interport.net  
<http://www.interport.net/~gering>

A series of arguments, beginning with the inflammatory statement: "In the future, books will be replaced by maps," in both time and space.

**Gradus: Revealing the Shape of the English Language**

Matt Grenby  
MIT Media Lab  
20 Ames Street  
Cambridge, Massachusetts 02139 USA  
grenby@media.mit.edu

In this visual representation of the English language, dictionary headwords are plotted along three dimensions: alphabetic, time, familiarity. The emergent shape offers insight into the nature of the language.

**Computer Graphics as Stainless Steel Output**

Ronald Carraher  
University of Washington  
Seattle Washington 98195-3440 USA  
rgc@u.washington.edu

Computer graphics that incorporate typography for output on stainless steel using chemical machining. Examples illustrate resolution, fenestrations, surface qualities, scale considerations, and conceptual possibilities.

**Hand Held Tools for Navigating Information**

David Small  
MIT Media Lab  
20 Ames Street  
Cambridge, Massachusetts 02139 USA  
dsmall@media.mit.edu

Two mechanical interfaces (one concrete, one highly abstract) control computer graphics, not simply to produce a pretty picture, but to forge a deeper understanding of the subject matter.

**Dynamic3: Interactive Physics and Physicality In Three Dimensions**

Reed Kram and John Maeda  
MIT Media Lab  
20 Ames Street  
Cambridge, Massachusetts 02139 USA  
kram@media.mit.edu

In this study, two physical cubes control a malleable hierarchical data structure. By using interactive particle physics, objects react in ways that correspond to our existing assumptions about our physical world.

**A Zooming Sketchpad, a Multiscale Narrative: Pad++, PadDraw, Gray Matters** CAL

Noah Wardrip-Fruin, Jon Meyer, Ken Perlin  
New York University  
719 Broadway, 12th Floor  
New York, New York 10003 USA  
noah@cat.nyu.edu

Ben Bederson, Jim Hollan  
University of New Mexico

Pad++ is a substrate for zooming applications. PadDraw is a zoomable sketchpad. Gray Matters is a collaborative multiscale visual hyperfiction.

**Multimedia Interactive Artist's Archive and Retrospective** CAL

Josepha Haveman  
A/PIX computer art center  
P.O. Box 9053  
Berkeley California 94708 USA  
JosephaH@aol.com  
[http://www.illuminated.com/JH\\_ArtArchive/](http://www.illuminated.com/JH_ArtArchive/)

A portfolio and a form of catalog: an artist-produced CD-ROM, arranged by media category and presented in dynamic formats. Hyperlinks connect with animations, texts, etc.

**Genderbender, Smartstall, The Automatic Confession Machine**

Gregory Patrick Garvey  
Concordia University  
1455 de Maisonneuve Boulevard West  
Montréal, Québec H3GA 1M8 CANADA  
ggarvey@vax2.concordia.ca

A review of three works: *Genderbender, Smart Stall* (exhibited in The Bridge: SIGGRAPH 96 Art Show), and *The Automatic Confession Machine* (exhibited in Machine Culture, SIGGRAPH 93).

**'The Virtual Harvester Project** CAL

Johann van der Schijff  
MEDIA-GN  
Hoendiepskade 23 A  
9718 BG Groningen  
THE NETHERLANDS  
schijff@scan.media-gn.nl  
<http://www.media-gn.nl/people/johannvdS/index.html>

An attempt to address the need for global commitment and action to fight one of human society's most basic problems: food insecurity.

**Making Caricatures with Morphing** CAL

Ergun Akleman  
Texas A&M University  
College Station, Texas 77843 USA  
ergun@viz.tamu.edu  
<http://www-viz.tamu.edu/faculty/ergun/artworks/artworks.html>

When using an interactive morphing tool, there is no need for the special talent of a caricaturist. This sketch introduces a new procedure for using morphing to make caricatures from photographs.

## ANIMATION SKETCHES

**FIX** FULL BODY ANIMATION

Wednesday, 6 August | 2 pm to 3:45 pm | Room 151/152 | Chair: David Novak

### Performance Capture and Character Animation

André Bustanoby  
Digital Domain  
300 Rose Avenue  
Venice, California 90291  
apb@d2.com

Using performance capture techniques and cutting-edge computer graphics to bring the performance art of Michael Jackson and Andre Agassi into the realm of digital characters.

### Motion Capture and Puppetry

Emre Yilmaz  
Protozoa, Inc.  
2727 Mariposa Street  
Studio 100  
San Francisco, California 94110  
USA  
emre@protozoa.com

It is possible to do a wider range of work with motion capture than is generally recognized, by using it more like puppetry and less like acting.

### Ubiquitous Animation: An Element-Based Concept to Make 3D Animations Commonplace **CAL**

Ralf Dörner, Volker Luckas, Ulrike Spierling  
Fraunhofer Institute for Computer Graphics  
Rundeturmstrasse 6  
D-64283 Darmstadt  
GERMANY  
{doerner,luckas,ulisp}@igd.fhg.de  
<http://www.igd.fhg.de>

First results of, and examples made in an industrial context with, CASUS Base, a universal animation elements library that allows everyone to create animations for everything.

### Isaacks: From Life Forms Choreography to Animation **CAL**

Jimmy Gamonet de Los Heros  
The Miami City Ballet Company

Sang Mah  
Credo Interactive, Inc.  
sang@cs.sfu.ca

Performance animation in a different mode: a three-minute animation with 18 dancers choreographed with virtual performers.

**FIX** VISUAL STYLES

Wednesday, 6 August | 4 pm to 5:45 pm | Room 151/152 | Chair: Jonathan Luskin

### The Tapir: Combining Myth and Contemporary Musical Structures to Create a Personal Perspective with 3D Computer Animation

Raquel Coelho  
Blue Sky Studios  
One South Road  
Harrison, New York 10528 USA  
raquel@ns.blueskystudios.com

How 3D computer animation can expand the idea of storytelling: using the 3D environment and computer-generated images to embody a personal vision.

### "Hercules:" The 30-Headed Hydra

Roger L. Gould  
Walt Disney Feature Animation  
2100 Riverside Drive  
Burbank, California 91521 USA  
rogerg@fa.disney.com

For Disney's "Hercules," a team of artists and technical directors collaborated to animate a 30-headed Hydra, the first computer-animated character ever to co-star in a traditionally animated film.

### Turner Classic Movies: "Hopper"

Tom McClure, Jeffery Roth, Colin Miller, Ingrid Overgard, Jance Allen, Jana Canellos  
Colossal Pictures  
2800 Third Street  
San Francisco, California 94107  
USA  
jeffrey@colossal.com

A literal example of animated art: digitally manipulated traditional animation combined with 3D environments brings Edward Hopper's art to life.

### Up...Down...Up

Betsy de Fries, Jerry van de Beek  
Little Fluffy Clouds  
Pier 29 Annex  
San Francisco, California 94111  
USA  
betsy@littlefluffyclouds.com

A 30-second animation that seamlessly combines traditional cel animation with new and unique techniques in 3D digital animation, creating an elegant black-and-white, two-dimensional, woodcut look.

**Dynamically Simulated Characters in Virtual Environments**

David C. Brogan, Ronald A. Metoyer, Jessica K. Hodgins  
Georgia Institute of Technology  
Atlanta, Georgia 30332 USA  
jkh@cc.gatech.edu

Two virtual environments populated by dynamically simulated characters: an interactive game with one-legged robots and a model of the 1996 Atlanta Road Race Course with virtual bicyclists.

**Transitions Between Dynamically Simulated Motions: Leaping, Tumbling, Landing, and Balancing**

Wayne L. Wooten  
Jessica K. Hodgins  
Georgia Institute of Technology  
Atlanta, Georgia 30332 USA  
wlw@cc.gatech.edu

Transitions between parameterized control systems for leaping, tumbling, landing, and balancing produce a diverse set of behaviors for dynamically simulated male and female characters.

**Animating Quadrupeds with Footprints**

Nick Torkos, Michiel van de Panne  
University of Toronto  
torkos@dgp.toronto.edu  
<http://www.dgp.utoronto.ca/people/torkos>

A system for generating animations of quadrupeds from sets of footprints. The animation is built in stages by combining trajectory optimization, inverse kinematics, and passive dynamics.

**General Motors EV-1: "Appliances"**

Alex Seiden  
Industrial Light & Magic  
P.O. Box 2459  
San Rafael, California 94912 USA

How would a toaster walk, if it could? A vacuum cleaner? Character design issues like these were critical in the development of a commercial for the first car in history designed from the ground up as a mass-production electric vehicle.

**"The Relic"**

John (DJ) Desjardin  
VIFX  
5333 McConnell Avenue  
Los Angeles, California 90066 USA

Computer graphics solutions were essential for getting a rampaging performance from a fantastic creature – for the heavy action shots such as a fiery monster chasing the heroine as well as detailed elements like the monster's six-foot tongue, which lovingly licks the heroine.

**"Dante's Peak"**

David Isyomin  
Digital Domain  
300 Rose Avenue  
Venice, California 90291 USA  
david@d2.com

Beginning with a series of digital matte paintings of the volcano, this project proceeded to creation of digital CG lava composited into various locations and terrain, even inside a mountain cabin.

**"101 Dalmations"**

Daniel Jeanette, Doug Smythe  
Industrial Light & Magic  
P.O. Box 2459  
San Rafael, California 94912 USA

The breakthroughs achieved in Disney's "101 Dalmations": creation of up to 90 believable CG stunt-doubles for man's best friend.

**Passive 3D Human Motion Capture**

Ioannis A. Kakadiaris  
Dimitris Metaxas  
GRASP Lab and Center for Modeling and Simulation  
University of Pennsylvania  
Philadelphia, Pennsylvania 19104 USA  
ioannisk@grip.cis.upenn.edu

Computer vision and computer graphics formulations and techniques for three-dimensional, model-based motion capture and animation of unconstrained human movement from multiple cameras.

**Visual Tracking and Pose Recovery for Special Effects**

Michael Isard, Andrew Blake  
University of Oxford  
Parks Road  
Oxford OX1 3PJ  
UNITED KINGDOM  
misard@robots.ox.ac.uk

Using computer vision-based tracking to separate a complex moving object from unknown background clutter and recover object pose, allowing computer graphics to be superimposed on the object.

**Lip Synchronization for Animation**

David F. McAllister, Robert D. Rodman, Donald L. Bitzer, Andrew S. Freeman  
Box 8206  
North Carolina State University  
Raleigh, North Carolina 27695-8206 USA  
dfm@adm.csc.ncsu.edu

Research into lip synchronization of speech that has not been preprocessed into phonetic units. Computers can achieve this without the necessity of speech recognition or electromechanical devices attached to the jaw.

**Layered Compositing of Facial Expression**

Ken Perlin  
Media Research Laboratory  
New York University  
719 Broadway, 12th Floor  
New York, New York 10003 USA  
perlin@cat.nyu.edu

An algorithm for real-time interactive facial animation based on a stratified approach. Animators layer degrees of freedom recursively to relate lower-level facial movements to higher-level moods and intentions.

**Career Center**

**At the SIGGRAPH 97 Career Center, registered attendees can make résumés available to the industry's leading employers.**

**LOCATION**  
 Lower Level | Kentia Hall

**DAYS/HOURS**

Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 5 pm

All registered attendees are eligible to post a résumé in the SIGGRAPH 97 Career Center. You will need at least two copies of your résumé (one of which will be kept for SIGGRAPH 97 permanent records). Résumés are posted by category. If you want your résumé posted in more than one category (three maximum) please provide an additional copy for each category.

Résumés are posted in the following categories:

- Educator
- Engineer
- Film/Video/Animator
- Graphic/Fine Artist
- Multimedia
- Scientist/Researcher
- Software Developer/Analyst
- Other

Registered attendees can review the job postings and ask the Career Center staff to give résumés to specific employers. Staff members also help attendees and employers schedule interviews and show demo tapes. Interview sign-up sheets are available in the Career Center beginning Sunday, 3 August.

Career Center job posting services are provided free of charge to SIGGRAPH 97 exhibitors. Please bring at least two copies of your posting to the Career Center. Organizations that are not exhibiting at SIGGRAPH 97 must pay a \$500 fee to participate in the Career Center. For complete information, stop by the Career Center. After SIGGRAPH 97, contact:

SIGGRAPH 97 Conference Management  
 Smith, Bucklin & Associates  
 401 North Michigan Avenue  
 Chicago, Illinois 60611 USA  
 +1.312.644.6610  
 +1.312.321.6876 fax  
 siggraph97@siggraph.org

**Job Fair**

**SIGGRAPH 97 is pleased to announce the first SIGGRAPH Job Fair, a one-day event that gives organizations and job seekers the opportunity to meet in an informal setting and discuss career opportunities.**

**LOCATION**  
 Level Two | Room 408

**DAY/HOURS**  
 Wednesday, 6 August | 8 am to 6 pm

**Job Fair Participants** (as of 30 June 1997)

- Adobe Systems Incorporated
- The Aerospace Corporation
- Alias | Wavefront
- Animation Science
- Battelle
- Buildup, Inc.
- CineSite
- Dynamic Pictures, Inc.
- Engineering Animation, Inc.
- Evans & Sutherland Computer Corporation
- FRAMESTORE
- MegaDrive Systems, Inc.
- Microsoft Corporation
- Premier Search, Inc.
- Realtime Associates, Inc.
- Silicon Graphics, Inc.
- Softimage
- Sony Pictures Imageworks
- SQUARE USA, INC.
- Tippett Studio
- VIFX
- WETA DIGITAL EFFECTS
- Xaos Tools, Inc.

*For a more complete listing of the Job Fair participants see the SIGGRAPH 97 Conference Locator.*

**Purpose**

The purpose of the Job Fair is to allow organizations to meet potential employees in an informal setting. The Job Fair also gives job seekers the opportunity to learn more about your company and the opportunities available. This is not an extension of the exhibit floor. The focus is on the sharing of information between organizations and job seekers.

Space is still available. If your organization is interested in participating in the Job Fair, please stop by the Career Center for detailed information.

**Mentors**

During the Job Fair, members of the SIGGRAPH 97 Committee and other volunteers will be available to discuss the current job situation in the computer graphics industry, job descriptions and responsibilities, and how to approach prospective employers.

## International Outreach

**SIGGRAPH 97 and Los Angeles welcome thousands of international computer graphics scientists, developers, and practitioners to this year's worldwide celebration. Members of the SIGGRAPH 97 International Committee and a multi-lingual staff of student volunteers are available to help international attendees take full advantage of all the programs and events, and the Exhibition.**

### BILINGUAL PANELS

**This year, for the first time, the SIGGRAPH conference provides a bilingual environment in one of its major programs. Panels will be simultaneously interpreted into Japanese.**

### INTERNATIONAL CENTER

**All international attendees are invited to make the SIGGRAPH 97 International Center their home away from home. During the conference, student volunteers provide assistance and conference information. Look for their yellow vest with flags that indicate their language fluency.**

### LOCATION

Level One | West Lobby

### DAYS/HOURS

Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 5 pm

<b>Special Interest Groups</b>
--------------------------------

**Special Interest Groups (SIGs)** are for attendees who think and work in similar technologies and environments. Special Interest Groups are open to all attendees. They are usually informal. At some, general subjects are discussed; others convene around topics related to specific product vendors.

**Birds of a Feather** meetings are impromptu gatherings. They can be scheduled at any time, to discuss any subject. To organize your own impromptu meeting, simply use the sign-up board in the South Lobby where late additions and revisions to the Special Interest Groups and Birds of a Feather schedule are posted.

SIGs schedule as of 25 June 1997

**SATURDAY 2 AUGUST**

SIGGRAPH Professional Chapters Leadership Workshop  
8 am to 5:30 pm  
Wilshire B/C, Omni Los Angeles  
Scott Lang  
+1.201.343.6000

**SUNDAY 3 AUGUST**

Hardware Workshop  
8 am to 4:30 pm  
Golden State Room  
Omni Los Angeles  
Bengt-Olaf Schneider  
+1.914.945.1585

Kinetix Developer Conference  
8 am to 8 pm  
Garden Room, Omni Los Angeles  
Jill Baradat  
+1.415.507.6505

Component-Based Visualization and Interaction Environments  
5 pm to 6 pm  
Los Angeles Room  
Omni Los Angeles  
Michael Pique  
+1.619.784.9775

Kinetix Developer Conference Reception  
5:30 pm to 8 pm  
Poolside, Omni Los Angeles  
Jill Baradat  
+1.415.507.6505

SIGGRAPH Round the Clock  
9 pm to 4 am  
Board Room, Omni Los Angeles

**MONDAY 4 AUGUST**

Hardware Workshop  
9 am to 5 pm  
Golden State Room  
Omni Los Angeles  
Bengt-Olaf Schneider  
+1.914.945.1585

3D Benchmarks  
5 pm to 6:30 pm  
Sierra Room, Omni Los Angeles  
Greg Passmore  
+1.206.861.9422

Massively Parallel Rendering SIG  
5:30 pm to 6:30 pm  
Omni Los Angeles, Los Angeles  
Patricia Crossno  
+1.505.845.7506

VRML Demo SIG  
6 pm to 8 pm  
Room 151, LACC  
Don Brutzman

**Member Rate**

You must provide your ACM or SIGGRAPH membership number. Local or regional SIGGRAPH memberships are not eligible for registration discounts.

**Student Rate**

You must attach a copy of your 1997 ACM student membership card or your valid 1997 student identification card to your registration form. In addition to your student identification card, you must attach a letter on college or university stationery verifying that you are a student. The letter must include your registrar's name, address, and phone number, so we can verify your student status. At SIGGRAPH 97, you must present the ID card (not a copy). If you do not provide student verification, you will be charged the full non-member registration fee.

**Registration Hours**

If you registered by Tuesday, 15 July, please go to Advance Registration, North Hall, Los Angeles Convention Center. Otherwise proceed to On-site Registration, also in North Hall.

REGISTRATION HOURS

Saturday, 2 August	7 pm to 9 pm
Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 1 pm

MEDIA HEADQUARTERS HOURS

Level One   Room 150A
Sunday, 3 August   10 am to 6 pm
Monday, 4 August   8 am to 6 pm
Tuesday, 5 August   8 am to 6 pm
Wednesday, 6 August   8 am to 6 pm
Thursday, 7 August   8 am to 5 pm
Friday, 8 August   8:30 am to 1 pm

**Media Registration**

Media representatives must register in the Media Headquarters Office. You must submit full and proper media credentials for a media pass. No exceptions will be made.

**Media-Only Information and Events**

MEDIA BRIEFING
Level Two   Theater
Tuesday, 5 August   8:15 am to 8:50 am

EXHIBITION FLOOR TOUR

Immediately following the Media Briefing
Tuesday, 5 August   9 am to 10 am

The official SIGGRAPH media briefing is the place for you to hear about what's new and what's hot at SIGGRAPH 97. Preview the Electronic Theater and receive insight into SIGGRAPH 97 programs and venues.

The SIGGRAPH 97 Exhibition, a benchmark for the diversity and exponential growth of digital technologies, showcases over 300 exhibitors in more than 185,000 net square feet. Gain access to the exhibit floor before its opening to the public for a "sneak preview" of the latest products and applications. Small groups of media representatives will be escorted onto the exhibit floor.

**Media Tours**

ELECTRIC GARDEN TOUR
Level Two   Room 301B
Monday, 4 August   9 am to 10:30 am
Thursday, 7 August   9 am to 10:30 am

Enter into a new dimension of gardens, as Electric Garden Chair, Rick Hopkins, guides you through the garden where art, design, and technology have blended to create the world's most exciting and seductive interactive computer applications and interface design.

ONGOINGS: THE FINE ARTS GALLERY TOUR

Level Two   Room 301B
Monday, 4 August   2 pm to 3:30 pm

Ongoing: The Fine Arts Gallery Chair, Lynn Pocock, has assembled an outstanding collection of computer-based artwork. Meet the contributing artists and gain an in-depth look into their ongoing creative vision.

**Exhibitor Media Events**

A schedule of various exhibitor media events will be available in the Media Headquarters Office, Room 150A.

**Special Policies**

- Children under 16 are not permitted in the Exhibition.
- No cameras or recording devices are permitted at SIGGRAPH 97.
- SIGGRAPH 97 will record all, or portions of, conference programs and events.
- Food and beverages cannot be brought into the Electronic Theater performances at the Shrine Auditorium.

### Housing and Airline Desk

A representative from Flying Colors is available to assist you with your travel or housing-related questions.

#### HOUSING AND AIRLINE DESK LOCATION

Lower Level | Kentia Hall

#### HOUSING AND AIRLINE DESK HOURS

Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 1 pm

If you wish to rent a car, special discounted rates have been arranged with Avis Rent A car, Inc. Ask your Flying Colors representative to reserve an Avis car when you make your airline reservations or call Avis directly at 800.331.1600 and mention SIGGRAPH ID #D001064.

### Shuttle Service

SIGGRAPH 97 provides complimentary shuttle service between most conference hotels, University of Southern California dormitory, the Los Angeles Convention Center, and the Electronic Theater at the Shrine Auditorium. Check your hotel for signs indicating pick-up times and locations at the hotels. See the Conference Locator for more details on shuttle service. For assistance with handicap service, please call 800.543.6332. SIGGRAPH 97 provides buses with wheelchair lifts and tie-downs.

#### LOS ANGELES CONVENTION CENTER

##### SHUTTLE HOURS

Saturday, 2 August	5 pm to 9:30 pm
Sunday, 3 August	10 am to 8:30 pm
Monday, 4 August	7 am to 6:30 pm
Tuesday, 5 August	7:30 am to 6:30 pm
Wednesday, 6 August	7:30 am to 6:30 pm
Thursday, 7 August	7:30 am to 6:30 pm
Friday, 8 August	8 am to 6 pm

### Los Angeles Convention Center

#### Shuttles to Receptions and the Electronic Theater

##### COURSE RECEPTION

##### The WaterCourt at California Plaza

Monday, 4 August | 8 pm to 11 pm

Beginning at 7:30 pm coaches will shuttle from all hotels (except the Intercontinental and the Biltmore) to/from the WaterCourt. Last coach will depart the WaterCourt at 11:30 pm.

##### PAPERS/PANELS RECEPTION

##### Pershing Square

Thursday, 7 August | 8 pm to 11 pm

Beginning at 7:30 pm coaches will shuttle from all hotels (except the Biltmore and the Intercontinental) to/from Pershing Square. Last coach will depart Pershing Square at 11:30 pm.

##### ELECTRONIC THEATER

##### Shrine Auditorium

Monday, 4 August	7 pm to 9 pm
Tuesday, 5 August	2 pm to 4 pm
Tuesday, 5 August	7 pm to 9 pm
Wednesday, 6 August	2 pm to 4 pm
Wednesday, 6 August	7 pm to 9 pm
Thursday, 7 August	7 pm to 9 pm

Tuesday and Wednesday matinée shuttles will run to/from the LACC beginning at 1 pm through 4:30 pm.

Service for evening shows Monday–Thursday will run to the Shrine Auditorium from the LACC only beginning at 5:30 pm. Following the show shuttles will run to all hotels, the LACC (for people with cars only—cars may exit the LACC parking lots until 11 pm) and the Course and Papers/Panels Reception.

### Airport Shuttle

+1.310.782.6600

##### LOCATION

Level One | South Lobby

##### BOOTH HOURS

Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8:30 am to 1 pm

If you make your return reservation at the Airport Shuttle Desk, you will receive \$1 off. Return reservations should be made at least one day prior to your departure. You may call Airport Shuttle direct at +1.310.782.6600.

**GraphicsNet**

**GraphicsNet is the SIGGRAPH 97 conference intranet. It serves as the link among the many conference programs and events, and as the gateway to the global graphics community.**

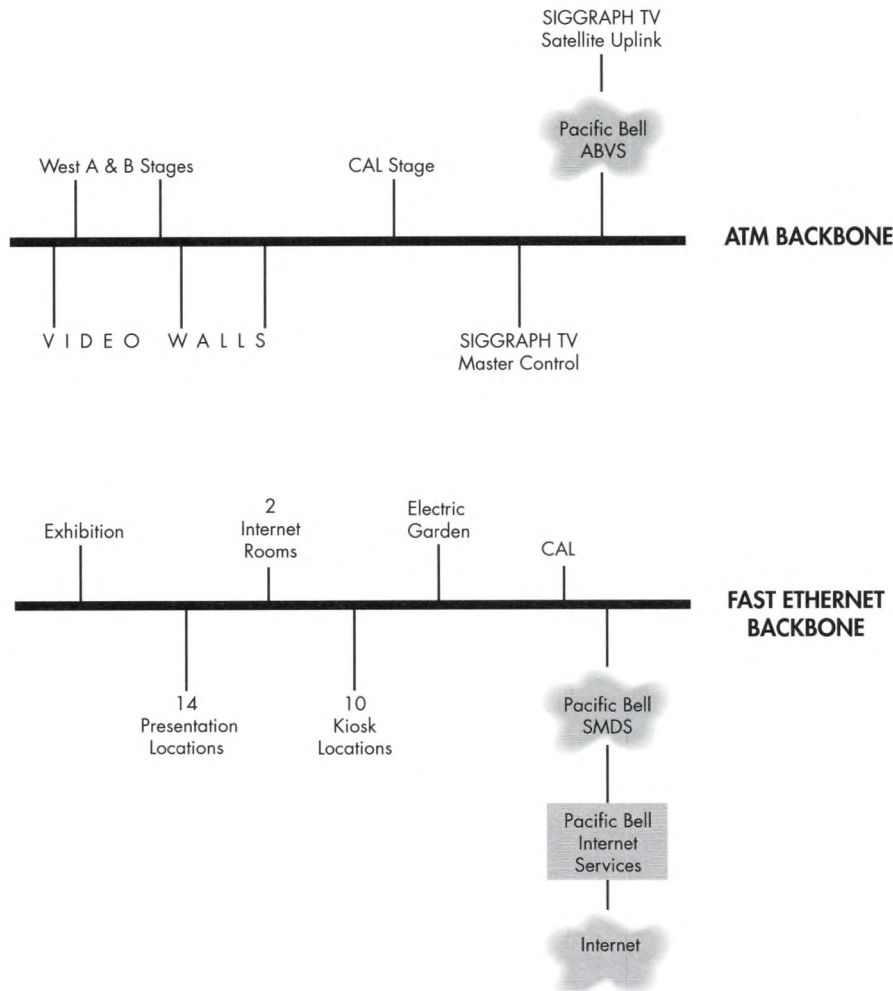

For the first time, GraphicsNet includes two different optical fiber backbones.

A production backbone based on Fast Ethernet (100 Mbps) links the Exhibition; the Internet Access Centers; the 14 presentation rooms for Papers, Panels, Courses, Sketches, and the Educators Program; the Electric Garden; 10 information kiosk locations; and the Creative Applications Lab (CAL). The production backbone is built with products from Cisco Systems, LANCAST, and others. It is connected to the Internet through a Switched Multimegabit Data Service (SMDS) circuit on the Pacific Bell optical fiber Synchronous Optical Network (SONET) ring that serves the Los Angeles Convention Center. The SMDS circuit provides a 34 Mbps path to Pacific Bell Internet Services and their multiple Internet backbone providers.

The other GraphicsNet backbone is based on ATM (155 Mbps, OC-3) and is designed primarily to serve as the high-performance video network for SIGGRAPH TV. It connects presentation venues with three video walls and with SIGGRAPH TV Master Control. The ATM network is built using switches and video encoding and decoding products from FORE Systems. An external link to the ATM backbone that uses Pacific Bell's Advanced Broadcast Video Service (ABVS) feeds the SIGGRAPH TV satellite uplink provider during SIGGRAPH TV's live broadcast on Friday.

GraphicsNet also includes several dedicated optical fiber links that are used by exhibitors to distribute digital video and for other applications.

The primary network management workstations and servers used in the Network Operations Center (NOC) are supplied by Sun Microsystems.

I wish to extend a special thank-you to each of the following volunteers and their employers for their immense contribution to GraphicsNet and SIGGRAPH 97. Without their expertise, creativity, dedication, and teamwork, GraphicsNet simply could not have been realized.

NETWORKING COMMITTEE  
David Evans  
Sandia National Laboratories

CJ Murzyn

Alan Verlo  
University of Illinois at Chicago

All of us on the GraphicsNet team owe a tremendous debt of gratitude to the following people, who provided professional support to the team.

Robin Myran  
Larry Rummens and the staff of the Los Angeles Convention Center  
Tim Gebelin and the crew at United Contractors

Grateful acknowledgement is extended for the support of the following companies. Through generous loans of equipment and personnel, they helped to ensure the success of GraphicsNet and SIGGRAPH 97.

Cisco Systems  
Fluke  
FORE Systems  
LANCAST  
Microsoft Corporation  
Shomiti Systems  
Silicon Graphics, Inc.  
Sun Microsystems Inc.  
Tripp Lite

And I wish to thank the many SIGGRAPH 97 committee members, contributors, exhibitors, and attendees who inspired us to build GraphicsNet.

Steven M. Van Frank  
SIGGRAPH 97 Networking Chair

**SIGGRAPH 97 and the Los Angeles Convention Center (LACC) offer a number of services during the conference to make your week more enjoyable.**

Sunday, 3 August	7 am to 7 pm
Monday, 4 August	7 am to 7 pm
Tuesday, 5 August	7 am to 7 pm
Wednesday, 6 August	7 am to 7 pm
Thursday, 7 August	7 am to 7 pm
Friday, 8 August	7 am to 2 pm

Direct all questions about audio/visual needs to this office. For more information on audio/visual services for speakers, see Speaker Prep Room, page 80.

#### Automated Teller Machines (ATMs)

There is an ATM located inside the LACC in the concourse between the West and South Lobbies directly in front of the Business Center.

#### Bookstore

Kentia Hall

**new** Business Outreach Books is offering computer-graphics-related books at the Los Angeles Convention Center during SIGGRAPH 97. Titles will also be available online after SIGGRAPH 97. See the SIGGRAPH 97 Web site for further details: [www.siggraph.org/s97/](http://www.siggraph.org/s97/)

Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 5 pm

Note: Bookstore refunds will only be processed during the conference. All bookstore policies are those of Business Outreach Books and not SIGGRAPH 97.

#### Busing

See Shuttle Services, page 73.

#### Check Room

South & West Lobby

SIGGRAPH 97 provides complimentary luggage check services for briefcases, backpacks, and other small items during conference hours. SIGGRAPH 97 is not responsible for items left in the Check Room overnight. Items left after hours will be left unattended.

#### Child Care

Rooms 517, 518, 519  
+1.213.765.4630

Accent on Arrangements provides age-appropriate child care activities for children from three months to 16 years of age at the Los Angeles Convention Center. Children must be registered for a minimum of three hours. Individualized evening child care is also available on a limited, first-come, first-served basis.

If you need to cancel a registration, you must call 24 hours in advance to qualify for a full refund of your child care fees. The Accent on Arrangements staff is certified in infant and child CPR. Child care services are guaranteed to be available during the following hours:

Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 6 pm

Costs: \$10 per hour for the first child per family; all others from the same family \$8 per hour per child.

Fees include snacks and beverages in the morning and afternoon for children over 30 months. Parents are responsible for their children's main meals.

#### Computer Animation Festival Office

Room 410  
+1.213.743.6201

Contributors can gather here to exchange ideas, leave messages, or discuss questions and concerns.

#### Conference Management Office

Room 304  
+1.213.765.4630

If you have questions regarding SIGGRAPH 97, call or stop by this office at anytime.

#### Electric Garden Office

Kentia Hall, Electric Garden  
+1.213.743.6202

Contributors can gather here to exchange ideas, leave messages, or discuss questions and concerns.

#### Electronic Theater Tickets

One ticket per person is included with Full Conference and Conference Select registrants. Every attempt is made to accommodate your requested Electronic Theater evening. All performances contain the same material.

Badged attendees may purchase up to four Electronic Theater tickets (subject to availability) at On-Site Registration in North Hall beginning at 7 pm Saturday, 2 August. Last-minute tickets are generally available. They will be sold at the Shrine Auditorium.

**Exhibition Management Office**

Room 303  
+1.213.765.4640

If you have questions regarding the SIGGRAPH 97 Exhibition, feel free to call or visit a staff member here.

**Exhibitor Registration**

Outside Kentia Hall

Exhibitors should pick up their badges at the exhibitor registration counter, which is open during registration hours. See Registration, page 79.

**First Aid Offices**

West Hall  
+1.213.741.1151 ext. 5133

South Hall  
+1.213.741.1151 ext. 5136

A registered nurse or paramedic is on duty at the first aid areas during registration hours.

**Food Services**

The Los Angeles Convention Center operates several food concession areas, including a barbecue, for the convenience of SIGGRAPH 97 attendees. Food carts, casual seating, are also available throughout the convention center.

**Information Desks**

South Lobby, North Hall, West Lobby

For answers to your questions about SIGGRAPH 97, stop by the information desks. They can provide information on conference programs and events and Los Angeles attractions.

**Internet Access Centers**

West Hall A & Kentia Hall

Two fully networked areas in the LACC provide complete Internet access to your home, office, and colleagues around the world. The Internet Access Centers are available to all attendees during registration hours beginning Sunday, 3 August. The Internet Access Center in Kentia Hall closes at 1 pm Friday.

**LACC Accessibility**

The convention center is wheelchair accessible. It has no curbs, and there are elevators to the upper levels. A special-assistance-equipped shuttle bus operates during SIGGRAPH 97 shuttle hours. For special pick-up services, call: 800.543.6332.

**LACC Business Center**

Concourse between West and South Lobby

A variety of services are offered by the Business Center including:

- computer time rental
- faxing services
- photocopying
- special finishing services (including hand stapling, collating, folding, binding and reduction/enlargement).

The Business Center also sells office supplies and U.S. stamps.

**LACC Parking**

SIGGRAPH 97 attendees can park at the Los Angeles Convention center for \$6 per day. Enter the parking areas from either of the convention center's two main entrances. The parking lots close at 8 pm for cars to enter, however cars may exit until 11 pm.

**Lost and Found**

Security

After the conference, all items will be turned over to the LACC security office. To inquire about lost items during and after the conference, call LACC security at +1.213.741.4605.

**Merchandise Fulfillment Center**

North Hall

The following material must be picked up at the Fulfillment Center located in the North Hall of the LACC:

- Advance-ordered technical materials
- Advance-ordered merchandise
- Conference documentation (included with registration)

All on-site registrants must pick up the conference documentation included with their registration at the Fulfillment Center.

Technical materials, merchandise, and conference documentation will not be shipped, nor will refunds be given for any material that is not picked up at the conference.

Saturday, 2 August	7 am to 9 pm
Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 1 pm

## Merchandise Store

South Lobby

**new** SIGGRAPH 97 introduces a conference store for casual browsers and serious shoppers. Stop by to purchase additional technical materials plus gifts for your family, co-workers, and yourself.

Technical material and conference documentation are available for purchase at the store. SIGGRAPH 97 merchandise is available on a first-come, first-served basis.

Merchandise vouchers are only valid in the Fulfillment Center located in the North Hall of LACC.

Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 1 pm

## Merchandise Sold After the Conference

*SIGGRAPH 97 Conference Proceedings* contains the permanent record of the technical papers and panels program from SIGGRAPH 97.

*SIGGRAPH 97 Proceedings CD-ROM* contains the electronic version of the conference proceedings, including papers, images, and additional material not found in the printed version including QuickTime movies and extended versions of papers.

*SIGGRAPH 97 Conference Proceedings Videotape* contains videotape supplements to technical papers and panels.

*SIGGRAPH 97 Visual Proceedings* contains the permanent record of images from Ongoing: The Fine Arts Gallery, Electric Garden, Computer Animation Festival, Electronic Theater, Sketches (Technical, Art & Design, Animation and Applications).

*SIGGRAPH 97 Visual Proceedings CD-ROM* contains selections from the Visual Proceedings, Slide Sets, Computer Animation Festival, Electronic Theater, Ongoing: The Fine Arts Gallery, Electric Garden, Sketches (Technical, Art & Design, Animation and Applications), and the SPACE Electronic Gallery.

## *SIGGRAPH 97 Course Notes CD-ROM*

contains the electronic version of the course notes.

## *SIGGRAPH 97 Educators Program CD-ROM*

contains the proceedings of the SIGGRAPH 97 Educators Program and a directory of funding sources for educators.

## *SIGGRAPH Video Review*

contains animations presented in the Electronic Theater and Festival Screening Rooms.

orders@acm.org

## Message Center

South Lobby  
+1.213.765.4200

Here you will find kiosks corresponding to each letter of the alphabet. You may leave a note for a friend pinned to one of the kiosks.

## Ongoing: The Fine Arts Gallery Office

Room 153A  
+1.213.743.6200

Contributors can gather here to exchange ideas, leave messages, or discuss questions and concerns.

## Receptions

Badged attendees may purchase additional tickets for the Course Reception and Papers/Panels Reception at On-Site Registration in North Hall.

## Registration

Advance Registration  
North Hall  
+1.213.743.6230

On-Site Registration  
North Hall  
+1.213.743.6240

Saturday, 2 August	7 pm to 9 pm
Sunday, 3 August	noon to 8 pm
Monday, 4 August	8 am to 6 pm
Tuesday, 5 August	8 am to 6 pm
Wednesday, 6 August	8 am to 6 pm
Thursday, 7 August	8 am to 6 pm
Friday, 8 August	8 am to 1 pm

## Restaurant Information Desks

South Lobby/West Lobby

There are two restaurant desks located in the Los Angeles Convention Center, one in the South Lobby and one in the West Lobby. Both are staffed with individuals happy to assist you in making reservations at local Los Angeles restaurants. These desks are open during registration hours. The Restaurant Information desk is closed on Saturday.

## Shipping Desks

South Lobby & North Hall

There are shipping desks located in the South Lobby of the LACC and North Hall Registration area. Staff can assist you in shipping your merchandise, course notes, and other conference materials. For your convenience, the shipping desks provide next-day air, second-day air, and regular ground shipping services to destinations throughout the world. These desks are open during registration hours. The South Lobby shipping desk is closed on Saturday.

**Speaker Prep Room**

Room 501A

+1.213.743.6260

Saturday, 2 August	2 pm to 8 pm
Sunday, 3 August	7 pm to 7 pm
Monday, 4 August	7 am to 7 pm
Tuesday, 5 August	7 am to 7 pm
Wednesday, 6 August	7 am to 7 pm
Thursday, 7 August	7 am to 7 pm
Friday, 8 August	7 am to 2 pm

All speakers must check in at the Speaker Prep Room at least 24 hours before their presentation.

Speakers and contributors should use the contributor registration desk in North Hall to pick up registration credentials and obtain conference information.

Speaker ribbons are available only in the Speaker Prep Room.

Speakers may use the Speaker Prep Room to prepare for their presentations, preview slides and videotapes, sort slides, and obtain slide carousels.

Changes in audio/visual equipment needs in presentation rooms should be directed to the Speaker Prep Room.

**Special Assistance Desk**

North Hall (Registration Area)

Staff members at the special assistance desk help attendees resolve a wide range of possible problems and concerns, including:

- Credit card problems (validations, errors)
- Lost badges
- Misspelled names on conference materials
- Payments submitted without registration forms
- Registration forms submitted without payments
- Substitute registration (only if authorized on company letterhead)

Kerry Howe

Apple Computer is showcasing the latest technologies from its Interactive Media product group, which includes QuickTime, the industry-standard multimedia architecture; QuickDraw 3D, the award-winning 3D architecture; and QuickTime VR, Apple's virtual-reality graphics technology. These technologies provide developers with an open, cross-platform environment for authoring, editing, distribution, and playback of multimedia content.

# Master the Media

Apple's Power Macintosh® systems, PowerBooks and QuickTime® Media Layer software architecture give you the power, ease-of-use and flexibility to work with all kinds of multimedia.

The QuickTime Media Layer is Apple's software multimedia architecture which brings ease-of-use and performance to all multimedia applications. Consisting of the industry standards, QuickTime, QuickDraw™ 3D, and QuickTime VR, the QuickTime Media Layer offers a cross-platform, scalable means for working with multimedia data in a standard way.

Apple's Power Macintosh systems and PowerBooks are the premiere platforms on which to run QuickTime Media Layer software.

These powerful systems, the Power Mac 8600/9600 series and the PowerBook® 3400, are designed specifically for multimedia authoring and lead the industry in performance, expandability, and industrial design.

See the latest innovations in Power Macintosh, PowerBook and the QuickTime Media Layer at Apple's booth, 1307. See how to Master the Media.

Organic 3D modeling  
is now child's play  
with ...

form

Booth  
# 2017

form  
2.9

Create smoothly blended forms with **metaformz™**, which are **metaballs** applied beyond spheres to a vast variety of 3D forms. Produce complex forms by changing the resolution of bulky models, through **smooth meshing**. Sketch the outlines of a shape and let **form•Z** sweep them along any number of paths. Refine your surfaces using **image based displacements**. All this and more while you also enjoy **QuickDraw 3D™**, **QuickTime VR™**, major speed and interface improvements, including **customizable key commands** and **undos** that can be even saved with the project.

As a designer, you need to visualize complex forms and to imagine shapes that do not yet exist. You frequently race against insane deadlines, while your customers grow impatient. That's when you need the modeling power of **form•Z**.

**form•Z** lets you create a vast variety of forms with unprecedented ease. It offers an extensive array of unique 2D and 3D form sculpting capabilities.

Grow a model from simple lines to complex surfaces or to true solids with a few quick clicks. Shape curved splines or NURBS surfaces as you slip effortlessly between 2D and 3D views. Resize your shape, stretch it, extrude it, lath it, sweep it, project it, unfold it, deform it, apply advanced vertex and edge rounding to it. What's more, **form•Z's** Boolean operations work even better than those found on pricey workstation level modeling packages.

Add as many layers as you need, work with floating point precision using simultaneous graphic and numeric input. If you're unhappy with your new design, unlimited undos are always at your fingertips.

## RenderZone

When you're done modeling, you can use **RenderZone's** state of the art shader technology to produce your photo realistic images at impressive speeds. Or you can transfer your models smoothly into your favorite animation program, using **form•Z's** extensive import/export formats. Flexibility of this caliber has made **form•Z** the most effective modeling complement to many popular animation programs.

Digital Marketing International is the North American distributor for a host of professional digital video products, including CFE's DVES based Gallea videographics engine, a single slot PCI adapter with programmable pixel depth, spatial resolution, and color space. Capable of uncompressed video capture at data rates ranging from 23 to 41 MB. Gallea's on board display memory is expandable to 128 MB.

**Our NT workstations are built with the  
the only thing between you and your idea**

SRC="/gifts/globel.s

a

motion that  
should be 1/4" of skull.

Deadlines. Budgets. Clients. Unreasonable expectations. Exactly how many things are standing between you and your ideas? The new expanded family of Compaq Professional Workstations is designed to help you work faster and deal with those obstacles. These NT-based workstations are optimized to run premier graphic applications from companies like Adobe, Kinetix, Macromedia, NetObjects and SoftImage. In fact, Macromedia made Compaq the launch platform for its Director 6.0 and Authorware 4.0 applications. They had good reason. Our new workstations can utilize up to two Pentium® II processors or four Pentium Pro processors. They also sport our new dual-memory controller architecture which provides two to four times the bandwidth (1.06GB/s) of other Intel-based workstations. Our high-performance graphic solutions accelerate complex multimedia, video editing and web-authoring tasks. And the Diamond Fire GL 4000 graphics accelerator lets you take 3D animation to a new level. The Compaq Professional Workstation 5000, 6000, and 8000 series. Your own skull may hold back your ideas. Your workstation should not.

Marshall Hash  
President

Martin Hash's 3-Dimensional Animation V5 is the most powerful and affordable patch-based modeler and character animation program available. Specifically designed for classic character animation for Win95, WinNT, and PowerMac, MH3D includes patch modeling and animation, high-quality rendering, inverse kinematics with constraints, decaling, stride length, lip-synch key framing, skin, etc.

# Create images that are really out there

Screen design courtesy of Xaos Tools.

Boost your creativity with: Up to two 200MHz<sup>1</sup> Pentium<sup>®</sup> Pro processors. Upgradable to 1GB of RAM. Up to 4.5GB<sup>2</sup> Wide Ultra Fast SCSI drive. Full-speed L2 cache. 2D Matrox Millennium graphics accelerator or Intergraph Intense3D Graphics Pro 1000/T accelerator.

for clients who are really out there.

Introducing the  
**IBM IntelliStation.**  
A 3D graphics workstation  
and powerful PC  
all in one.

Come see the IBM IntelliStation in action at  
**SIGGRAPH 97, booth 1153.**

Call **1 800 426-7255** ext. 4203.

*Deadlines are shorter. Budgets are tighter. Clients are more demanding. The problem's the same no matter what planet you're from. You need to do more. Faster. For less. Enter IntelliStation™—with the powerful 2D and 3D graphics performance you've come to expect from Macintosh and UNIX® and the functionality of thousands of applications that support the Intel® and Windows® standard—like videoconferencing. Every day more and more of your favorite applications are being optimized for Windows NT,® so you can create awesome images and effects using multiple packages. On the same system. At the same time. At a price even a producer could love. Animate with Softimage. Composite with AfterEffects. Invigorate your images with Xaos Tools. Edit with Avid. Use real-time manipulation in high-res and true color. Spend less time running between platforms and more time being creative. Call the number below or visit our Web site at [www.us.pc.ibm.com/intellistation/hot](http://www.us.pc.ibm.com/intellistation/hot). Sit down in front of the IntelliStation. And let your ideas really take off.*

**IBM IntelliStation.**  
Nothing gets in the way  
of a good idea.

**IBM**

Solutions for a small planet.

MicroScribe-3D is a low cost 3D DIGITIZER for the desktop. It lets you capture 3D geometry from any physical object in minutes. A great tool for 3D animators, artists, engineers, or anyone working in 3D.

## 1 9 9 7 New Media Series

The Hollywood Reporter's award-winning New Media Series continues to expand its coverage in 1997 in tandem with the explosive growth in current and future entertainment technologies.

This year our 12 New Media special issues will cover the latest technical developments and emerging business trends that make entertainment a leading industry for the Information Age. We'll cover entertainment web sites, digital production and delivery, music and children's multimedia, satellite distribution, music and children's multimedia, satellite distribution, information technology, electronic exhibition and much more.

The 1997 New Media Series is a superb marketing opportunity for advertisers to influence the minds of moguls, seasoned or new, who are pointing the way toward the next century. We invite you to position your company, product or service and reach the ever-expanding audience of new media executives and professionals.

The Tracing Solutions Company demonstrates the world's first real-time tracking system for hand-held TV or film cameras. The new CONSTELLATION system provides accurate position and orientation of virtually any camera. It allows instantaneous calibration of cameras for virtual sets or special effects. An infinitely scalable, super smooth tracking system for VR applications is also demonstrated.

NEW in the ACM SIGGRAPH Books Series

*Entertaining the Future with High Technology*

# DIGITAL ILLUSION

**Clark Dodsworth Jr., Contributing Editor**

*Digital Illusion* is the future of entertainment. That future, as seen in this just-published SIGGRAPH Series book, is at the intersection of show business and interactivity. Clark Dodsworth, coproducer of ACM SIGGRAPH's critically acclaimed *Digital Bayou* venue, gathers here prominent contributors from the computer and entertainment industries to describe the design and implementation of computer-based entertainment applications, and to explore business opportunities for both content vendors and providers. The book covers diverse subjects in some technical detail, making it a useful resource for readers designing or developing their own applications. Much of the book, however, is accessible and interesting to the general reader—anyone fascinated by the potential for high-tech fun.

ISBN #0-201-84780-9 • 1998 • 560 pp. • Softcover • ACM Order #702960  
15% CONFERENCE DISCOUNT OFF ACM MEMBER AND REGULAR PRICES

Photograph © 1994 Cinematrix, Inc.

The **ACM SIGGRAPH Books Series** is a collaboration among ACM SIGGRAPH, ACM Press, and Addison Wesley Longman, Inc. The Series comprises books on theory, practice, applications, and imaging in computer graphics and interactive techniques, some developed from courses, papers, or panels presented at the annual ACM SIGGRAPH conference. Submissions are welcome, and proposals should be sent to [heleng@aw.com](mailto:heleng@aw.com).

Editor: Steve Spencer (The Ohio State University). Editorial Board: Mike Bailey (San Diego Supercomputer Center), Wayne Carlson (The Ohio State University), George S. Carson (GSC Associates), Ed Catmull (Pixar), Tom DeFanti (University of Illinois, Chicago), Richard L. Phillips (Los Alamos National Laboratory), Andries van Dam (Brown University).

Other titles in the SIGGRAPH Books Series include:

- Multimedia Systems**, John F. Koegel Buford. A technical introduction to key issues in multimedia.
- Virtual Reality Systems**, John Vince. A detailed examination of core technologies underlying VR.
- Networked Virtual Environments**, Michael Zyda and Sandeep Singhal. Forthcoming in 1998.

WANT TO GET  
**MORE WORK**  
OUT OF YOUR  
WORKSTATIONS?

**LIFETIME  
WARRANTY**

IT'S TWO IN THE MORNING, you're on your third espresso shot, and suddenly that big idea dawns on you. Question is, can your workstation bring it to life? [www.kingston.com](http://www.kingston.com)

With enough memory it can. Fortunately, there's never been a better time to fuel up. That's because Kingston® Technology, the world's leading memory company, has dramatically reduced their prices. Kingston workstation memory costs nearly half as much as the system manufacturer's and compatibility is guaranteed. Our memory is customized to the requirements of the system or class of systems in which it will be used, so you will always get the right memory the first time around. We even have licensing agreements with Sun Microsystems® and Silicon Graphics®, plus service agreements with Digital® and IBM®.\* To get the memory that's just right for your UNIX workstation, call Kingston at (800) 835-2545.

After all, isn't it time your workstation lived up to its name? **Kingston**  
TECHNOLOGY  
COMPUTING WITHOUT LIMITS®

\*IBM will no longer provide maintenance service during the warranty period. Customers may install Kingston memory at anytime during the warranty period, however, if service should be necessary, it becomes a billable charge to the customer. **We wanted to tell you how our rapid access to large amounts of data maximizes your computing investment (without putting a majestic beast through the indignities of a photoshoot).**

solutions? The fact is, MAXSTRAT Gen5 storage servers are scalable to over 800 gigabytes. That's ten times more capacity than other enclosures. Here's the fast part: a data transfer rate of 250 megabytes per second. Which is 15 times faster than competing storage products. » Gen5 is serious centralized storage. » When it comes to today's data-intensive applications, no other solution delivers better throughput and access for leading platforms including Sun, SGI/Cray, Fujitsu, NEC and IBM. Clearly, MAXSTRAT sets the new storage standard. » In some ways, we're like a storage investment protection policy. You see, thanks to MAXSTRAT's compatibility, the Gen5 only gets better if you change or add workstation or supercomputer suppliers. » What makes us the ideal solution? Maybe it's because storage is our ONLY business. We're the specialists. Which brings to mind a few visual possibilities like a...nah, we'll spare you. » To get the most out of your computing investment, call us at 408-383-1600.

Who needs visual cliché when you've got the world's fastest, most reliable, high capacity storage

Mercury exhibits its family of solutions that extends Advanced Workgroup Editing (AVE) capabilities to non-linear video editing suites. The family of Mercury Media Servers initially includes the MDVS hardware platform, with a range of performance options, and its revolutionary media workgroup software: SuiteFusion and LiteFusion.

# Raising the Bar

On What You Expect

from a  
Digital  
Animation  
Recorder

In today's competitive environment, you need an edge. The new **Matrox DigiSuite** digital animation recording solution for your Windows NT workstation gives you the tools you need for peak performance.

**NOW SHIPPING!**

#### Uncompressed-Quality D1 Video

Matrox® DigiSuite gives you the artifact-free capture and playback features you need to really show off the quality of your work. Serial D1, analog component, Y/C, and composite I/O support gives you maximum flexibility.

#### More From Your Storage

Using mathematically lossless encoding (a.k.a. "data compaction"), DigiSuite maintains your original image integrity and still lets you store about twice as much video on a hard disk and make network transfers about twice as fast. The use of the standard NTFS file system makes disk and project management easy. Three standard SCSI drives form a simple disk stripe set – that's all the storage you need to get uncompressed-quality 4:2:2:4 throughput.

#### Standard AVI File Format

DigiSuite lets you work in the seamless Windows® native-AVI environment that is supported by all your favorite animation, editing and compositing applications. You manipulate your digital audio/video at uncompressed-quality data rates without time-consuming and restrictive file conversions.

#### Simultaneous Alpha Channel

Preview your alpha-keyed animations over video in real time. Record your animations and their associated key signals simultaneously at full 4:2:2:4 resolution.

#### Perfect Audio Sync

True 48 KHz professional digital and analog audio are built right on the card, genlocked to video. You don't need to struggle to get a perfectly synchronized sound track.

#### Frame-Accurate VTR Control

Capture, record and sync-play your animations over video – *frame accurately*. Do perfect insert edits every time.

#### More than just an Animation Recorder

Of course, DigiSuite works with all the leading animation packages – 3D Studio MAX™, LightWave 3D™, Softimage® 3D and others. But what's more, you can also use the same DigiSuite boardset to do all your other video production tasks – realtime nonlinear editing, audio/video compositing, titling, and video paint – with software from some of the industry's most innovative application developers.

For more information and the name of the DigiSuite reseller nearest you, call us today.

At SIGGRAPH 96, Windows had finally arrived as the compelling content-creation platform. This year, it's taken off! Check out the Microsoft booth and experience Windows like you've never seen it before: with new Microsoft DirectX APIs. Windows gives you the multimedia power you need, plus the greatest choice of hardware and software creation tools available for any platform. For film, video, graphic design, broadcast, Internet, collaborative design, and games, look to Windows for a new source of creative freedom.

## An Introduction to Implicit Surfaces

Edited by

Jules Bloomenthal

with

Chandrajit Bajaj

Jim Blinn

Marie-Paule Cani-Gascuel

Alyn Rockwood

Brian Wyvill

Geoff Wyvill

**I**mplicit surfaces offer a new range of capabilities for the modeling of complex geometric objects. This comprehensive introduction develops the fundamental concepts and techniques of implicit surface modeling, rendering, and animation in terms accessible to anyone with a basic background in computer graphics.

- provides a thorough overview of implicit surfaces with a focus on their applications in graphics
- explains the best methods for designing, representing, and visualizing implicit surfaces
- surveys the latest research

1997; 215 pages; cloth; ISBN 1-55860-233-X; \$64.95

### Jim Blinn's Corner

Eminent computer graphicist Jim Blinn has coupled his scientific knowledge and artistic abilities to foster the growth of the computer graphics field. These books, collections of his best columns from *IEEE Computer Graphics and Applications*, offer a wealth of tips and tricks to help computer graphics software and application developers recognize and solve graphics programming problems.

### Dirty Pixels

Jim Blinn, Microsoft Research

January 1998

215 pages; paper;

ISBN 1-55860-455-3; \$34.95

### A Trip Down the Graphics Pipeline

Jim Blinn, Microsoft Research

1996; 216 pages; paper;

ISBN 1-55860-387-5; \$34.95

### Wavelets for Computer Graphics: Theory and Applications

Eric J. Stollnitz, University of Washington, Tony D. DeRose, Pixar Animation Studios, David H. Salesin, University of Washington

Stressing intuition and clarity, this distinctly accessible introduction to wavelets provides graphics professionals and researchers with the mathematical foundations for understanding and applying this new and powerful tool. This book focuses on a generalized theory that naturally accommodates the kinds of objects that commonly arise in computer graphics, including images, open curves, and surfaces of arbitrary topology. 1996; 245 pages; cloth; ISBN 1-55860-375-1; \$49.95

### Forthcoming

#### Working with Virtual Reality

William Sherman and Alan Craig, the National Center for Supercomputing Research  
December 1997  
400 pages; cloth;  
ISBN 1-55860-353-0; \$59.95

### Interactive Curves and Surfaces: A Multimedia Tutorial on CAGD

Alan Rockwood, Arizona State University and Peter Chambers, VLSI Technology, Inc.

This interactive software/book tutorial teaches foundational CAGD concepts and discusses fast-growing applications in such areas as geological and molecular modeling, commercial advertising, and animation. Using interactive examples and animations to illustrate the mathematical concepts, this hands-on multimedia tutorial enables users who may not have a substantial mathematical background to quickly gain an understanding of CAGD.

1996; 217 pages; paper;

3.5" disks for windows;

ISBN 1-55860-405-7; \$59.95

#### Rendering with Radiance

Gregory Ward, Silicon Graphics, Inc. and Robert Shakespeare, University of Indiana, Bloomington  
January 1998  
600 pages; paper / CD ROM;  
ISBN 1-55860-499-5; \$79.95

### Principles of Digital Image Synthesis

Andrew S. Glassner, Microsoft Research

This sweeping work provides an introduction to the human visual system, digital signal processing, and the interaction of matter and energy. Glassner demonstrates how these disciplines are elegantly orchestrated into modern rendering techniques such as radiosity and ray tracing.

1995; 1600 pages/2 volumes;

cloth; ISBN 1-55860-276-3;

\$94.95

Dennis J. Solomon  
CEO

Holoverse, Inc. introduces three exciting innovations: its next generation of solid-state volumetric imagers; its flat screen, digital holographic television; and its Holodeck-99 digital holographic theater designed for large audiences without special glasses. Holoverse's gigavoxel-per-second technology has been repeatedly cited as setting performance standards for 3D and special effects systems.

3D ANIMATION TOOLS

**Houdini**™

**D**oes your animation software help you work smarter?

Instead of hard-coded solutions, Houdini uses the procedural approach to animation pioneered by Side Effects Software. You can drive your workflow to go wherever you want, whenever you want. Revisions are easy, and all your changes happen in real time. So, if you're not satisfied with one approach, you can try another... and another.

**It's that flexible.**

U N L I M I T E D

**flexibility**

That's the power of Houdini, the 3-D animation package for professionals from Side Effects Software.

Seamlessly integrating 3-D modeling and animation with 2-D compositing and rendering, Houdini reduces frequent tool-switching. Plus, Houdini and its user interface offer a broad range of customization – for animators and technical directors alike – through the scripting language, expressions, and the developer's kit.

Houdini lets you do more, more efficiently. Its inherent flexibility grows with you, keeping pace with your skill and imagination.

**Who knows? It might even stretch your career.**

Trade Show Manager

Video Systems magazine focuses on the tasks and objectives readers face and serves decision-makers in business and industry, independent production facilities, and independent producers. Millimeter magazine is a monthly publication that serves film, video, and multimedia production professionals in advertising, motion pictures, and television.

When we say ViewSonic®

will exceed your expectations,

we've got the guts to back it up.

Shown-Model PT775

**Aperture grille technology that rewrites the spec charts.**

ViewSonic's PT813 21" (20" viewable) and PT775 17" (16.0" viewable) set a new standard for aperture grille monitors used in professional applications.

A rather large claim. But one we can make without equivocation because we have the technology and the specs to prove it.

Both monitors achieve breakthrough quality in brightness, color saturation and screen clarity (see spec boxes below for eye-popping details).

**Wait, there's more.**

After setting the standard for the pros, we did it again for general office and graphic applications. Our new GT775 17" (16.0" viewable) monitor exceeds all your high performance demands with an optimum resolution rate of 1,280 x 1,024 @ 80Hz and a maximum resolution of 1,600 x 1,280 – from design to business presentations to CAD and the Internet.

It doesn't get any better.

And, all ViewSonic monitors are backed by a limited 3 year warranty\* on CRT, parts labor (the best in the business), as well as an optional Express Exchange<sup>SM</sup> Service program that insures 48 hour replacements.

*To exceed your highest expectations, call (800) 888-8583 for the dealer nearest you or visit our website at [www.viewsonic.com](http://www.viewsonic.com).*

If your first  
reaction was

“Wow!”

Cool, blobby old Joe  
particle system,”

check us out.

So, you're a master in the art of re-creating visual reality and natural phenomena? A high-level creative effects talent? Well, we're a tight, slightly obsessive collaborative team working on features like Batman & Robin, The Peacemaker and ANTS (our first computer-animated feature film co-produced with DreamWorks). If you've got the talent and share the passion, we'd love to get you in on the action. Is that blobby particle system looking more like a crystal ball?

# Power your PC into the next Millennium

Introducing *Matrox Millennium II* - Superior performance for professional computing

The next revolution in graphics technology is here today. The new Matrox Millennium II accelerator delivers the world's most powerful, all-in-one solution for corporate enterprise and professional 2D/3D applications. Its state-of-the-art design combines the new

Matrox MGA-2164W graphics chip with a powerful 220 MHz RAMDAC for the highest resolutions and refresh rates possible. Millennium II's highly integrated design offers dramatic increases in 2D/3D and video performance that will power your Pentium II to a whole new level. What's more, you can upgrade Millennium II with up to 16 MB of powerful dual-ported WRAM memory or the new Matrox Rainbow Runner Studio upgrade for video conferencing, video editing, MPEG computer based training, and much more.

With over 20 years of experience and 200 international awards of excellence, Matrox is the company you can rely on. Choose the leader in acceleration. Choose Matrox.

Matrox outperforms the competition (16-bit)

### Matrox Millennium II

- Ideal for corporate workflow, true color publishing, 2D/3D CAD, and 3D business presentations.
- Includes 7 free software titles. \$500 value.

### Matrox Rainbow Runner Studio

- Ideal for video editing, video conferencing, PC to TV output, 'PC-VCR' video capture, and hardware MPEG video.
- Includes 4 free software titles. \$500 value.
- Available Q3 '97 for Millennium II.

### Award Winning Performance

#### Dell wins Editor's Choice!

"Outfitted with a new Matrox Millennium II graphics accelerator... the Dell Dimension XPS H266 shattered all previously held graphics WinMark records."

PC Magazine, June 10, 1997

**Come see us at #2307!**

\* Estimated street prices. Software bundle available only with retail product. All performance tests conducted by Matrox Graphics Inc. Windows NT 4.0 tests conducted on a Dell Pentium Pro 200 Mhz with 32 MB of EDO DRAM and 256K cache. Matrox Millennium II, Diamond Stealth 3D 3000, Number Nine Imagine 128 Series 2, ATI 3D ProTurbo+PC2TV and Diamond FireGL 1000 tested using driver releases 3.06, 2.03, 4.102.21, 3.1.75 and 2.70.4.0.27 respectively. Windows 95 testing was done on a Gateway 200 MHz MMX with 32 MB of RAM and 512K cache using driver release 3.41, 4.03.00.3105, 2.13, 3.03 and 4.03.00.2101.0008 respectively. All boards tested were configured with maximum memory configurations. WinBench 97 business tests conducted at 1024 x 768 @16-bit at 75 Hz using small fonts under Windows NT 4.0 and 95.

Hey, have you heard about A K Peters Publishers yet?

They're the ones that published that fantastic book *Computer Facial Animation* by Parke and Waters, right?

Yes, but they also have tons of other cool stuff like the new *journal of graphics tools* and videos like *Outside In!*

Well, I'm definitely going to check them out at SIGGRAPH and stock up on all my computer graphics titles.

**DON'T LOSE FACE WHEN IT COMES TO COMPUTER GRAPHICS!**  
**VISIT US AT SIGGRAPH...BOOTH #827.**

**A K PETERS, LTD., PUBLISHERS OF SCIENCE & TECHNOLOGY**

# We're Ecstatic To Have Once Again Been Named "Best Read\* Magazine" At SIGGRAPH in 1996

For 11 years running, when SIGGRAPH attendees were asked what publications they read, more people named *Computer Graphics World* than any other publication.

We take this honor very seriously and appreciate being recognized by the leaders in the computer graphics industry. At *CGW* we're working hard to continue providing you with leading-edge information that will help you do your job better, faster, and more efficiently. Thank you for supporting our efforts. We appreciate your vote of confidence!

\* Source: SIGGRAPH Audience Reports, Exhibit Surveys, Inc. Red Bank, NJ

## Stop by Booth 805 and Find Out Why Industry Leaders Rely on *CGW*

While you're there, pick up a free subscription to *Digital Magic*. The hottest publication — read by the biggest players in the digital media industry!

Visit our web site at [www.cgw.com](http://www.cgw.com)

# TO CONVERT REAL-TIME COMPUTER GRAPHICS TO VIDEO...

1280x1024  
Computer Display

...and get the best possible image,  
you will need the Model 9400JR  
or Model 9700XL  
from Folsom Research.

NTSC/PAL  
Monitor

You're looking at the two best autsync video scan converters available anywhere. Both can turn your high-resolution desktop workstation, PC or Mac presentations into broadcast-quality videos. The 9400JR is built for the same top performance and excellent picture quality as our top-of-the-line unit. It is the most affordable true broadcast-quality scan converter made. The 9700XL, built for absolute control and flexibility, is the most powerful scan converter made. Period.

To see all of the powerful features, call for your free demo today.

# 3D SCANNING AT YOUR FINGERTIPS

## Introducing Cyberware's Desktop Rapid 3D digitizer

The Model 15 features a complete 3D scanning package — scanning unit, motion subsystem, and software — in an integrated format. With the addition of any Silicon Graphics workstation, the system includes everything you need to make fast, high-quality scans.

The motion subsystem built into the Model 15 provides both linear and cylindrical scanning. The motion platform rotates in front of the scanning unit, and the scanning unit scans across an object on the platform. These scanning patterns allow you to scan virtually any type of object up to approximately 200mm (8") in size.

All the scanning motions and other settings are controlled completely by software included with the Model 15. This software has been designed to give even non-technical users a quick and easy way to capture the shape of an object. The software includes tools for modifying and measuring scanned objects, as well as translating file formats so that you can take advantage of the many commercially available software packages that accept 3D models.

## ACM SIGGRAPH

**SIGGRAPH is ACM's Special Interest Group on Computer Graphics and Interactive Techniques. It is dedicated to the advancement of computer graphics and interactive techniques through activities that foster the exchange of information among graphics professionals of all kinds. Founded in 1967, SIGGRAPH has grown from a handful of computer graphics enthusiasts to a diverse membership including artists, engineers, animators, filmmakers, software and hardware developers, scientists, mathematicians, and other professionals in the field of computer graphics. In addition to its own annual conference, SIGGRAPH sponsors other conferences, supports a wide range of educational activities, produces a variety of publications, and maintains relationships with other professional technical organizations around the world. SIGGRAPH has established local groups across the United States and internationally. For general information on SIGGRAPH and ACM membership, contact ACM at:**

## How to Get Involved

ACM SIGGRAPH, one of over 35 Special Interest Groups of ACM, the Association for Computing Machinery, is dedicated to the advancement of computer graphics and interactive techniques through activities that foster the exchange of information among graphics professionals of all kinds. The organization has a long tradition of bringing together a wide variety of people (users, researchers, teachers, product developers, artists, designers, and media developers) in an exciting exchange of ideas that benefit our entire community.

The heart of SIGGRAPH is its active, talented core of volunteers, and we are always looking for new people with new ideas to keep SIGGRAPH vibrant. It's easy to find SIGGRAPH volunteers at SIGGRAPH 97. Many very involved volunteers will be in the SIGGRAPH organization's booth in the South Lobby. You can also meet us at our joint open house with the SIGGRAPH 98 committee:

SIGGRAPH Get Involved  
Wednesday, 6 August, 5:30 pm to 7 pm  
Room 301, LACC

### Membership

SIGGRAPH is the world's largest professional society for persons working in computer graphics and interactive techniques. It has members all over the world and in every facet of the computer graphics field. Being a member of SIGGRAPH demonstrates your involvement in the computer graphics community and your support for SIGGRAPH's goals and activities. The strength of SIGGRAPH's voice on issues important to our field depends on its activities and on the number and quality of our membership.

As a SIGGRAPH member, you receive the Computer Graphics newsletter, the Conference Proceedings and Proceedings CD-ROM, and the Visual Proceedings and Visual Proceedings CD-ROM. You may also choose a less expensive "Lite" membership that includes only the newsletter. All members enjoy discounts on SIGGRAPH conferences and publications, and have the opportunity to subscribe to the proceedings of other computer graphics-related conferences through the Member Plus program.

You can join SIGGRAPH at the ACM booth in the South Lobby of the Los Angeles Convention Center, or look for membership information at: <http://www.siggraph.org/>

### SIGGRAPH Activities

In addition to sponsoring the annual conference, SIGGRAPH has many activities that go on throughout the year and around the world. Many of the activity areas mentioned below have open meetings during SIGGRAPH 97.

### Publications

SIGGRAPH's Publications Committee is responsible for all of SIGGRAPH's publications in print, on CD-ROM, on video, and online. The committee is made up of people with skills in editing, writing, and producing various media, and is a great place for someone skilled in these areas to help others learn about computer graphics and interactive techniques. For information, contact Stephen Spencer, SIGGRAPH Director for Publications.

### Other Conferences

SIGGRAPH sponsors or has formal cooperation with about a dozen other conferences each year. These include such events as the Interactive 3D Graphics Workshop, the Computational Geometry Conference, the ACM Multimedia Conference, the Volume Visualization Symposium, UIST: User Interface Software and Technology Conference, and the Solid Modeling Conference. SIGGRAPH works with the organizers of SIGGRAPH-sponsored conferences and coordinates relationships with other conferences. For information, contact Chuck Hansen, SIGGRAPH Director at Large.

### Public Policy

SIGGRAPH's Public Policy Committee provides information on relevant external activities, such as proposed legislation, to SIGGRAPH members and others of the technical community. It also provides education on the implications of technology to the non-technical community. For information, contact Bob Ellis or Judy Brown, Co-Chairs of the Public Policy Committee.

### SIGGRAPH Meetings at SIGGRAPH 97

Annual SIGGRAPH Business Meeting  
Thursday, 7 August, 5:30 pm to 7 pm  
Room 502A, LACC

SIGGRAPH Education Committee  
Visualization Education Meeting  
Tuesday, 5 August, 5 pm to 6 pm  
Glenwood Room, Omni Los Angeles

SIGGRAPH Education Committee  
Annual Meeting  
Wednesday, 6 August, 2 pm to 3 pm  
Del Mar/Verdugo Rooms, Omni Los Angeles

SIGGRAPH Education Committee  
Breakout – Art  
Wednesday, 6 August, 3 pm to 4 pm  
Del Mar/Verdugo Rooms, Omni Los Angeles

SIGGRAPH Education Committee  
Breakout – Computer Science  
Wednesday, 6 August, 3 pm to 4 pm  
Balboa Room, Omni Los Angeles

SIGGRAPH Education Committee  
Breakout – K-12  
Wednesday, 6 August, 3 pm to 4 pm  
Sawtelle Room, Omni Los Angeles

SIGGRAPH Public Policy Activities  
Thursday, 7 August, 1 pm to 3 pm  
Room 305, LACC

SIGGRAPH Executive Committee Meeting  
Saturday, 9 August, 10 am to 3 pm  
Westwood Room, Omni Los Angeles

### How to Contact SIGGRAPH

You can send email to SIGGRAPH people by addressing them as:

firstname-lastname@siggraph.org

The directors whose names appear here are also members of the Executive Committee. Their contact information is listed on the inside front cover of the *Conference Proceedings* and in all issues of the Computer Graphics newsletter.

The SIGGRAPH information booths, located on Level One, South Lobby of the Los Angeles Convention Center, provide information about these services and activities.

#### ACM

ACM, the Association for Computing Machinery is the sponsor of the SIGGRAPH conference. ACM is an umbrella organization that has been serving information technology professionals since its inception in 1947. Through its magazines, journals, books, SIGs, and conferences, ACM offers its members access to the latest developments in information technology. Visit the ACM Booth, located in the south lobby area of SIGGRAPH 97. Special discounted conference rates will be available on membership, ACM Press Books, and the SIGGRAPH Books Series. Make sure to examine the new title available through ACM Press, *Digital Illusion: Entertaining the Future With Interactive Technology*, by Clark Dodsworth. Pick up free sample copies of *Communications of the ACM*, *Interactions - New Visions of Human-Computer Interaction*, and *netWorker*, *The Craft of Network Computing*. For more information, contact:

#### ACM

1515 Broadway  
New York, New York 10036 USA  
800.342.6626  
(Continental US and Canada)  
+1.212.626.0500 (Worldwide)  
+1.212.944.1318 fax  
acmhelp@acm.org

#### SIGGRAPH One More Time

SIGGRAPH once again offers the opportunity to purchase conference proceedings, CD-ROMs, and slide sets from previous SIGGRAPH annual conferences as well as from other SIGGRAPH-sponsored conferences and workshops. Many items are in very limited quantities. For more information contact:

Stephen Spencer  
spencer@siggraph.org

#### SIGGRAPH 98

Welcome to SIGGRAPH 98! The 25th SIGGRAPH Conference convenes 19-24 July in Orlando, Florida, to celebrate the convergence of past and future, technology and imagination, and the people who create computer graphics in all its amazing manifestations. Pick up a copy of the SIGGRAPH 98 Call for Participation. Meet the SIGGRAPH 98 Committee. And let us know how you can help us astound the world in Orlando. For more information contact:

SIGGRAPH 98 Conference Management  
Smith, Bucklin & Associates, Inc.  
401 North Michigan Avenue  
Chicago, Illinois 60611 USA  
+1.312.321.6830  
+1.312.321.6876 fax  
siggraph98@siggraph.org

#### Education

Education is the word most often used to describe SIGGRAPH's mission. SIGGRAPH's Education Committee supports computer graphics education, the use of computer graphics in education, and activities at many levels in many disciplines in many countries. The Education Committee booth features SPACE, a juried exhibition of student animations and posters, and a display of student slides submitted by faculty from around the world, and SPICE (Student Projects for Interactive Concepts in Education). The booth also serves as a central meeting area for educators who wish to make contact with others and to exchange information. The Education Committee welcomes new ideas and volunteers. For information, contact:

Marc Barr, SIGGRAPH Director for Education  
#58 Middle Tennessee State University  
Murfreesboro, Tennessee 37132 USA  
+1.615.898.5118  
+1.615.898.5682 fax  
barr@siggraph.org

#### SIGGRAPH Professional Chapters

The Professional Chapters of ACM SIGGRAPH, formerly called Local Groups, exist in over 30 cities in 10 countries around the world. They form an international multi-cultural network of like-minded people who develop, continue, and extend the work and achievements presented at the annual ACM SIGGRAPH Conference. Each chapter includes members involved in education, the arts, research, development, industry, and entertainment who are interested in the development of computer graphics and its related technologies and applications. Here is your opportunity to continue your SIGGRAPH experience by joining a professional chapter. If there is no professional chapter in your local area, inquire at the SIGGRAPH Professional Chapters Booth about how to form one. For more information contact:

Scott Lang  
SIGGRAPH Director for Professional Chapters  
lang@siggraph.org  
<http://www.siggraph.org/chapters>

#### SIGGRAPH Video Review

SIGGRAPH Video Review is the world's most widely circulated video-based publication. Since 1979, SIGGRAPH Video Review has illustrated the latest concepts in computer graphics and interactive techniques/technologies. Over one hundred programs provide an unequalled opportunity to study advanced computer graphics theory and applications. SIGGRAPH Video Review tapes are available at SIGGRAPH 97 in NTSC VHS and PAL VHS. For more information contact:

# SIGGRAPH 98

**In the summer of 1974,**

325 pioneers of an esoteric fringe of computing technology met in Boulder, Colorado to discuss whether and how and why machines might someday help human beings create useful images. In July 1998, they and over 30,000 of their intellectual and creative descendants will gather in Orlando to celebrate the 25th international conference on computer graphics and interactive techniques.

**Cool!**

**Where will you be next summer**, the next time the international computer graphics community gathers to share its knowledge, creativity, history, and vision? This is your invitation to be in Orlando, and be SIGGRAPH 98!

Join the SIGGRAPH 98 Committee and 30,000 of your closest friends to celebrate 25 years of inventing the future. To explore the latest research, the finest images, the far-out applications, the down-to-earth problem solving, the serious adventures, and the world-class fun of the 25th international conference on computer graphics and interactive techniques.

Orlando is a global capital of location-based entertainment, where your whole family's sense of wonderment will be stretched to new horizons. SIGGRAPH 98 is next year's computer graphics celebration of the dreaming, thinking, speculating, planning, and laughter that light the way to the new century.

For all the details on how you and your work can be part of SIGGRAPH 98:

[www.siggraph.org/s98/](http://www.siggraph.org/s98/)

**SIGGRAPH 76:** 10 small companies displayed their products on folding tables at the University of Pennsylvania.

**SIGGRAPH 74:** Computer graphics was mostly academic.

**SIGGRAPH 82:** Morphing appears at SIGGRAPH.

**SIGGRAPH 88:** The first SIGGRAPH demonstration of virtual reality.

### **papers**

The world's premier annual forum for the latest and greatest research findings in computer graphics and interactive techniques.

### **panels**

Ideas, insights, aspirations, controversies, questions, successes, failures, and revelations.

### **courses**

Expert instruction in an immense range of computer graphics topics, from traditional to leading-edge.

### **sketches**

Informal presentations of new concepts, unique collaborations, late-breaking results, works in progress, and novel applications.

### **educators program**

Exploration of computer graphics at all levels of education, in papers, panels, workshops, and a new hands-on demonstration area: The Electronic Schoolhouse.

### **emerging technologies**

Enhanced Realities (advanced human-machine interaction), high-bandwidth networked graphics, Interactive Art, and sigKIDS INterACTIVE.

### **computer animation festival**

The past, present, and future of worldwide adventures in computer animation.

### **art gallery: touchware**

Creative achievements that reveal the simultaneity of touch as a sensory experience and the ephemeral experience of being in touch electronically.

### **community outreach**

Extending computer graphics beyond SIGGRAPH 98 to empower citizens, families, schools, industries, and institutions.

### **sigKIDS**

Engaging young, adventurous minds in the art and science of computer graphics to inspire a lifetime of learning.

### **creative applications laboratory**

Hands-on exploration of the concepts presented in Papers, Panels, Courses, and Sketches.

### **SIGGRAPH TV**

Documenting and delivering SIGGRAPH 98 to the global computer graphics community.

### **25th conference celebration**

Exhibits and events celebrating 25 years of computer graphics, interactive techniques, and SIGGRAPH experiences.

### **exhibition**

All the industry's most advanced, and most practical, products and services.

25th International Conference  
on Computer Graphics and  
Interactive Techniques
