The TOP 10 Reasons to Attend **SIGGRAPH 2012**

Knowing that the majority of SIGGRAPH conference attendees rely on their employers to fund their registration and travel in part or in full, we have developed the following persuasive talking points for your employer.

1. Value

Learn all the latest techniques, tips, and technologies in one location at a very reasonable price. SIGGRAPH 2012's exclusive educational programs offer the best return on investment for your organization's training budget.

2. Experts In-Residence

Consolidate new knowledge and skills by working directly with the experts in the field. In SIGGRAPH 2012's papers, courses, talks, and studio, you'll develop the professional assets you need for another year of creative and business success.

3. Time Optimization

Explore the full spectrum of computer graphics and interactive techniques in one intense, rewarding week. At SIGGRAPH 2012, you'll gain knowledge, contacts, and skills that could take more than a year to acquire elsewhere.

4. Customization

Design the conference experience that delivers the best value for you and your organization. SIGGRAPH 2012 offers a very diverse range of sessions, experiences, and collaboration opportunities.

5. Industry Visionaries

Meet and exchange ideas with the superstars who created this dynamic field and the young visionaries who are building its future.

6. Connections

Join your friends and colleagues from around the world, and make invaluable new connections. SIGGRAPH 2012 is the annual destination location for computer graphics and interactive techniques.

7. Essential Resources

Discover all the resources you need to support your creativity, improve your efficiency, and grow your business. The SIGGRAPH 2012 Exhibition features hardware, software, and services from the leading companies in the industry.

8. World-Class Animation and Visual Effects

Immerse yourself in this year's best work in animated storytelling, scientific visualization, advertising, games, and feature films. The Computer Animation Festival presents four days of screenings and live demos.

9. Los Angeles

Enjoy this world-class, entrepreneurial city where exploration, innovation, and experimentation merge with the creativity, advanced technology, and business innovation that have made SIGGRAPH the international capital of digital media.

10. Inspiration

Leave SIGGRAPH 2012 with new skills, creativity, and energy, ready to rejuvenate your career and inspire your organization's next phase of leadership in computer graphics and interactive techniques.

Keynote Speaker

#siggraph #keynote

Jane McGonigal

Chief Creative Officer for SuperBetter Labs

Monday, 6 August, 11am-1pm

Jane McGonigal's *Reality Is Broken: Why Games Make us Better and How They Can Change the World* (2011) is in digital and analog bookstores everywhere. She is a game researcher, developer, player, theorist, and evangelist:

“My #1 goal in life is to see a game designer nominated for a Nobel Peace Prize. I’ve forecast that this will happen by the year 2023. Of course, it’s not enough to just forecast the future — I’m also actively working to make it a reality.”

She uses alternative reality games (ARGs) to conduct research, build communities, connect with markets, and solve real-world problems. She directed the world’s first massively multiplayer forecasting game, Superstruct, which brought together more than 7,000 future forecasters from 90 countries. Her games work to solve many real-world challenges from curing disease to addressing issues of poverty, hunger, and a world without petroleum.

She is the Director of Game Research and Development at the Institute for the Future in Palo Alto, California, where she earned Harvard Business Review honors for one of the Top 20 Breakthrough Ideas of 2008. *The New York Times* featured her as one of 10 scientists with the best vision for what’s coming next, *BusinessWeek* called her one of the Top 10 Innovators to Watch, and *Fast Company* named her one of the 100 Most Creative People in business.

Conference Overview

■ Reception

Monday, 6 August 9-11 pm

The international SIGGRAPH community's highest-energy, best-attended social event of the year. Drink a toast to your colleagues' achievements, and your own. Share dessert and a convivial evening with people you haven't seen since SIGGRAPH 2011. And meet the people you need to know for another year of professional success and adventure.

■ ● + ACM SIGGRAPH Awards Presentations (included with Keynote Speaker)

🐦 #siggraph #awards

■ ● + ACM SIGGRAPH Award Talks

🐦 #siggraph #awards

The Computer Graphics Achievement Award

Awarded annually to recognize a major accomplishment that provided a significant advance in the state of the art of computer graphics and is still significant and apparent.

The Significant New Researcher Award

Awarded annually to a researcher who has made a recent significant contribution to the field of computer graphics and is new to the field. The intent is to recognize people who, though early in their careers, have already made a notable contribution.

The Distinguished Artist Award for Lifetime Achievement in Digital Art

Awarded annually to an artist who has created a substantial and important body of work that significantly advances aesthetic content in the field of digital art.

ACM SIGGRAPH Outstanding Service Award

This award, is given on even-numbered years to recognize outstanding service to ACM SIGGRAPH by a volunteer. It recognizes persons who have given extraordinary service to ACM SIGGRAPH, both in the trenches and in positions of more responsibility or visibility, over a significant period of time.

■ ● + ▲ ★ ACM Student Research Competition

🐦 #siggraph #awards

Twenty-five student posters are selected for judging at SIGGRAPH 2012. The panel of distinguished judges selects five semi-finalists. The semi-final poster authors present their work to the judges.

■ ● + ★ Art Gallery: In Search of the Miraculous

🐦 #siggraph #artgallery

Unique perspectives reveal moments of wonderment in a technologically mediated world.

■ ● + ▲ ★ Birds of a Feather (BOF)

🐦 #siggraph #bof

Informal presentations, discussions, and demonstrations, designed by and for people who share interests, goals, technologies, environments, or backgrounds.

■ Courses

🐦 #siggraph #courses

Expand your knowledge and enhance your career. Industry and academic experts teach SIGGRAPH 2012 Courses on the fundamental principles of computer graphics and interactive techniques, practical solutions to everyday challenges, and advanced theoretical approaches to the next wave of innovation.

■ ● + ★ Emerging Technologies

🐦 #siggraph #etech

Adventurous robotic experiments, pre-production prototypes of glasses-free 3D displays, speculative plant-based interfaces, force-feedback haptic displays, and other futuristic systems, all available for hands-on interaction.

Sponsored by

■ ● + ▲ ★ Exhibition

🐦 #siggraph #exhibits

Discover all the resources you need to support your creativity, improve your efficiency, and grow your business. The SIGGRAPH 2012 Exhibition features hardware, software, and services from the leading companies in the industry.

■ ● + ▲ ★ Exhibitor Tech Talks

🐦 #siggraph #techtalks

Get the inside story direct from the commercial developers of tomorrow's hot hardware, software, and systems. Join question-and-answer exchanges and one-on-one conversations with the presenters after each presentation by exhibitors who participate in the SIGGRAPH 2012 Exhibition.

■ ● + ▲ ★ International Resources

🐦 #siggraph #international

Learn how the industry is evolving worldwide and collaborate with attendees from five continents. The International Center offers informal translation services, and space for meetings, talks and demonstrations.

Conference Overview

SIGGRAPH Business Symposium

Sunday, 5 August, 8 am-5:30 pm

A full day of frank discussions, networking opportunities, talks, and panels that investigate critical international issues related to intellectual property, venture capital, complex legal systems, and other topics vital to the health and welfare of a global creative community.

A **separate admission fee** is required for the SIGGRAPH Business Symposium. It is **not included** in any of the SIGGRAPH 2012 registration categories.

#siggraph #symposium

■ ● + ▲ ★ Job Fair

#siggraph #jobfair

Looking for opportunity? Interested in meeting with some inspiring companies? Discover your future at SIGGRAPH 2012. In the Job Fair, attendees connect with employers before, during, and after the conference via the CreativeHeads.net job board and candidate profiling system.

■ Panels

#siggraph #panels

Expert panelists share experiences, opinions, insights, speculation, disagreement, and controversy with each other and the audience. Panel topics range from motion-controlled gaming to the growing use of virtual production in game and film creation.

■ Papers

Explore the most advanced research results in computer graphics and interactive techniques. These prestigious juried sessions are the premier international forums in their respective fields.

Technical Papers

#siggraph #techpapers

The premier international forum for peer-reviewed research in computer graphics and interactive techniques. SIGGRAPH Technical Papers reveal new directions and define the future of imaging, interfaces, interaction, and international collaboration.

Art Papers

#siggraph #artpapers

Scholars and artists report and analyze their recent findings on current trends in digitally mediated art.

■ ● + ▲ ★ Posters

#siggraph #posters

Student, in-progress, and late-breaking work on novel interactive techniques and in-depth research in specific areas. Posters are displayed throughout the conference, and poster authors meet and discuss their work with attendees during Poster Presentations.

■ ● + ▲ SIGGRAPH Dailies!

#siggraph #dailies

This celebration of excellence in modeling, shading, animation, lighting, effects, and more showcases images and short animations of extraordinary power and beauty. Each presenter has one minute to present an animation and describe the work.

Sponsored by

■ SIGGRAPH Mobile **New!**

#siggraph #mobile

Inspired by SIGGRAPH Asia 2011's popular Symposium on Apps, this new program presents the latest advances in mobile technologies. Explore what's possible, and when, for computers that can remain in their bags at security checkpoints.

■ ● + ★ Studio

#siggraph #studio

A hands-on creative space for art and design of all kinds. Try out a wide range of new techniques and media. Play with the latest in 3D printing, modeling, and animation software. Bring your ideas to life with tomorrow's technologies in gigapixel imaging, motion capture, and more.

■ Talks

#siggraph #talks

Discover recent achievements and work in progress in all areas of computer graphics and interactive techniques: art, design, animation, visual effects, interactivity, research, engineering, and games. Talks take you behind the scenes and into the minds of the innovators who are leading the way in computer graphics and interactive techniques.

■ ● + ▲ Technical Papers Fast Forward

#siggraph #techpapers

The world's leading experts in computer graphics and interactive techniques preview the technical papers in provocative, sometimes hilarious summaries of the field's evolution. The author(s) of each paper are allowed a little less than a minute to wow the crowd with their results and entice attendees to hear their complete paper presentation later in the week.

Computer Animation Festival

- Full Conference Access
- ▲ Computer Animation Festival
- + Basic Conference Plus
- 🐦 #siggraph #caf

The world's most prestigious annual festival of amazing innovation in digital film and video includes outstanding achievements in time-based art, scientific visualization, visual effects, real-time graphics, animation, and narrative shorts. Relax and enjoy an amazing compilation of animated works ranging from student pieces to blockbuster video games and feature films.

The Computer Animation Festival is recognized by the Academy of Motion Picture Arts and Sciences as a qualifying festival. Since 1999, several works originally presented in the Computer Animation Festival have been nominated for or have received a “Best Animated Short” Academy Award.

Real-Time Live!

Real-Time Live! is the premiere showcase for the latest trends and techniques for pushing the boundaries of interactive visuals. As part of the Computer Animation Festival, an international jury selects submissions from a diverse array of industries to create a fast-paced, 90-minute show of cutting-edge, aesthetically stimulating real-time work.

Pixomondo Presents Hugo: A Cinematic Convergence of 3D and Visual Effects

Monday, 6 August, 9-10:30 am

In "Hugo", Martin Scorsese's love letter to classic cinema and cinema history, the director was passionate about pushing the capabilities of stereoscopic filmmaking to new heights. Pixomondo developed custom workflows to handle complex challenges in VFX and capture all of the live-action production data required to accommodate the rigorous effects and post-production demands of the project. This Pixomondo panel discusses the creative and technical challenges they overcame to achieve Scorsese's vision for early filmmaking in stereo 3D. Also joining them will be New Deal Studios visual effects supervisor, Matthew Gratzner, who was responsible for creating the train crash sequence in the film.

Panelists

Assembling the VFX for Marvel's "The Avengers"

Monday, 6 August, 2-3:30 pm

Leaders of the visual effects teams from Industrial Light & Magic and Weta Digital will discuss the unique effects challenges that this blockbuster film presented and how the studios broke new ground with their respective approaches to creating the seamless effects work. From the epic Mountain Battle between Iron Man and Thor and the climatic alien invasion of Manhattan to bringing the Hulk to life, the supervisors will detail what worked, what didn't and the complexities involved in bringing "The Avengers" to the big screen.

Panelists

Building Disney•Pixar's "Brave": Pencils to Pixels

Monday, 6 August, 3:45-5:15 pm

From bouncing red curls to gusty dark forests, this panel summarizes how Disney•Pixar created their summer 2012 film: "Brave." The artists lead a guided tour through "Brave's" production pipeline, illustrating the kind of exploration and problem-solving required to move an asset from initial design through characters and sets, animation, and lighting, and into a final rendered frame.

Sony Pictures Animation: Checking in at "Hotel Transylvania"

Tuesday, 7 August, 9-10:30 am

Welcome to "Hotel Transylvania", Dracula's lavish five-star resort, where monsters and their families can live it up, free to be the monsters they are without human interference. For one special weekend, Dracula invites some of his best friends – Frankenstein and his bride, the Mummy, the Invisible Man, the Werewolf family, and more – to celebrate his beloved daughter Mavis's 118th birthday. In this session, first-time feature director Genndy Tartakovsky ("Dexter's Laboratory", "Samurai Jack", "Clone Wars") and the creative team behind "Hotel Transylvania" explore the art, unique animation style, and technical achievements of Sony Pictures Animation's new animated feature.

Digital Domain Presents "Making the Steel Real: Moving VFX Into Production"

Tuesday, 7 August, 10:45 am-12:15 pm

Nominated for a visual effects Academy Award, DreamWorks' "Real Steel" was recognized not only for its rollicking boxing matches between CG robots, but also for the seamless way the film moves between practical robots and their CG counterparts. In this panel, some of the "Real Steel" filmmakers walk through robot design, explain key techniques and shots, and share the groundbreaking virtual-production process that they packed up and moved to Detroit, which compressed the shooting schedule to 71 days with no second unit.

Sony Pictures Imageworks: Travel Behind the Scenes of “Men in Black 3”

Tuesday, 7 August, 10:45 am-12:15 pm

Sony Pictures Imageworks’ visual effects for “Men in Black 3” included diverse and richly detailed characters and environments, all created with a heightened sense of realism. With a mix of humor and style, the Men in Black return to 1969 with a digital re-creation of New York’s Shea Stadium and the Apollo 11 rocket launch, and an action-packed monocycle chase through the streets of Brooklyn. This panel explores the challenges and achievements of producing the visual effects for “Men in Black 3”.

Sony Pictures Imageworks: The Untold Story of “The Amazing Spider-Man”

Tuesday, 7 August, 2-3:30 pm

Sony Pictures Imageworks oversaw the visual effects for the untold story of Spider-Man, set in a gritty, edgy urban world. The VFX team established a visual style that naturally blends cutting-edge live-action stunt work, extensive digital environments, and CG character animation. This panel provides a revealing inside look at VFX production for an “amazing” film.

Rhythm & Hues Studios: 25 Years of Art, Technology and People

Tuesday, 7 August, 3:45-5:15 pm

In this panel and presentation, an array of artists and executives associated with the past and present of Rhythm & Hues Studios explore the many factors that have led to the studio’s longevity and success. Highlights include a retrospective of the company’s early days, from its origins at the pioneering CGI company Robert Abel and Associates in the 1970s and 80s and the founding of Rhythm & Hues in 1987, to its groundbreaking animation work in the 90s and its recent work “The Chronicles of Narnia: The Lion, the Witch and the Wardrobe”, VFX Oscar-winner “The Golden Compass”, “The Incredible Hulk”, the “Alvin & The Chipmunks” franchise, and more.

LAIKA’s ParaNorman: The Fusion of Stop-Motion and CG in a Zombie-Ridden World

Wednesday, 8 August, 9-10:30 am

Get a first-hand, 3D look at ParaNorman’s interdependent combination of stop-motion and CG in an environment where hand-crafted movement is seamlessly integrated with computer technology, from initial concept to final frame. In this session from LAIKA, Academy Award-winner Brian Van’t Hul (VFX Supervisor) is joined by Steve Emerson (Compositing Supervisor) and Andrew Nawrot (CG and Look Development Supervisor). They will discuss the collaborative relationship of the technologies in the upcoming feature ParaNorman (in theaters August 17).

Balancing Act: Life as a Visual Effects Supervisor at DreamWorks Animation

Wednesday, 8 August, 2-3:30 pm

In this panel, the Visual Effects Supervisors for the last two and next two DreamWorks Animation films discuss how they approached each production. In the studio environment, there are opportunities to share development with other shows, but differing visual requirements also mean each show has unique needs. How do the visual-effects teams balance the safety of using tried-and-true-techniques with the requirements to create ever more visually sophisticated and complex work? How do they manage the benefits of sharing across shows with the specific needs of their show? Each panelist shares some successes (and failures!) from their most recent projects.

Weta Digital Presents Virtual Production: Combining Animation, Visual Effects, and Live-Action Filmmaking

Wednesday, 8 August, 3:45-5:15 pm

Four-time Oscar-winning Senior Visual Effects Supervisor, Joe Letteri, presents Weta Digital's pioneering virtual-production work on "The Adventures of Tintin" and "Avatar". His talk also addresses workflow development at Weta going all the way back to "The Lord of the Rings" and suggests some areas of future development. Weta sees virtual production as a connected, holistic approach to filmmaking that melds the best of animation and live-action techniques in pre-production, onset, and post. This presentation demonstrates how virtual production brings all of the components of filmmaking together to provide a way of working that has attracted directors like Peter Jackson, James Cameron, and Steven Spielberg.

High Frame Rate Cinema, Impacts on Art and Technology With Douglas Trumbull and Dennis Muren: Moderated by Christie Digital

Wednesday, 8 August, 10:45 am-12:15 pm

Some of the biggest movies on the horizon – "Avatar's" sequels and "Lord of the Rings" prequels – will be presented in stereoscopic 3D high-frame-rate cinema. Peter Jackson and James Cameron are betting on their expectation that audiences will love the more immersive and detailed worlds that these 3D productions can offer. But what is high-frame-rate cinema, and what will it mean to producers of content and to the audience experience? This panel of experts explains high-frame-rate cinema and discusses the implications of producing and experiencing cinematic content in the new medium.

The Art and Science Behind Walt Disney Animation Studios' "Paperman"

Thursday, 9 August, 10:45 am-12:15 pm

Applying a technique that seamlessly merges computer-generated and hand-drawn animation techniques, first-time director, John Kahrs, takes the art of animation in a bold new direction with "Paperman". Using a minimalist black-and-white style, the short film follows the story of a lonely young man in mid-century New York City, whose destiny takes an unexpected turn after a chance meeting with a beautiful woman on his morning commute. In this panel, members of the small, innovative group at Walt Disney Animation Studios that created "Paperman" share their insights about the art, design, and technology of this innovative project.

6-8 pm

Technical Papers Fast Forward

8:30-11 pm

BOF: Taipei ACM SIGGRAPH Chapter Reunion

Conference Overview

Monday, 6 August

9-10 am

BOF: Exploring Software Delivery and Pipeline Choices for Students in the Cloud

9-10:30 am

Computer Animation Festival Production Session:

Pixomondo Presents Hugo: A Cinematic Convergence of 3D and Visual Effects

Course: Computational Plenoptic Imaging

Course: Computational Aesthetic Evaluation: Steps Toward Machine Creativity

Panel: Virtual Production Branches Out

Studio Talks: Jamming

Studio Workshop: Material is Expensive But Complexity is Free

Talks: Pointed Illumination

Technical Papers: Character Locomotion

Technical Papers: Shape Analysis

9 am-5:35 pm

Geek Bar

9 am-6 pm

International Center

ACM SIGGRAPH Theater Event: International Sessions on the Current State of Computer Graphics Around the World

11 am-Noon

BOF: ASIFA-Hollywood Animation Educators Forum Asks: How Do We Maintain Excellent Animation Programs and Teach the Latest Technology at the Same Time?

11 am-1 pm

ACM SIGGRAPH Award Presentation

Keynote Speaker: Jane McGonigal, Chief Creative Officer for SuperBetter Labs; Author of The New York Times Best Seller, *Reality Is Broken*

Noon-1 pm

BOF: The ACME Network Presents: Animation and 21st Century Skills – Mentoring From the Front Line, Online

1-1:50 pm

ACM SIGGRAPH Theater Event: CG in Australasia + Sydney ACM SIGGRAPH Chapter

1-2 pm

BOF: Teaching Procedural Workflows

1-2:30 pm

BOF: Undergraduate Research Alliance

2-3 pm

BOF: Skyline: Open Sourcing the Pipeline

2-3 pm

BOF: Teaching Artists to Program With Algorithmic Art

2-3:30 pm

ACM SIGGRAPH Award Talks

Course: Virtual Texturing in Software and Hardware

Studio Talks: Design Computing I

Studio Workshop: Presenting Mojito: A Yahoo! Library Implementing a JavaScript-Based On-Line/Off-Line, Multi-Device, Hosted Application Platform

Talks: Head in the Clouds

Technical Papers: Cloth

Technical Papers: Image Processing

2-5:15 pm

Course: Introduction to Modern OpenGL

2:30-3:20 pm

ACM SIGGRAPH Theater Event: ACM SIGGRAPH Student Chapters

3-4 pm

BOF: 3D Animation Education Around the World

3:30-4:20 pm

ACM SIGGRAPH Theater Event: CG in Africa + Middle East

3:45-5:15 pm

Computer Animation Festival Production Session:

Building Disney•Pixar's "Brave": Pencils to Pixels

Studio Talks: Grooving

Talks: Surf & Turf

3:45-5:35 pm

Talks: Material: The Gathering

Technical Papers: Appearance

Technical Papers: Hand, Eye, and Face

Technical Papers: Sketching

4-5 pm

BOF: Visualization/Visual Analytics Curriculum

5-6 pm

BOF: Hacking Objects: An Exploration in Rule Breaking

6-7:30 pm

BOF: The 25th Anniversary CG Show/Sake Barrel Opening Party at SIGGRAPH 2012

6-8 pm

Computer Animation Festival: Electronic Theater

Conference Overview

8:30 pm–2 am

ACM SIGGRAPH Chapters Party

9-11 pm

Conference Reception

Tuesday, 7 August

9-10:30 am

Art Papers: Expanding Boundaries: Sensory Technologies in Art Making

BOF: Women In Animation International

Computer Animation Festival Production Session: Sony Pictures Animation: Checking in at “Hotel Transylvania”

Course: Cinematic Color: From Your Monitor to the Big Screen

Studio Talks: Wild Rides

Studio Workshop: ZBrush: Artists Without Borders

Technical Papers: Fabrication

9 am-5:35 pm

Geek Bar

9 am-6 pm

International Center

ACM SIGGRAPH Theater Event: International Sessions on the Current State of Computer Graphics Around the World

9:30 am-6 pm

Exhibition

9:30 am-6 pm

Job Fair

9 am-12:15 pm

Course: Beyond Programmable Shading

Course: Data-Driven Simulation Methods in Computer Graphics: Cloth, Tissue, and Faces

Course: Practical Physically Based Shading in Film and Game Production

10:45 am-12:15 pm

Art Panel 1: In Search of the Miraculous

Art Papers: Mediating the Material and the Immaterial: The Embodiment of Sound, Light, and Social Life in Spatial Practices

Computer Animation Festival Production Session: Digital Domain Presents “Making the Steel Real: Moving VFX Into Production”

Computer Animation Festival Production Session: Sony Pictures Imageworks: Travel Behind the Scenes of “Men in Black 3”

Studio Workshop: Python Scripting in Maya

Technical Papers: Geometry Reconstruction & Tracking

Technical Papers: Sampling, Reconstructing, and Filtering Light

11 am-12:30 pm

BOF: From CAD to the Web

11 am-1 pm

BOF: Substrate: Mobile Gesture for the Processing Graphics Environment

11:15 am-12:15 pm

Exhibitor Tech Talk: Unity Technologies – Unity Art Pipeline, Butterfly Demo

Noon-1:20 pm

ACM SIGGRAPH Theater Event: ISEA International Foundation - Open Forum

12:15-1:15 pm

Poster Presentations

12:30-2:30 pm

BOF: ACM SIGGRAPH Carto BOF

12:45-1:45 pm

Exhibitor Tech Talk: AMD – AMD FirePro Advanced 3D Graphic and Compute Features & AMD FirePro 3D Graphics and Compute Combined on Latest GPU Architecture in Deep Dive

1-2:30 pm

BOF: Kinect Users

1:30-2:30 pm

ACM SIGGRAPH Theater Event: CG in Latin America

2-3:30 pm

Computer Animation Festival Production Session: Sony Pictures Imageworks: The Untold Story of “The Amazing Spider-Man”

Studio Talks: Big Game

Talks: Model Stories

Talks: Three is a Crowd

Technical Papers: Light Rays

Technical Papers: Particle Fluids

Technical Papers: Sets of Shapes

2-5:15 pm

Course: Character Rigging and Creature Wrangling in Game, Feature Animation, and Visual Effects Production

2:15-3:15 pm

Exhibitor Tech Talk: Next Limit Technologies – RealFlow 2013 Technology Preview

2:30 pm - 3:30 pm

BOF: 3D Medical Visualization Using X3D

Studio Workshop: MaxScript for Artists

Conference Overview

Tuesday, 7 August (continued)

3-4 pm

ACM SIGGRAPH Theater Event: CG in Asia

3-4:30 pm

BOF: Practical Application of Alembic

3-5 pm

BOF: Motion Graphics

3:30-5 pm

BOF: JogAmp: 2D/3D & Multimedia Across Devices

BOF: Web3D Consortium Town Hall Meeting

3:40-4:40 pm

Exhibitor Tech Talk: CentiLeo - Huge-Scene Interactive Rendering on a Laptop

3:45-5:15 pm

Computer Animation Festival Production Session: Rhythm & Hues Studios: 25 Years of Art, Technology and People

Course: Delivering Creative Feedback: A Workshop on Critique

Course: Applying Color Theory to Digital Media and Visualization

Studio Talks: Digifab

Studio Workshop: Signal Strength: Activist Networking Techniques

3:45-5:35 pm

Technical Papers: Control Deformables

Technical Papers: Fun With Video

Technical Papers: Noise and Texture

4-5 pm

Educators Meet and Greet

4-6 pm

BOF: ACCAD/Ohio State Alumni Gathering

5:05-6 pm

Exhibitor Tech Talk: Imagination Technologies Limited – Accelerating Look Development With Rhinoceros Interactive Ray-Traced Viewports

5:30-7 pm

BOF: Dynamic Simulation in Production

6-8 pm

ACM SIGGRAPH Pioneer Reception (Open to Pioneer members only)

Computer Animation Festival: Electronic Theater

6:15-7:45 pm

SIGGRAPH Dailies!

7-8 pm

BOF: Animation: From Visual Development to Art Direction

8-9 pm

BOF: Image-Based Lighting Using Pixar's RenderMan

Wednesday, 8 August

9-9:50 am

ACM SIGGRAPH Theater Event: ACM SIGGRAPH Chapters Business Meeting

9-10 am

Exhibitor Sessions: Intel Corporation - Embree: Photo-Realistic Ray Tracing Kernels

9-10:30 am

Computer Animation Festival Production Session: LAIKA's "ParaNorman": The Fusion of Stop Motion and CG in a Zombie-Ridden World

Exhibitor Sessions: Intel Corporation - Embree: Photo-Realistic Ray Tracing Kernels

SIGGRAPH Mobile Panel: Mobile GPUs: Markets and Technology

Studio Talks: Doing Design

Studio Workshop: Making Your Own Avatar - Realistic Faces and Expressions Workshop

Talks: Priming the Pipe

Technical Papers: Displays

Technical Papers: Shape Transformation

9 am-12:15 pm

Course: FEM Simulation of 3D Deformable Solids: A Practitioner's Guide to Theory, Discretization, and Model Reduction

Course: Advances in Real-Time Rendering in Games: Part I

9 am-5:30 pm

Exhibitor Session: NVIDIA

9 am-5:35 pm

Geek Bar

9 am-6 pm

International Center

ACM SIGGRAPH Theater Event: International Sessions on the Current State of Computer Graphics Around the World

9:30 am-6 pm

Exhibition

Job Fair

9:45-10:45 am

Art Panel 2: The Message is in the Medium

Exhibitor Tech Talk: Qt Commercial, Digia – Learn How to Develop Powerful Advanced Visualization Applications and UIs With Qt Commercial

Conference Overview

Wednesday, 8 August (continued)

10-11 am

BOF: 3D Modeling Standards Development

BOF: OpenScenegraph BOF

BOF: X3DOM a Declarative 3D Solution

10 am-Noon

BOF: Christians in Computer Animation

BOF: Collaboration Between Education and Industry: The New Model

10:45-11:45 am

Exhibitor Sessions: Intel Corporation - Efficient Anti-Aliasing on Intel HD graphics

10:45 am-12:15 pm

Computer Animation Festival Production Session: Industrial Light & Magic Presents: The Visual Effects of "Battleship"

Computer Animation Festival Production Session: High Frame Rate Cinema, Impacts on Art and Technology with Douglas Trumball and Dennis Murren

SIGGRAPH Mobile Talks: Understanding Mobile Graphics – GPUs and Platforms

Studio Workshop: VFX for Games: Pre-Baked Destruction

Talks: Capture the World

Technical Papers: Maps, Surfaces, and Shapes

Technical Papers: Stitching

11 am-12:30 pm

BOF: Augmented and Mixed Reality

11 am-1 pm

BOF: Using Advanced Imaging for Developing Dream Slides

11:15 am-12:15 pm

Exhibitor Tech Talk: AMD – AMD FirePro Advanced 3D Graphic and Compute Features & AMD FirePro 3D Graphics and Compute Combined on Latest GPU Architecture in Deep Dive

12:15-1:15 pm

Poster Presentations

12:30-1:20 pm

ACM SIGGRAPH Theater Event: Professional and Student ACM SIGGRAPH Chapters Start-Up Meeting

12:45-1:45 pm

Exhibitor Tech Talks: Web3D Consortium – Delivering New Dimensions on the Web

1-2:30 pm

BOF: *Leonardo* Community Meeting

1:30-2:30 pm

ACM SIGGRAPH Theater Event: CG in Europe

2-3 pm

BOF: COLLADA

BOF: Computer Graphics for Simulation

BOF: San Francisco ACM SIGGRAPH Meeting

Exhibitor Sessions: Intel Corporation - Optimizing Film and Media with OpenCL and Intel Quick Sync Video

2-3:30 pm

BOF: Studio Trainer Meet Up

Computer Animation Festival Production Session: Balancing Act: Life as a Visual Effects Supervisor at DreamWorks Animation

SIGGRAPH Mobile Talks: Mobile Graphics – Hardware and Software Techniques

Studio Talks: Space is the Place

Studio Workshop: Building a Game Level

Talks: Building Character

Talks: Play Time

Talks: Effects Omelet

Technical Papers: Interactive Systems & Hardware

2-4 pm

BOF: Animating Diversity

2-5:15 pm

Course: Advances in Real-Time Rendering in Games II

Course: GPU Shaders for OpenGL 4.x

2:15-3:15 pm

Exhibitor Tech Talk: Imagination Technologies Limited – Accelerating Look Development *With* Autodesk 3ds Max and Autodesk Maya Interactive Ray Traced Viewports

2:30-5:30 pm

BOF: Web3D Standards Meeting

3-4 pm

BOF: OpenCL

3-5 pm

BOF: Managing Creative Projects

BOF: Mari Massive Texture Painter Showcase

3:15-4:15 pm

Exhibitor Sessions: Intel Corporation - The Future of OpenCL for Graphics and Film Applications on Intel Platforms

3:45-4:40 pm

Exhibitor Tech Talks: Isotropix SAS – Introducing Artistically Correct Rendering

Conference Overview

Wednesday, 8 August (continued)

3:45-5:15 pm

Computer Animation Festival Production Session: Virtual Production: Combining Animation, Visual Effects, and Live-Action Filmmaking

SIGGRAPH Mobile Talks: Mobile Applications – In Your Hand and On the Road

Studio Talks: Mesh Mash

Studio Workshop: VFX for Games: Particle Effects

3:45-5:35 pm

Technical Papers: Collisions

Technical Papers: Perception and Stereo

Technical Papers: Physics and Mathematics for Light

4-5 pm

BOF: Renderfarming

4-5 pm

BOF: WebGL

4:30-5:30 pm

Exhibitor Sessions: Intel Corporation - The Future of Visual Computing as Viewed by Intel Visual Computing Research Centers

5-6 pm

BOF: OpenGL ES

5:05-6 pm

Exhibitor Tech Talk: Imagination Technologies Limited – PowerVR: Getting Great Graphics Performance With the PowerVR Insider SDK

5:30-7 pm

Real-Time Live!

6-7 pm

BOF: OpenGL

6-8 pm

Computer Animation Festival: Electronic Theater

6-9 pm

BOF: Purdue University Birds of a Feather

7:30-9:00 pm

BOF: University of Pennsylvania and ETH Zürich Reception

Thursday, 9 August

9-10:30 am

Studio Talks: Hackerspace Continuum

Studio Workshop: Intro to Arduino

Talks: Silence! Eliminate the Noise

Technical Papers: All About Images

Technical Papers: Sound and Elements

9 am-12:15 pm

Course: Advanced (Quasi) Monte Carlo Methods for Image Synthesis

Course: Efficient Real-Time Shadows

Course: Graphics Programming for the Web

9 am-3:30 pm

International Center

ACM SIGGRAPH Theater Event: International Sessions on the Current State of Computer Graphics Around the World

9 am-5:15 pm

Geek Bar

9:30 am-3:30 pm

Exhibition

Job Fair

10:45 am-12:15 pm

Computer Animation Festival: Electronic Theater

Studio Workshop: Smart Lighting With Arduino

Talks: John Carter Scales Up

Technical Papers: Layout and Parameterization

Technical Papers: Rigid Bodies and Penalty Forces

2-3:30 pm

ACM Student Research Competition Final Presentation

Computer Animation Festival Production Session: Ninja Theory Presents DmC Devil May Cry: Breathing Life Into Video Games

Talks: Fast Realistic Lighting

Talks: Hairy Scary

Technical Papers: Geometry and Viewing

Technical Papers: Mesh Based Fluids

2-5:15 pm

Course: State of the Art in Photon-Density Estimation

3:45-5:15 pm

Course: Color Transfer

Talks: Image Playground

Talks: PANDA: Panoramas, Displays and Acquisition

Technical Papers: Faces and Hair

Art Gallery: In Search of the Miraculous

- Full Conference Access
- Basic Conference Pass
- + Basic Conference Plus
- ★ Exhibitors
- 🐦 #siggraph #artgallery

Framed within the mystery of technology itself or the fascinations of a technologically mediated world, from unique interfaces to unique perspectives, the SIGGRAPH 2012 Art Gallery: In Search of the Miraculous, presents digital and technologically mediated artworks that reveal moments of wonderment.

Reception:

Leonardo, Art Papers, and Art Gallery

Tuesday, 7 August, 2-3:30 pm

Experience a sense of wonder in the digital era. Talk with the artists, designers, and Art Papers authors about their work. Meet the editors of Leonardo. And greet the members of the SIGGRAPH 2012 committee who organized this year's Art Gallery.

Sponsored by Leonardo/ISAST and The MIT Press

Daily Art Gallery Tours

Monday, 6 August – Wednesday, 8 August, 1-1:30 pm

Members of the Art Gallery committee offer 30-minute guided tours to introduce attendees to In Search of the Miraculous. The daily tours begin in the Art Gallery.

Art Papers

Full Conference Access
 #siggraph #artpapers

SIGGRAPH 2012, in collaboration with Leonardo/ISAST, features not only artists and artwork, but also the processes and theoretical frameworks for making art and contextualizing its place in society.

Art Papers:

- Explore the changing roles of artists and the methods of art-making in our increasingly networked and computationally mediated world.
- Present excellent ideas in accessible ways.
- Inform artistic disciplines, set standards, and stimulate future trends.

The papers are published in a special issue of *Leonardo*, *The Journal of the International Society of the Arts, Sciences and Technology*. The issue also includes visual documentation of the works exhibited in the Art Gallery. Publication of this special issue coincides with SIGGRAPH 2012.

Expanding Boundaries: Sensory Technologies in Art Making
Tuesday, 7 August, 9-10:30 am

Session Chair
 Victoria Szabo, Duke University

Translation + Pendaphonics = Movement Modulated Media

This paper describes a collaboration between an arts-technology research team and a performing-arts organization to create a computationally augmented, multimedia dance performed on a vertical wall.

Byron Lahey
 Winslow Burleson
 Arizona State University

Elizabeth Streb
 The STREB Extreme Action Company

From Wunderkammern to Kinect - The Creation of Shadow Worlds

This creative team presents their 3D scanning technologies and discusses how space itself can act as a shadow, how they suture the past with the present to reveal ways that light slips secretly between us to reveal other realms.

Mediating the Material and the Immaterial: The Embodiment of Sound, Light, and Social Life in Spatial Practices

Tuesday, 7 August, 10:45 am-12:15 pm

Session Chair
 Tad Hirsch
 University of Washington School of Art

Soundshperes: Resonant Chamber

Resonant Chamber is a responsive interior envelope system that deploys the principles of rigid origami to transform the acoustic environment through dynamic spatial, material, and electro-acoustic technologies. The project is developed through iterative research in computational testing and full-scale prototype installation.

Within an Ocean of Light: Creating Volumetric Lightscares

The Ocean of Light project uses volumetric visualization techniques based on 3D grids of individually addressable points of light to create compelling and immersive mixed-reality experiences.

Anthony Rowe
 Oslo School of Architecture and Design

Entr'acte

Entr'acte is a model from theater for analyzing and understanding hybrid and evanescent moments of the commons in transition today, for disciplining how we see and form public space and discourse.

Jordan Geiger
 University at Buffalo

Reception: Leonardo, Art Papers, and Art Gallery

Tuesday, 7 August, 2-3:30 pm

Experience a sense of wonder in the digital era. Talk with the artists, designers, and Art Papers authors about their work. Meet the editors of *Leonardo*. And greet the members of the SIGGRAPH 2012 committee who organized this year's Art Gallery.

Sponsored by Leonardo/ISAST and The MIT Press

Courses

■ Full Conference Access
 🐦 #siggraph #courses

Learn from the experts in the field and gain inside knowledge that is critical to career advancement. Courses are structured sessions that often include elements of interactive demonstration, performance, or other imaginative approaches to teaching.

Full Conference Access registration allows attendees access to all SIGGRAPH 2012 Courses. Seating is on a first-come, first-served basis. Please be sure to arrive early for the Course you wish to attend.

Fundamentals Seminar

Sunday, 5 August,
9 am-12:15 pm

The Fundamentals Seminar is a fun, three-hour introduction to computer graphics concepts that will help new attendees get the most from the conference. The seminar is especially important for educators, but it's open to all registered attendees.

Mike Bailey
Oregon State University

Computational Displays

Sunday, 5 August, 2-3:30 pm
Intermediate

An introduction to computational displays that exploit the co-design of optical elements and efficient computational processing, taking into account particular characteristics of the human visual system. Applications include 3D displays, next-generation projection systems, high-dynamic-range displays, perceptually driven devices, and computational probes.

Gordon Wetzstein
Douglas Lanman
MIT Media Lab

Diego Gutierrez
Universidad de Zaragoza

Matthew Hirsch
MIT Media Lab

The Hitchhiker's Guide to the Galaxy of Mathematical Tools for Shape Analysis

Sunday, 5 August, 2-5:15 pm
Intermediate

A practical mathematical guide for researchers in 3D shape analysis who need to understand the mathematical concepts most methods rely on. Attendees are introduced to basics in differential geometry, then proceed to the mysteries of algebraic topology, keeping an eye on computational counterparts and applications.

Silvia Biasotti
Bianca Falcidieno
Daniela Giorgi
Michela Spagnuolo
Istituto di Matematica Applicata e
Tecnologie Informatiche

State-of-the-Art Stereoscopic Visual Effects: Stereoscopy and Conversion are "More Than Meets the Eye"

Sunday, 5 August, 2-3:30 pm
Introductory

What to look for to articulate and identify poor quality conversion, an overview of the creative processes utilized in blockbuster film production, when it is appropriate to convert materials, and tips on how to shoot specifically for 2D-to-3D conversion.

Jonathan Karafin
Digital Domain Stereo Group

The Invisible Art: The History of Matte Painting Through the Digital Age

Sunday, 5 August, 2-3:30 pm
Introductory

Matte paintings, a mainstay in the filmmaker's repertoire, are used to create realistic illusions while working within strict budgets. This course focuses on matte painting in film, ranging from traditional matte paintings to modern techniques including 3D projections and software-generated matte backgrounds.

Craig Barron
Matte World Digital

Optimizing Realistic Rendering With Many-Light Methods

Sunday, 5 August, 2-5:15 pm
Intermediate

This course presents the state of the art in many-light rendering methods for global-illumination computation: scalability, real-time rendering, how to handle difficult lighting situations, and rendering of participating media, including Autodesk Cloud rendering.

Jaroslav Krivanek
Charles University in Prague

Milos Hasan
University of California, Berkeley

Adam Arbree

Carsten Dachsbacher
Karlsruher Institut für Technologie

Alexander Keller
NVIDIA Advanced Rendering Center

Cornell University

Courses

■  #siggraph #courses

Principles of Animation Physics
Sunday, 5 August, 2-5:15 pm
Introductory

Application of basic mechanics and bio-mechanics to character animation. No previous physics experience is required, but some character-animation experience is expected.

Alejandro Garcia
 San Jose State University

Storytelling With a Camera and a Computer: Q&A With Cinematographer Roger Deakins
Sunday, 5 August, 3:45-5:15 pm
Introductory

With nine Academy Award nominations and three BAFTA awards, 2011 ASC Lifetime Achievement Award recipient Roger Deakins, ASC, BSC, is one of the world's leading cinematographers. This course offers a rare opportunity to hear him discuss his ideas and approach to both live-action and animated features.

Computational Aesthetic Evaluation: Steps Toward Machine Creativity
Monday, 6 August, 9-10:30 am
Introductory

Current generative computer-art systems can blindly create form, but they typically lack a critical capacity in aesthetic evaluation. This course provides an overview of the evolution of computational aesthetic evaluation, empirical studies and psychological models of human aesthetic response, and contributions from the nascent field of neuroaesthetics in machine creativity.

Philip Galanter
 Texas A&M University

Computational Plenoptic Imaging
Monday, 6 August, 9-10:30 am
Introductory

An intuitive overview of joint optical and computational approaches to capturing the dimensions of the plenoptic function with a focus on light-field acquisition and ultra-fast imaging.

Gordon Wetzstein
 MIT Media Lab

Ivo Ihrke
 Universität des Saarlandes and Max-Planck-Institut für Informatik

Douglas Lanman
 MIT Media Lab

Wolfgang Heidrich
 The University of British Columbia

Ramesh Raskar
 MIT Media Lab

Kurt Akeley
 Lytro, Inc.

Virtual Texturing in Software and Hardware
Monday, 6 August, 2-3:30 pm
Intermediate

An introduction to partially resident textures, a hardware implementation of virtual texturing introduced on AMD Radeon HD 7xxx GPUs. The course contrasts partially resident textures with existing virtual texturing techniques deployed in the game RAGE and discusses the strengths and weaknesses of both techniques.

Juraj Obert
 Advanced Micro Devices, Inc.

J.M.P. van Waveren
 id Software LLC

Graham Sellers
 Advanced Micro Devices, Inc.

Introduction to Modern OpenGL
Monday, 6 August, 2-5:15 pm
Introductory

This introduction to programming with OpenGL – the mostly widely available programming library for creating computer graphics – showcases its most modern techniques and features.

Edward Angel
 University of New Mexico

Dave Shreiner
 ARM, Inc.

Beyond Programmable Shading
Tuesday, 7 August, 9 am-12:15 pm
Intermediate

This course provides information and instruction on bleeding-edge rendering techniques and hardware that combine parallel computation with traditional graphics pipelines.

Mike Houston
 Advanced Micro Devices, Inc.

Aaron Lefohn
 Intel Corporation

Johan Andersson
 DICE

Cinematic Color: From Your Monitor to the Big Screen
Tuesday, 7 August, 9-10:30 am
Intermediate

An introduction to the color pipelines behind modern feature-film visual effects and animation.

Jeremy Selan
 Sony Pictures Imageworks

Data-Driven Simulation Methods in Computer Graphics: Cloth, Tissue, and Faces
Tuesday, 7 August, 9 am-12:15 pm
Intermediate

This survey of the recent explosion of successful data-driven simulation methods presents a common theory of data-driven dynamic deformation methods that may inspire the development of novel solutions and makes data-driven approaches accessible.

Miguel Otaduy
 Universidad Rey Juan Carlos Madrid

Bernd Bickel
 Derek Bradley
 Disney Research Zürich

Huamin Wang
 The Ohio State University

Courses

Practical Physically-Based Shading in Film and Game Production
Tuesday, 7 August, 9 am-12:15 pm
Intermediate

Using examples from film and games, this course presents advances in the theory and production of physically-based shading, demonstrating how it enhances realism and leads to faster and more intuitive art creation.

- Stephen McAuley
Stephen Hill
Ubisoft Montréal
- Naty Hoffman
Activision Studio Central
- Yoshiharu Gotanda
tri-Ace

Pixar Animation Studios
- Brent Burley
Walt Disney Animation Studios
- Adam Martinez
Sony Pictures Imageworks

Character Rigging and Creature Wrangling in Game, Feature Animation, and Visual Effects Production
Tuesday, August 7, 2-5:15 pm

This course focuses on rigging, deformations, dynamics, and animation production practices in feature-film animation, visual effects, and video game development. Topics include: analysis of performance requirements, motion-system setup, procedural rigging for secondary animation, and efficient extension of techniques over a wide range of primary and secondary characters.

- Tim McLaughlin
Texas A&M University
- James Tooley
Industrial Light & Magic
- Ben Cloward
Bioware Austin

Delivering Creative Feedback: A Workshop on Critique
Tuesday, 7 August, 3:45-5:15 pm
Introductory

Delivering useful, honest, and effective feedback to creatives is one of the biggest daily challenges faced by producers, supervisors, teachers, etc. When critiques “feel” subjective, they can do more damage than good. This course presents a simple, effective framework for delivering actionable criticism to your team every day, in every environment.

- Evan Hirsch
Engine Co. 4

Applying Color Theory to Digital Media and Visualization
Tuesday, 7 August, 3:45-5:15 pm
Introductory

This course highlights the visual impact of specific color combinations, provides practical suggestions for color mixing, highlights how to produce color-blind safe displays, and includes a hands-on session that teaches how to build and evaluate color schemes for digital media visualization.

- Theresa-Marie Rhyne
Visualization Consultant

FEM Simulation of 3D Deformable Solids: A Practitioner’s Guide to Theory, Discretization, and Model Reduction
Wednesday, 8 August, 9 am-12:15 pm
Intermediate

A practical guide to finite-element method (FEM) simulation of 3D deformable solids. The course reviews offline FEM simulation techniques, how they are applied to complex nonlinear materials, invertible treatment of elasticity, and model-reduction techniques for real-time simulation.

- Eftychios Sifakis
University of Wisconsin-Madison
- Jernej Barbic
University of Southern California

Advances in Real-Time Rendering in Games: Part I
Wednesday, 8 August, 9 am-12:15 pm
Intermediate

This course covers the best innovations and practical techniques in state-of-the-art rendering and the results of forward-thinking rendering research that will be found in the games of tomorrow.

- Natalya Tatarchuk
Bungie, Inc.

Advances in Real-Time Rendering in Games: Part II
Wednesday, 8 August, 2-5:15 pm
Intermediate

The second part of Advances in Real-Time Rendering in Games.

- Natalya Tatarchuk
Bungie, Inc.

GPU Shaders for OpenGL 4.x
Wednesday, 8 August, 2-5:15 pm
Intermediate

Shader programming has become an indispensable part of graphics application development. This course reviews vertex, fragment, geometry, tessellation shaders, shader-specific theory, and the GLSL 4.x shader language.

- Mike Bailey
Oregon State University

Efficient Real-Time Shadows
Thursday, 9 August, 9 am-12:15 pm
Intermediate

This overview of several modern shadow-computation techniques provides practical advice, including AAA game showcases, for finding the best trade-off between computation budget and quality for your interactive applications.

- Elmar Eisemann
Télécom ParisTech
- Ulf Assarsson
Chalmers University
- Michael Schwarz
Cornell University
- Michal Valient
Guerrilla Games and Sony Computer Entertainment
- Michael Wimmer
Technische Universität Wien

Courses

■  #siggraph #courses

Advanced (Quasi) Monte Carlo Methods for Image Synthesis
Thursday, 9 August, 9 am-12:15 pm
Advanced

This course covers practical aspects of advanced (Quasi) Monte Carlo methods for photorealistic rendering.

Alexander Keller
 NVIDIA Research
 Simon Premoze
 Matthias Raab
 NVIDIA ARC GmbH

Graphics Programming for the Web
Thursday, 9 August, 9 am-12:15 pm
Introductory

This course introduces and demonstrates modern web technologies (HTML5 <canvas>, CSS3, WebGL, SVG, WebCL) that enable developers to produce complex, general-purpose graphics applications for the web.

Pushkar Joshi
 Mikaël Bourges-Sévenier
 Motorola Mobility
 Kenneth Russell
 Zhenyao Mo
 Google, Inc.

State of the Art in Photon-Density Estimation
Thursday, 9 August, 2-5:15 pm
Advanced

Recent developments in light-transport simulation algorithms using photon-density estimation.

Toshiya Hachisuka
 Aarhus Universitet
 Wojciech Jarosz
 Disney Research Zürich

Color Transfer
Thursday, 9 August, 3:45-5:15 pm
Introductory

This course discusses color transfer, an exciting and creative approach to adjusting color content in images and video, with applications in night-for-day imagery, correcting stereo pairs, color matching photographs for constructing panoramas, and example-based enhancement of photographs.

Tania Pouli
 Erik Reinhard
 University of Bristol

Emerging Technologies

- Full Conference Access

The Battle for Motion-Controlled Gaming and Beyond

Sunday, 5 August 3:45-5:15 pm

Although motion tracking has existed in research labs and some niche markets for decades, only recently has it gained mainstream acceptance in the living room in the form of the Nintendo Wii, the Playstation Move, Microsoft's Kinect, and the Sixense Razer Hydra. These devices and their corresponding software have pushed human-computer interaction to new levels in gaming. Is this just another passing fad that will move back to the laboratory or is it here to stay? Will motion control move beyond gaming to control a wide range of digital media? Or is it only appropriate for a small subset of technologies? This panel of motion-tracked game pioneers will debate the tradeoffs of different tracking technologies, discuss important aspects of the end-user experience, predict the future of motion-controlled gaming, and discuss how this technology will affect other industries.

Topics include:

- What technologies are the most appropriate for what types of games?
- How the specific technologies affect user experience
- The role, if any, for hardcore gaming
- Buttons versus no buttons
- How media and marketing have affected the perception of motion tracking
- The future of gaming
- The role of motion control in industries beyond gaming

Panelists

Virtual Production Branches Out

Monday, 6 August 9-10:30 am

Virtual production is changing how directors, actors, and stories interact. The ability to capture the subtleties of actors' performance digitally and move digital-environment data among pre-production, production, and post is opening up new worlds, new kinds of characters, and new ways of telling stories.

After gaining wide public visibility on "Avatar", virtual production is sweeping through the feature film world – and beyond. Because blending live and CGI elements is not only possible, but now practical, virtual production has been embraced to improve the standard of previsualization, to augment motion capture in games creation to enhance overall quality, and to enable film directors to see more of what their world will look like while they're in production. In short, virtual production has branched out.

A panel of leading virtual-production practitioners discusses and debates:

- Advances and considerations in motion capture
- Relative benefits of separate vs. in-scene facial capture
- SimulCam – its evolution and where it is heading
- The client/filmmaker experience

Moderator

Ray Feeney
 RFX Inc. and former Co-Chair, Academy of Motion Picture Arts & Sciences Science & Technology Council

Panelists

Matt Aitken

SIGGRAPH Mobile

■ Full Conference Access
 🐦 #siggraph #mobile

Inspired by SIGGRAPH Asia 2011's popular Symposium on Apps, this new program presents the latest advances in mobile technologies.

In just a few years, smartphones, tablets, and handheld game devices have evolved beyond text, voice, music, news, and simple contests. Now, they combine serious graphics hardware with very cool software, good cameras, full-color screens, and high-resolution sensors that deliver precision space-time data everywhere in the world. What's next? In talks, workshops, and demonstrations, SIGGRAPH Mobile explores what's possible, and when, for computers that can remain in their bags at security checkpoints.

 #siggraph #talks

SIGGRAPH 2012 Talks provide a broad spectrum of presentations on recent achievements in all areas of computer graphics and interactive techniques, including art, design, animation, visual effects, interactivity, research, and engineering.

Talks often highlight the latest developments before publication, present ideas that are still in progress, or showcase how computer graphics and interactive techniques are actually implemented and used, in graphics production or other fields. Talks take you behind the scenes and into the minds of SIGGRAPH 2012 creators.

Full Conference Access registration allows attendees access to all SIGGRAPH 2012 Talks. Seating is on a first-come, first-served basis. Please be sure to arrive early for the Talk you wish to attend.

Talks

Understanding Mobile Graphics – GPUs and Platforms [SIGGRAPH Mobile Talks]

Wednesday, 8 August 10:45 am-12:15 pm

Session Chair

Lars Erik Holmquist
Yahoo! Research

Saving the Planet, One Handset at a Time: Designing Low-Power, Low-Bandwidth Mobile GPUs

Thomas Olson
Edvard Sorgard
Dave Shreiner
ARM, Inc.

Unity: iOS and Android - Cross-Platform Challenges and Solutions

Renaldas Zioma
Aras Pranckevicius
Unity Technologies

Mobile Graphics – Hardware and Software Techniques [SIGGRAPH Mobile Talks]

Wednesday, 8 August 2-3:30 pm

Session Chair

Lars Erik Holmquist
Yahoo! Research

Advancing Dynamic Lighting on Mobile

Sam Martin
Geomerics Ltd.

Novel approaches to GPU performance analysis

Karthik Hariharakrishnan
ARM, Inc.

Space is the Place

Wednesday, 8 August 2-3:30 pm

Session Chair

Dan Collins
Arizona State University

Public Displays of Computing: Space, Place, and Computing

Eric Sauda
Christopher Beorkrem
Taylor Milner
Trevor Hess
University of North Carolina at Charlotte

Multi-Disciplinary Mashups – People, Technology, and Design

Shane Burger
Xavier DeKestler
Smartgeometry Ltd

Robert Woodbury
Simon Fraser University

Building Character

Wednesday, 8 August 2-3:30 pm

Session Chair

Juan Buhler
Pixar Animation Studios

Computer-Assisted Animation of Line and Paint in Disney’s “Paperman”

Brian Whited
Eric Daniels
Michael Kaschalk
Patrick Osborne
Kyle Odermatt
Walt Disney Animation Studios

Simulation Preview in “Brave”

Alexander Nehls
Paul Mendoza
Tom Sanocki
Pixar Animation Studios

Stable, Art-Directable Skin and Flesh Using Biphasic Materials

Ryan Kautzman
Jiayi Chong
Patrick Coleman
Pixar Animation Studios

Character Design: Visual Complexity in “Brave”

Jacob Speirs
Lou Hamou-Lhadj
Pixar Animation Studios

Effects Omelet

Wednesday, 8 August 2-3:30 pm

Session Chair

Eric Tabellion
PDI/DreamWorks

“Wrath of the Titans” - Complex Models With Voxel Greeble

Daniel Seddon
James Kirk
Tomas Zaveckas
Method Studios

“Wrath of the Titans” - Creating CG Lava With Advected Sculptps

Daniel Seddon
Daniel Letarte
James Kirk
Method Studios

Dark Fairy Creature Effects on “Snow White and the Huntsman”

Alexander Seaman
Pablo Gimenez
Peter Kyme
Double Negative Visual Effects

Multiresolution Radiosity Caching for Global Illumination in Movies

Per Christensen
George Harker
Jonathan Shade
Brenden Schubert
Dana Batali
Pixar Animation Studios

Talks

Play Time

Wednesday, 8 August 2-3:30 pm

Session Chair

Ken Museth
DreamWorks Animation

Making Tracks: Footprints in the “Ice Age” Movies

Hugo Ayala
Michael Reed
Ilan Gabai
Blue Sky Studios, Inc.

Building the Snow Footprint Pipeline on “Brave”

Keith Kohn
Michael O’Brien
Tim Speltz
Tom Wichitsripornkul
Pixar Animation Studios

A Guided Synthesizer for Blendshape Characters

Wan-Chun Ma
J.P. Lewis
Weta Digital

dRig: An Artist-Friendly, Object-Oriented Approach to Rig Building

Gregory Smith
Evan Goldberg
Mark McLaughlin
Chung-An Lin
Frank Hanner
Walt Disney Animation Studios

Mesh Mash [Studio Talks]

Wednesday, 8 August 3:45-5:15 pm

Session Chair

Dan Collins
Arizona State University

Interactive Modeling With Mesh Surfaces

Ryan Schmidt
Autodesk Research

A Guided Synthesizer for Blendshape Characters

Wan-Chun Ma
J.P. Lewis
Weta Digital

Mobile Applications – In Your Hand and On the Road [SIGGRAPH Mobile Talks]

Wednesday, 8 August 3:45-5:15 pm

Session Chair

Ronald van der Lingen
Layar

Auto(mobile)

Vidya Setlur
Nokia Research Center

Alark Joshi
Boise State University

Mobile Augmented Reality in Advertising: the TineMelk AR App - A Case Study

Kim Baumann Larsen
Placebo Effects

Tuck Siver
David Jones
Labrat

Magnus Wessel Bøe-Waal

Michael Birkeland
Placebo Effects

Sigbjørn Galåen
Christer Sveen
Eigil Jarl Halse
Blink Studios AS

Thursday, 9 August

Hackerspace Continuum

Thursday, 9 August 9-10:30 am

Session Chair

Byron Lahey
Arizona State University

The Signal Strength Project

Amelia Marzec

Ikimo: Open Entry-Level Robotics Platform

Charith Fernando
Jan Rod
David Eisner
Mauricio Cordero
InMojo Inc.

Gigapixel Science Lab

Gene Cooper
Four Chambers Studio

Silence! Eliminate the Noise

Thursday, 9 August 9-10:30 am

Session Chair

Pete Segal
Luxology, LLC

Importance Sampling for Hair Scattering

Jiawei Ou
Dartmouth College/
DreamWorks Animation

Feng Xie
DreamWorks Animation

Parashar Krishnamachari
DreamWorks Animation

Fabio Pellacini
Dartmouth College/
Sapienza University of Rome

Adaptive Noise Reduction for Progressive Photon Mapping

Zhe Fu
Henrik Jensen
University of California, San Diego

Progressive Volume Photon Tracing

Charly Collin
University of Central Florida

Mickaël Ribardière
Rémi Cozot
Kadi Bouatouch
IRISA Rennes

Volume-Aware Extinction Mapping

Pascal Gautron
Cyril Delalandre
Jean-Eudes Marvie
Pascal Lecocq
Technicolor Research & Innovation

Talks

John Carter Scales Up

Thursday, 9 August 10:45 am-12:15 pm

Session Chair

Nafees Bin Zafar
DreamWorks Animation

Stereoscopic Conversion of “John Carter”

Michele Sciolette
Scott Willman
Gregory Keec
John Grotelueschen
Cinesite

Zodanga, The Walking City of “John Carter”

Jon Neill
Artemis Oikonomopoulou
Axel Akesson
Dan Boogert
Cinesite

Thern: The Nano Technology of “John Carter”

Simon Stanley-Clamp
Richard Pickler
Artemis Oikonomopoulou
Cinesite

Facial Motion Capture for “John Carter”

Oliver James
Peter Kyme
Martin Parsons
Double Negative Visual Effects

Fast Realistic Lighting

Thursday, 9 August 2-3:30 pm

Session Chair

Chris Wyman
NVIDIA Research

Fast Generation of Directional Occlusion Volumes

Andrew Willmott
Electronic Arts Inc.

Local Image-Based Lighting With Parallax-Corrected Cubemaps

Sebastien Lagarde
Antoine Zanuttini
Dontnod Entertainment

Tiled and Clustered Forward Shading

Ola Olsson
Ulf Assarsson
Markus Billeter
Chalmers University of Technology

Art Pipeline: Transition From Offline to Real-Time CG

Renaldas Zioma
Paulius Liekis
Unity Technologies

Julian Hodgson
Passion Pictures

Hairy Scary

Thursday, 9 August 2-3:30 pm

Session Chair

Paul Strauss
Google, Inc.

Curls Gone Wild: Hair Simulation in “Brave”

Olivier Soares
Samantha Raja
Rich Hurrey
Hayley Iben
Pixar Animation Studios

High-Fidelity Facial Hair Capture

Graham Fyffe
USC Institute for Creative Technologies

Furry, Fuzzy, Lovable: Once Upon a Monster’s Fur Pipeline

Peter Demoreuille
Google Inc.

Oliver Franzke
Double Fine Productions, Inc.

Lydia Choy
Bloom Studio, Inc.

Image Playground

Thursday, 9 August 3:45-5:15 pm

Session Chair

Kurt Luther
Georgia Institute of Technology

Crowd Sourcing Memory Colors For Image Enhancement

Su Xue
Yale University

Ann McNamara
Texas A&M University

Holly Rushmeier
Julie Dorsey
Yale University

Calligraphic Cutting: Extreme Image Resizing With Cuts in Continuous Domain

Youyou Wang
Ergun Akleman
Texas A&M University

Intelligent Brush Strokes
Daniel Wexler
Gilles Dezeustre
The 11ers

Rich Intrinsic Image Decomposition of Outdoor Scenes From Multiple Views

Pierre-Yves Laffont
Adrien Bousseau
George Drettakis
INRIA Sophia-Antipolis

PANDA: Panoramas, Displays and Acquisition

Thursday, 9 August 3:45-5:15 pm

Session Chair

Robert Kooima
Louisiana State University

Building Interior Multi-Panorama Experiences at Scale

Mark Colbert
Google Inc.

Panorama Light-Field Imaging

Clemens Birklbauer
Oliver Bimber
Johannes Kepler Universität Linz

Colloidal Display: A Membrane Screen That Combines Transparency, BRDF, and 3D Volume

Yoichi Ochiai
The University of Tokyo

Alexis Oyama
Carnegie Mellon University

Keisuke Toyoshima
University of Tsukuba

CoDAC: Compressive Depth Acquisition Using a Single Time-Resolved Sensor

Andrea Colaco
Ahmed Kirmani
Franco Wong
Vivek Goyal
Massachusetts Institute of Technology

Technical Papers

■ Full Conference Access
 🐦 #siggraph #techpapers

SIGGRAPH Technical Papers is the premier international forum for disseminating new scholarly work in computer graphics and interactive techniques. At the conference, paper authors provide brief overviews of their work in the Technical Papers Fast Forward session.

Technical Papers are published as a special issue of ACM Transactions on Graphics. In addition to papers selected by the SIGGRAPH 2012 Technical Papers Jury, the conference presents papers that have been published in ACM Transactions on Graphics during the past year.

Full Conference Access registration allows attendees access to all SIGGRAPH 2012 Technical Papers. Seating is on a first-come, first-served basis. Please be sure to arrive early for the Technical Papers session you wish to attend.

Technical Papers Fast Forward

Sunday, 5 August, 6-8 pm

This exciting two-hour session is an entertaining, illuminating summary of all presented papers!

- Full Conference Access
- Basic Conference Pass

Character Locomotion

Monday, 6 August 9-10:30 am

Session Chair

Jehee Lee
 Seoul National University

Optimizing Locomotion Controllers Using Biologically Based Actuators and Objectives

Jack M. Wang
 Samuel R. Hamner
 Scott L. Delp
 Vladlen Koltun
 Stanford University

Soft Body Locomotion

Jie Tan
 Greg Turk
 C. Karen Liu
 Georgia Institute of Technology

Video-Based 3D Motion Capture Through Biped Control

Marek Vondrak
 Brown University

Leonid Sigal
 Disney Research Pittsburgh

Jessica Hodgins
 Disney Research Pittsburgh and Carnegie Mellon University

Odest Jenkins
 Brown University

Continuous Character Control With Low-Dimensional Embeddings

Sergey Levine
 Jack M. Wang
 Alexis Haraux
 Stanford University

Zoran Popović
 University of Washington

Vladlen Koltun
 Stanford University

Shape Analysis

Monday, 6 August 9-10:30 am

Session Chair

Richard Zhang
 Berlin Mathematical School (BMS) and MPI Informatik

Schelling Points on 3D Surface Meshes

Xiaobai Chen
 Abulhair Saparov
 Bill Pang
 Thomas Funkhouser
 Princeton University

Functional Maps: A Flexible Representation of Maps Between Shapes

Maks Ovsjanikov
 Mirela Ben-Chen
 Justin Solomon
 Adrian Butscher
 Leonidas Guibas
 Stanford University

Variational Mesh Decomposition

Juyong Zhang
 Jianmin Zheng
 Nanyang Technological University
 Chunlin Wu
 National University of Singapore
 Jianfei Cai
 Nanyang Technological University

Sketch-Based Shape Retrieval

Mathias Eitz
 Ronald Richter
 Technischen Universität Berlin
 Tamy Boubekeur
 Télécom ParisTech
 Kristian Hildebrand
 Marc Alexa
 Technischen Universität Berlin

Technical Papers

■ #siggraph #techpapers

Image Processing

Monday, 6 August 2- 3:30 pm

Session Chair

Peter-Pike Sloan
NVIDIA Research

Decoupling Algorithms From Schedules for Easy Optimization of Image-Processing Pipelines

Jonathan Ragan-Kelley
Andrew Adams
Massachusetts Institute of Technology

Sylvain Paris
Adobe Systems Incorporated

Marc Levoy
Stanford University

Saman Amarasinghe
Frédo Durand
Massachusetts Institute of Technology

Adaptive Manifolds for Real-Time High-Dimensional Filtering

Eduardo S. L. Gastal
Manuel M. Oliveira
Universidade Federal do Rio Grande do Sul

High-Quality Image Deblurring With Panchromatic Pixels

Sen Wang
Eastman Kodak Company

Tingbo Hou
Stony Brook University

John Border
Eastman Kodak Company

Hong Qin
Stony Brook University

Rodney Miller
Eastman Kodak Company

Practical Temporal Consistency for Image-Based Graphics Applications

Manuel Lang
Disney Research Zürich and ETH Zürich

Oliver Wang
Tunc Aydin
Aljoscha Smolic
Disney Research

Markus Gross
Disney Research Zürich and ETH Zürich

Cloth

Monday, 6 August 2-3:30 pm

Session Chair

Dinesh Pai
University of British Columbia

Specular Reflection From Woven Cloth

Piti Irawan
Steve Marschner
Cornell University

DRAPE : DRessing Any PErsOn

Peng Guan
Loretta Reiss
Brown University

David A. Hirshberg
Max Planck Institut für Intelligente Systeme

Alexander Weiss
Brown University

Michael J. Black
Max Planck Institut für Intelligente Systeme

Design-Preserving Garment Transfer

Rémi Brouet
Laboratoire Jean-Kuntzmann/INRIA

Alla Sheffer
The University of British Columbia

Laurence Boissieux
INRIA

Marie-Paule Cani
Laboratoire Jean-Kuntzmann/INRIA

Stitch Meshes for Modeling Knitted Clothing With Yarn-level Detail

Cem Yuksel
Jonathan M. Kaldor
Doug L. James
Steve Marschner
Cornell University

Appearance

Monday, 6 August 3:45-5:35 pm

Session Chair

Hendrik Lensch
Tübingen University

3D Imaging Spectroscopy for Measuring 3D Hyperspectral Patterns on Solid Objects

Min H. Kim
Todd Alan Harvey
Yale University

David S. Kittle
Duke University

Holly Rushmeier
Julie Dorsey
Richard O. Prum
Yale University

David J. Brady
Duke University

Primal-Dual Coding to Probe Light Transport

Matthew O'Toole
University of Toronto

Ramesh Raskar
Massachusetts Institute of Technology

Kiriakos Kutulakos
University of Toronto

Fast High-Resolution Appearance Editing Using Superimposed Projections

Daniel E. Aliaga
Yu Hong Yeung
Alvin Law
Purdue University

Behzad Sajadi
Aditi Majumder
University of California, Irvine

Printing Spatially Varying Reflectance for Reproducing HDR Images

Yue Dong
Xin Tong
Microsoft Research Asia

Fabio Pellacini
Dartmouth College and Sapienza –
Università di Roma

Baining Guo
Microsoft Research Asia

Technical Papers

Printing Reflectance Functions

Thomas Malzbender
Ramin Samadani
Hewlett-Packard Laboratories

Steven Scher
Adam Crume
University of California, Santa Cruz

Douglas Dunn
3M

James Davis
University of California, Santa Cruz

Hand, Eye, and Face

Monday, 6 August 3:45-5:35 pm

Session Chair

Vladlen Koltun
Stanford University

Synthesis of Detailed Hand Manipulations Using Contact Sampling

Yuting Ye
C. Karen Liu
Georgia Institute of Technology

Eyecatch: Simulating Visuomotor Coordination for Object Interception

Sang Hoon Yeo
Martin Lesmana
Debanga R. Neog
Dinesh K. Pai
The University of British Columbia

Discovery of Complex Behaviors through Contact-Invariant Optimization

Igor Mordatch
Emanuel Todorov
Zoran Popović
University of Washington

Spacetime Expression Cloning for Blendshapes

Yeongho Seol
Korea Advanced Institute of Science and Technology and Weta Digital

J.P. Lewis
Weta Digital

Jaewoo Seo
Byungkuk Choi
Korea Advanced Institute of Science and Technology

Ken Anjyo
OLM Digital, Inc. and JST CREST

Junyong Noh
Korea Advanced Institute of Science and Technology

Bilinear Spatiotemporal Basis Models

Ijaz Akhter
Lahore University of Management Sciences

Tomas Simon
Carnegie Mellon University

Sohaib Khan
Lahore University of Management Sciences

Iain Matthews
Disney Research Pittsburgh

Yaser Sheikh
Carnegie Mellon University

Sketching

Monday, 6 August 3:45-5:35 pm

Session Chair

Eitan Grinspun
Columbia University

Three-Dimensional Proxies for Hand-Drawn Characters

Eakta Jain
Yaser Sheikh
Carnegie Mellon University

Moshe Mahler
Jessica Hodgins
Carnegie Mellon University and Disney Research Pittsburgh

How Do Humans Sketch Objects?

Mathias Eitz
Technischen Universität Berlin

James Hays
Brown University

Marc Alexa
Technischen Universität Berlin

CrossShade: Shading Concept Sketches Using Cross-Section Curves

Cloud Shao
University of Toronto

Adrien Bousseau
REVES/INRIA Sophia Antipolis

Alla Sheffer
The University of British Columbia

Karan Singh
University of Toronto

Learning Hatching for Pen-and-Ink Illustration of Surfaces

Evangelos Kalogerakis
Stanford University

Derek Nowrouzezahrai
Université de Montréal

Simon Breslav
Autodesk Research

Aaron Hertzmann
University of Toronto

HelpingHand: Example-Based Stroke Stylization

Jingwan Lu
Fisher Yu
Adam Finkelstein

Princeton University

Stephen DiVerdi
Adobe Systems Incorporated

Fabrication

Tuesday, 7 August 9-10:30 am

Session Chair

Marc Alexa
Technischen Universität Berlin

Fabricating Articulated Characters From Skinned Meshes

Moritz Bächer
Harvard University

Bernd Bickel
Disney Research Zürich

Doug L. James
Cornell University

Hanspeter Pfister
Harvard University

Stress Relief: Improving Structural Strength of 3D Printable Objects

Ondrej Stava
Juraj Vanek
Bedrich Benes
Purdue University

Nathan Carr
Radomir Mech
Adobe Systems Incorporated

Beady: Interactive Beadwork Design and Construction

Sampling, Reconstructing, and Filtering Light

Tuesday, 7 August 10:45 am-12:15 pm

Session Chair

Kun Zhou
Zhejiang University

A Theory of Monte Carlo Visibility Sampling

Ravi Ramamoorthi
University of California, Berkeley

John Anderson
Mark Meyer
Pixar Animation Studios

Derek Nowrouzezahrai
Disney Research Zürich and Université de Montréal

Theory, Analysis, and Applications of 2D Global Illumination

Wojciech Jarosz
Disney Research Zürich and University of California, San Diego

Volker Schönfeld
Limbic Software, RWTH Aachen University, and University of California, San Diego

Leif Kobbelt
RWTH Aachen University

Henrik Wann Jensen
University of California, San Diego

On Filtering the Noise From the Random Parameters in Monte Carlo Rendering

Pradeep Sen
Soheil Darabi
University of New Mexico

Reconstructing the Indirect Light Field for Global Illumination

Jaakko Lehtinen
Timo Aila
Samuli Laine
NVIDIA Research

Frédo Durand
Massachusetts Institute of Technology

Geometry Reconstruction & Tracking

Tuesday, 7 August 10:45 am-12:15 pm

Session Chair

Chi-Keung Tang
The Hong Kong University of Science & Technology

Stochastic Tomography and Its Applications in 3D Imaging of Mixing Fluids

James Gregson
Michael Krimerman
Matthias Hullin
Wolfgang Heidrich
The University of British Columbia

Animation Cartography - Intrinsic Reconstruction of Shape and Motion

Art Tevs
Alexander Berner
Michael Wand
Max-Planck-Institut für Informatik

Ivo Ihrke
Universität des Saarlandes

Martin Bokeloh
Jens Kerber
Hans-Peter Seidel
Max-Planck-Institut für Informatik

Temporally Coherent Completion of Dynamic Shapes

Hao Li
ETH Zürich

Linjie Luo
Princeton University

Daniel Vlasic
Massachusetts Institute of Technology

Pieter Peers
The College of William & Mary and USC Institute for Creative Technologies

Jovan Popović
Adobe Systems Incorporated, University of Washington, and Massachusetts Institute of Technology

Mark Pauly
École Polytechnique Fédérale de Lausanne

Szymon Rusinkiewicz
Princeton University

Tracking Surfaces With Evolving Topology

Morten Bojsen-Hansen
Institute of Science and Technology Austria

Hao Li
Columbia University

Chris Wojtan
Institute of Science and Technology Austria

Sets of Shapes

Tuesday, 7 August 2-3:30 pm

Session Chair

Alla Sheffer
University of British Columbia

Exploring Collections of 3D Models Using Fuzzy Correspondence

Vladimir G. Kim
Princeton University

Wilmot Li
Adobe Systems Incorporated

Niloy J. Mitra
University College London

Stephen DiVerdi
Adobe Systems Incorporated

Thomas Funkhouser
Princeton University

Technical Papers

■  #siggraph #techpapers

A Probabilistic Model for Component-Based Shape Synthesis

Evangelos Kalogerakis
Siddhartha Chaudhuri
Daphne Koller
Vladlen Koltun
Stanford University

Synthesizing Open Worlds With Constraints Using Locally Annealed Reversible Jump MCMC

Yi-Ting Yeh
Lingfeng Yang
Matthew Watson
Noah D. Goodman
Pat Hanrahan
Stanford University

Fit and Diverse: Set Evolution for Inspiring 3D Shape Galleries

Kai Xu
Shenzhen VisuCA Key Lab/SIAT and National University of Defense Technology (NUDT)

Simon Fraser University

Daniel Cohen-Or
Tel Aviv University

Baoquan Chen
Shenzhen VisuCA Key Lab/SIAT

Light Rays

Tuesday, 7 August 2-3:30 pm

Session Chair

Jaakko Lehtinen
NVIDIA Research

Naïve Ray Tracing: A Divide-And-Conquer Approach

Benjamin Mora
Swansea University

Manifold Exploration: A Markov Chain Monte Carlo Technique for Rendering Scenes With Difficult Specular Transport

Wenzel Jakob
Steve Marschner
Cornell University

Bidirectional Lightcuts

Bruce Walter
Pramook Khungurn
Kavita Bala
Cornell University

Virtual Ray Lights for Rendering Scenes With Participating Media

Jan Novák
Karlsruher Institut für Technologie

Derek Nowrouzezahrai
Disney Research Zürich

Carsten Dachsbacher
Karlsruher Institut für Technologie

Wojciech Jarosz
Disney Research Zürich

Particle Fluids

Tuesday, 7 August 2-3:30 pm

Session Chair

Nils Thuerey
ScanlineVFX

Ghost SPH for Animating Water

Hagit Schechter
Robert Bridson
The University of British Columbia

Versatile Rigid-Fluid Coupling for Incompressible SPH

Nadir Akinci
Markus Ihmsen
Gizem Akinci
Universität Freiburg

Barbara Solenthaler
ETH Zürich

Matthias Teschner
Universität Freiburg

MultiFLIP for Energetic Two-Phase Fluid Simulation

Landon Boyd
Robert Bridson
The University of British Columbia

Animating Bubble Interactions in a Liquid Foam

Oleksiy Busaryev
Tamal K. Dey
Huamin Wang
The Ohio State University

Zhong Ren
Zhejiang University

Fun With Video

Tuesday, 7 August 3:45-5:35 pm

Session Chair

Noah Snively
Cornell University

Video Deblurring for Hand-Held Cameras Using Patch-Based Synthesis

Sunghyun Cho
Pohang University of Science and Technology

Jue Wang
Adobe Systems Incorporated

Seungyong Lee
Pohang University of Science and Technology

Eulerian Video Magnification for Revealing Subtle Changes in the World

Hao-Yu Wu
Michael Rubinstein
Massachusetts Institute of Technology

Eugene Shih
Quanta Research Cambridge, Inc.

John Guttag
Frédo Durand
Massachusetts Institute of Technology

William T. Freeman
Massachusetts Institute of Technology

Selectively De-Animating Video

Jiamin Bai
University of California, Berkeley

Aseem Agarwala
Adobe Systems Incorporated

Maneesh Agrawala
Ravi Ramamoorthi
University of California, Berkeley

Tools for Placing Cuts and Transitions in Interview Video

Floraine Berthouzot
University of California, Berkeley

Wilmot Li
Adobe Systems Incorporated

Maneesh Agrawala
University of California, Berkeley

Displays

Wednesday, 8 August 9-10:30 am

Session Chair

Diego Gutierrez
Universidad de Zaragoza

Resolution Enhancement by Vibrating Displays

Floraine Berthouzoz
University of California, Berkeley

Raanan Fattal
The Hebrew University of Jerusalem

Edge-Guided Resolution Enhancement in Projectors via Optical Pixel Sharing

Behzad Sajadi
Meenakshisundaram Gopi
Aditi Majumder
University of California, Irvine

Tensor Displays: Compressive Light-Field Synthesis Using Multilayer Displays With Directional Backlighting

Gordon Wetzstein
Douglas Lanman
Matthew Hirsch
Ramesh Raskar
MIT Media Lab

Tailored Displays to Compensate for Visual Aberrations

Vitor F. Pamplona
Manuel M. Oliveira
Universidade Federal do Rio Grande do Sul

Daniel G. Aliaga
Purdue University

Ramesh Raskar
MIT Media Lab

Stitching

Wednesday, 8 August 10:45 am-12:15 pm

Session Chair

Ping Tan
National University of Singapore

Image Merging: Combining Inconsistent Images Using Patch-Based Synthesis

Soheil Darabi
University of New Mexico

Eli Shechtman
Connelly Barnes
Dan B. Goldman
Adobe Systems Incorporated

Pradeep Sen
University of New Mexico

Panorama Weaving: Fast and Flexible Seam Processing

Brian Summa
University of Utah and ViSUS Inc.

Julien Tierny
Télécom ParisTech

Valerio Pascucci
University of Utah, Pacific Northwest
National Laboratory, and ViSUS Inc.

Understanding and Improving the Realism of Image Composites

Su Xue
Yale University

Aseem Agarwala
Adobe Systems Incorporated

Julie Dorsey
Holly Rushmeier
Yale University

Exposing Photo Manipulation With Inconsistent Reflections

James F. O'Brien
University of California, Berkeley

Hany Farid
Dartmouth College

Maps, Surfaces, and Shapes

Wednesday, 8 August 10:45 am-12:15 pm

Session Chair

Eugene Zhang
Oregon State University, Berlin Mathematical
School and MPI Informatik

Robust Modeling of Constant Mean Curvature Surfaces

Interactive Systems & Hardware

Wednesday, 8 August 2-3:30 pm

Session Chair

Patrick Baudisch
Hasso Plattner Institute

Position-Correcting Tools for 2D Digital Fabrication

Alec Rivers
Ilan E. Moyer
Frédo Durand
Massachusetts Institute of Technology

REVEL: Tactile Feedback Technology for Augmented Reality

Olivier Bau
Ivan Poupyrev
Disney Research Pittsburgh

Realistic Perspective Projections for Virtual Objects and Environments

Frank Steinicke
Gerd Bruder
Universität Würzburg

Scott Kuhl
Michigan Technological University

Micro Perceptual Human Computation for Visual Tasks

Yotam Gingold
Columbia University and Rutgers,
The State University of New Jersey

Ariel Shamir
Interdisciplinary Center, Herzliya

Daniel Cohen-Or
Tel Aviv University

Perception and Stereo

Wednesday, 8 August 3:45-5:35 pm

Session Chair

Holly Rushmeier
Yale University

Push it Real: Perceiving Causality in Virtual Interactions

Ludovic Hoyet
Rachel McDonnell
Carol O'Sullivan
Trinity College Dublin

Render Me Real? Investigating the Effect of Render Style on the Perception of Animated Virtual Humans

Rachel McDonnell
Trinity College Dublin

Martin Breidt
Max-Planck-Institut für biologische
Kybernetik

Heinrich Bühlhoff
Korea University

Highlight Microdisparity for Improved Gloss Depiction

- 🐦 #siggraph #techtalks

Comprehensive summaries of the latest technologies in computer graphics and interactive techniques. SIGGRAPH 2012 exhibitors demonstrate software, hardware, and systems; answer questions; and host one-on-one conversations about how their applications improve professional and technical performance.

Tuesday, 7 August

Unity Technologies

Tuesday, 7 August, 11:15 am-12:15 pm

Unity Art Pipeline, Butterfly Demo
Unity art pipeline, Butterfly Demo.

AMD

Tuesday, 7 August, 12:45-1:45 pm

AMD FirePro Advanced 3D Graphic and Compute Features & AMD FirePro 3D Graphics and Compute Combined on Latest GPU Architecture in Deep Dive

This talk reviews the features that the AMD FirePro solutions provide for 3D graphics and compute through OpenGL, DirectX, and OpenCL. It describes how they apply to specific workflows for digital content creation or video processing.

Demos combining 3D graphics and compute using the latest AMD GPU architecture. The demos provide deep-dive technical details on the best ways to combine rendering and compute tasks.

Next Limit Technologies

Tuesday, 7 August, 2:15-3:15 pm

RealFlow 2013 Technology Preview

Next Limit demos the exciting new developments coming up in RealFlow 2013, from the new Hybrido2 solver to the RealFlow Graphs implementation. Examples demonstrate the power and flexibility of the new nodal systems. The session also includes a preview of some of the other great new features coming up in this release: Alembic, Maxwell Render integration, and RealFlow Renderkit3.0

Speakers

Angel Tena
RealFlow Lead Developer

Gustavo Sanchez
Real Flow Product Manager

CentiLeo

Tuesday, 7 August, 3:45-4:40 pm

Huge-Scene Interactive Rendering on a Laptop

CentiLeo is a high-performance rendering engine that interactively renders huge scenes composed of hundreds of millions of polygons, on a laptop accelerated with a GPU. Using the fastest ray tracing and to render photorealistic images, the system supports arbitrarily dynamic 3D scenes (deformed or exploding) and a huge number of large textures. Scenes can contain dozens or hundreds of gigabytes, and still the frames are interactively updateable on a laptop with a GPU.

Imagination Technologies Limited

Tuesday, 7 August, 5:05-6 pm

Accelerating Look Development *With* Rhinoceros Interactive Ray-Traced Viewports

Interactive ray tracing plugins for popular 3D packages (including Autodesk 3ds Max, Autodesk Maya, and McNeel & Associates Rhinoceros) are now bringing final-frame photorealism to even the earliest stages of modeling and lighting, and in doing so creating exciting new creative opportunities for artists and designers. In this session, users of Rhinoceros learn how real-time ray-traced viewports help designers make better-informed creative choices, shorten review cycles, and save time by reducing unnecessary and time-consuming preview renders compared to working with traditional OpenGL or Direct3D viewports.

Wednesday, 8 August

Qt Commercial, Digia Oyj

Wednesday, 8 August, 9:45-10:45 am

Learn How to Develop Powerful Advanced Visualization Applications and UIs With Qt Commercial

This session shows how development frameworks can be used to create advanced visualization applications and UIs with fewer lines of code. It introduces the Qt Commercial cross-platform application and UI framework to create stunning graphics and an amazing UX. Qt Commercial is the strategic-development choice for leading production houses looking to shorten time to market, increase efficiency, drive creativity, and extend outreach. Demos show the development tool in action and explain how to quickly develop an easy-to-use UI. The session also covers how our Qt Commercial's cross-platform capabilities protect investments by enabling developers to write the same application once and deploy it on different OS targets.

Exhibitor Tech Talks

AMD

Wednesday, 8 August-11:15 am-12:15 pm

AMD FirePro Advanced 3D Graphic and Compute Features & AMD FirePro 3D Graphics and Compute Combined on Latest GPU Architecture in Deep Dive

This talk reviews the features that the AMD FirePro solutions provide for 3D graphics and compute through OpenGL, DirectX, and OpenCL. It describes how they apply to specific workflows for digital content creation or video processing. Demos combining 3D graphics and compute using the latest AMD GPU architecture. The demos provide deep-dive technical details on the best ways to combine rendering and compute tasks.

Web3D Consortium

Wednesday, 8 August, 12:45-1:45 pm

Delivering New Dimensions on the Web

X3D is the only open-standard (ISO), royalty-free file format and run-time player specification for 4D virtual environments. It remains the most robust and versatile open standard for implementation of high-integrity, high-capability 4D multimedia information spaces. With multiple encodings and API bindings, it is compatible with many web and industry technologies. The data-integration capacities and the rich set of componentized features are rapidly expanding X3D's value across markets from mobile to AR, CAD, and medical.

Meet our innovative community of content and application developers, who ensure interoperability, longevity, and ownership of your content. See the latest real-world interactive 3D applications and find out how you can build and protect your content investment in this ever-changing competitive market.

Presenters from: Virginia Polytechnic Institute and State University, Bitmanagement Software GmbH, Fraunhofer-Gesellschaft, Naval Postgraduate School, and others

Imagination Technologies Limited

Wednesday, 8 August, 2:15-3:15 pm

Accelerating Look Development *With* Autodesk 3ds Max and Autodesk Maya Interactive Ray Traced Viewports

Interactive ray tracing plugins for popular 3D packages (including Autodesk 3ds Max, Autodesk Maya, and McNeel & Associates Rhinoceros) are now bringing final-frame photorealism to even the earliest stages of modeling and lighting, and in doing so creating exciting new creative opportunities for artists and designers. In this session, users of 3ds Max and Maya learn how real-time ray-traced viewports help designers make better-informed creative choices, shorten review cycles, and save time by reducing unnecessary and time-consuming preview renders compared to working with traditional OpenGL or Direct3D viewports.

Isotropix SAS

Wednesday, 8 August, 3:45-4:40 pm

Introducing Artistically Correct Rendering

Clarisse is a new breed of high-end 2D/3D animation software derived from years of teamwork between Isotropix R&D engineers and high-end CG artists. Designed as the fusion of a compositing software, a 3D rendering engine, and animation software, Clarisse delivers a fully revised workflow powered by a unified 2D/3D graphics rendering pipeline. It is the world's first animation software that lets artists work interactively on their final images, with full effects on. This session demonstrates creating and working on feature-film-like visual effects, interactively.

Imagination Technologies Limited

Wednesday, 8 August, 5:05-6 pm

PowerVR: Getting Great Graphics Performance With the PowerVR Insider SDK

Experts from the PowerVR Developer Technology team deliver the low-down on the great new features that have been added to the PowerVR Insider SDK and utilities. Learn how to tame textures, models, and shaders, and incorporate these leading development tools into your workflow to produce smarter, more portable game code. Then take a deep-dive into the SDK's performance tools, PVRTune and PVRTrace, and how they are used, and the PVRScope API for extracting maximum performance from today's leading mobile and hand-held gaming platforms.

Exhibitor Sessions

Exhibitor Sessions

Wednesday, 8 August 9 am-5:30 pm

Intel Corporation, Room 402B

Join Intel experts for a full day of cutting-edge graphics research deep-dives, technical discussions, and exciting demos. From open-source ray tracing kernels and next-gen graphics technologies to OpenCL programming on Intel CPUs and GPUs, learn how to take advantage of latest-generation hardware to identify, optimize and unleash stellar performance for your next graphics and media workloads.

9-10 am

Embree: Photo-Realistic Ray Tracing Kernels

10:45-11:45 am

The Future of OpenCL for Graphics and Film Applications on Intel Platforms

2-3 pm

Optimizing Film and Media with OpenCL and Intel Quick Sync Video

3:15-4:15 pm

Efficient Anti-Aliasing on Intel HD graphics

4:30-5:30 pm

The Future of Visual Computing as Viewed by Intel Visual Computing Research Centers

Exhibitor Sessions

Wednesday, 8 August 9 am-5:30 pm

NVIDIA Corporation, Room 503

Explore the impact of GPUs on state-of-the-art CG and interactive design. Join NVIDIA for seven engaging talks and technical deep dives covering everything from advanced ray tracing and rendering to tessellation. Get insight into today's most exciting applications-and a glimpse into the next generation of groundbreaking advancements. Don't miss the unveiling of NVIDIA's latest groundbreaking developer tools.

Airport Shuttle Bus Discounts

SIGGRAPH 2012 has partnered with Super Shuttle to offer transportation to and from Los Angeles International Airport (LAX).

Shared Ride Van: \$13 per passenger (up to 9 passengers)

Town Car Service: \$63 per sedan (up to 4 passengers)

These discounted rates are valid from five days before the conference to five days after it concludes.

If you book your shuttle reservation through the SIGGRAPH 2012 website, you earn miles on American Airlines, United Airlines, Delta, and Frontier Airlines.

Book by phone at 800.258.3826 (toll free) or +1.310.222.5500, extension 4. To receive the discount, you must mention the SIGGRAPH 2012 discount code: **PK7AU**.

Bookstore

BreakPoint Books offers the latest and greatest books, CDs, and DVDs on computer animation, graphic design, gaming, 3D graphics, modeling, and digital artistry. The bookstore features recent books by SIGGRAPH 2012 speakers and award winners. To suggest books, CDs, or DVDs that should be available in the bookstore, contact:

Breakpoint Books
dave@breakpointbooks.com

Camera and Recording Policies

No cameras or recording devices are permitted at SIGGRAPH 2012. Abuse of this policy will result in the loss of the individual's registration credentials.

SIGGRAPH 2012 employs a professional photographer and reserves the right to use all images that this photographer takes during the conference for publication and promotion of future ACM SIGGRAPH events.

Hotel-Convention Center Shuttle Bus Service

SIGGRAPH 2012 provides complimentary shuttle service between many conference hotels and the Los Angeles Convention Center.

IMPORTANT NOTICE

Attendees who use the SIGGRAPH 2012 hotel reservation system to make reservations at hotels served by the SIGGRAPH 2012 shuttle buses will receive a shuttle wristband when they check in. Attendees who do not book through the SIGGRAPH 2012 reservation system and wish to use the shuttle service can purchase wristbands at the SIGGRAPH Store.

Hotel Reservations

Visit the SIGGRAPH 2012 web site to access the easy-to-use online hotel reservation system, which includes complete information on housing policies, procedures, and rates: www.siggraph.org/s2012

Or contact:
onPeak
SIGGRAPH 2012 Travel Partner
siggraph@onpeakevents.com

SIGGRAPH 2012 has negotiated discount rates for hotels in Los Angeles. These discounts are available to SIGGRAPH 2012 attendees only. Please make your hotel reservation by 9 July 2012. Reservations made after 9 July will be based on availability only, and rates may increase.

Los Angeles Convention Center

1201 South Figueroa Street
Los Angeles, CA 90015

Accessibility

The convention center is handicap accessible. If you have special needs or requirements, please call Conference Management at: +1.312.673.4785.

Food Services

Several restaurants, concessions, and food carts are available throughout the convention center for the convenience of SIGGRAPH 2012 attendees.

Internet Access

Free wireless access is available for SIGGRAPH 2012 in limited areas in the Los Angeles Convention Center.

Parking

SIGGRAPH 2012 attendees can park at the Los Angeles Convention Center or L.A. LIVE Parking Lots:

Los Angeles Convention Center Parking
+1.213.741.1151, ext 5850

L.A. LIVE Parking Lots
+1.213.463.5483

Additional parking information, call:
District Parking Office
+1.213.742.PARK (7275)

Luggage and Coat Check

Luggage and coat-check services (\$2 for coat or small handbag and \$3 for luggage or large items) are available at the Los Angeles Convention Center from Sunday, 5 August through Thursday, 9 August.

Special Policies

Lost badges cannot be replaced. If you lose your badge, you must purchase a new registration. Technical materials included with your registration must be picked up at the SIGGRAPH 2012 Merchandise Pickup Center. Lost merchandise vouchers will not be replaced.

Access: To be admitted to the Reception, you must have a ticket (your badge does not provide access). Computer Animation Festival access comes with a Full Conference

Technical Materials

■ Full Conference DVD-ROM

This digital publication contains the electronic version of the Technical Papers, including images and supplemental material; all of the course and tutorial notes, including auxiliary material (movies, source code, HTML presentations); and the permanent record of the Courses, Emerging Technologies, Panels, Posters, Real-Time Live!, SIGGRAPH Dailies!, SIGGRAPH Mobile, Studio Talks, Talks, and the permanent record of the Art Gallery and the Computer Animation Festival.

The DVD is included with all Full Conference registrations, and it is available for purchase at SIGGRAPH 2012. The content of the printed version of the ACM Transactions on Graphics (Conference Proceedings Special Issue) is included on the Full Conference DVD-ROM.

NOTE:

Full Conference registrants must pick up the Full Conference DVD-ROM included with registration at SIGGRAPH 2012 at the Merchandise Pickup Center located in Petree Hall, West Lobby.

The printed *ACM Transactions on Graphics* (Conference Proceedings Special Issue), which contains the Technical Papers and the ACM SIGGRAPH awards is NOT included with any registration category. The Proceedings is available for purchase at SIGGRAPH 2012.

Technical Materials are also available after the conference, contact:

ACM, Member Services
 800.342.6626 (Continental US and Canada)
 +1.212.626.0500 (International and New York Metro area)
 +1.212.944.1318 fax
 orders@acm.org

Basic Conference registration does not include any technical materials.

SIGGRAPH Business Symposium is NOT included with SIGGRAPH conference registration packages. This is an additional cost.

See page 55 for pricing information.

Registration Fees & Information

The printed *ACM Transactions on Graphics* (Conference Proceedings Special Issue) is not included in your registration and may be purchased separately.

Member rates refer to ACM SIGGRAPH membership.

SIGGRAPH Business Symposium	PURCHASE BEFORE OR AT SIGGRAPH 2012
	\$500 or \$175 with the purchase of a Full Conference Week Pass

A full day of frank discussions, networking opportunities, talks, and panels that investigate critical international issues related to intellectual property, venture capital, complex legal systems, and other topics vital to the health and welfare of a global creative community. **The SIGGRAPH Business Symposium is NOT included with SIGGRAPH conference registration packages. This is an additional cost.**

SIGGRAPH 2012 Conference Committee

ACM SIGGRAPH is a diverse group of researchers, artists, developers, filmmakers, scientists, and other professionals, who share an interest in computer graphics and interactive techniques. The community values excellence, passion, integrity, volunteerism, and cross-disciplinary interaction.
